This proposed rule incorporates elements that conform to the STCW requirements for a QSS for training and assessment activities, but that would at the same time take into consideration the impact on Coast Guard resources that may be needed for effective supervision. The proposed rule is intentionally drafted to allow for a variety of QSSs that may be tailored to suit particular programs of training and assessment. They are also designed to ensure that no QSS imposes unreasonable costs on small enterprises or entities that offer training programs whether limited in scope or offered only to a restricted pool of seafarers and programs that, regardless, may be conducted either on board ship or at shoreside.

The Coast Guard invites comments on the extent to which the following systems or processes, or a combination of such systems or processes, should be accepted as meeting the QSS requirements of the 1995 Amendments to STCW:

(a) Periodic accreditation under a recognized process like the regional accreditation used by high-level academic institutions in the United States, such as the Middle States Association of Colleges and Schools, provided that the process can be appropriately modified to explicitly cover maritime training and take into account guidance regarding quality-standards provided in part B–I/8 of the STCW Code.

(b) Periodic Accreditation by an independent professional agency, or a voluntary association of trade and technical schools, that has membership standards and a procedure for accreditation that takes into account guidance regarding quality-standards provided in part B–I/8 of the STCW Code.

(c) Periodic certification, by a State board of education, or other suitable regulatory body at the State level, establishing that a particular training program or institution is authorized to issue certificates of completion of training requirements in a relevant maritime field, if the supervising process takes into account guidance regarding quality-standards provided in part B–I/8 of the STCW Code.

(d) Periodic certification by an organization accepted or authorized by the Coast Guard, such as a ship-classification society, that has developed a certification process for maritime-training programs based on guidance regarding quality-standards provided in part B–I/8 of the STCW Code, or has suitably adapted such a process from the standards, guidelines, and principles contained in the ISO 9000 series, or from the equivalent Quality management and Quality Assurance Standards developed by the American National Standards Institute (ANSI).

(e) Periodic evaluation by a panel or team of maritime-education specialists, made up of professional staff from the State or Federal maritime academies, or from other recognized maritime-training institutions. The evaluation would be based on an industry standard to be developed, and guidance regarding quality-standards provided in part B–I/8 of the STCW Code.

The Coast Guard is continuing to work with MERPAC to identify how best to introduce an effective QSS. It will consider the recommendations of MERPAC that came from its first meeting in 1996 in drafting the final rule.

For further discussion on qualifications of instructors and assessors, see the section on *Approved training other than approved courses.*

9. *Simulators.* The 1995 Amendments to STCW promote the use of simulators for training and assessment by (a) requiring the proper use of radar and ARPA simulators in training, and (b) allowing the use of simulation as a tool for assessing the competence of candidates for certification. The amendments also set out performance standards for simulators used for conducting required training or assessment. An opportunity for grandfathering simulators installed or brought into use before February 1, 2002, is provided under STCW Regulation I/12.

Current domestic rules require the use of simulators for those training to qualify as radar observers (46 CFR 10.305 and 10.480) and promote the use of simulator training promoted by allowing it to count, in conjunction with approved training, as an equivalency for up to 25 percent of required sea service (46 CFR 10.304(d)).

A new study by the Marine Board of the National Research Council (NRC) examines the role of ship-bridge simulation in the professional development and licensing of mariners responsible for vessels' navigation and piloting. The study, entitled "Simulated Voyages" recommends steps to increase the use of simulators in maritime training and assessment. The Coast Guard considers this proposed rule for implementing STCW to be consistent with the study and its conclusions. This rule is intended to allow introduction of the most effective use of simulators into maritime training and assessment taking place in the United States.

In this regard, the Coast Guard has also been working with the maritime academies in developing guidelines on the use of simulators there. The Maritime Academies Simulator Committee (MASC) includes representatives from the six State maritime academies, the Maritime Administration (MARAD), and the Coast Guard. The outcome of the efforts of this committee will figure in drafting the final rule.

Because of the wide variety of interpretations given to the term "simulation," the Coast Guard invites comments on the need for introducing definitions, or technical performance standards, into the rules, and on the extent to which, or the conditions under which, personal computer-based training should be classified as falling within the scope of simulator training.

10. *Effective dates.* As noted earlier, the 1995 Amendments to STCW come into force on February 1, 1997. However, STCW Regulation I/15, on transitional provisions, allows some requirements to come into force more gradually. The Coast Guard will be working at IMO to establish an international agreement on precisely which requirements must come into force as of February 1, 1997. Any agreement reached at IMO will be taken into figure in drafting the final rule.

STCW Regulation I/15 provides that a Party may continue, until February 1, 2002, to issue certificates (licenses) in accordance with the domestic rules it has in place before the 1995 Amendments come into force (February 1, 1997) only in respect to seafarers who begin their sea service or their approved maritime training before August 1, 1998. Candidates who begin their service or their training after then will be subject to the full application of the revised STCW requirements.

Where options presented by this proposed rule would be to the advantage of the maritime industry in the United States, there may be no need to defer or delay implementation. Comments on the most suitable effective dates for new requirements associated with such matters as the QSS and the process for identifying qualified instructors and assessors should be submitted to the docket.

46 CFR Part 10—Licensing of Maritime Personnel

1. Purpose of Regulations

The Coast Guard would revise § 10.101(a) to reflect that the purpose of part 10 is twofold. This proposed rule is intended to provide, first, a means of determining that an applicant is qualified to hold a U.S. license and, second, a means of determining that an applicant is competent to hold an STCW certificate or endorsement to serve in a particular shipboard position. The use of the term "STCW certificate or endorsement" would allow the Coast Guard to combine the U.S. license and the STCW endorsement into a single document at some time in the future, for administrative convenience.

2. Approved Training

The Coast Guard would revise § 10.101(c) to indicate that Subpart C of Part 10 would apply not only to approved training used for remission of seagoing service but also to all training and assessment that must be approved as meeting the requirements of STCW. For additional discussion of approved training see the discussion of § 10.309 under *Approved training other than approved courses.*

3. Incorporation by Reference

The Coast Guard would introduce the necessary language in § 10.102 to allow technical requirements of the 1995 Amendments to STCW and to the STCW Code to be incorporated by reference into specific rules in part 10.

4. Definitions

The Coast Guard would add a number of new definitions in § 10.103. These include *approved training* because virtually all training required under STCW is subject to approval to ensure that it meets the relevant provisions of STCW. However, such training is distinct from training provided in the context of a course approved by the Coast Guard for use as a substitute for sea service. Under this proposed rule, training could be "approved" for the purposes of STCW if it met certain minimal conditions, as set out in § 10.309. Refer to the discussion of that section (paragraph 12) for more details.

The proposal also includes a definition for *Coast-Guard-accepted.* This term is used in a number of regulations to indicate that, although the Coast Guard would not in some cases engage in a formal approval process, it would maintain certain standards of practice by accepting materials or processes as meeting the applicable requirements, or by authorizing a third party to do so on its behalf under a Memorandum of Agreement.

This proposed rule also defines *approved instructor* as a person trained or instructed in instructional techniques and qualified to provide required training to candidates for licenses, documents, and endorsements.

A definition of *STCW endorsement* also appears in § 10.103 because that term occurs with some frequency in the proposed rule, and the definition would give this endorsement a special legal significance as a document issued under Part 10 to those found in compliance with STCW Standards of Competence.

For the purposes of this proposed rule, the Coast Guard assumes that Part 10 will also include a number of new definitions along the lines of those being developed for docket number CGD 94–055, the project on licensing requirements for officers of towing vessels, including the following:

(a) *Designated examiner* means an individual trained or instructed in assessment techniques and otherwise qualified to evaluate whether a candidate for a license, document, or endorsement has achieved the level of competence necessary to hold the license, document, or endorsement. This individual may be personally designated by the Coast Guard, or be designated within the context of a Coast-Guard-approved program of training or assessment.

(b) *Standard of competence* means the level of proficiency necessary for the proper performance of duties on board vessels in accordance with national and international criteria.

(c) *Practical demonstration* means the performance of an activity under the direct observation of a designated examiner for the purpose of establishing that the performer is sufficiently proficient in a practical skill to meet a specified standard of competence or other objective criterion.

These are not final definitions, and comments made on their applicability to STCW requirements will be taken into account in the rule on towing vessels to ensure that that final rule winds up consistent with all the changes being made to Part 10 by this. Both rules will also maintain uniformity with the definitions of identical terms used in

part 12. This will be discussed further under § 12.01–6.

5. Paperwork Approval

If this proposed rule finally results in new reporting and recordkeeping requirements, § 10.107 will refer to the appropriate OMB control numbers.

6. Eligibility for Licenses

The Coast Guard would revise paragraph (a) of § 10.207 to reflect that, in some cases, candidates must provide proof of having successfully completed practical demonstrations of certain skills. Demonstration requirements are further specified in proposals relating to §§ 10.205, 10.910, and 10.950.

7. Issuance of Licenses

The Coast Guard would revise § 10.202 to ensure that anyone qualified for an STCW certificate or endorsement is issued the appropriate documents at the same time as a license.

8. Requirements for Original Licenses

Under § 10.205, the Coast Guard would incorporate a number of new requirements from the 1995 Amendments to STCW, as follows:

(a) *Firefighting.* Under paragraph (g) of § 10.205, every candidate for a license—as master or mate of a vessel on near-coastal or ocean service, as an operator of an uninspected passenger vessel operating beyond the boundary line, for service on a MODU, and as an engineer—will have to meet the standard of competence in basic and advanced firefighting set out in STCW Regulations VI/1 and VI/3 and in Part A of the associated sections of the STCW Code. This proposed rule assumes that operators of seagoing towing vessels will be classified as masters or mates under a separate rulemaking [CGD 94–055]. If they are not, then the final rule in this will restore the reference to operators of such vessels.

A second provision would allow the Coast Guard to approve a firefighting course or training program specially designed for a particular ship or type of service. This is consistent with the exemption in STCW Regulation II/3 of the 1995 Amendments, which concerns certification of masters and mates on ships of less than 500 GT and states that

> [t]he Administration, if it considers that a ship's size and the conditions of its voyage are such as to render the application of the full requirements of this regulation and section A–II/3 of the STCW Code unreasonable or impracticable, may to that extent exempt the master and the officer in charge of a navigational watch on such a ship or class of ships from some of the requirements, bearing in mind the safety of all ships that may be operating in the same waters.

The Coast Guard expects to apply this flexibility, for instance, in approval of a firefighting course or training program for licensed personnel serving on small passenger vessels engaged in near-coastal voyages. In these cases, the Coast Guard would take into consideration the firefighting equipment whose fitting is actually required on such vessels, as well as the complexity of firefighting that may take place on such vessels. The Coast Guard invites comments on the scope, content, and skills-assessment techniques that it should include in these limited or modified courses or training programs.

(b) *Automatic Radar-Plotting Aids (ARPA).* The Coast Guard would revise § 10.205 by adding a new STCW requirement for every candidate for a license—as master or mate of vessels on near-coastal or ocean service, or as operator of uninspected passenger vessels operating beyond the boundary line—to establish competence in the use of ARPA. Candidates would have to have ARPA-simulator training. However, this requirement would not apply to those who will be serving on vessels not fitted with ARPA; in such cases, the license and STCW endorsement would state the lack of the training. (For further discussion of radar-training requirements, see the discussion of § 10.480 at page 46.)

(c) *Certificate for Operator of Radio in Global Maritime Distress and Safety System (GMDSS).* The Coast Guard would revise § 10.205 by adding a new STCW requirement that every candidate for a license—as master or mate of a vessel on near-coastal or ocean service—hold a Certificate for Operator of Radio in Global Maritime Distress and Safety System issued by the Federal Communications Commission (FCC) under its regulations (47 CFR Part 13), or a certificate of completion of an FCC-approved or Coast Guard-approved Certificate for Operator of Radio in Global Maritime Distress and Safety System. However, this requirement would not apply to those who will be serving on vessels not required to participate in the GMDSS system under FCC regulations (47 CFR Part 80) and Chapter IV of the International Convention on Safety of Life At Sea (SOLAS). Seagoing cargo ships of 300 GTs and seagoing passenger ships must meet GMDSS requirements. On the other hand, some mates or masters may have to hold GMDSS certificates before this proposed rule would become final in any form, if they are designated to serve as primary or secondary GMDSS operators under FCC regulations.

One comment submitted in response to the request for comments published in the **Federal Register** on August 2, 1995 [60 FR 39306], urged the Coast Guard to provide for "maintenance of GMDSS and radio equipment in the revisions of the licensing and documentation regulations to reflect the STCW Amendments." The comment also said "a communications and electronics position should be established incorporating the skills of the traditional Radio Officer and those of an electronics specialist." The comment also asserted that the Coast Guard, rather than the FCC, should certify training facilities and testing facilities for the GMDSS. Lastly, the comment said the Coast Guard should consider establishing standards of competence for shipboard radio-electronics personnel responsible for distress and emergency communications.

For regulatory purposes, the Coast Guard considers this comment to raise four distinct issues. Only two of these fall directly in the scope of the present rulemaking, to implement the 1995 Amendments to STCW. Qualifications of those who will be maintaining GMDSS and radio equipment, and their training and testing, are subjects within the scope of this project. A proposal for establishing an electronics-technician endorsement appears under part 12 (in new § 12.25–45).

Proposals for the establishment of a new crew position on U.S. ships, to be dedicated to communications and electronics, or modification of radio officers' role to encompass all GMDSS-related responsibilities, lie outside the scope of this rulemaking. STCW does not impose manning requirements on seagoing ships. On the other hand, the new certification standards may have implications for crew complements; therefore, the Coast Guard has included a proposal for revising part 15 concerning the ability of the electronics technician to perform at-sea maintenance of GMDSS installations when the ship is required to have that onboard-maintenance capability as one of the options under the GMDSS provisions of SOLAS. That proposal pertains to § 15.401.

With respect to the role of the Coast Guard and the FCC in regulating maritime communications, the Coast Guard currently recognizes the FCC as the agency with primary responsibility for establishing U.S. requirements for holding radiocommunications licenses or radio operators' certificates. This responsibility is complemented by the Coast Guard's authority for issuing radio officers' licenses. This proposed rule honors the complementary roles of both agencies, while taking into account the fact that adjustments may be made in the future on how these roles are allocated and carried out. Comment to the docket is welcome on whether the Coast Guard should be involved in approving the GMDSS training program, as it is proposing to be. The Coast Guard will also be looking at this issue in light of section 365 of the Telecommunications Act of 1996 (Public Law 104–104) which will allow a vessel to operate without a radio officer if it is determined that the vessel is properly fitted with equipment to implement GMDSS, and the equipment is in good working condition.

(d) *Personal survival techniques.* The Coast Guard is proposing to revise § 10.205 by adding a new STCW requirement—for every candidate for a license as master, mate, or engineer on a vessel on near-coastal or ocean service, or for a license as operator of uninspected passenger vessels operating beyond the boundary line, or for a license for service on a MODU—to present proof of having received approval training or instruction in personal survival techniques (i.e., survival at sea in the event of abandoning ship). The object of the training is to ensure that the candidate meets the standard of competence in personal survival techniques set out in STCW Regulation VI/1 and in table VI/1–1 in section A/VI/1 of the STCW Code. The Coast Guard intends to accept training and assessment which is based on documented practical experience.

The Coast Guard is also proposing to approving a personal survival course of training especially designed for a particular ship or type of service. This is consistent with the flexibility conferred by section A–VI/1, paragraph 3, of the STCW Code that concerns familiarization and basic safety-training and states that

> [t]he Administration may, in respect of ships other than passenger ships of more than 500 gross tonnage engaged on international voyages and tankers, if it considers that a ship's size and the conditions of its voyage are such as to render the application of the full requirements of this section of the STCW Code unreasonable or impracticable, exempt to that extent the seafarers on such a ship or class of ships from some of the requirements, bearing in mind the safety of people on board, the ship and property and the protection of the environment.

The Coast Guard expects to apply this flexibility, for instance, in approval of personal survival training for licensed personnel serving on small vessels engaged in near-coastal voyages. The Coast Guard invites comment on the scope, content, and skills-assessment techniques that should be included in this limited or modified training.

(e) *Personal safety and social responsibilities.* The Coast Guard is proposing to revise § 10.205 by adding a new STCW requirement—for every candidate for a license as master, mate, or engineer on a vessel in near-coastal or ocean service, or for a license as an operator of uninspected passenger vessels operating beyond the boundary line, or for a license for service on a MODU—to present a certificate of completion of approved training in personal safety and social responsibilities (e.g., taking proper actions in emergencies, taking precautions to prevent pollution, observing safe working practices, understanding and communicating orders, and contributing to effective human relationships on board ship by being aware of employment conditions, individual rights and obligations, dangers of alcohol abuse, etc.). The object is to ensure that the candidate meets the standard of competence in personal safety and social responsibility set out in STCW Regulation VI/1 and in table A–VI/1–4 in section A/VI/1 of the STCW Code.

The Coast Guard is also proposing to let itself approve a course in personal safety and social responsibilities especially designed for a particular ship or type of service. This is consistent with the exemption in section A–VI/1, paragraph 3, of the STCW Code quoted under paragraph (d) *Personal survival techniques.*

The Coast Guard invites comments on the scope, content, and skill-assessment techniques that belong in this limited or modified training.

The Coast Guard anticipates that the requirements for firefighting, personal survival, and personal safety and social responsibility including pollution prevention can be combined into a single course of training or instruction, which also includes elementary first aid, to meet the basic safety-training requirements of section A–VI/1, paragraph 2, of the STCW Code. This will be particularly true with respect to operators of uninspected passengers vessels (OUPVs) operating seaward of the boundary line. The Coast Guard intends to develop a checklist of elementary basic safety-instruction that candidates for OUPV licenses could have confirmed by boating-safety instructor from the Coast Guard Auxiliary or the Red Cross, or by a suitable official from the local firefighting department. The Coast Guard invites comments on what belongs in this elementary basic safety checklist.

After receiving the basic safety-training or instruction, the license-holder must every 5 years provide evidence of having maintained the required standard of competence, by providing evidence at the time of renewal that he or she has demonstrated competence and has been examined or continuously assessed as part of an approved training program, in accordance with the tables in section A–VI/1, paragraph 2, of the STCW Code. This matter gets closer scrutiny in the discussion under paragraph 9, *Requirements for renewal of licenses.*

(f) *Procedures for bridge team-work.* The Coast Guard would revise § 10.205 by adding a new STCW requirement for every candidate for a license as master, or mate, on a vessel on near-coastal or ocean service to know effective bridge-team-work procedures as an essential element of the competence to maintain a safe navigational watch. The Coast Guard understands bridge-team-work procedures to encompass the processes by which the watchkeeping personnel work together efficiently and effectively to maintain a continuously safe watch. The concepts applied in training and assessment to that end should reflect the principles of bridge-resource management that contribute to the most effective performance of watchkeeping duties. In this regard, refer to the principles of bridge-resource management outlined in section B–VIII of the STCW Code.

(g) *Practical demonstration.* The Coast Guard would add a new subsection to § 10.205 to require that, when a practical demonstration of a skill is called for under this section or under a provision of STCW referred to in this section the candidate must provide sufficient evidence that the skill has been demonstrated properly in the presence of a designated examiner. A written record, including skills demonstrated, identity of the designated examiner, and the results of the demonstration, must be maintained in the applicant's license file. The Coast Guard invites comments on the best format for maintaining this record. For related proposals, refer to the discussion on tables 10.910 and 10.950.

9. Requirements for Raise in Grade of License

The Coast Guard would revise § 10.207 to require proof that candidates for a raise in grade of license have been examined and otherwise assessed, to establish that they meet standards of competence. In many cases, STCW will

require assessment by examination and by demonstration of practical skills, which will be in addition to any basic qualifications such as age, seagoing experience, and training.

10. Requirements for Renewal of Licenses

The Coast Guard is proposing to add a new subsection under § 10.209 to indicate that after July 31, 1998, applicants for renewals will have to meet new requirements for holding the original licenses at the grades concerned.

Candidates for renewal of licenses as masters or mates for service on vessels in ocean or near-coastal service, or as operators of uninspected passenger vessels operating beyond the boundary line, will have to have the appropriate training or instruction in firefighting, personal survival techniques, and personal safety and social responsibility. If the instruction took place more than 5 years ago, the candidates will also have to provide proof that competence was assessed and validated within the last 5 years. Regardless of the schedule under which a candidate's license is renewed, he or she will need to receive basic safety training in accordance with dates of compliance established in paragraph (b) of § 15.403 for service on a seagoing vessel. The Coast Guard intends to accept training and assessment which is based on documented practical experience.

Candidates for renewal of licenses will also need to be trained in ARPA if they will be serving on vessels fitted with ARPA and they will need to hold a Certificate for Operator of Radio in Global Maritime Distress and Safety System if they will be serving on vessels that participate in GMDSS.

The proposed deadline of July 31, 1998, derives from the transitional provisions of the 1995 Amendments to STCW, which allow for a phase-in of new requirements up to August 1, 1998. STCW Regulation I/15 permits a Party to renew certificates (licenses) until February 1, 2002, in accordance with rules that will be in effect before February 1, 1997. However, to meet the target for full implementation in 2002, it is necessary to process renewals in accordance with new requirements beginning in 1998.

With these changes, the renewal process will conform to the requirements of new STCW Regulation I/11 (Revalidation of Certificates) of the 1995 Amendments.

11. Required use of Training—And Assessment—record Books

As noted, the 1995 Amendments to STCW require the use of a training- and assessment-record book under some circumstances. The Coast Guard is proposing to revise § 10.304 to require use of Coast-Guard-accepted training- and assessment-record books when candidates for deck licenses are using training to substitute of service, and when candidates for engineer licenses need onboard training to meet the requirements of STCW. A training- and assessment-record book must provide certain basic information including an indication, by means of the initials or signature of a clearly identified, designated examiner, that the candidate has established, through practical demonstrations, that he or she is competent in each of the subjects of knowledge, understanding, and proficiency set forth in the tables of the appropriate section in Part A of the STCW Code.

The Coast Guard proposes to require the designated examiner to certify that he or she has in fact personally witnessed the practical demonstration by the candidate.

STCW requires the training- and assessment-record book to be "approved." The Coast Guard plans to issue a NVIC or suitable regulation in due course that would set out the format or formats that it will consider approved (i.e., Coast-Guard-accepted) for the purposes of complying with this regulation. Formal approval would take place when the record book is submitted as proof that competence has been assessed.

12. Approved Training Other Than Approved Courses

The 1995 Amendments to STCW refer to "approved training" in the following eight contexts:

(a) STCW Regulation II/1 states that a candidate for certification as officer in charge of a navigational watch must have approved seagoing service of not less than 1 year "as part of an approved training program which includes onboard training which meets the requirements of section A–II/1 of the STCW Code and is documented in an approved training-record book." In the absence of an approved training program, the candidate must have at least 3 years of approved seagoing service.

(b) STCW Regulation III/1 states that a candidate for officer in charge of an engineering watch, or for designated duty engineer, must have completed "approved education and training of at least 30 months which includes onboard training documented in an approved training-record book and meets the standards of competence specified in section A–II/1 of the STCW Code."

(c) STCW Regulation IV/2 states that candidates for certification as persons in charge of or performing radio duties on a ship required to participate in the GMDSS must have completed "approved education and training and meet the standard of competence specified in section A–IV/2 of the STCW Code."

(d) STCW Regulation V/1 requires certain personnel on tankers to have completed "an approved tanker familiarization course" and "an approved specialized training program."

(e) STCW Regulation V/2 requires certain personnel on ro-ro passenger ships to have completed "approved training in crisis management and human behavior."

(f) Section A–VI of the STCW Code refers to "approved familiarization training" for all persons employed or engaged on seagoing ships other than passengers, and to "approved basic training or instruction" for seafarers with designated safety or pollution-prevention duties.

(g) The table of competence for deck officers (A–II/1) refers to "approved radar simulator and ARPA simulator training."

(h) The tables of competence throughout part A of the STCW Code refer to "approved training," "approved simulator training" and "approved laboratory equipment training" as alternative methods constituting evidence to prove a candidate's competence.

The Coast Guard's current course-approval system, as provided in §§ 10.301 to 10.307, applies only to specific mandatory courses such as firefighting, radar, and first aid or cardiopulmonary resuscitation, and to training used as a substitute for required service or for a written examination. There are almost 400 Coast-Guard-approved courses. (The procedures necessary to process course approvals appear (as outlined in NVIC 5–95, "Marine Licensing Program's Quality Standards System for Approved Training"). An alternative system may be needed to regulate approved training conducted to meet STCW requirements but not used for remission of seagoing service under Part 10.

The Coast Guard is working with MERPAC to identify the criteria for instructors of approved courses. MERPAC is also looking at the relationship of these criteria to the overall requirements for monitoring training under a quality-standards system that ensures the meeting of training objectives. Preliminarily, the MERPAC working groups engaged in these efforts have settled on a concept under which the Coast Guard would individually certify instructors and examiners whom it finds to meet professional and instructional experience. The status and content of MERPAC's recommendations on these criteria will influence the final rule.

The Coast Guard is including in this proposed rule an alternative to its current course-approval system. Proposed new § 10.309 rests on the principle of self-certification with minimum Coast Guard oversight based on acceptance by the Coast Guard of certain materials and procedures to maintain standards. In other words, completion certificates issued by training programs that meet the conditions stated in that section could be accepted as meeting the "approved training" requirements of STCW when such training is not being used for remission of seagoing service.

This could be done by a process like that used to credit "approved seagoing service" after the fact, on sufficient documentary proof. If the Coast Guard learned that the conditions set out in new § 10.309 were not being met by a particular training program, it would not accept certificates of completion as proof that the necessary training had been completed. The conditions for conducting approved training other than approved courses are set out in new § 10.309.

This proposal is intended to comply with the requirements of new STCW Regulations I/6 and I/8 of the 1995 Amendments. STCW Regulation I/6 concerns qualifications of those who train or assess the competence of seafarers; and STCW Regulation I/8 requires that training and assessment of seafarers be continuously monitored through a quality-standards system to ensure achievement of defined objectives, including those concerning the qualifications and experience of instructors and assessors.

The Coast Guard welcomes comments on this alternative approach, particularly with respect to (a) Coast Guard involvement in conducting oversight and maintenance of standards through a Coast-Guard-acceptance procedure and (b) specific training or instruction in instruction or assessment that those who instruct or assess candidates for STCW certificates or endorsements should be proficient in.

13. Radar Training

The Coast Guard would revise § 10.480 to require that radar simulators used in radar training meet the performance standards set out in section A–I/12 of the STCW Code.

14. Requirements for Radio Operators' Certificates

The Coast Guard would expand §§ 10.601 and 10.603 to cover certification or radio operators for service on ships required to participate in GMDSS. Candidates must meet the standard of competence set forth in STCW Regulation IV/2 of the 1995 Amendments.

This proposal is intended to complement that under § 10.205, which would require masters and mates to hold a Certificate for Operator of Radio in Global Maritime Distress and Safety System (GMDSS) if they serve on vessels that participate in GMDSS, and with FCC regulations in 47 CFR parts 13 and 80 also allows persons other than masters and mates to acquire radio operators certificates from the Coast Guard if they have the necessary training and have met standards of competence by means of an examination and practical demonstration.

The Coast Guard invites comment on the most effective process for implementing the Certificate requirements for GMDSS radio operator, particularly in light of section 365 of the Telecommunications Act of 1996 which promotes implementation of GMDSS on U.S. vessels.

15. Practical Demonstration

Subpart I of part 10 (§§ 10.901 through 10.950) is currently limited to identification of subjects in which candidates must be examined to qualify for certain licenses. Because qualification for STCW certificates or endorsements under the 1995 Amendments to the Convention will typically require candidates to prove their competence by means of both an examination and a demonstration of skills, the Coast Guard is proposing to expand § 10.901 to cover practical demonstrations.

Proposed new § 10.901 provision would incorporate by reference the tables in Part A of the STCW Code, with the effect of permitting candidates for U.S. licenses to demonstrate their competence by any of the methods authorized under those tables.

The table of subjects (a) adds subjects that will be treated under STCW; (b) highlights those subjects for which candidates must perform practical demonstrations; and (c) suggests subjects that can be removed from the table because not treated under STCW.

The Coast Guard is also proposing a new subsection to require that simulators used in assessment of competency or demonstration of continued proficiency must meet the appropriate performance standards set out in section A–I/12 of the STCW Code. However, simulators installed or brought into use before February 1, 2002, would be exempt from full compliance with these standards to the extent that they remained capable of meeting the objectives of the assessment of competence or demonstration of continued proficiency.

16. Ro-Ro Passenger Ships

The 1995 Amendments to STCW include new special provisions for personnel serving on ro-ro passenger ships. New STCW Regulation V/2 in Chapter V of the Annex, and section A–V/2 of the STCW Code, establish mandatory minimum standards for the training and certification of masters, officers, ratings (i.e., unlicensed seamen with certain ratings), and other personnel on ro-ro passenger ships.

Because there are a number of ro-ro passenger ships documented in the United States, of which six operate on international voyages between the United States and Canada, the Coast Guard is proposing to add a new subpart J in part 10, on "Professional requirements for officers serving on ro-ro passenger ships," to implement STCW Regulation V/2 in the U.S. licensing system. Primarily, the new subpart would incorporate by reference STCW Regulation V/2 and section A–V/2 of the STCW Code. This proposed rule would apply only to U.S. Ro-Ro passenger ships to which SOLAS Certificates are issued. Comments on whether application should be expanded to other classes of U.S. ro-ro passenger ships may be submitted to the docket.

The International Maritime Organization (IMO) will be undertaking further work to clarify certain requirements under STCW Regulation V/2. In particular, the STCW of IMO will consider training in crisis management for masters and senior officers. Any recommendations that IMO ultimately adopts in this regard will influence the Coast Guard in approving training programs or course materials on this subject.

46 CFR Part 12—Certification of Seamen

1. Purpose of Regulations

The Coast Guard would revise § 12.01–1 to reflect that the purpose of part 12 is twofold. Part 12 is intended to provide, first, a means of determining the qualifications an applicant must possess to be eligible for certification to serve on U.S. merchants vessels and, second, a means of determining whether an applicant is competent under STCW to serve in a particular shipboard position. The Coast Guard is also proposing to indicate that new subpart 12.03 prescribes the requirements applicable to training and assessment associated with meeting the standards of competence under amended STCW.

2. Incorporation by Reference (§ 12.01–3)

The Coast Guard would introduce the necessary language in § 12.01–3 to allow technical requirements of the 1995 Amendments to STCW and to the STCW Code to be incorporated by reference into specific rules in Part 12.

3. Definitions

As noted in the discussion of § 10.103, the Coast Guard intends to maintain consistency in the definitions for identical terms used in parts 10 and 12. Consequently, the Coast Guard is proposing for § 12.01–6 a number of new definitions that correspond with those proposed for § 10.103. These comprise *approved training, Coast-Guard-accepted, designated examiner, practical demonstration, qualified instructor, STCW endorsement,* and *standard of competence.*

4. When Documents are Required

The Coast Guard would revise § 12.02–7 to require individuals serving in certain capacities on seagoing ships to hold STCW certificates or endorsement stating that they are so qualified.

5. General Provisions Respecting Merchant Mariner's Document (MMD)

The Coast Guard is proposing to revise § 12.02–11 to ensure that everyone qualified for an STCW certificate or endorsement is issued the appropriate certificate or endorsement when he or she is issued an MMD, or when the MMD is renewed or endorsed. One may be qualified to hold an endorsement for a rating forming part of a navigation or engineering watch, under STCW Regulation II/4 or III/4 and the corresponding section of the STCW Code (A–II/4 or A–III/4), without being qualified as an AB or QMED.

The Coast Guard is also proposing to allow the endorsement of an MMD to indicate that the holder has received the familiarization or basic safety-training required by chapter VI of STCW as amended. This would not be mandatory, but it should be a convenience to those who move from ship to ship, or company to company. As in the relevant parts of § 10.205, the Coast Guard would be able to approve courses which are designed for particular ships or types of service, within the limits allowed by STCW.

6. Medical Fitness

The Coast Guard is proposing to add a new subsection to § 12.02–17, requiring an applicant for an MMD to present documents issued by a qualified medical practitioner attesting the applicant's medical fitness to perform the functions for which the document is issued. There are currently no medical-fitness requirements for entry-level seamen.

This proposal is intended to comply with new STCW Regulation I/9 of the 1995 Amendments, which states that "each party shall establish standards of medical fitness for seafarers, particularly regarding eyesight and hearing." For further discussion of medical fitness, refer to *General,* at page 9.

The Coast Guard invites comments on whether additional procedures or criteria belong in the rule to regulate medical fitness of entry-level seamen.

7. Approved Training Other Than Approved Courses

As discussed under § 10.309, the Coast Guard is proposing an alternative to the course-approval system, for accepting training programs as "approved" to satisfy STCW as amended. The proposal in § 12.03–1 is almost identical to the proposal in § 10.309 (with necessary editorial adjustments to fit in the context of Part 12). The conditions are intended to meet the quality-standards provisions of STCW as amended.

8. Able Seaman

The Coast Guard is proposing to revise the able seamen qualifications in Subpart 12.05 to conform with the requirements of the 1995 Amendments to STCW.

Section 12.05–3 would expand the reference to "lifeboatman" to include everyone with "proficiency in survival craft and rescue boats."

This section would also add a new subsection to require candidates for AB certificates for service on seagoing vessels to receive approved basic safety-training as set out in STCW Regulation VI/1 and section A–VI/1 of the STCW Code (i.e., personal survival techniques; firefighting and fire prevention; elementary first aid; and personal safety and social responsibilities). As in the relevant parts of § 10.205, the Coast Guard would be able to approve courses designed for particular ships or types of service, within the limits allowed by STCW. Also, as in § 10,209, an applicant for renewal of an MMD with an AB endorsement would have to prove that competency was assessed within the last 5 years, if instruction took place more than 5 years ago.

Section 12.05–3 would also require a candidate for an AB certificate for service on seagoing ships of 500 GT or more to meet the requirements of STCW Regulation II/4, and be qualified to hold an STCW certificate or endorsement for a rating forming part of a navigational watch. The standard of competence set out in section A–II/4 of the STCW Code would be incorporated by reference.

The table in section A–II/4 of the STCW Code includes a number of subjects areas (such as use of gyro compasses, change-over from auto-pilot, maintenance of a safe watch, knowledge of EPIRBs, and avoidance of false alerts) that are not currently required under § 12.05–9 (examination and demonstration of ability). That section would refer to the STCW table.

Also, each candidate would have to prove that he or she had a stated minimum of seagoing service including training and experience associated with navigational watchkeeping under the direct supervision of the Master, the officer in charge of the navigational watch, or a qualified rating.

The Coast Guard is also proposing to revise § 12.05–11 (general provisions respecting MMDs endorsed for able seaman) to indicate that, on seagoing ships of 500 GT ton and more, ABs who serve in navigational watchkeeping must hold STCW certificates or endorsements for a rating forming part of a navigational watch and be qualified in accordance with STCW Regulation II/4.

9. Lifeboatman

The Coast Guard is proposing to revise the lifeboatman qualifications in subpart 12.10 to conform with the requirements of the 1995 Amendments to STCW.

Section 12.10–3 would expand the reference to "lifeboatman" to include every mariner with "proficiency in survival craft and rescue boats." This section would require candidates to (a) be at least 18 years of age and (b) have a minimum of 6 months of seagoing service when associated with approved training.

This section would also add a new subsection to require a candidate for a certificate for lifeboatman or survival craft to receive approved basic safety-training as set out in STCW Regulation VI/1 and section A–VI/1, paragraph 2, of the STCW Code (i.e. personal survival techniques; firefighting and fire prevention; elementary first aid; and personal safety and social responsibilities). As in the relevant parts of § 10.205, the Coast Guard would be able to approve courses designed for particular ships or types of service, within the limits allowed by the STCW. Also, a candidate for renewal of an MMD with a lifeboatman endorsement would have to prove that competence was established within the last 5 years if instruction took place more than 5 years ago.

Section 12.10–5 would incorporate by reference the standard of competence set out in STCW Regulation VI/2 and section A–VI/2 of the STCW Code. This would expand the coverage under this section to such subjects as methods of starting survival-craft engines use of the fire extinguisher provided method of helicopter rescue, effects of hypothermia, use of rescue boats for persons in the sea, use of EPIRBS and pyrotechnic distress signals, and first aid for survivors. The Coast Guard would be able to approve courses designed for a particular class of ship or type of service, to take into account such conditions as small ships required only to carry liferafts. It would place an appropriate limitation on the certificate issued on the basis of such training.

The Coast Guard is proposing to delete § 12.10–7. Individuals qualified under STCW Regulation VI/2 must hold certificates stating they are qualified. However, by policy, the Coast Guard proposes to grandfather those who currently hold AB endorsements. Until August 1, 1998, it would issue to holders of MMDs with AB endorsements, endorsements for proficiency in survival craft when they renew their MMDs.

The Coast Guard is proposing to add a new § 12.10–9 on certificates of proficiency in fast rescue boats. This section would incorporate by reference both the requirements of STCW Regulation VI/2, paragraph 2, and the relevant portions of section A–VI/2 of the STCW Code, including table A–VI/2–2. Fast rescue boats are those that can sustain speeds of over 20 knots with crews of 3, and over 8 knots with full complements of persons and equipment.

The Coast Guard is also proposing to add a new § 12.10–11 for those designated to provide medical care on board ship. This section would incorporate by reference the requirements of STCW Regulation VI/4 and those of section A–VI/4 of the STCW Code. This allows individuals not already having to be trained in first aid under other regulations (e.g., § 10.205(h) for licenses and certificates of registry) to acquire endorsements to provide medical care on board ship.

10. Qualified Member of the Engine Department

The Coast Guard is proposing to revise the qualifications for qualified members of the engine department (QMEDs) in subpart 12.15 to conform with the requirements of the 1995 Amendments to STCW.

Section 12.15–3 would get a new subsection to require candidates for QMED certificates for service on seagoing vessels driven by main propulsion machinery of 750 kW [1,000 hp] of propulsion power or more to receive approved basic safety-training as set out in STCW Regulation VI/1 and section A–VI/1 of the STCW Code (i.e., personal survival techniques; firefighting and fire prevention; elementary first aid, and personal safety and social responsibilities, including pollution prevention). As in the relevant parts of §§ 10.205 and 12.05–3, the Coast Guard would be able to approve courses designed for particular ships or types of service, within the limits allowed by the STCW. Also, as in § 12.05–3, an applicant for renewal of an MMD with a QMED endorsement would have to prove that competency was assessed within the last 5 years if instruction took place more than five years ago.

Section 12.15–3 would also require candidates for QMED certificates for service on seagoing vessels driven by main propulsion machinery of 750 kW [1,000 hp] of propulsion power or more to meet the requirements of STCW Regulation III/4, and either be qualified to hold an STCW certificate or endorsement for a rating forming part of a watch in a manned engine-room or be designated to perform duties in a periodically unmanned engine-room. The standard of competence set out in section A–III/4 of the STCW Code would be incorporated by reference.

The table in section A–III/4 of the STCW Code includes a number of subjects (such as engine-room watchkeeping and knowledge of escape routes from machinery spaces) not currently covered under § 12.15–9.

Section 12.15–7 would require a minimum of seagoing service performing duties associated with engine-room watchkeeping under the direct supervision of a qualified engineer officer or of a member of a qualified rating.

Section 12.15–9 would refer to table A–III/4 of the STCW Code, and would require practical demonstration of abilities.

Section 12.15–11 would indicate that, on seagoing vessels driven by main propulsion machinery of 750 kW [1,000 hp] of propulsion power or more, QMEDs who serve in a watchkeeping capacity in a manned engine-room or are designated to perform duties in a periodically unmanned engine-room must hold STCW certificates or endorsements stating that they are qualified in accordance with STCW Regulation III/4.

11. Electronics Technician

The Coast Guard would establish a new rating under part 12 by adding a section to Subpart 12.25 (Certificates of service for ratings other than AB or QMED). New § 12.25–45 would allow an individual to hold a certificate or MMD stating that he or she is qualified to serve as an electronics technician on board a vessel.

Section 12.25–45 would require candidates for this endorsement to provide sufficient proof of competence. This would comprise (a) a certificate of completion from a Coast Guard-approved training program that includes instruction and assessment by qualified instructors and designated examiners, and makes the student complete appropriate examinations and practical demonstrations to establish competence in the basic skills, knowledge, and understanding necessary to perform maintenance, diagnosis, and repair of electronic equipment and installations on board ships, in accordance with the manuals normally provided for such equipment and installations and (b) a certificate of completion from a course approved by the FCC or Coast Guard and covering at least the scope and content of training outlines in the relevant sections of B–IV/2 of the STCW Code relating to maintenance of GMDSS installations on board ships.

Under § 12.25–45 an individual could receive an electronic-technician rating without completing the GMDSS course. However, in that case, the endorsement would contain a limitation to the effect that the individual could not serve as the person designated to perform at-sea maintenance of GMDSS installations when such a person was necessary to meet the maintenance requirements imposed by SOLAS Regulation IV/15 (i.e., "electronics technician—non-GMDSS)". When at-sea maintenance is

to be used as a means of meeting the SOLAS requirement for maintenance of GMDSS, the person designated to perform the maintenance must have an electronics-technician endorsement, without the limitation. While this proposed rule would establish an electronics-technician endorsement in part 12, the intent is not that there be any restriction on the ability of a licensed engineer to acquire the endorsement. The Coast Guard solicits comments on whether Part 10 should include additional requirements on electronics as a shipboard skill or responsibility, particularly in light of section 365 of the Telecommunications Act of 1996 which promotes the implementation of GMDSS on U.S. vessels.

12. Qualifications for Service on Ro-Ro Passenger Ships

The Coast Guard would add a new subpart (§ 12.30) under part 12 to establish requirements for certification (i.e., by endorsement of an MMD) of unlicensed seamen for service on ro-ro passenger ships. The requirements would essentially incorporate by reference the provisions of STCW Regulation V/2 as they relate to personnel with specific duties on such ships, and those with duties for care of passengers. The proposed rule would apply only to U.S. ro-ro passenger ships to which SOLAS certificates are issued. Comments on whether application should be expanded to other classes of ro-ro passenger ships may be submitted to the docket.

46 CFR Part 15—Manning Requirements

The 1995 Amendments to STCW contain a number of provisions that affect manning and watchkeeping on seagoing vessels, as well as conditions that must be met before crewmembers can be assigned to duties. The Coast Guard is proposing to revise part 15 to incorporate these new requirements on U.S. merchant vessels that operate seaward of the boundary line.

1. Incorporation by Reference (§ 15.105)

The Coast Guard would introduce the necessary language in § 15.105 to allow technical requirements of the 1995 Amendments to STCW and to the STCW Code to be incorporated by reference into specific rules in part 15.

2. Definitions (§ 15.301)

The Coast Guard would revise this section to reflect changes proposed in parts 10 and 12. For example, a reference to *GMDSS radio operator, electronics technician—non-GMDSS,* and *electronics technician* must each be added to paragraph (b) or (c).

3. Employment and Service Within Restrictions of License or Document (§ 15.401)

The Coast Guard would expand this section to include references to STCW certificates and endorsements. The section would also propose that, as of February 1, 2002, only persons with the appropriate training and certification as GMDSS radio operators be employed or engaged as masters, chief mates, or officers in charge of navigational watches on ships required to participate in the GMDSS system under SOLAS Chapter IV. Additionally, only persons trained in the use of ARPA could be employed or engaged as masters, chief mates, officers in charge of navigational watches, or operators of uninspected passenger vessels on vessels fitted with ARPA. These requirements would complement those for §§ 10.205 and 10.209.

Section 15.401 would also, as of February 1, 2002, let only persons holding electronic-technician endorsements not limited to non-GMDSS electronics installations be designated to perform at-sea maintenance of GMDSS installations, when such designation is used to meet the maintenance requirements imposed by SOLAS Regulation IV/15. This would complement the proposal for § 12.25–45.

Section 15.401 would also allow only those with proper training under subpart J of part 10 and § 12.24–30 of part 12 to be employed or engaged on ro-ro passenger ships.

4. Familiarization and Basic Safety-Training (§ 15.403)

The Coast Guard would implement STCW Regulation VI/1 of the 1995 Amendments by adding new § 15.403 to Part 15 on familiarization and basic safety-training. The section would propose that after February 1, 1997 no person may be assigned to perform any duties on a seagoing vessel unless he or she has received approved familiarization training in personal survival or has received sufficient information and instruction in a number of subjects affecting personal safety, in accordance with A–VI/1 of the STCW Code.

This section would also state that no person may be employed or engaged in any capacity on board a seagoing vessel in the business of that vessel as part of the crew with designated duties for safety or pollution prevention in the operation of the ship unless he or she has received approved basic safety-training or instruction in accordance with A–VI/1 of the STCW Code. Designated duties for safety include those associated with fire-team emergency squads and with assisting passengers in emergencies.

Additionally, this section would provide that no person may perform duties on board a seagoing vessel unless he or she has received the required familiarization training or instruction, or has achieved the required standard of competence through basic safety-training, as appropriate.

Under the relevant parts of §§ 10.205 and 12.02–11, the Coast Guard would be able to approve training designed for particular ships or types of service, within the limits allowed by STCW.

One comment submitted to the docket following the public meeting in August expressed concern about the application of these requirements of familiarization and basic safety-training to personnel serving on MODUs. Again, to the extent a MODU was a seagoing ship under STCW, the implementing regulations being proposed at this time would apply to its personnel. On the other hand, in approving specific training, the Coast Guard will take into consideration, and use as the basis for its evaluation, any IMO resolutions that provide special guidance on the training of personnel on MODUs.

5. Maintenance of Seamen's Records by Owner or Operator (§ 15.411)

STCW Regulation I/14 of the 1995 Amendments requires Administrations to impose certain responsibilities on companies that own or operate seagoing vessels. These responsibilities are fundamental to good management, are consistent with the principles reflected in the International Management Code for Safe Operation of Ships (ISM Code), and are to a large extent already covered by domestic regulations.

For example, the obligation under item 1.1 of STCW Regulation I/14, concerning the need to ensure that each seafarer holds the appropriate STCW certificate, is addressed by 46 CFR 15.401. The obligation in item 1.2 of STCW Regulation I/14, concerning compliance with manning requirements, is addressed by 46 CFR 15.401 and 15.515, and to some extent by 46 CFR 15.801, with statutory support (e.g., 46 U.S.C. 8101 (c) and (f) and 8104(j)). Similarly, the object of item 1.4 of STCW Regulation I/14, ensuring that seafarers are familiar with ship-specific arrangements, equipment, and so forth, before being assigned to duties, is already addressed in 46 CFR 15.405.

But, because § 15.405 does not explicitly require companies to ensure that a level of familiarity has been achieved, the Coast Guard is inviting comment on whether it should be revised. If so, the Coast Guard also invites comments on whether the term *company* (or, alternatively, the term *owner or operator*) should be defined in Part 15. The Coast Guard also invites comments on how § 15.405 should be revised to effectively implement paragraph 2 of section A.I/14 of the STCW code, which states the following:

> The company shall provide written instructions to the master of each ship to which the Convention applies, setting forth the policies and the procedures to be followed to ensure that all seafarers who are newly employed on board the ship are given a reasonable opportunity to become familiar with the shipboard equipment, operating procedures and other arrangements needed for the proper performance of their duties, before being assigned to those duties.

To some extent, the requirements for maintaining certain records, as set out in item 1.3 of STCW Regulation I/14, are already addressed by statutory and regulatory provisions on shipping articles and other records of seamen (e.g., 46 U.S.C. 10302, 10320, and 10502 and 46 CFR part 14). Additionally, it is considered routine practice for U.S. companies that employ seaman to maintain a personnel record for each employee, or to ensure that one is maintained by an agency acting on behalf of the company in such matters (such as a labor union that has entered into a collective-bargaining agreement).

Taking the above into account, the rule proposed as § 15.411 focuses on the recordkeeping requirements in STCW Regulation I/14 of the 1995 Amendments. The object is to allow companies a suitable range of flexibility for complying with these requirements in a manner most consistent with good management. Furthermore, the policy of the Coast Guard will be to presume, in the absence of information to the contrary, that companies holding valid ISM certificates, issued in accordance with the appropriate international, and domestic regulations, are fulfilling their obligations under STCW Regulation I/14.

One comment submitted in response to the notice published on August 2, 1995 [60 FR 39306], asked that the requirements of item 1.4 of STCW Regulation I/14 (on familiarization with specific equipment and procedures) not be extended to apply to duties of industrial personnel on industrial vessels (e.g., MODUs) or research crew on research vessels. The Coast Guard would not expect this proposed rule to impose an unreasonable obligation on companies that employ such personnel. However, in keeping with earlier statements in this preamble, the Coast Guard recognizes that IMO will be giving further consideration to issues of industrial personnel. Therefore, the proposals relating to paragraph 1.4 of STCW Regulation 1/14 should be understood not to apply to industrial personnel on MODUs or research personnel on research vessels. Such personnel, however, would be subject to the familiarization and basis safety training requirements, of STCW Regulation VI/I, as described in section 4.

6. Watchkeeping Arrangements

The Coast Guard is proposing to revise § 15.705 (Watches) by requiring masters on seagoing vessels to observe the principles on watchkeeping arrangements set out in STCW Regulation VIII/2 of the 1995 Amendments.

7. Workhours and Rest Periods

The Coast Guard is proposing to implement the rest-hour requirements of STCW Regulation VIII/1 of the 1995 Amendments, and of section A–VIII/1 of the STCW Code, by adding new subparagraphs to § 15.710. Essentially, the STCW Amendments will require that every person assigned duty as an officer in charge of a watch or as a rating forming part of a watch shall receive a minimum of 10 hours of rest in any 24-hour period. These 10 hours of rest may be divided into two parts as long as one segment is at least 6 hours.

Deviation from the requirement for 10 total and 6 continuous hours of rest is permissible in the case of "an emergency or drill or in other overriding operational conditions." Additionally, the 10 hours of rest in a 24-hour period may drop to 6 consecutive hours in a 24-hour period over 2 days, as long as the watch-keeper receives 70 hours of rest in each 7-day period. Watch schedules that ensure compliance with these rest-hour requirements must be posted when they are easily accessible to watchkeeping personnel and to port-control officers in foreign ports.

Section B–VIII/1 of the STCW Code provides some guidance on the meaning of the terms used in section A–VIII/1, and on the correct interpretation of the rest-hour requirements when calculating workhours outside of the periods of watchkeeping responsibility. For instance, it construes the phrase "overriding operational conditions" to mean "only essential shipboard work which cannot be delayed for safety or environmental reasons or which could not reasonably have been anticipated at the commencement of the voyage."

The guidance in section B–VIII/1 of the STCW Code also states that the minimum rest periods should not be interpreted as implying that all other hours may be devoted to watchkeeping or other duties. It also invites administrations to consider a requirement for recordkeeping to ensure compliance with that for hours of the rest.

One comment submitted in response to the notice published on August 2, 1995 [60 FR 39306], expressed concern that an individual serving in a two-watch rotation on a towing vessel would be considered unfit for duty if he or she got only 5 hours of sleep in one 6-hour off-duty period, and 2 hours of sleep in the next off-duty period. The Coast Guard does not view the rest-hour requirements of STCW as mandating a period in which the individual concerned is actually in his or her bunk asleep. However, over any period of 24 hours, the watchkeeping personnel must be provided the opportunity for an uninterrupted period of rest for at least 6 hours, and an additional 4-hour period during which no duties are assigned or performed. The operative word is "opportunity". This would not prevent a person from attending to routine personal affairs, or engaging in recreational or other off-duty activities.

Another comment submitted on this matter suggested that the rest-hour requirements of STCW could have an adverse impact on the operation of towing vessels and small passenger vessels because it would permit a 14-hour workday or a 98-hour workweek, in violation of U.S. statutory and regulatory provisions that limit the number of hours a seaman may be required to work.

Note, however, that the introduction of a rest-hour requirement into U.S. regulations would not change any existing work-hour limits or rest-hour requirements that apply to personnel on U.S. vessels. Limits that apply to seagoing ships under 46 U.S.C. 8104 and 46 CFR 15.705 and 15.710 would remain fully in effect. Additionally, operators of towing vessels and tankers already have to comply with both the work-hour limits under 46 U.S.C. 8104(h) and 8104(n), respectively, and the rest-hour requirements under STCW and 46 U.S.C. 8104(a).

In any specific set of circumstances, the stricter rule would apply. For example, although the rest-hour requirements proposed here would technically permit the operator of a seagoing towing vessel to stand watch for up to 14 hours a day, 46 U.S.C. 8104(h) would limit the operator to no more than 12 hours in a 24-hour period.

Similarly, although 46 U.S.C. 8104(n) technically permits a mate on a tanker to work up to 15 hours in a 24-hour period, the rest-hour requirements proposed here would limit his or her periods of duty to not more than 14 hours in that same 24-hour period, unless there were an emergency or other overriding operational condition; and then an adjustment would subsequently be necessary to ensure that the mate received 70 hours of rest in 7 days.

Although calculating work and rest may be complex under some non-routine circumstances, the Coast Guard considers the STCW rest-hour requirements of STCW and the existing work-hour limits in U.S. statutes and regulations to be compatible and enforceable, and in keeping with the object of safe watchkeeping.

Further comment to the docket is welcome, on the implementation of the rest-hour requirement, and particularly on the extent to which the terms *rest hours and overriding operational conditions* should be clarified or interpreted either in this proposed rule itself or in the policy on its enforcement. Comment is also welcome on the kinds of shipboard activity (such as personal housekeeping) that should be allowed to watchkeeping personnel who are off duty and on the need for recordkeeping to ensure compliance with the rest-hour requirements.

Incorporation by Reference

The following material would be incorporated by reference in §§ 10.102, 12.01–3, and 15.105: Amendments to the Annex to the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers, 1978, and the associated Seafarers' Training, Certification and Watchkeeping (STCW) Code, as adopted under resolutions 1 and 2, respectively, by the Conference of Parties to the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers, 1978, held at IMO from June 26 to July 7, 1995.

Copies of the material are available for inspection where indicated under **ADDRESSES**. Copies of the material are also available from IMO, 4 Albert Embankment, London, SE1 7SR, England, telephone in London 0171–735–7611.

Before publishing a final rule, the Coast Guard will submit this material to the Director of the Federal Register for approval of the incorporation by reference.

Regulatory Evaluation

This proposed rule is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. It has not been reviewed by the Office of Management and Budget under that Order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) [44 FR 11040 (February 26, 1979)].

A preliminary regulatory assessment has been prepared and is available for inspection where indicated under **ADDRESSES**.

The regulatory assessment is preliminary at this stage. The Coast Guard published a notice of inquiry on November 13, 1995 [60 FR 56970], to solicit information that would be useful in calculating the costs and benefits of implementing the 1995 Amendments to STCW. Some of those calling the Coast Guard to discuss the notice said they could not give a detailed or accurate assessment of impacts until they had seen the specific proposals. Others indicated they did not foresee a cost impact since they felt that their current practices and procedures generally conformed with the requirements of the amendments to STCW.

To a great extent, the STCW revisions are introducing, as requirements, practices already successfully promoted through the current U.S. regulations (e.g., use of approved training, and the use of simulators in training as predicates of remission of seagoing service). In most cases, the new requirements would involve modification or enhancement of existing training and oversight rather than establishment of new programs.

The Coast Guard estimates that the proposal will affect approximately 19,500 seafarers over a 5-year period. The estimated composition of this group is 10,335 deck and other officers, 1,755 engineering officers, 3,900 able seamen, and 3,510 qualified members of the engineering department.

The approximate vessel population that operate outside the boundary line and may be affected by the proposed regulation are 136 MODUs; 95 industrial vessels; 271 freight ships; 103 oil recovery vessels; 696 offshore supply vessels; 20 passenger vessels; 2,112 small passenger vessels; 14 research vessels; 14 maritime school ships; 162 tank ships; 15 towboats and tugboats; 462 tank barges; 3 ferries; and 486 freight barges.

Costs

The Coast Guard estimates that costs fall into the following categories: medical fitness, training costs, training infrastructure costs, company and/or owner/operator costs, and government costs.

The Coast Guard estimates that approximately 12,000 seafarers apply for MMDs annually. Approximate costs of $1,900,000 annually are estimated for mariners certifying their medical fitness when applying for an MMD.

Deck, radio, and other officers will be required to demonstrate competency and knowledge in a combination of courses including GMDSS, ARPA, Personal Survival, Personal Safety and Social Responsibility, and Bridge Teamwork. The Coast Guard estimates that as many as 4,091 officers may be affected annually while the proposed regulation has a high level of flexibility built into it for mariners, the Coast Guard has assumed that mariners will attend formal, classroom courses to comply with the requirements. Annual training costs for deck, radio, and other officers are estimated at $21,804,580.

Engineering officers will be required to demonstrate competence and knowledge in a combination of courses including Personal Survival, Personal Safety and Social Responsibility, and Electronic and Control Engineering. The Coast Guard estimates that as many as 645 engineering officers may be affected annually. Annual training costs for engineering officers are estimated at $3,247,575.

ABs will be required to demonstrate competence and knowledge in a combination of courses including Personal Survival, Personal Safety and Social Responsibility, Shipboard Orientation, Firefighting and Fire Prevention, and estimates that as many as 1,369 ABs may be affected annually. Annual training costs for ABs are estimated at $11,568,050.

QMEDs will be required to demonstrate competence and knowledge in a combination of courses including Personal Survival, Personal Safety and Social Responsibility, Shipboard Orientation, and Firefighting and Fire Prevention. The Coast Guard estimates that as many as 1,253 QMEDs may be affected annually. Annual training costs for QMEDs are estimated at $7,580,650.

Ro/Ro personnel will be required to attend specialized training including crowd management, passenger safety, cargo safety, and hull integrity. The Coast Guard estimates that this may affect 225 Seafarers every 5 years. Estimated annual cost is $67,500.

The Coast Guard has estimated a new electronics technician rating for vessels equipped with GMDSS. Electronic technicians will be required to demonstrate competence and knowledge to perform maintenance, diagnosis and repair of electronic equipment and installations. The Coast Guard estimates that this may affect 1,128 Seafarers. The Coast Guard has estimated this as a one-time cost of $6,204,000.

The Coast Guard has determined that training infrastructure costs include QSS, Approved Instructor, Designated Examiner, Capital Investments, and Course Development.

For QSS, the Coast Guard estimates that 100 training institutions may be affected at an initial cost of $7,500, $1,000 annual maintenance costs, and an independent evaluation estimated at $5,000. Total cost is estimated at $1,750,000.

For Approved Instructors, the Coast Guard estimates that 1,500 instructors at 100 training institutions may be affected. Annual approved instructor costs are estimated at $1,500,000.

For Designated Examiners, the Coast Guard estimates each will be required to provide 20 hours of service. Annual designated examiner costs are estimated at $3,900,000 for 1997 through 2001 and $780,000 for 2002 through 2003.

The Coast Guard has determined that there are likely to be some GMDSS and ARPA Capital Investments necessary by training institutions to accommodate the anticipated annual through-put of deck and other officers. A one-time cost of $3,160,000 is estimated.

The Coast Guard has determined that there are likely to be some course-development costs associated with the proposed rulemaking. A one-time cost of $889,000 is estimated.

The Coast Guard has determined that costs for companies and for owners and operators are likely to include those associated with rest-hour and recordkeeping requirements.

The Coast Guard has determined that rest-hour requirements are likely to affect 83 vessels annually. Crew augmentation costs for these vessels is estimated at $2,120,650 annually.

The Coast Guard has determined that records on Seafarer training and competence, medical fitness, and rest hour requirements will be required. The Coast Guard estimates that this will likely affect 19,500 seafarers annually at an estimated cost of $1,462,500.

The Coast Guard does not anticipate any additional costs in implementing the regulation at this time.

Total Costs

Costs of the proposal are forecast to 2003. The Coast Guard estimates that these requirements will be fully integrated into the marine infrastructure by 2003 and, thus, a regular part of doing business. Costs are estimated at $45,789,021 in 1997, $36,218,521 in 1998, $35,568,521 in 1999 through 2001, $12,767,724 in 2002, and $13,200,224 in 2003. The present value of the costs of this proposed regulation discounted at 7 percent to 1997 would total $172,685,673.

Benefits

The Coast Guard has determined that the proposed rule has potential economic benefits and a potential to reduce marine casualties.

Economics play a significant role in safety. While the U.S. commercial fleet has long been among the safest in the world, differences between U.S. standards and those of other maritime nations put our vessels at a competitive disadvantage. Responsible operators can be forced to operate with lower profit margins and less capital to invest in safe operations, and in some cases forced out of the market entirely. More aggressively holding all ships to the same standards set for U.S. ships is key to shifting the balance. This proposal would allow the U.S. to hold mariners aboard all vessels entering its ports to the same competency standards which the U.S. holds its own vessels, without foreign retaliation. Consequently, U.S. vessels visiting foreign ports would not be faced with increased scrutiny that could result in costly vessel delays. Such delays would otherwise likely decrease the value of trade carried in U.S. bottoms. Conversely, under this proposal, the U.S. could expect to increase its market share of cargo carried which could result from the more even competitive playing field accorded U.S. and foreign fleets because of this proposal. Appendix F provides a summary of the value of U.S. international trade and ocean trade worldwide.

U.S. ships only carry about 8 percent of the value of U.S. export trade and 7 percent of the value of U.S. import trade. If, as a result of complying with international standards proposed in this rulemaking, U.S. vessels gain one tenth of one percent of the value of U.S. international trade in any given year of implementation (approximately $56,000,000), the annual benefits will outweigh the costs.

On average, there were 29 fatalities and 76 injuries annually as a result of errors that potentially could be linked to training deficiencies. The training required by this proposal has the potential to significantly decrease the number of fatalities and injuries in maritime transportation. Based on the $27,700,000 value of a human life, if this proposal causes a reduction in the number of fatalities by 17 in 1997, 13 in 1998–2001, and 55 in 2002–2003, the benefits will exceed the costs.

The complex cumulative effect of human error makes it difficult to quantify the exact benefits of the proposed rulemaking. One way to reduce the risks associated with human error in operating seagoing ships is to ensure that seafarers maintain the highest practicable standards of training, certification, and competence. The proposal is intended to reduce the risk of maritime casualties and pollution incidents caused by human error. Benefits are expected to accrue from a reduction of shipboard accidents and injuries because personnel will have an increased awareness of safe shipboard practices. As the Coast Guard reviews comments resulting from the proposal and formulates a final rule, further review of benefits based on risk is anticipated.

Small Entities

Under the Regulatory Flexibility Act [5 U.S.C. 601 *et seq.*], the Coast Guard must consider whether this proposal, if adopted, would have a significant economic impact on a substantial number of small entities. "Small entities" may include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under Section 3 of the Small Business Act (15 U.S.C. 632). "Small entities" also include small not-for-profit organizations and small governmental jurisdictions.

The proposed rule has built in sufficient flexibility and options to allow small entities to comply with its proposed requirements at modest cost. For the most part, it is expected to affect only large business enterprises and individuals mariners. There is no requirement that one entity perform all the STCW training and assessment requirements that are being proposed.

Those small entities engaged in training may choose to obtain assessment from individual qualified assessors who may also be organized as small entities. The Coast Guard does not limit the arrangements as to who may offer instruction or assessment. Any combination may be used by a mariner to achieve the desired qualifications licenses, or certificates.

The proposed rule applies to individual mariners and allows for small entities to remain in and actively compete in the maritime-training sector of the maritime industry with options to teach and assess as many courses or functions as any entity chooses. The proposal covers requirements that

would not begin to go into effect until early 1997, through the phase-in period.

Because of these accommodations and characteristics, the Coast Guard certifies under 5. U.S.C. 605(b) that this proposal will not have a significant economic impact on a substantial number of small entities.

Collection of Information

Under the Paperwork Reduction Act [44 U.S.C. 3501 *et seq.*], the Office of Management and Budget (OMB) reviews each proposed rule that contains a collection-of-information requirement to determine whether the practical value of the information is worth the burden imposed by its collection. Collection-of-information requirements include reporting, recordkeeping, notification, and other, similar requirements.

This proposal contains collection-of-information requirements in the following sections: 10.304 (training and assessment-record books); 10.309 and 12.03–1 (approved training); and 15.411 (maintenance of seamen's records by owner or operator). The following particulars apply:

Training conducted on board ships, when part of an approved program based on 1 year of seagoing service for deck licenses (6 months for engineer licenses), would have to make use of a training- and assessment-record book to document that required training and assessment of competency has been completed properly. The books would be submitted to the Coast Guard as part of an application for a license.

The QSS that would monitor training and assessment to ensure that they were meeting objectives would compel organizations offering training to document certain information and to maintain records for 1 year. The records would cover such matters as the course syllabus, students performance, and the qualifications of instructors and examiners. Additionally, an independent evaluation would need to be documented periodically. Records would be subject to review by the Coast Guard in its oversight function to ensure that training and assessment satisfy minimum conditions.

The proposed rule would allow for wide variation in the means for complying with new requirements to ensure that the scope of the QSS is reasonably related to the scope of training and assessment conducted by the entity concerned.

Companies owning or operating U.S.-documented seagoing vessels would have to arrange for the maintenance of certain records concerning the medical fitness, experience, training, and competence, of the seamen employed or engaged on their ships. The records could be maintained by a third party on behalf of the company, but they would need to be readily accessible to those in management responsible for the safety of vessel operations and the prevention of marine pollution. The recordkeeping requirement would be in effect only during the period of service of the seaman concerned.

The proposed rest-hour schedule would require documentation necessary for the safe operation of the vessel. This would ensure that the crew was informed of rest-hour requirements.

The proposed recordkeeping generally reflects routine practices for U.S. ship-operating companies and training institutions. However, the international rules in STCW were drafted to apply to companies and training programs worldwide. In due course, by its obligation under STCW as amended, the United States must demonstrate to the IMO that it has in place certain specific regulations that implement the international rules.

Dot No: 2115.

Administration: U.S. Coast Guard.

Title: Implementation of the 1995 Amendments to the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers, 1978 (STCW).

Need for Information: To ensure compliance with international requirements, and to maintain an acceptable level of quality in the training and assessment of merchant mariners.

Proposed use of Information: The Coast Guard would have access to information to monitor compliance with regulations and to identify where corrective action may be needed. Coast Guard officials involved in issuing licenses, documents, and STCW certificates would have a reliable source for determining whether training and assessment had been completed by candidates in accordance with domestic and international rules.

Frequency of Response: Under this proposed rule, records would have to be maintained for 1 year. In one case a certification of continued compliance would have to be provided to the Coast Guard once a year.

Burden Estimate: 40,215 hours.

Respondents: 28,645.

Form(s): N/A.

Average Burden-Hours per Respondent: 1.4 hours.

The Coast Guard has submitted the requirements to OMB for review under § 3504(h) of the Paperwork Reduction Act. Persons submitting comments on the requirements should submit their comments both to OMB and to the Coast Guard where indicated under **ADDRESSES**.

Federalism

The Coast Guard has analyzed this proposal under the principles and criteria contained in Executive Order 12612 and has determined that this proposal does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

This rulemaking should not have a direct impact on State, local, or tribal governments. However, States that operate or charter maritime-training institutions would have to bring the relevant training programs into line with the new requirements. For the most part, the existing State-sponsored maritime-training institutions have programs that would need little adjustment to meet the new requirements. And the accreditation process for these institutions should satisfy the new quality-assurance provisions.

Environment

The Coast Guard considered the environmental impact of this proposed rule proposal and concluded that, under paragraph 2.B.2.e(34)(C) of Commandant Instruction M16475.1B, this rulemaking is categorically excluded from further environmental documentation.

This rulemaking would have no direct environmental impact. The implementation of the 1995 Amendments to STCW should reduce the risk that human error will result in a maritime casualty or pollution incident by ensuring that seafarers on seagoing ships are meeting the highest practicable standards of competence. However, there are few objective criteria for quantifying the reduction in this risk. A "Categorical Exclusion Determination" is available in the docket for inspection or copying where indicated under **ADDRESSES**.

List of Subjects

46 CFR Part 10

Fees, Marine safety, Incorporation by reference, Reporting and recordkeeping requirements, Schools, Seamen, Vessels.

46 CFR Part 12

Fees, Marine safety, Incorporation by reference, Reporting and recordkeeping requirements, Schools, Seamen, Vessels.

46 CFR Part 15

Marine safety, Navigation (water), Incorporation by reference, Reporting and recordkeeping requirements, Schools, Seamen, Vessel manning, Vessels.

For the reasons set out in the preamble, the Coast Guard proposes to amend 46 CFR parts 10, 12, and 15 as follows:

PART 10—LICENSING OF MARITIME PERSONNEL

1. the authority citation for part 10 continues to read as follows:

Authority: 31 U.S.C. 9701; 46 U.S.C. 2103, 7101, 7106, 7107; 49 CFR 1.45, 1.46; § 10.107 also issued under the authority of 44 U.S.C. 3507.

2. Section 10.101 is amended by revising paragraphs (a) and (c) to read as follows:

§ 10.101 Purpose of regulations.

(a) The purpose of the regulations in this part are to provide—

(1) A comprehensive means of determining the qualifications an applicant must possess to be eligible for a license as deck officer, engineer, pilot, radio officer, or radio operator on merchant vessels, or for a license to operate uninspected towing vessels or uninspected passenger vessels, or for a certificate of registry as staff officer; and

(2) A means of determining that an applicant is competent to serve as a master, chief mate, officer in charge of a navigational watch, chief engineer officer, second engineer officer, officer in charge of an engineering watch, designated duty engineer, or radio operator, in accordance with the provisions of the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers, 1978, as amended (STCW), and to receive the appropriate certificate or endorsement as required by STCW.

* * * * *

(c) The regulations in subpart C of this part prescribe the requirements applicable to—

(1) Each approved training course if the training course is to be acceptable as a partial substitute for service or for a required examination, or as training required for a particular license or license endorsement; and

(2) All training and assessment associated with meeting the standards of competence established by STCW.

3. Section 10.102 is added to read as follows:

§ 10.102 Incorporation by reference.

(a) Certain material is incorporated by reference into this part with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. To enforce any edition other than that specified in paragraph (b) of this section, the Coast Guard must publish notice of change in the **Federal Register** and the material must be available to the public. All approved material is available for inspection at the Office of the Federal Register, 800 North Capitol Street NW., Suite 700, Washington, DC, and at the U.S. Coast Guard, Operating and Environmental Standards Division, 2100 Second Street SW., Washington, DC 20593–0001, and is available from the sources indicated in paragraph (b) of this section.

(b) The material approved for incorporation by reference in this part and the sections affected are as follows:

International Maritime Organization (IMO)

4 Albert Embankment, London, SE1 7SR, England.

Amendments to the Annex to the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers, 1978 (STCW), and the associated Seafarers' Training, Certification and Watchkeeping Code (STCW Code), as adopted under resolutions 1 and 2, respectively, by the Conference of Parties to the International Convention of Standards of Training, Certification and Watchkeeping for Seafarers, 1978, held at IMO from June 26 to July 7, 1995—10.103; 10.205; 10.304; 10.480; 10.602; 10.901.

4. Section 10.103 is amended by adding in alphabetical order the following new definitions to read as follows:

§ 10.103 Definitions of terms used in this part.

Approved training means training that is approved by the Coast Guard or meets the requirements of § 10.309.

* * * * *

Coast-Guard-accepted means that the Coast Guard has officially acknowledged in writing that the material or process at issue meets the applicable requirements; that the Coast Guard has issued an official policy statement listing or describing the material or process as meeting the applicable requirements; or that an entity acting on behalf of the Coast Guard under a Memorandum of Agreement has determined that the material or process meets the applicable requirements.

* * * * *

Designated examiner means an individual who has been trained or instructed in techniques of training or assessment and is otherwise qualified to evaluate whether a candidate for a license, document, or endorsement has achieved the level of competence required to hold the license, document, or endorsement. This individual may be designated by the Coast Guard or by a Coast-Guard-approved program of training or assessment.

* * * * *

Practical demonstration means the performance of an activity under the direct observation of a designated examiner for the purpose of establishing that the performer is sufficiently proficient in a practical skill to meet a specified standard of competence or other objective criterion.

Qualified instructor means an individual who has been trained or instructed in instructional techniques and is otherwise qualified to provide required training to candidates for licenses, documents, and endorsements.

* * * * *

Standard of competence means the level of proficiency to be achieved for the proper performance of duties on board vessels in accordance with national and international criteria.

STCW endorsement means a certificate or endorsement issued in accordance with the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers, 1978, as amended (STCW). An STCW endorsement issued by the Officer in Charge, Marine Inspection, will be valid only when accompanied by the appropriate U.S. license or document; and, if the license or document is revoked, then the associated STCW endorsement will no longer be valid for any purpose.

* * * * *

5. In § 10.107, paragraph (b)(3) is added to read as follows:

§ 10.107 Paperwork approval.

* * * * *

(b) * * *

(3) OMB 2115—46 CFR 10.304, 10.309.

6. In § 10.201, paragraph (a) is revised to read as follows:

§ 10.201 Eligibility for licenses and certificates of registry, general.

(a) The applicant shall establish to the satisfaction of the Officer in Charge, Marine Inspection (OCMI), that he or she possesses all of the qualifications necessary (e.g., age, experience, character references and recommendations, physical examination, citizenship, approved training, passage of a professional examination, as appropriate, and, when required by this part, a practical demonstration of skills) before the OCMI will issue a license or certificate of registry.

* * * * *

7. In § 10.202, paragraph (j) is added to read as follows:

§ 10.202 Issuance of licenses and certificates of registry.

* * * * *

(j) When an original license is issued, renewed, upgraded, or otherwise modified, the Officer in Charge, Marine Inspection (OCMI), will determine whether the holder of the license must hold an STCW certificate or endorsement for service on a seagoing vessel and, if so, and if the holder is qualified, will issue the appropriate certificate or endorsement. The OCMI will also issue an STCW certificate or endorsement at other times, if circumstances so require and if the holder of the license is qualified to hold the certificate or endorsement.

8. In § 10.205, paragraph (g) is revised, and paragraphs (k), (l), (m), (n), (o), and (p) are added, to read as follows:

§ 10.205 Requirements for original licenses and certificates of registry.

* * * * *

(g) *Firefighting certificate.* (1) Applicants for licenses in the following categories shall each present a certificate of completion from an approved course or approved training in firefighting. The course must be sufficient to establish that the applicant meets the standard of competence in basic and advanced firefighting set forth in STCW Regulations VI/1 and VI/3. The course must have been completed 5 years or less before the date of application for the license requested:

(i) All masters' or mates' licenses for service on vessels in ocean or near-coastal service.

(ii) All licenses for operators of uninspected passenger vessels for service beyond the boundary line.

(iii) All licenses for service on mobile offshore drilling units.

(iv) all engineers' licenses.

(2) The officer in charge, Marine Inspection (OCMI), may accept a certificate of completion from an approved course or approved training in firefighting designed for a particular ship or type of service; however, in that case, the OCMI will limit the endorsement by indicating the ship or type of service.

* * * * *

(k) *Competence in the use of Automatic Radar-Plotting Aids (ARPA).* (1) Subject to paragraph (j)(2) of this section, all candidates for masters' or mates' licenses for service on vessels in ocean or near-coastal service, or for licenses for operators of uninspected passenger vessels for service beyond the boundary line, shall each present a certificate of completion from an approved course or approved training on an ARPA simulator. The course must be sufficient to establish that the applicant is competent to maintain safe navigation through the proper use of ARPA, by correctly interpreting and analyzing the information obtained from that device and taking into account both the limitations of the equipment and the prevailing circumstances and conditions. The simulator used in the course must meet or exceed the performance standards established under STCW Regulation I/12 of the 1995 Amendments.

(2) Training and assessment in the use of ARPA is not required for those who serve exclusively on ships not fitted with ARPA. However, when the simulator training has not been completed, the license must be endorsed to indicate this limitation.

(l) *Certificate for operator of radio in the Global Maritime Distress and Safety System (GMDSS).* (1) Subject to paragraph (l)(2) of this section, candidates for all masters' or mates' licenses for service on vessels in ocean or near-coastal service shall each present either a certificate for operator of radio in the GMDSS issued by the Federal Communication Commission (FCC) or a certificate of completion from a Coast-Guard- or an FCC-approved course for operator of radio in the GMDSS. The course must be sufficient to establish that the applicant is competent to perform radio duties on a ship participating in the GMDSS and meets the standard of competence under STCW Regulation IV/2 of STCW.

(2) Candidates intending to serve only on ships not required to comply with the provisions of the GMDSS in Chapter IV of SOLAS need not comply with those of paragraph (k)(1) of this section.

(m) *Personal survival techniques.* (1) Applicants for licenses in the following categories shall each present a certificate of completion from an approved course or approved training in personal survival techniques. The course must be sufficient to establish that the applicant meets the standard of competence under STCW Regulation VI/1 and table A–VI/1–1 of the STCW Code. The course must have been completed 5 years or less before the date of application for the license requested:

(i) All masters' or mates' licenses for service on vessels in ocean or near-coastal service.

(ii) All licenses for operators of uninspected passenger vessels for service beyond the boundary line.

(iii) All licenses for service on mobile offshore frilling units.

(iv) All engineers' licenses.

(2) The officer in charge, Marine Inspection (OCMI), may accept a certificate of completion from an approved course or approved training in firefighting designed for a particular ship or type of service; however, in that case the OCMI will limit the endorsement by indicating the ship or type of service.

(n) *Personal safety and social responsibilities.* (1) Applicants for licenses in the following categories shall each present a certificate of completion from an approved course or approved training in personal safety and social responsibilities. The course must be sufficient to establish that the applicant meets the standard of competence under STCW Regulation VI/1 and table A–VI/1–4 of the STCW Code. The course must have been completed 5 years or less before the date of application for the license requested:

(i) All masters' or mates' licenses for service on vessels in ocean or near-coastal service.

(ii) All licenses for operators of uninspected passenger vessels for service beyond the boundary line.

(iii) All licenses for service on mobile offshore drilling units.

(iv) All engineers' licenses.

(2) The officer in charge, Marine Inspection (OCMI), may accept a certificate of completion from an approved course or approved training in firefighting designed for a particular ship or type of service; however, in that case, the OCMI will limit the endorsement by indicating the ship or type of service.

(o) *Procedures for bridge team-work.* Candidates for all masters' or mates' licenses for service on vessels in ocean or near-coastal service shall each present sufficient documentary proof that they understand and can effectively apply procedures for bridge team-work as an essential aspect of maintaining a safe navigational watch, taking into account the principles of bridge-resource management enumerated in section B–VIII/2 of the STCW Code.

(p) *Practical demonstration of skills.* Candidates for original licenses must each successfully complete any practical demonstrations required under this part and appropriate to the particular licenses concerned, to prove that they are sufficiently proficient in skills required under subpart I of this part. The OCMI must be satisfied as to the authenticity and acceptability of all evidence that each candidate has successfully completed those demonstrations in the presence of a designated examiner. The OCMI will place in each candidate's file a written record of the skills required, the results of the practical demonstrations, and the identification of the designated examiner in whose presence those occurred.

9. In § 10.207, the section heading, the heading for paragraph (c), and paragraph (c)(1) are revised to read as follows:

§ 10.207 Requirements for raise in grade of license.

* * * * *

(c) *Age, experience, training, and assessment.* (1) Applicants for a raise of grade of licenses shall establish that they possess the age, experience, and training qualifications necessary, and that they have been examined and otherwise assessed as may be required by this part to establish competence to hold the particular license requested, before they are entitled to a raise in grade of license.

* * * * *

10. In § 10.209, paragraphs (k), (l), and (m) are added to read as follows:

§ 10.209 Requirements for renewal of licenses and certificates of registry.

* * * * *

(k) After July 31, 1998, each applicant for renewal of a license in any of the following categories shall meet the applicable requirements of §§ 10.205(g), 10.205(l), and 10.205(m) unless he or she has previously done so:

(1) All masters' or mates' licenses for service on vessels in ocean or near-coastal service.

(2) All licenses for operators of uninspected passenger vessels for service beyond the boundary line.

(3) All licenses for service on mobile offshore drilling units.

(4) All engineers' licenses.

(l) After July 31, 1998, each applicants for renewal of a license in any of the following categories of license shall provide evidence of having both demonstrated competence in firefighting, personal survival techniques, and personal safety and social responsibility and been examined or continuously assessed in these areas as part of an approved training program, within the previous 5 years:

(1) All masters' or mates' licenses for service on vessels in ocean or near-coastal service.

(2) All licenses for operators of uninspected passenger vessels for service beyond the boundary line.

(3) All licenses for service on mobile offshore drilling units.

(4) All engineers' licenses.

(m) After July 31, 1998, each applicant for renewal of any master's or mate's license for service on vessels in ocean or near-coastal service, or any license for operator of an uninspected passenger vessel for service beyond the boundary line, shall meet the applicable requirements of §§ 10.205(k), 10.205(l), and 10.205(o) if he or she has not previously done so.

11. In § 10.304, the heading is revised and paragraphs (e), (f), and (g) are added to read as follows:

§ 10.304 Substitution of training for required service, and use of training- and assessment-record books.

* * * * *

(e) Where a candidate for ocean and near-coastal deck licenses uses completion of approved training to substitute for required service, then not less than 1 year of the remaining service must be part of approved training that meets the appropriate requirements of Chapter II of STCW and the requirements of subpart C of this part. The candidate's training must be documented in a Coast-Guard-accepted training- and assessment-record book.

(f) Each candidate for an engineer's licenses for service on seagoing vessels shall complete onboard training as part of approved training that meets the appropriate requirements of Chapter III of STCW and the requirements of subpart C of this part. The training must be documented in a Coast-Guard-accepted training- and assessment-record book.

(g) The training- and assessment-record book referred to in paragraphs (e) and (f) of this section must contain at least the following:

(1) Identification of the candidate, including full name, home address, photograph or photo-image, and personal signature.

(2) The objectives of the training and assessment.

(3) The tasks to be performed or the skills to be demonstrated, based on the standards of competence set forth in the tables of the appropriate sections in Part A of the STCW Code.

(4) The criteria to be used in determining that the tasks or skills have been performed properly, based on the standards of competence set forth in the tables of the appropriate sections in Part A of the STCW Code.

(5) A place for a qualified instructor to indicate by his or her initials that the candidate has received training in the proper performance of the task or skill.

(6) A place for a qualified examiner to indicate by his or her initials that the candidate has successfully completed a practical demonstration and has proved competent in the task or skill under the criteria.

(7) Identification of each qualified instructor by full name, home address, employer, job title, ship name or business address, number of any Coast Guard license or document held, and personal signature.

(8) Identification of each designated examiner by full name, home address, employer, job title, ship name or business address, number of any Coast Guard license or document held, and personal signature confirming that his or her initials certify that he or she has witnessed the practical demonstration of a particular task or skill by the candidate.

12. Section 10.309 is added to read as follows:

§ 10.309 Approved training other than approved courses.

(a) When the training and assessment of competence required by these regulations are not subject to § 10.302 of this part and are not being used to substitute for seagoing service, they must meet the following requirements:

(1) The training and assessment program must have written, clearly defined objectives that emphasize specific knowledge, skills, and abilities, and include criteria to use in establishing a candidate's successful achievement of the objectives.

(2) The training must be set out in a written syllabus that conforms to a Coast-Guard-accepted outline for such training and includes—

(i) The sequence of subjects to be covered;

(ii) The number of classroom hours in the presence of a qualified instructor to be spent on each subject;

(iii) The identity and professional qualifications of the instructor(s) to be conducting the training;

(iv) The identification of other media or facilities to be used in conducting training; and

(v) Measurements at appropriate intervals of each candidate's progress toward acquisition of the specific knowledge, skills, and abilities stated in the objectives.

(3) Except as provided in paragraphs (a)(4) and (a)(5) of this section, documentary evidence must be readily available to establish that all instructors—

(i) Have experience, training, or instruction in effective instructional techniques;

(ii) Are qualified in the task for which the training is being conducted; and

(iii) Hold the level of license, endorsement, or other professional credential required of those who would apply, on board a vessel, the relevant level of knowledge, abilities, and skills described in the training objectives.

(4) Neither a specialist in a particular field of non-maritime education, such as

mathematics or first aid, nor an individual with at least 3 years of service as a member of the Armed Forces of the United States specializing in the field in which he or she is to conduct training, need hold a maritime license or document to conduct training in that field.

(5) A simulator may be used in training if—

(i) The simulator meets applicable performance standards;

(ii) The instructor has gained practical operational experience on the particular type of simulator being used; and

(iii) The instructor employing the simulator has received appropriate guidance in instructional techniques involving the use of simulators.

(6) Essential equipment and instructional materials must afford all candidates adequate opportunity to participate in exercises and acquire practice in performing required skills.

(7) A process or routinely assessing the effectiveness of the instructors, including the use of confidential evaluations by candidates, must be in place.

(8) Records of candidates' performance must be maintained for at least a year.

(9) To ensure that the training is meeting its objectives and the requirements of paragraph (a) of this section, its offeror must monitor it at suitable intervals in accordance with a Coast-Guard-accepted quality-standards system, which must include the following features:

(i) Those monitoring the trading, shall be persons knowledgeable about the subjects being monitored and about the national and international requirements that apply to the training, and they shall not themselves be involved in the training.

(ii) Those monitoring the training must enjoy convenient access to all appropriate documents and facilities, and opportunities both to observe all appropriate activities and to conduct confidential interviews when necessary.

(iii) Arrangements must be such as to ensure that persons monitoring the training are not penalized or rewarded, directly or indirectly, by the sponsor of the training for making any particular observations or for reaching any particular conclusions.

(10) Those monitoring the training shall communicate their conclusions to the Coast Guard within 1 month of the completion of the monitoring.

(11) Upon prior notice by the Coast Guard, those providing the training shall let the Coast Guard observe the training and review documentation relating to paragraphs (a)(1) through (a)(10) of this section.

(b) The Coast Guard will maintain a list of training each of whose providers annually submits a certificate, signed by the provider or its authorized representative, starting that the training fully complies with requirements of this section. Training on this list will presumptively offer the training necessary for licenses and STCW endorsements under this part. The Coast Guard will update this list periodically and make it available to members of the public on request.

(c) If the Coast Guard determines, on the basis of observations or conclusions either of its own or by those monitoring the training, that particular training does not satisfy one or more of the conditions described in paragraph (a) of this section—

(1) The Coast Guard will so notify the provider of the training by letter enclosing a report of the observations and conclusions;

(2) The provider will have a specified period to appeal the conclusions to the appropriate official at Coast Guard Headquarters, or to bring the training into compliance; and

(3) If the appeal is denied—or the deficiency is not corrected in the allotted time, or within any additional period held by the Coast Guard, considering progress toward compliance, to be appropriate—the Coast Guard will remove the training from the list referred to in paragraph (b) of this section until it can verify full compliance; and it may deny applications based in whole or in part on training not on the list until additional training or assessment can be documented.

13. In § 10.480, paragraph (d)(1) is added and paragraph (d)(20 is added and reserved to read as follows:

§ 10.480 Radar observer.

* * * * *

(d) * * *

(1) Each applicant for an STCW certificate or endorsement as master or deck officer must complete approved radar-simulator training that meets the appropriate requirements of sections A–I/12 and A–II of the STCW Code.

* * * * *

14. Section 10.601 is revised to read as follows:

§ 10.601 Applicability.

This subpart provides for the licensing of radio officers for employment on vessels, and for the certification of radio operators for service on ships subject to the provisions on the Global Maritime Distress and Safety System (GMDSS) of Chapter IV of SOLAS.

15. In § 10.603, the heading is revised, and paragraphs (d) and (e) are added to read as follows:

§ 10.602 Requirements for radio offices' licenses and radio operators' certificates.

* * * * *

(d) Each applicant for a radio operator's certificate required for service on ships subject to the Global Maritime Distress and Safety System (GMDSS) shall provide evidence that he or she meets the standard of competence set out in STCW Regulation IV/2 including the competence to transmit and receive information using subsystems of GMDSS, to fulfill the functional requirements of GMDSS, and to provide radio services in emergencies.

(e) Evidence required by paragraph (d) of this section must include a certificate of completion of a Coast Guard-approved or FCC-approved course on the GMDSS.

16. In § 10.901, paragraphs (c) and (d) are added to read as follows:

§ 10.901 General provisions.

* * * * *

(c) Each applicant for a license for service in the following capacities on vessels that operate beyond the boundary line must also provide sufficient documentary evidence that he or she has successfully performed practical demonstrations using one or more of the methods for demonstrating competence authorized under the tables set out under the appropriate regulations of STCW:

(1) *Deck Department*—(i) Officer in charge of the navigational watch on seagoing ships of 500 gross tons or more.

(ii) Officer in charge of the navigational watch on seagoing ships of less than 500 gross tons not engaged on near-coastal voyages.

(iii) Officer in charge of the navigational watch on seagoing ships of less than 500 gross tons engaged on near-coastal voyages.

(iv) Master and chief mate on seagoing ships of 3,000 gross tons or more.

(v) Master and chief mate on seagoing ships of between 500 and 3,000 gross tons or more.

(vi) Master on seagoing ships of less than 500 gross tons not engaged on near-coastal voyages.

(vii) Master on seagoing ships of less than 500 gross tons engaged on near-coastal voyages.

(2) *Engine Department*—(i) Officer in charge of the an engineering watch in a manned engine-room on a seagoing ship.

(ii) Designated duty engineer in a periodically unmanned engine-room on a seagoing ship.

(iii) Chief engineer officer of a seagoing ship driven by main propulsion machinery of 3,000 kW [4,000 hp] of propulsion power or more.

(iv) Second engineer officer of a seagoing ship driven by main propulsion machinery of 3,000 kW [4,000 hp] of propulsion power or more.

(v) Chief engineer officer of a seagoing ship powered by main propulsion machinery of between 750 kW [1,000 hp] and 3,000 kW [4,000 hp] of propulsion power or more.

(vi) Second engineer officer of a seagoing ship driven by main propulsion machinery of between 750 kW [1,000 hp] and 3,000 kW [4,000 hp] of propulsion power or more.

(d) Simulators used in assessment of competence under paragraph (c) of this section must meet the appropriate performance standards set out in section A–I/12 of the STCW Code. However, simulators installed or brought into use before February 1, 2002, need not meet them so far as they fulfill the objectives of the assessment of competence or demonstration of proficiency.

17. In § 10.910, the introductory text and table 10.910–2 are revised to read as follows:

§ 10.910 Subjects for deck licenses.

On each topic indicated by an "X", each applicant for an ocean or near-coastal license is subject to an assessment of his or her command of the practical skills included within each professional topic, as well as to a written test of his or her knowledge. On each topic indicated by a "T" he or she is subject only to an assessment of evidence obtained from his or her completion of approved training. On each topic indicated by an "A" he or she is subject only to an assessment of his or her command of those practical skills.

1 - For ocean routes only.
2 - River chart navigation only.
3 - Topic covered only on Great Lakes specific module(s) taken for "Great Lakes and inland" routes.
4 - Including recommended courses, distances, prominent aids to navigation, depths of waters in channels and over hazardous shoals, other important features of the routes, such as character of the bottom. The OMCI may accept chart sketching of only a portion or portions of the route for long or extended routes.
5 - Take COLREGS if license not limited to non-COLREG waters.
6 - For licenses over 1600 gross tons.
7 - For licenses over 100 gross tons.
8 - Applicants for a sail/auxiliary sail endorsement to a master's or mate's license are tested on a sail vessel safety, rules of the road, operations, heavy-weather operations, navigation, Maneuvering, and terminology.

BILLING CODE 4910-14-C

18. Section 10.950 is revised to read as follows:

§ 10.950 Subjects for engineer licenses.

(a) On each topic indicated by an "X", each applicant for an engineering license is subject to a written test of his or her knowledge. On each topic indicated by a "T", he or she is subject only to an assessment of evidence obtained from his or her completion of approved training. On each topic indicated by an "A" he or she is subject only to an assessment of his or her practical skills assessed by an established regime of on-board practical factors, simulator demonstration, or a combination.

(b) A distinct engineering license for steam-driven vessels of limited power or tonnage is no longer practicable, because of the small number of these vessels. When such a license is necessary for these vessels, the owner or operator is responsible for the engineer's competence in the operation of steam propulsion. Engineer licenses endorsed for steam must first hold a comparable license for motor-driven vessels and attend a course approved for limited steam engines.

BILLING CODE 4910-14-C

19. Subpart J, consisting of §§ 10.1001 through 10.1005, is added to read as follows:

Subpart J—Ro-Ro Passenger Ships

Sec.
10.1001 Purpose or regulations.
10.1003 Definitions.
10.1005 General requirement for license-holders.

Subpart J—Ro-Ro Passenger Ships

§ 10.1001 Purpose of regulations.

The purpose of the regulations in this subpart is to establish requirements for officers serving on roll-on/roll-off (ro-ro) passenger ships.

§ 10.1003 Definitions.

Roll-on/roll-off (ro-ro) passenger ship means a passenger ship with ro-ro cargo spaces or special-category spaces as defined in the International Convention for the Safety of Life at Sea, 1974, as amended (SOLAS), and to which a SOLAS certificate is issued.

§ 10.1005 General requirement for license-holders.

To serve on a ro-ro passenger ship after January 30, 1997, a person licensed as master, chief mate, licensed mate, chief engineer, or licensed engineer shall meet the appropriate requirements of STCW Regulation V/2 and section A–V/2 of the STCW Code, and hold documentary evidence to show his or her meeting these requirements.

PART 12—CERTIFICATION OF SEAMEN

1. The authority citation for part 12 continues to read as follows:

Authority: 31 U.S.C. 9701; 46 U.S.C. 2101, 2103, 2110, 7301, 7302, 7503, 7505, 7701; 49 CFR 1.46.

2. Section 12.01–1 is revised to read as follows:

§ 12.01–1 Purpose of regulations.

(a) The purposes of the regulations in this part are to provide—

(1) A comprehensive and adequate means of determining the identity or the qualifications an applicant must possess to be eligible for certification to serve on merchant vessels of the United States; and

(2) A means of determining that an applicant is competent to serve in a "rating forming part of a navigational watch" or a "rating forming part of an engine-room watch", or is otherwise "designated to perform duties in a periodically unmanned engine-room", on a seagoing ship, in accordance with the provisions of the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers, 1978, as amended (STCW), and to receive the certificate or endorsement required by STCW.

(b) The regulations in subpart 12.03 of this part prescribe the requirements applicable to all training and assessment associated with meeting the standards of competence established by STCW.

3. Section 12.01–3 is added to read as follows:

§ 12.01–3 Incorporation by reference.

(a) Certain material is incorporated by reference into this part with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. To enforce any edition other than that specified in paragraph (b) of this section, the Coast Guard must publish notice of change in the **Federal Register** and the material must be available to the public. All approved material is available for inspection at the Office of the Federal Register, 800 North Capitol Street NW., Suite 700, Washington, DC, and at the U.S. Coast Guard, Operating and Environmental Standards Division, 2100 Second Street SW., Washington, DC, and is available from the sources indicated in paragraph (b) of this section.

(b) The material approved for incorporation by reference in this part and the sections affected are as follows:

International Maritime Organization (IMO)

4 Albert Embankment, London, SE1 7SR, England.

Amendments to the Annex to the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers, 1978 (STCW), and the associated Seafarers' Training, Certification and Watchkeeping Code (STCW Code), as adopted under resolutions 1 and 2, respectively, by the Conference of Parties to the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers, 1978, held at IMO from June 26 to July 7, 1995—12.01–1; 12.01–6; 12.02–7; 12.02–11; 12.05–3; 12.05–7; 12.10–3; 12.10–9; 12.10–11; 12.15–3; 12.15–7; 12.25–45; 12.30–5.

4. Section 12.01–6 is amended by adding in alphabetical order the following new definitions to read as follows:

§ 12.01–6 Definitions of terms used in this part.

Approved training means training that is approved by the Coast Guard or otherwise meets the requirements of § 12.03–1.

Coast-Guard-accepted means that the Coast Guard has officially acknowledged in writing that the material or process at issue meets the applicable requirements; that the Coast Guard has issued an official policy statement listing or describing the material or process as meeting the applicable requirements; or that an entity acting on behalf of the Coast Guard under a Memorandum of Agreement has determined that the material or process meets the applicable requirements.

Designated examiner means an individual who is trained or instructed in assessment techniques and is otherwise qualified to evaluate whether a candidate for a license, document, or endorsement has achieved the level of competence required to hold the license, document, or endorsement. This individual may be designated by the Coast Guard, or is designated as part of a Coast Guard-approved training or assessment program.

* * * * *

Practical demonstration means the performance of an activity under the direct observation of a designated examiner for the purpose of establishing that the performer is sufficiently proficient in a practical skill to meet a specified standard of competence or other objective criterion.

Qualified Instructor means an individual who has been trained or instructed in instructional techniques and is otherwise qualified to provide required training to candidates for licenses, documents, and endorsements.

* * * * *

Standard of competence means the level of proficiency to be achieved for the proper performance of duties on board vessels in accordance with national and international criteria.

STCW endorsement means a certificate or endorsement issued in accordance with the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers, 1978, as amended (STCW). An STCW endorsement issued by the Officer in Charge, Marine Inspection shall be valid only when accompanied by the appropriate U.S. license or document; and if the license or document is revoked, then the associated STCW endorsement is no longer valid for any purpose.

5. In § 12.02–7, paragraphs (d) and (e) are added to read as follows:

§ 12.02–7 When documents are required.

* * * * *

(d) Every individual serving as a rating forming part of a navigational watch on a seagoing ship of 500 gross tons or more shall hold an STCW

endorsement certifying him or her as qualified to perform the navigational function at the support level, in accordance with STCW.

(e) Every individual who are serving in a rating forming part of a watch in a manned engine-room or designated to perform duties in a periodically unmanned engine-room, on a seagoing ship driven by main propulsion machinery of 750 kW [1,000 hp] of propulsion power or more, shall hold an STCW endorsement certifying him or her as qualified to perform the marine-engineering function at the support level, in accordance with STCW.

6. In § 12.02–11, the heading is revised, and paragraphs (h) and (i) are added, to read as follows:

§ 12.02–11 General provisions respecting merchant mariners' documents.

* * * * *

(h) When a merchant mariner's document is issued, renewed, or endorsed, the Officer in Charge, Marine Inspection (OCMI), will determine whether the holder of the document is required to hold an STCW endorsement for service on a seagoing vessel and, if so, and if the holder is qualified, will issue the appropriate endorsement. The OCMI will also issue an STCW endorsement at other times, if circumstances so require if the holder of and the document is qualified to hold the endorsement. The OCMI will issue an STCW endorsement for the following ratings:

(1) A rating forming part of a navigational watch on a seagoing ship of 500 gross tons or more if the holder of the document is qualified in accordance with STCW Regulation II/4 and section A–II/4 of the STCW Code, to perform the navigational function at the support level.

(2) A rating forming part of a watch in a manned engine-room, if the holder of the document is designated to perform duties in a periodically unmanned engine-room, on a seagoing ship driven by main propulsion machinery of 750 kW [1,000 hp] of propulsion power or more and if the holder is qualified in accordance with STCW Regulation III/4 and section A–III/4 of the STCW Code, to perform the marine-engineering function at the support level.

(i) At the request of the holder of the document, the OCMI may add an endorsement to indicate that the holder has received familiarization or basic safety-training required under, Chapter VI of STCW.

7. In § 12.02–17, paragraph (e) is added to read as follows:

§ 12.02–17 Rules for the preparation and issuance of documents.

* * * * *

(e) An applicant for a merchant mariner's document shall provide a document issued by a qualified medical practitioner attesting the applicant's medical fitness to perform the functions for which the document is issued.

* * * * *

8. Subpart 12.03, consisting of § 12.03–1, is added to read as follows:

Subpart 12.03—Approved Training

Sec.

12.03–1 Approved training other than approved courses.

Subpar 12.03—Approved Training

§ 12.03–1 Approved training other than approved courses.

(a) When training and assessment of competence required by these regulations is not subject to the course-approval provisions of § 10.302 of this chapter, such training and assessment must meet the following requirements:

(1) The program must have written, clearly defined objectives that emphasize specific knowledge, skills, and abilities, and include criteria to be used in establishing a student's successful achievement of the training objectives.

(2) The course of training must be set out in a written syllabus which conforms to a Coast-Guard-accepted outline for such training and includes—

(i) The sequence of subjects to be covered;

(ii) The number of classroom hours (i.e., in the presence of a qualified instructor) to be spent on each subject;

(iii) The identify and professional qualifications of the instructor(s) to be conducting the training;

(iv) Identification of other media or facilities to be used in conducting the training; and

(v) Measurements at appropriate intervals of each student's progress toward acquisition of the specific knowledge, skills and abilities stated in the training objectives.

(3) Documentary evidence must be readily available to establish that all instructors—

(i) Have experience, training, or instruction in effective instructional techniques;

(ii) Are qualified in the task for which the training is being conducted; and

(iii) Hold the level of license, endorsement, or other professional credential required of those who would apply, on board a vessel, the relevant level of knowledge, abilities, and skills described in the training objectives; provided, however—

(A) A specialist in a particular field of non-maritime education, such as mathematics or first-aid, and an individual with at least 3 years of service as a member of the Armed Forces of the United States specializing in the field in which he or she is to conduct training, need not hold a maritime license or document to conduct training in that field; and

(B) A simulator may be used in training if—

(*1*) The instructor employing the simulator has received appropriate guidance in instructional techniques involving the use of simulators;

(*2*) The instructor has gained practical operational experience on the particular type of simulator being used; and

(*3*) The simulator meets applicable performance standards.

(4) Essential equipment and instructional materials must be conveniently available to allow all students adequate opportunity to participate in exercises and acquire practice in performing required skills.

(5) A process of routinely assessing the effectiveness of the instructors, including the use of confidential student evaluations, must be in place.

(6) Records of student performance must be maintained for a period of not less than 1 year.

(7) A process must be in place for monitoring at suitable intervals that the training program is meeting its training objectives and is consistently applying the requirements in accordance with a Coast Guard-accepted quality-standards system, which shall include, as a minimum, the following:

(i) Those monitoring the training program shall be individuals who are knowledgeable about the subject area being monitored and about the national and international requirements which apply to the training program, and they shall not themselves be involved in the activities being monitored.

(ii) Persons engaged to conduct monitoring of training programs must be provided convenient access to all appropriate documents and facilities, as well as opportunities to observe all appropriate activities, and to conduct confidential interviews when necessary.

(iii) Arrangements shall be such as to ensure that persons performing monitoring activities shall not be directly or indirectly penalized or rewarded by the sponsor of the training program being monitored for making any particular observations or for reaching any particular conclusions.

(8) The results of the monitoring must be communicated to the Coast Guard within 1 month of completion of those activities.

(9) Upon prior notification by the Coast Guard, an opportunity must be provided for the Coast Guard to observe training activities and review documentation relating to paragraphs (a)(1) through (a)(10) of this section.

(b) The Coast Guard will maintain a list of training programs which annually submit a certification, signed by the sponsor or an authorized representative of the sponsor, stating that the program is conducted in a manner which fully complies with the requirements in offering a specified course of approved training. Programs on this list will be presumptively considered to offer approved training for the purposes of evaluating materials supporting applications for licenses and STCW endorsements under this part. This list shall be updated periodically and made available to members of the public on request.

(c) If the Coast Guard determines, on the basis of an observation of training activities or a review of relevant documentation, that a particular program does not meet one or more of the conditions described in paragraph (a) of this section—

(1) The Coast Guard will so notify the managers or sponsors of the program by letter enclosing a report of the Coast Guard's observations and its conclusions;

(2) The managers or sponsors of the program will have a specified period to appeal the Coast Guard's conclusions to the appropriate official at Coast Guard Headquarters, or to come into compliance with the requirement where the program has been found to be deficient; and

(3) If the appeal is denied, or the deficiency is not corrected in the allotted time, or within any additional period considered by the Coast Guard to be appropriate considering progress toward compliance, the training program shall be removed from the list referred to in paragraph (b) of this section until full compliance can be established by the Coast Guard, and applications which are based in whole or in part on training received from a program at a time when it was not on the list may be denied until additional training or assessment can be documented.

9. In § 12.05–3, paragraph (d) is revised, paragraph (e) is amended by removing the period at the end and adding a semicolon in its place, and paragraphs (f) and (g) are added to read as follows:

§ 12.05–3 General requirements.

* * * * *

(d) Pass an examination demonstrating ability as an able seaman and lifeboatman with proficiency in survival craft and rescue boats;

* * * * *

(f) Complete approved basic safety-training as set out in STCW Regulation VI/1 and section a–VI/1 of the STCW Code. This training must encompass personal survival, firefighting and fire prevention, elementary first aid, and personal safety and social responsibilities. The Coast Guard may approve a basic safety-training program designed for a particular ship or type of service; however, in that case, the Coast Guard will limit the endorsement by indicating the ship or type of service. The training must have been completed 5 years or less before the date of application for the endorsement. For renewal, the applicant shall prove that his or her competence in all the subjects encompassed by the training has been assessed and established within the last 5 years; and

(g) Meet the requirements of STCW Regulation II/4 and section A–11/4 of the STCW Code, if the applicant will be serving in a rating forming part of a navigational watch on a seagoing ship of 500 gross tons or more.

10. In § 12.05–7, paragraph (a)(5) is added before the note to read as follows:

§ 12.05–7 Service or training requirements.

(a) * * *

(5) For a candidate to qualify to receive an STCW endorsement for service in a "rating forming part of a navigational watch" on a seagoing ship of 500 gross tons or more, the candidate's seagoing service must include training and experience associated with navigational watchkeeping and involve the performance of duties carried out under the direct supervision of the master, the officer in charge of the navigational watch, or a qualified rating. The training and experience must be sufficient to establish that the candidate has achieved the required standard of competence prescribed in table A–II/4 of the STCW Code, in accordance with the methods of demonstrating competence and the criteria for evaluating competence specified in that table.

* * * * *

11. In § 12.05–11, the heading and paragraph (a) are revised to read as follows:

§ 12.05–11 General provisions respecting merchant mariner's document endorsed for service as able seaman.

(a) The holder of a merchant mariner's document endorsed for the rating of able seaman may serve in any unlicensed rating in the deck department without obtaining an additional endorsement; provided, however, that the holder shall hold the appropriate STCW endorsement when serving in a "rating forming part of a navigational watch" on a seagoing ship of 500 gross tons or more.

* * * * *

12. In § 12.10–3, the heading, paragraph (a) introductory text, and paragraph (a)(6) are revised, and paragraph (c) is added, to read as follows:

§ 12.10–3 General requirements.

(a) To be eligible for certification as lifeboatman with proficiency in survival craft and rescue boats, an applicant shall be at least 18 years of age, shall meet the requirements of STCW Regulation VI/2, paragraph 1, and the appropriate provisions of section A–VI/2 of the STCW Code, and shall meet one of the following requirements:

* * * * *

(6) Successful completion of a training course, approved by the Commandant, that includes a minimum of 30 hours' actual lifeboat training; provided that the applicant produces evidence of having served a minimum of 6 months at sea aboard ocean or coastwise vessels.

* * * * *

(c) To be eligible for certification as lifeboatman with proficiency in survival craft and rescue boats, an applicant shall receive approved basic safety-training as set out in STCW Regulation VI/1 and section A–VI/1 of the STCW Code. This training must encompass personal survival, firefighting and fire prevention, elemental first aid, and personal safety and social responsibilities. The Officer in Charge, Marine Inspection (OCMI), may approve a basic safety-training program designed for a particular ship or type of service; however, in that case, the OCMI will limit the endorsement by indicating the particular ship or type of service. The training must have been completed 5 years or less before the date of application for the endorsement. For renewal, an applicant shall prove that his or her competence has been assessed and established within the last 5 years.

§ 12.10–7 [Reserved].

13. Section 12.10–7 is removed and reserved.

14. Section 12.10–9 is added to read as follows:

§ 12.10–9 Certificates of proficiency in fast rescue boats.

(a) Every person engaged or employed in a rating as a lifeboatman with proficiency in fast rescue boats shall hold a certificate of proficiency in these boats or a merchant mariner's document endorsed for proficiency in them.

(b) To be eligible for a certificate of proficiency in fast rescue boats or a merchant mariner's document endorsed for proficiency in these boats, an applicant must—

(1) Be qualified as a lifeboatman with proficiency in survival craft and rescue boats under this subpart; and

(2) Provide sufficient proof that he or she has met the requirements for training and competence of STCW Regulation VI/2, paragraph 2, and the appropriate requirements of section A–VI/2 of the STCW Code.

15. Section 12.10–11 is added to read as follows:

§ 12.10–11 Requirements for those designated to provide medical care on board ship.

(a) Every person designated to provide medical first aid on board ship, or to take charge of medical care on board ship, shall hold documentary evidence indicating that the holder has attended a course of training in medical first aid or medical care, as appropriate.

(b) The Coast Guard will issue such documentary evidence to the person, or endorse his or her license or document, on being satisfied that the training required under paragraph (a) of this section was sufficient to establish that he or she meets the standards of competence set out in STCW Regulation VI/4 and the provisions of section A–VI/4 of the STCW Code.

16. In § 12.15–3, paragraphs (d) and (e) are added to read as follows:

§ 12.15–3 General requirements.

* * * * *

(d) To be eligible for certification as qualified member of the engine department, an applicant shall complete approved basic safety-training as set out in STCW Regulation VI/1 and section A–VI/1 of the STCW Code. This training must encompass personal survival, firefighting and fire prevention, elementary first aid, and personal safety and social responsibilities. The Officer in Charge, Marine Inspection (OCMI), may approve a basic safety-training program designed for a particular ship or type of service; however, in that case, the OCMI will limit the endorsement by indicating the particular ship or type of service. The training must have been completed within 5 years or less before the date of application for the endorsement. For renewal, the applicant shall prove that his or her competence in all the subjects encompassed by the training has been assessed and established within the last 5 years.

(e) To be eligible for certification as qualified member of the engine department, an applicant shall meet the requirements of STCW Regulation III/4 and section A–II/4 of the STCW Code, if he or she will be either serving in a rating forming part of a watch in a manned engine-room or designated to perform duties in a periodically unmanned engine-room on a seagoing ship driven by main propulsion machinery of 750 kW [1,000 hp] propulsion power or more.

17. in § 12.15–7, paragraph (c) is added to read as follows:

§ 12.15–7 Service or training requirements.

* * * * *

(c) To qualify to receive an STCW endorsement as "rating forming part of a watch in a manned engine-room or designated to perform duties in a periodically unmanned engine-room" on a seagoing vessel driven by main propulsion machinery of 750 kW [1,000 hp] propulsion power or more, an applicant shall prove seagoing service that includes training and experience associated with engine-room watchkeeping and involves the performance of duties carried out under the direct supervision of a qualified engineer officer or a member of a qualified rating. The training must be sufficient to establish that the applicant has achieved the standard of competence prescribed in table A–I/4 of the STCW Code, in accordance with the methods of demonstrating competence and the criteria for evaluating competence specified in that table.

18. in § 12.15–11, the heading is revised, paragraphs (a) through (j) are redesignated as paragraphs (1) through (10), the introductory text is designated as paragraph (a), and paragraph (b) is added, to read as follows:

§ 12.15–11 General provisions respecting merchant mariner's document endorsed for service as qualified member of the engine department.

* * * * *

(b) The holder of a merchant mariner's document endorsed for the rating of qualified member of the engine department shall hold the appropriate STCW endorsement when either serving in a "rating forming part of a watch in a manned engine-room or designated to perform duties in a periodically unmanned engine-room" on a seagoing vessel driven by main propulsion machinery of 750 kW [1,000 hp] propulsion power or more.

19. Section 12.25–45 is added to read as follows:

§ 12.25–45 Electronics technician.

(a) An applicant is eligible to have his or her merchant mariner's document endorsed for the rating of electronics technician if he or she holds a certificate of completion from—

(1) Approved training that includes instruction and assessment by qualified instructors and designated examiners, and requires the student both to complete appropriate examinations and practical demonstrations to establish competence in the basic knowledge, understanding, and skills necessary to perform maintenance, diagnosis, and repair of electronic equipment and installations on board ships and to make practical use of maintenance and repair manuals provided for such equipment and installations; or

(2) An FCC- or Coast-Guard-approved course that covers at least the scope and content of training outlined in section B–IV/2 of the STCW Code for training in maintenance of GMDSS installations on board ships.

(b) Only an applicant fulfilling the requirements of paragraph (a)(2) of this section may be designated to perform at-sea maintenance requirements imposed by SOLAS Regulation IV/15.

(c) An applicant fulfilling only the requirements of paragraph (a)(1) of this section will have his or her document endorsed as follows: "electronics technician—non-GMDSS." No one whose document bears this endorsement may be designated to perform at-sea maintenance of GMDSS installations when such a designation is used to meet the maintence requirements imposed by SOLAS Regulation IV/15.

20. Subpart 12.30, consisting of 12.30–1 through 12.30–5, is added to read as follows:

Subpart 12.30—Ro-Ro Passenger Ships

Sec.

12.30–1 Purpose of regulations.
12.30–3 Definitions.
12.30–5 General requirements.

Subpart 12.30—Ro-Ro Passenger Ships

§ 12.30–1 Purpose of regulations.

The purpose of the regulations in this subpart is to establish requirements for certification of seamen serving on roll-on/roll-off (Ro-Ro) passenger ships.

§ 12.30–3 Definitions.

Roll-on/roll-off (Ro-Ro) passenger ship means a passenger ship with ro-ro cargo spaces or special-category spaces as defined in the International Convention for the Safety of Life at Sea, 1974, as amended (SOLAS), and to which a SOLAS Certificate is issued.

MMD means merchant mariner's document.

12.30–5 General requirements.

To serve on a ro-ro passenger ship after January 30, 2002, a person holding an MMD and performing duties toward safety, cargo-handling, or care for passengers shall meet the appropriate requirements of STCW Regulation V/2 and section A–V/2 of the STCW Code, and have his or her MMD endorsed to show his or her meeting those requirements.

PART 15—MANNING REQUIREMENTS

1. The authority citation for part 15 continues to read as follows:

Authority: 46 U.S.C. 3703, 8105; 49 CFR 1.46.

2. Section 15.105 is added to subpart A to read as follows:

§ 15.105 Incorporation by reference.

(a) Certain material is incorporated by reference into this part with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. To enforce any edition other than that specified in paragraph (b) of this section, the Coast Guard must publish notice of change in the **Federal Register** and the material must be available to the public. All approved material is available for inspection at the Office of the Federal Register, 800 North Capitol Street NW., Suite 700, Washington, DC and at the U.S. Coast Guard, Operating and Environmental Standards Division, 2100 Second Street SW., Washington, DC 20593–0001, and is available from the sources indicated in paragraph (b) of this section.

(b) The material approved for incorporation by reference in this part and the sections affected are as follows:

International Maritime Organization (IMO)

4 Albert Embankment, London, SE1 7SR, England.

Amendments to the Annex to the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers, 1978 (STCW), and the associated Seafarers' Training, Certification and Watchkeeping Code (STCW Code), as adopted under resolutions 1 and 2, respectively, by the Conference of parties to the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers, 1978, held at IMO from June 26 to July 7, 1995—15.401; 15.403; 15.705.

3. In § 15.301, the periods at the ends of paragraphs (b)(7) and (b)(10) are removed, a semicolon is added in each place, the word "and" is added after the semicolon after paragraph (b)(10), and paragraph (b)(11) is added; and paragraphs (c)(7) and (c)(8) are added to paragraph (c) as that paragraph will stand after the revision effective on March 31, 1996, all to read as follows:

§ 15.301 Definitions of terms used in this part.

* * * * *

(b)* * *

(11) GMDSS radio operator.

(c) * * *

(7) Electronics technician.

(8) Electronics technician—Non-GMDSS.

* * * * *

4. In § 15.401, the heading is revised, the existing text is designated as paragraph (a), and paragraphs (b), (c), (d), (e), (f), (g), (h), and (i) are added, to read as follows:

§ 15.401 Employment and service within restrictions of license, document, and STCW endorsement.

* * * * *

(b) On a vessel operating beyond the boundary line, no person may employ or engage any person to serve, and no person may serve, in a position in which a person shall hold an STCW endorsement, including master, chief mate, chief engineer, second engineer, officer of the navigational or engineering watch, or radio operator, unless the person serving holds an appropriate, valid STCW certificate or endorsement issued in accordance with part 10 or 12 of this chapter.

(c) On a seagoing vessel of 500 gross tons or more, no person may employ or engage any person to serve, and no person may serve, in a rating forming part of the navigational watch, except for training, unless the person serving holds an appropriate, valid STCW certificate or endorsement issued in accordance with part 12 of this chapter.

(d) After January 31, 1997, no person may either be engaged or employed to serve on a roll-on/roll-off (ro-ro) passenger ship to which a SOLAS certificate has been issued, or perform duties on such a ship, unless he or she holds a license or document endorsed for service on ro-ro passenger ships in accordance with § 10.1005 or § 12.30–5, of this chapter, whichever is appropriate to the service or the duties.

(e) On a seagoing vessel driven by main propulsion machinery of 750 kW [1,000 hp] propulsion power or more, no person may employ or engage any person to serve, and no person may serve, in a rating forming part of a watch in a manned engine-room, nor may any person be designated to perform duties in a periodically unmanned engine-room, except for training or for the performance of duties of an unskilled nature, unless the person serving holds an appropriate, valid STCW certificate or endorsement issued in accordance with part 12 of this chapter.

(f) After January 31, 2002, on a seagoing vessel required to comply with provisions of the Global Maritime Distress and Safety System (GMDSS) in Chapter IV of SOLAS, no person may employ or engage any person to serve, and no person may serve, as the master, chief mate, or officer of the navigational watch, unless the person serving holds the appropriate Certificate for Operator of Radio in Global Maritime Distress and Safety System (GMDSS).

(g) After January 31, 1997, on a seagoing vessel required to comply with provisions of the GMDSS in Chapter IV of SOLAS, no person may employ or engage any person to serve, and no person may serve, as the person designated to perform at-sea maintenance of GMDSS installations, when such designation is used to meet the maintenance requirements imposed by STCW Regulation IV/15, unless the person serving holds an electronic-technician endorsement not limited to non-GMDSS electronic installations.

(h) After January 31, 2002, on a seagoing vessel fitted with an Automatic Radar-Plotting Aid (ARPA), no person may employ or engage any person to serve, and no person may serve, as the master, chief mate, or officer of the navigational watch, unless the person serving has been trained in the use of ARPA in accordance with § 10.205 or § 10.209 of this chapter.

(i) The provisions of paragraphs (b) through (g) of this section are effective as of August 1, 1998.

5. Section 15.403 is added to read as follows:

§ 15.403 Familiarization and basic safety-training.

(a) After January 31, 1997, on a seagoing vessel, no person may assign any person to perform shipboard duties, and no person may perform those duties, unless the person performing them has received—

(1) Familiarization training in personal survival techniques as set out in the standard of competence under STCW Regulation VI/1; or

(2) Sufficient training or instruction, to be able to—

(i) Communicate with other persons on board on elementary safety matters and understand information symbols, signs, and alarm signals covering information on safety;

(ii) Know what to do if a person falls overboard; if fire or smoke is detected; or if the fire or abandon-ship alarm sounds;

(iii) Identify stations for muster and embarkation, and emergency-escape routes;

(iv) Locate and don life-jackets;

(v) Raise the alarm and know the use of portable fire extinguishers;

(vi) Take immediate action upon encountering an accident or other medical emergency before seeking further medical assistance on board; and

(vii) Close and open the fire, weathertight, and watertight doors fitted in the particular ship other than those for hull openings.

(b) After January 31, 1997, on a seagoing vessel, no person may assign any person on board a ship, as part of the complement with designated safety or pollution-prevention duties in the operation of the ship, to perform shipboard duties, and no person may perform those duties, unless the person performing them has—

(1) Received approved basic safety-training or instruction as set out in the standards of competence under STCW Regulation VI/1, particularly with respect to personal survival techniques, fire prevention and fire-fighting, elementary first aid, and personal safety and social responsibilities; and

(2) Established competence within the last 5 years as part of an approved training program, in accordance with the methods and criteria prescribed under STCW Regulation VI/1.

(c) Each person who has met the requirements of either §§ 10.205 and 10.209 of this chapter or §§ 12.05–3, 12.10–3, and 12.15–3 of this chapter meets the requirements of this section without further training or assessment.

6. Section 15.411 is added to read as follows:

§ 15.411 Maintenance of seamen's records by owner or operator.

Each owner or operator of a U.S.-documented vessel that operates beyond the boundary line shall ensure that procedures are in place, in respect of licensed and unlicensed seamen who serve on each such vessel, to ensure that the following information is maintained throughout their service, and is readily accessible to those in management responsible for the safety of vessels and prevention of marine pollution:

(a) Medical fitness.

(b) Experience and training relevant to assigned shipboard duties.

(c) Assessment of competence in performance of assigned shipboard duties.

7. In § 15.705, paragraph (f) is revised to read as follows:

§ 15.705 Watches.

* * * * *

(f) Masters of vessels that operate beyond the boundary line shall observe the principles concerning watchkeeping as set out in STCW Regulation VIII/2 and section A–VIII/2 of the STCW Code.

8. In § 15.710, the heading is revised, paragraphs (a) through (d) are redesignated as paragraphs (1) through (4), respectively, the introductory text is designated as paragraph (a), and paragraphs (b) and (c) are added to read as follows:

§ 15.710 Working hours and rest periods.

* * * * *

(b) After January 31, 1997, each person assigned duty as officer in charge of a navigational or engineering watch, or duty in a rating forming part of a navigational or engineering watch, on any vessel that operates beyond the boundary line shall receive a minimum period of 10 hours of rest in any 24-hour period, except in an emergency, a drill, or any other overriding operation condition, provided—

(1) The hours of rest are divided into no more than two periods, one of which must be at least 6 hours in length; and

(2) The minimum period of 10 hours of rest may be reduced to not less than 6 consecutive hours as long as—

(i) No reduction extends beyond 2 days; and

(ii) He or she receives at least 70 hours of rest in each 7-day period.

(c) The Master shall post watch schedules where they are easily accessible. Each schedule must include each affected person.

(d) For purposes of applying this section—

(1) *Rest period* means a period of time during which no tasks are assigned to the person concerned, the person is not scheduled to perform any duty, and the person is allowed to sleep without being interrupted; and

(2) *Overriding operational conditions* means circumstances in which essential shipboard work cannot be delayed for reasons of safety or environment or for reasons not foreseeable at the commencement of the voyage.

Dated: 5 March 1996.

Joseph J. Angelo,

Acting Chief, Office of Marine Safety, Security and Environmental Protection.

federal register

Tuesday
March 26, 1996

Part VIII

Department of Justice

Bureau of Prisons

28 CFR Part 549

Plastic Surgery; Final Rule

DEPARTMENT OF JUSTICE

Bureau of Prisons

28 CFR Part 549

[BOP–1020–F]

RIN 1120–AA26

Plastic Surgery

AGENCY: Bureau of Prisons, Justice.

ACTION: Final rule.

SUMMARY: In this document, the Bureau of Prisons is revising its regulations concerning the circumstances and procedures under which the Bureau approves plastic surgery for inmates. Criteria under which plastic surgery may be approved are as follows: as a component of standard medical/surgical treatment, when necessary for the good order and security of the institution, and in other special situations as determined by the Medical Director. Additionally, these regulations have been reorganized to emphasize "informed consent" and to remove unnecessary provisions. This revision is intended to provide for the continued efficient and orderly operation of the Bureau and its institutions.

EFFECTIVE DATE: April 25, 1996.

ADDRESSES: Office of General Counsel, Bureau of Prisons, HOLC Room 754, 320 First Street, NW., Washington, DC 20534.

FOR FURTHER INFORMATION CONTACT: Roy Nanovic, Office of General Counsel, Bureau of Prisons, phone (202) 514–6655.

SUPPLEMENTARY INFORMATION: The Bureau of Prisons is revising its regulations on plastic surgery (28 CFR part 549, subpart D). A proposed rule on this subject was published in the **Federal Register** on October 20, 1995 (60 FR 54288).

The proposed regulations stipulated in the statement of purpose (28 CFR 549.50) that the Bureau ordinarily does not perform plastic surgery on inmates to correct preexisting disfigurements (including tattoos) on any part of the body. Plastic surgery may be performed when it is a component of the presently medically necessary standard of treatment. Plastic surgery may also be approved under special circumstances: namely, for the good order and security of the institution. Approval procedures for requests, whether for medical reasons or special circumstances, are contained in § 549.51. "Informed consent" requirements were redesignated as a separate section (§ 549.52) for the sake of emphasis. Procedures relating to staff processing of inmate identification records were removed because these administrative details are better addressed in internal instructions to staff.

The Bureau received one comment on the proposed rule. This comment supported the adoption of the proposed rule. The Bureau is therefore adopting the proposed rule as a final rule without change.

Members of the public may submit comments concerning this rule by writing to the address cited above. These comments will be considered but will receive no response in the **Federal Register**.

The Bureau of Prisons has determined that this rule is not a significant regulatory action for the purpose of E.O. 12866, and accordingly was not reviewed by the Office of Management and Budget. After review of the law and regulations, the Director, Bureau of Prisons has certified that this rule, for the purpose of the Regulatory Flexibility Act (Pub. L. 96–354), does not have a significant impact on a substantial number of small entities.

List of Subjects in 28 CFR Part 549

Prisoners.

Kathleen M. Hawk,

Director, Bureau of Prisons.

Accordingly, pursuant to the rulemaking authority vested in the Attorney General in 5 U.S.C. 552(a) and delegated to the Director, Bureau of Prisons in 28 CFR 0.96(p), part 549 in subchapter C of 28 CFR, chapter V is amended as set forth below.

Subchapter C—Institutional Management

PART 549—MEDICAL SERVICES

1. The authority citation for 28 CFR part 549 continues to read as follows:

Authority: 5 U.S.C. 301; 18 U.S.C. 3621, 3622, 3624, 4001, 4005, 4042, 4045, 4081, 4082, (Repealed in part as to offenses committed on or after November 1, 1987), 4241–4247, 5006–5024 (Repealed October 12, 1984, as to offenses committed after that date), 5039; 28 U.S.C. 509, 510; 28 CFR 0.95–0.99.

2. Subpart D, consisting of §§ 549.50 and 549.51, is revised to consist of §§ 549.50 through 549.52 as follows:

Subpart D—Plastic Surgery

Sec.
549.50 Purpose and scope.
549.51 Approval procedures.
549.52 Informed consent.

Subpart D—Plastic Surgery

§ 549.50 Purpose and scope.

The Bureau of Prisons does not ordinarily perform plastic surgery on inmates to correct preexisting disfigurements (including tattoos) on any part of the body. In circumstances where plastic surgery is a component of a presently medically necessary standard of treatment (for example, part of the treatment for facial lacerations or for mastectomies due to cancer) or it is necessary for the good order and security of the institution, the necessary surgery may be performed.

§ 549.51 Approval procedures.

The Clinical Director shall consider individually any request from an inmate or a BOP medical consultant.

(a) In circumstances where plastic surgery is a component of the presently medically necessary standard of treatment, the Clinical Director shall forward the surgery request to the Office of Medical Designations and Transportation for approval.

(b) If the Clinical Director recommends plastic surgery for the good order and security of the institution, the request for plastic surgery authorization will be forwarded to the Warden for initial approval. The Warden will forward the request through the Regional Director to the Medical Director. The Medical Director shall have the final authority to approve or deny this type of plastic surgery request.

(c) If the Clinical Director is unable to determine whether the plastic surgery qualifies as a component of presently medically necessary standard of treatment, the Clinical Director may forward the request to the Medical Director for a final determination in accordance with the provisions of paragraph (b) of this section.

§ 549.52 Informed consent.

Approved plastic surgery procedures may not be performed without the informed consent of the inmate involved.

Part IX

Department of Education

34 CFR Part 299

General Provisions, Elementary and Secondary Education Act; Proposed Rule

DEPARTMENT OF EDUCATION

34 Part 299

RIN 1810–AA82

General Provisions, Elementary and Secondary Education Act

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The U.S. Secretary of Education (the Secretary) proposes to issue general regulations governing programs under the Elementary and Secondary Education Act of 1965, as amended by the Improving America's Schools Act of 1994 (the "Elementary and Secondary Education Act", "ESEA" or the "Act"). These proposed regulations would implement several provisions in Title XIV, General Provisions, of the Act. These proposed regulations would generally govern all programs under the Act, and would establish uniform provisions that would minimize burdensome differences in implementing these provisions in individual programs.

The areas that would be covered by these proposed regulations for ESEA programs include: other regulations that would apply; priorities for empowerment zones or enterprise communities in discretionary grants; the consolidation of State and local administrative funds; maintenance of effort; services to private school children and teachers; and complaint procedures. In addition, the proposed regulations would provide further flexibility to States under Title III of the Goals 2000: Educate America Act.

DATES: Comments must be received on or before May 10, 1996.

ADDRESSES: All comments concerning these proposed regulations should be addressed to Delores Warner, U.S. Department of Education, Portals Building, 1250 Maryland Avenue SW., Room 4000, Washington, DC 20202–6110. The fax number for submitting comments is (202) 260–0310. Comments may also be sent through the Internet to General_Provisions@ed.gov.

To ensure that public comments have maximum effect in developing the final regulations, the Department urges that each comment clearly identify the specific section or sections of the regulations that the comment addresses and that comments be in the same order as the regulations.

A copy of any comments that concern information collection requirements should also be sent to the Office of Management and Budget at the address listed in the Paperwork Reduction Act section of this preamble.

FOR FURTHER INFORMATION CONTACT: For further information on this part, please contact Delores Warner. Telephone: (202) 260–1941. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: On October 20, 1994, the President signed into law the Improving America's Schools Act of 1994 (IASA) (Pub. L. 103–382). The IASA reauthorizes and fundamentally changes the ESEA, redesigning its programs so that they work together to support high-quality teaching and learning to help all children learn challenging material in academic areas and acquire the knowledge and skills they will need to succeed in the 21st century.

Throughout the reauthorized Elementary and Secondary Education Act, including Title XIV of the Act, provisions are designed to make it easier for programs to work together with, rather than separately from, one another. In addition, the Act fosters the operation of ESEA programs in unison with the broader education that children receive. For example, the reauthorized Act supports State and community reform efforts geared to challenging State academic standards, particularly those initiated or supported by the Goals 2000: Educate America Act.

Unlike the reauthorized ESEA programs, earlier ESEA programs often were not coordinated with each other and with other educational programs in the schools. The previous programs often were not designed to target funds to areas, schools or students with the greatest needs for assistance, nor were they designed to support State and local efforts at broader educational reform. They were often burdensome without adequate provisions for needed flexibility.

Virtually all of the major ESEA programs have been redesigned to include greater flexibility at the State and local levels, to support directly comprehensive State and local reforms of teaching and learning, and to ensure that all children—regardless of background and whatever school they attend—can achieve at high levels.

In implementing the Act, the Department, is issuing regulations only where absolutely necessary, and is providing flexibility to the maximum extent permitted by statute. The regulations proposed in Part 299 are consistent with this approach and are intended to provide support to educators at the State and local levels for the appropriate implementation of provisions in Title XIV and of the Act as a whole. Title XIV contains provisions that allow: flexibility, promote coordinated program services and allow waivers of certain provisions to increase the quality of instruction or improve academic performance, consolidated State and local plans and applications, consolidation of State and local administrative funds, and uniform provisions that apply to programs authorized in the ESEA. Most of the provisions of Title XIV are not the subject of regulations. The Department has issued, separately from this notice of proposed rulemaking (NPRM), non-binding guidance on a number of Title XIV provisions such as State consolidated plans (sections 14302 of the Act), waivers (section 14401 of the Act), and the Gun-Free Schools Act (sections 14601–03 of the Act). Copies of this guidance are available from Delores Warner, U.S. Department of Education, 1250 Maryland Avenue SW., Room 4000, Portals Building, Washington, DC 20202–6110.

Summary of Provisions

Section 299.1 of these proposed regulations would provide general information about the scope of these regulations and the laws and regulations that would apply to ESEA programs. Further guidance about which general administrative regulations would apply is provided in the discussion of § 299.2 in the next paragraph of this summary.

Section 299.2 of these proposed regulations would provide flexibility by permitting a State to formally adopt its own general provisions, in lieu of 34 CFR Part 80 (Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments) of the Education Department General Provisions Regulations for most ESEA programs if the State meets several minimal requirements. This flexibility is similar to flexibility that was previously included in regulations for Chapters 1 and 2 of ESEA before the 1994 amendments.

Section 299.2 would also indicate that 34 CFR Part 80 would apply to direct grant programs under ESEA and to Title XI. While this would provide States in ESEA State-administered programs the option of adopting and using their own procedures as an alternative to Part 80, the Department believes that the application of Part 80 to direct grant programs and to Title XI provides the appropriate balance of flexibility and accountability for results in those programs. As the Department continues to look for other ways to simplify the direct grant process, the Department particularly invites comments on the appropriate balance of flexibility and accountability in direct grant and Title XI programs.

Section 299.2 would indicate that 34 CFR Part 80 applies to State, local, and Indian tribal governments under direct grant programs, and programs under Title XI of ESEA (Coordinated Services). 34 CFR Part 80 also applies to other programs under the ESEA unless a State formally adopts its own written fiscal and administrative requirements for expending and accounting for all funds received by State educational agencies (SEA) and local educational agencies (LEAs) under this part that meet certain minimal requirements contained in § 299.2. This flexibility would also apply to Title III of the Goals 2000: Educate America Act.

Section 299.2 would not affect the applicability of the Department's other general administrative regulations to ESEA programs. Therefore, unless a particular regulatory provision is inconsistent with a statutory provision (in which case the statute controls), the Department's general administrative regulations apply to ESEA programs as follows:

(a) 34 CFR Part 74 (Administration of Grants to Institutions of Higher Education, Hospitals and Nonprofit Organizations) applies to grantees other than State and local governments and Indian tribal organizations.

(b) 34 CFR Part 75 (Direct Grant Programs), except for § 75.650 (participation of students enrolled in private schools), applies to all direct grant programs.

(c) 34 CFR Part 76 (State-Administered Programs), except for §§ 76.650 through 76.662 (participation of students enrolled in private schools), applies to State administered grant programs.

(d) 34 CFR Part 77 (Definitions that Apply to Department Regulations).

(e) 34 CFR Part 79 (Intergovernmental Review of Department of Education Programs and Activities) applies to some of the ESEA programs.

(f) 34 CFR Part 80 (Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments), as discussed in this preamble.

(g) 34 CFR Part 81 (General Education Provisions Act—Enforcement) applies to all ESEA programs except for Title VIII (Impact Aid) of ESEA.

(h) 34 CFR Part 82 (New Restrictions on Lobbying) applies to all ESEA programs.

(i) 34 CFR Part 85 (Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants)) applies to all ESEA programs.

(j) 34 CFR Part 86 (Drug-Free Schools and Campuses) applies to institutions of higher education.

Guidance on which of these provisions apply to Title VIII (Impact Aid) will be issued separately.

Section 299.3 of these proposed regulations would authorize the Secretary to coordinate discretionary grants under the ESEA with the Empowerment Zones and Enterprise Community initiative, a critical community revitalization strategy. Under this initiative, the United States Department of Housing and Urban Development or the United States Department of Agriculture has designated certain urban and rural areas as Empowerment Zones, including Supplemental Empowerment Zones, or Enterprise Communities. These selected areas, which are characterized by pervasive poverty, unemployment, and general distress, are implementing locally designed strategies for building healthy, safe, and economically vibrant communities. Interested individuals may contact the Department of Housing and Urban Development at 1–800–998–9999 for additional information on the Empowerment Zone and Enterprise Community initiative.

The discretionary grants under the ESEA can play a key role in helping Empowerment Zones and Enterprise Communities address key educational needs as part of a community revitalization strategy. Therefore, to encourage grantees to concentrate resources to address multi-faceted problems, under the proposed § 299.3, the Secretary would be able to give priority to applications that propose projects that serve these zones and communities.

In § 299.4, the Secretary proposes to authorize each SEA to adopt and use its own reasonable standards in determining whether the majority of its resources for administrative purposes come from non-Federal sources, a prerequisite for the consolidation of State administrative funds as authorized by section 14201 of the ESEA. Under this section, SEAs would also be permitted to adopt reasonable standards for determining when to allow the consolidation of local administrative funds. This section would provide flexibility for SEAs in these State-administered programs and fulfill the Secretary's obligation to issue regulations under section 14203.

Sections 299.5–299.12 of these proposed regulations would contain uniform provisions regarding maintaining fiscal effort, serving private school children and teachers, and for filing and resolving complaints from the public. In the past, these requirements have varied program-by-program. The revised provisions discussed as follows are designed to reduce burden for grantees by making their implementation uniform among ESEA programs.

The proposed regulations in § 299.5 for maintenance of effort would, for the first time, provide uniform provisions to reduce the burden of requiring different recordkeeping for several programs. It would also provide more flexibility than in previous regulations by excluding all Federal funds and supplemental funds spent as a result of a Presidentially declared disaster. The exclusion of Federal funds from maintenance of effort calculations is consistent with the purposes of the statutory provision. The Secretary interprets the maintenance of effort provision in section 14501 of Title XIV not to apply to Title VI programs, because of the specific maintenance of effort provision in section 6401 of Title VI. Therefore, § 299.5 also does not apply to Title VI programs.

The proposed regulations governing participation of private schools students, teachers and other personnel in §§ 299.6–299.9 are similar to the regulations for Title I of the Act (34 CFR §§ 200.10–200.14 (published on July 3, 1995 (60 FR 34800)). For example, § 299.7 on equitable participation includes the same provisions on "equal expenditures" and "equitable basis" as in 34 CFR § 200.11, except that § 299.7 does not include provisions relating to the specific distribution of Title I funds. Instead of simply cross-referencing the Title I regulations, however, for the convenience of the reader, full provisions are included in this notice.

Sections 299.6–299.9 also provide for more flexibility than in general regulations on participation of students enrolled in private schools currently in 34 CFR §§ 76.650–76.662 that would otherwise apply. Sections 299.6–299.9 would supersede the provisions of 34 CFR §§ 76.650–76.662 for the programs listed in § 299.6.

Sections 299.10–299.12 require States to establish complaint procedures in State-administered programs, so that the public is provided an opportunity to bring complaints to the attention of State program administrators. The provisions are similar to those previously included in the regulations for Chapter 1 of ESEA before the 1994 amendments, but the new regulations would provide the SEA with considerably more flexibility in

establishing reasonable procedures for resolving these complaints by authorizing SEAs to adopt their own reasonable time limits for resolving a complaint.

Executive Order 12866

1. Assessment of Costs and Benefits

These proposed regulations have been reviewed in accordance with Executive Order 12866. Under the terms of the order, the Secretary has assessed the potential costs and benefits of this regulatory action. The potential costs and benefits associated with the proposed regulations are minimal and to the extent there are costs, the costs result from the statutory requirements and regulations determined by the Secretary to be necessary for administering these programs effectively and efficiently. To the extent there are burdens specifically associated with information collection requirements, they are identified and explained elsewhere in this preamble under the heading "*Paperwork Reduction Act of 1995.*"

Thus, in assessing the potential costs and benefits—both quantitative and qualitative—of these proposed regulations, the Secretary has determined that the benefits of the proposed regulations justify the costs. The Secretary has also determined that this regulatory action does not interfere unduly with State and local governments in the exercise of their governmental functions.

To assist the Department in complying with the specific requirements of Executive Order 12866, the Secretary invites comments on whether there may be further opportunities to reduce any potential costs or increase potential benefits resulting from these proposed regulations without impeding the effective and efficient administration of the program.

2. Clarity of the Regulations

Executive Order 12866 requires each Federal agency to write regulations that are easy to understand.

The Secretary invites comment on how to make these regulations easier to understand, including answers to questions such as the following: (1) Are the requirements in the regulations clearly stated? (2) Do the regulations contain technical terms or other wording that interferes with the clarity? (3) Does the format of the regulations (grouping and order of sections, use of headings, paragraphing, etc.) aid or reduce their clarity? Would the regulations be easier to understand if they were divided into more (but shorter) sections? (A "section" is preceded by the symbol "§" and a numbered heading; for example "§ 299.1 What are the purpose and scope of the regulations?") (4) Is the description of the proposed regulations in the "Supplementary Information" section of this preamble helpful in understanding the proposed regulations? How could this description be more helpful in making the proposed regulations easier to understand? (5) What else could the Department do to make the regulations easier to understand?

A copy of any comments that concern whether these proposed regulations are easy to understand should also be sent to Stanley M. Cohen, Regulations Quality Officer, U.S. Department of Education, 600 Independence Avenue, S.W. (room 5121, FOB–10), Washington, DC, 20202–2241.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations would not have a significant economic impact on a substantial number of small entities.

The small entities that would be affected by these proposed regulations are small local educational agencies (LEAs), and public or nonprofit private agencies receiving Federal funds under the ESEA programs. The proposed regulations would not have a significant economic impact on the small entities affected because the proposed regulations would not impose excessive regulatory burdens or require unnecessary Federal supervision. The proposed regulations would impose minimal requirements to ensure the proper expenditure of program funds.

Paperwork Reduction Act of 1995

Collection of Information: General Provisions, Elementary and Secondary Education Act: Complaint Process: Sections 299.10–299.12 contain information collection requirements. As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)), the Department of Education has submitted a copy of these sections to the Office of Management and Budget (OMB) for its review under that Act.

Under sections 299.10–299.12, an SEA is required to adopt written procedures for receiving and resolving on a timely basis complaints from an organization or individual that the SEA or an agency or consortium of agencies is violating a Federal statute or regulations that apply to a covered program listed in § 299.10(b). The resolution of a complaint by the SEA may be reviewed by the Secretary, at the Secretary's discretion.

The likely respondents to the collection of information in the complaint process are individuals and organizations that submit complaints. The information submitted is used to resolve complaints and will be collected as complaints are submitted.

We estimate that each State will receive, an average of twenty complaints each year, and that each complaint will take an average of four burden hours to prepare. Therefore, the total annual reporting and recordkeeping burden that will result from the collection of this information is 4560 burden hours (fifty-seven State entities, multiplied by twenty complaints, multiplied by four burden hours for preparing each complaint).

Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Office of Information and Regulatory Affairs, OMB, Room 10235, New Executive Office Building, Washington, D.C. 20503; Attention: Desk Officer for U.S. Department of Education.

The Department considers comments by the public on these proposed collections of information in:

- Evaluating whether the proposed collections of information are necessary for the proper performance of the functions of the Department, including whether the information will have practical utility;
- Evaluating the accuracy of the Department's estimate of the burden of the proposed collections of information, including the validity of the methodology and assumptions used;
- Enhancing the quality, usefulness, and clarity of the information to be collected; and
- Minimizing the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology; e.g., permitting electronic submission of responses.

OMB is required to make a decision concerning the collection of information contained in these proposed regulations between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication. This does not affect the deadline for the public to comment to the Department on the proposed regulations.

Intergovernmental Review

Some of the programs that would be affected by these regulations are subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of the Executive order is to foster an inter-governmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance. In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for these programs.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

All comments submitted in response to these proposed regulations will be available for public inspection during and after the comment period, in rooms 4400 and 4100, respectively, Portals Building, 1250 Maryland Avenue, S.W., Washington, DC., between the hours of 8:30 a.m. and 4 p.m., Monday through Friday of each week except Federal holidays.

List of Subjects in 34 CFR Part 299

Administrative practice and procedure, Education, Elementary and secondary education, Grant programs—education, Private schools, Reporting and recordkeeping requirements.

(Catalog of Federal Domestic Assistance Number does not apply)

Dated: March 20, 1996.

Richard W. Riley,

Secretary of Education.

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by adding a new Part 299 to read as follows:

PART 299—GENERAL PROVISIONS

Subpart A—Purpose and Applicability

Sec.

299.1 What are the purpose and scope of these regulations?
299.2 What regulations apply to ESEA programs?

Subpart B—Selection Criteria

299.3 What priority may the Secretary establish for activities in an Empowerment Zone or Enterprise Community?

Subpart C—Consolidation of State and Local Administrative Funds

299.4 What requirements apply to the consolidation of state and local administrative funds?

Subpart D—Fiscal Requirements

299.5 What maintenance of effort requirements apply to ESEA programs?

Subpart E—Services to Private School Students and Teachers

299.6 What are the responsibilities for providing services to children and teachers in private schools?
299.7 What are the factors for determining equitable participation of children and teachers in private schools?
299.8 What are the requirements to ensure that funds do not benefit a private school?
299.9 What are the requirements concerning property, equipment, and supplies for the benefit of private school children and teachers?

Subpart F—Complaint Procedures

299.10 What complaint procedures shall an SEA adopt?
299.11 What are included in the complaint procedures?
299.12 How does an organization or individual file a complaint?

Authority: 20 U.S.C. 1221e–3, unless otherwise noted.

Subpart A—Purpose and Applicability

§ 299.1 What are the purpose and scope of these regulations?

(a) This part establishes uniform administrative rules for programs in Titles I through XIII of the Elementary and Secondary Education Act of 1965, as amended (ESEA), except where otherwise indicated. As indicated in particular sections of this part, certain provisions apply only to a specific group of programs.

(b) If an ESEA program does not have implementing regulations, the Secretary implements the program under the authorizing statute, and, to the extent applicable, Title XIV of ESEA, the General Education Provisions Act, the regulations in this part, and the Education Department General Administrative Regulations (34 CFR Parts 74 through 86) that are not inconsistent with specific statutory provisions of this Act.

(Authority: 20 U.S.C. 1221e-3(a)(1))

§ 299.2 What regulations apply to ESEA programs?

With regard to the applicability of Education Department General Administrative Regulations (EDGAR) to the ESEA programs (in addition to any other specific implementing regulations):

(a) 34 CFR Part 80 (Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments) applies to State, local, and Indian tribal governments under direct grant programs (as defined in 34 CFR 75.1(b)), and programs under Title XI of ESEA.

(b) 34 CFR Part 80 also applies to all other programs under the ESEA and to programs under Title III of the Goals 2000: Educate America Act (Title III of Goals 2000), unless a State formally adopts its own written fiscal and administrative requirements for expending and accounting for all funds received by State educational agencies (SEAs) and local educational agencies (LEAs) under the ESEA and Title III of Goals 2000. If a State adopts its own alternative requirements, the requirements must be available for inspection upon the request of the Secretary or the Secretary's representatives and must—

(1) Be sufficiently specific to ensure that funds received under ESEA and Title III of Goals 2000 are used in compliance with all applicable statutory and regulatory provisions;

(2) Ensure that funds received under ESEA and Title III of Goals 2000 are spent only for reasonable and necessary costs of operating programs under this part; and

(3) Ensure that funds received under ESEA and Title III of Goals 2000 are not used for general expenses required to carry out other responsibilities of State or local governments.

(Authority: 20 U.S.C. 1221e–3(a)(1))

Subpart B—Selection Criteria

§ 299.3 What priority may the Secretary establish for activities in an Empowerment Zone or Enterprise Community?

For any ESEA discretionary grant program, the Secretary may establish a priority, as authorized by 34 CFR 75.105(b), for projects that will—

(a) Use a significant portion of the program funds to address substantial problems in an Empowerment Zone, including a Supplemental Empowerment Zone, or an Enterprise Community designated by the United States Department of Housing and Urban Development or the United States Department of Agriculture; and

(b) Contribute to systemic educational reform in an Empowerment Zone, including a Supplemental Empowerment Zone, or an Enterprise Community, and are made an integral

part of the Zone or Community's comprehensive community revitalization strategies.

(Authority: 20 U.S.C. 2831(a))

Subpart C—Consolidation of State and Local Administrative Funds

§ 299.4 What requirements apply to the consolidation of state and local administrative funds?

An SEA may adopt and use its own reasonable standards in determining whether—

(a) The majority of its resources for administrative purposes come from non-Federal sources to permit the consolidation of State administrative funds in accordance with section 14201 of the Act; and

(b) To approve an LEA's consolidation of its administrative funds in accordance with section 14203 of the Act.

(Authority: 20 U.S.C. 8821 and 8823)

Subpart D—Fiscal Requirements

§ 299.5 What maintenance of effort requirements apply to ESEA programs?

(a) *General.* An LEA receiving funds under a covered program listed in subsection (b) may receive its full allocation of funds if the SEA finds that either the combined fiscal effort per student or the aggregate expenditures of State and local funds with respect to the provision of free public education in the LEA for the preceding fiscal year was not less than 90 percent of combined fiscal effort per student or the aggregate expenditures for the second preceding fiscal year.

(b) *Covered programs.* Programs covered by this subpart are the following:

(1) Part A of Title I (Improving Basic Programs Operated by Local Educational Agencies).

(2) Title II (Eisenhower Professional Development Program) (other than section 2103 and part C of this title).

(3) Subpart 2 of Part A of Title III (State and Local Programs for School Technology Resources).

(4) Part A of Title IV (Safe and Drug-Free Schools and Communities) (other than section 4114).

(c) *Meaning of "preceding fiscal year."* For purposes of determining if the requirement of paragraph (a) of this section is met, the "preceding fiscal year" means the Federal fiscal year, or the 12-month fiscal period most commonly used in a State for official reporting purposes, prior to the beginning of the Federal fiscal year in which funds are available for obligation by the Department.

Example: For fiscal year 1995 funds, that are first made available on July 1, 1995, if a State is using the Federal fiscal year, the "preceding fiscal year" is Federal fiscal year 1994 (which began on October 1, 1993 and ended September 30, 1994) and the "second preceding fiscal year" is Federal fiscal year 1993 (which began on October 1, 1992). If a State is using a fiscal year that begins on July 1, 1995, the "preceding fiscal year" is the 12-month period ending on June 30, 1994, and the "second preceding fiscal year," is the period ending on June 30, 1993.

(d) *Expenditures.* (1) In determining an LEA's compliance with paragraph (a) of this section, the SEA shall consider only the LEA's expenditures from State and local funds for free public education. These include expenditures for administration, instruction, attendance and health services, pupil transportation services, operation and maintenance of plant, fixed charges, and net expenditures to cover deficits for food services and student body activities.

(2) The SEA may not consider the following expenditures in determining an LEA's compliance with the requirement in paragraph (a) of this section:

(i) Any expenditures for community services, capital outlay, debt service or supplemental expenses made as a result of a Presidentially declared disaster.

(ii) Any expenditures made from funds provided by the Federal Government.

(Authority: 20 U.S.C. 8891)

Subpart E—Services to Private School Students and Teachers

§ 299.6 What are the responsibilities for providing services to children and teachers in private schools?

(a) *General.* An agency or consortium of agencies receiving funds under a program listed in subsection (b) of this section shall, after timely and meaningful consultation with appropriate private school officials, in accordance with that section, provide special educational services or other benefits under this part, on an equitable basis, to children who are enrolled in private elementary and secondary schools, and are eligible for that program, and to their teachers or other educational personnel.

(b) *Covered programs.* In accordance with section 14503(b) of ESEA, programs covered by this subpart are the following:

(1) Part C of Title I (Migrant Education).

(2) Title II (Professional Development) (other than section 2103 and part C of this title).

(3) Title III (other than Part B of the Title) (Star Schools).

(4) Part A of Title IV (Safe and Drug-Free Schools and Communities) (other than section 4114).

(5) Title VI (Innovative Education Program Strategies).

(6) Title VII (Bilingual Education).

(c) *Provisions not applicable.* Sections 75.650 and 76.650 through 76.662 of Part 34 of the Code of Federal Regulations (participation of students enrolled in private schools) do not apply to covered programs.

(Authority: 20 U.S.C. 8893)

§ 299.7 What are the factors for determining equitable participation of children and teachers in private schools?

(a) *Equal expenditures.* (1) Expenditures of funds made by an agency or consortium of agencies under a covered program for services for eligible private school children and their teachers and other educational personnel must be equal on a per-pupil basis to the amount of funds expended for participating public school children and their teachers and other educational personnel taking into account the number and educational needs of those children and their teachers or other educational personnel.

(2) Before determining equal expenditures under paragraph (a)(1) of this section, an agency or consortium of agencies shall pay for the reasonable and necessary administrative costs of providing services to public and private school children and their teachers or other educational personnel, from the agency's or consortium of agencies' total allocation of funds under the applicable ESEA program.

(b) *Services on an equitable basis.* (1) The services that an agency or consortium of agencies provides to eligible private school children and their teachers and other educational personnel must also be equitable in comparison to the services and other benefits provided to public school children and their teachers or other educational personnel participating in a program under this subpart.

(2) Services are equitable if the agency or consortium of these agencies—

(i) Addresses and assesses the specific needs and educational progress of eligible private school children and their teachers or other educational personnel on a comparable basis as public school children and their teachers or other educational personnel;

(ii) Determines the number of students to be served on an equitable basis;

(ii) Meets the equal expenditure requirements under paragraph (a) of this section; and

(iii) Provides private school children and their teachers or other educational personnel with an opportunity to participate that—

(A) Is equitable to the opportunity and the benefits provided to public school children and their teachers or other educational personnel; and

(B) Provides reasonable promise of those children meeting challenging academic standards as called for by the State's student performance standards and has their teachers or other educational personnel assisting these students in meeting high standards.

(3) The agency or consortium of these agencies shall make the final decisions with respect to the services to be provided to eligible private school children and their teachers or other educational personnel.

(c) If the needs of private school students, their teachers or other educational personnel are different from the needs of students, teachers or other educational personnel in the public schools, the agency or consortium of these agencies shall provide program benefits for the private school students, teachers, or other educational personnel that are different from the benefits the subgrantee provides for the public school children and their teachers or other educational personnel.

(Authority: 20 U.S.C. 8893)

§ 299.8 What are the requirements to ensure that funds do not benefit a private school?

(a) An agency or consortium of these agencies shall use funds under a covered program to provide services that supplement, and in no case supplant, the level of services that would, in the absence of services under that ESEA program, be available to participating children and their teachers or other educational personnel in private schools.

(b) An agency or consortium of those agencies shall use funds under a listed program to meet the special educational needs of participating children who attend a private school and their teachers or other educational personnel, but may not use those funds for—

(1) The needs of the private school; or

(2) The general needs of children and their teachers or other educational personnel in the private school.

(Authority: 20 U.S.C. 8893)

§ 299.9 What are the requirements concerning property, equipment, and supplies for the benefit of private school children and teachers?

(a) A public agency must keep title to, and exercise continuing administrative control of, all property, equipment, and supplies that the public agency acquires with funds under a covered program for the benefit of eligible private school children and their teachers or other educational personnel.

(b) The public agency may place equipment and supplies in a private school for the period of time needed for the program.

(c) The public agency shall ensure that the equipment and supplies placed in a private school—

(1) Are used only for proper ESEA program purposes; and

(2) Can be removed from the private school without remodeling the private school facility.

(d) The public agency must remove equipment and supplies from a private school if—

(1) The equipment and supplies are no longer needed for ESEA program purposes; or

(2) Removal is necessary to avoid unauthorized use of the equipment or supplies for other than ESEA program purposes.

(e) No funds may be used for repairs, minor remodeling, or construction of private school facilities.

(f) For the purpose of this section, the term public agency includes the agency or consortium of these agencies.

(Authority: 20 U.S.C. 8893)

Subpart F—Complaint Procedures

§ 299.10 What complaint procedures shall an SEA adopt?

(a) *General.* An SEA shall adopt written procedures, consistent with State law, for—

(1) Receiving and resolving any complaint from an organization or individual that the SEA or an agency or consortium of agencies is violating a Federal statute or regulations that apply to a covered program listed in subsection (b) of this section.

(2) Reviewing an appeal from a decision of an agency or consortium of agencies with respect to a complaint; and

(3) Conducting an independent on-site investigation of a complaint if the SEA determines that an on-site investigation is necessary.

(b) *Covered programs.* Programs covered by this subpart are the following:

(1) Part A of Title I (Improving Basic Programs Operated by Local Educational Agencies).

(2) Part B of Title I (Even Start Family Literacy Programs).

(3) Part C of Title I (Migrant Education).

(4) Part D of Title I (Children and Youth Who Are Neglected, Delinquent, or At Risk of Dropping Out).

(5) Title II (Eisenhower Professional Development Program) (other than section 2103 and part C of this title).

(6) Subpart 2 of Part A of Title III (State and Local Programs for School Technology Resources).

(7) Part A of Title IV (Safe and Drug-Free Schools and Communities) (other than section 4114).

(8) Title VI (Innovative Education Program Strategies).

(Authority: 20 U.S.C. 1221e–3(a)(1))

§ 299.11 What are included in the complaint procedures?

An SEA shall include the following in its complaint procedures—

(a) A reasonable time limit after the SEA receives a complaint for resolving the complaint, including a provision for carrying out an independent on-site investigation, if necessary.

(b) An extension of the time limit under paragraph (a) of this section only if exceptional circumstances exist with respect to a particular complaint.

(c) The right for the complainant to request the Secretary to review the final decision of the SEA, at the Secretary's discretion.

(Authority: 20 U.S.C. 1221e–3(a)(1))

§ 299.12 How does an organization or individual file a complaint?

An organization or individual may file a written signed complaint with an SEA. The complaint must include—

(a) A statement that the SEA or an agency or consortium of these agencies has violated a requirement of a Federal statute or regulations that apply to the ESEA program; and

(b) The facts on which the statement is based, and the specific requirement violated.

(Authority: 20 U.S.C. 1221e–3(a)(1))

AGENCY: Office of the Secretary, HUD.

ACTION: Final rule.

SUMMARY: In an effort to comply with the President's regulatory reform initiative, this final rule streamlines HUD's regulations governing its environmental criteria and standards. Specifically, this rule amends these regulations to eliminate provisions which do not require regulatory codification. The rule also updates the regulations to more accurately reflect current HUD organization and practices. The streamlining amendments made by this final rule will make HUD's environmental criteria clearer and more concise.

EFFECTIVE DATE: April 25, 1996.

FOR FURTHER INFORMATION CONTACT: Richard Broun, Office of Community Viability, Department of Housing and Urban Development, Room 7240, 451 Seventh Street, SW., Washington, DC 20410, telephone (202) 708–3297. Hearing- or speech-impaired individuals may access this number by calling the Federal Information Relay Service TTY at 1–800–877–8339. (With the exception of the "800" number, these numbers are not toll-free.)

SUPPLEMENTARY INFORMATION:

I. Background

On March 4, 1995, President Clinton issued a memorandum to all Federal departments and agencies regarding regulatory reinvention. In response to this memorandum, HUD conducted a page-by-page review of its regulations to determine which can be eliminated, consolidated, or otherwise improved. As part of this review, HUD reexamined its regulations at 24 CFR part 51, which govern HUD's environmental criteria and standards. HUD has determined that several streamlining amendments can be made to part 51.

This final rule removes provisions which do not require regulatory codification. For example, this rule removes most of the substance of § 51.3, which sets forth the responsibility for administering the requirements of 24 CFR part 51. The rule also removes paragraph (a) of § 51.102, which describes the authority to approve projects under part 51, subpart B. This information, while helpful to HUD's clients, will more appropriately be provided through **Federal Register** notice. Accordingly, Appendix I to this rule identifies the HUD officials with responsibility for administering the requirements of part 51 and their specific duties. HUD will update this appendix as necessary.

This final rule also updates part 51 to more accurately reflect current HUD organization and practices. For example, paragraph (a)(3) of § 51.101 sets forth HUD's policy for support of construction of new noise sensitive uses. This paragraph states that the "policy does not apply to * * * any action or emergency assistance under disaster emergency programs." The provision originally applied to FEMA programs, which are no longer under HUD jurisdiction. This final rule updates paragraph (a)(3) of § 51.101 to apply this exclusion more generally to other emergency actions, such as those performed under HUD's CDBG and HOME programs.

Finally, the rule streamlines 24 CFR part 51 to eliminate unnecessary wordiness. The streamlining amendments made by this final rule will make HUD's environmental criteria clearer and more concise.

II. Justification for Final Rulemaking

HUD generally publishes a rule for public comment before issuing a rule for effect, in accordance with its own regulations on rulemaking in 24 CFR part 10. However, part 10 provides for exceptions to the general rule if the agency finds good cause to omit advance notice and public participation. The good cause requirement is satisfied when prior public procedure is "impracticable, unnecessary, or contrary to the public interest" (24 CFR 10.1). In this case, HUD finds that prior public comment is unnecessary.

This rule merely removes provisions which are unnecessarily codified and which HUD will more appropriately set forth through **Federal Register** notice. The rule also eliminates excessive wordiness and updates the regulations at 24 CFR part 51 to reflect current HUD organization and practices. This final rule does not affect or establish policy.

III. Other Matters

A. Regulatory Flexibility Act

The Secretary, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed and approved this final rule, and in so doing certifies that this rule will not have a significant economic impact on a substantial number of small entities. This rule merely streamlines and updates regulations to reflect current organization and practices. The rule will have no adverse or disproportionate economic impact on any small entity.

B. Environmental Impact

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969. The Finding of No Significant Impact is available for public inspection during regular business hours in the Office of General Counsel, the Rules Docket Clerk, Room 10276, 451 Seventh Street, SW., Washington, DC 20410.

C. Executive Order 12612, Federalism

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, *Federalism*, has determined that this rule will not have substantial direct effects on States or their political subdivisions, or the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of government. No programmatic or policy changes will result from this rule that would affect the relationship between the Federal Government and State and local governments.

D. Executive Order 12606, The Family

The General Counsel, as the Designated Official under Executive Order 12606, *The Family*, has determined that this rule will not have the potential for significant impact on family formation, maintenance, or general well-being, and thus is not subject to review under the Order. No significant change in existing HUD policies or programs will result from promulgation of this rule.

List of Subjects in 24 CFR Part 51

Environmental protection, Airports, Hazardous substances, Housing standards, Noise control.

Accordingly, 24 CFR part 51 is amended as follows:

PART 51—ENVIRONMENTAL CRITERIA AND STANDARDS

1. The authority citation for 24 CFR part 51 is revised to read as follows:

Authority: 42 U.S.C. 3535(d), unless otherwise noted.

Subpart A—General Provisions

2–3. Section 51.2 is revised to read as follows:

§ 51.2 Authority.

This part implements the Department's responsibilities under: The National Housing Act (12 U.S.C. 1701 *et seq.*); sec. 2 of the Housing Act of 1949 (42 U.S.C. 1441); secs. 2 and 7(d) of the Department of Housing and Urban Development Act (42 U.S.C. 3531 and 3535(d)); the National Environmental Policy Act of 1969 (42 U.S.C. 4321); and the other statutes that are referred to in this part.

4. Section 51.3 is revised to read as follows:

§ 51.3 Responsibilities.

The Assistant Secretary for Community Planning and Development is responsible for administering HUD's environmental criteria and standards as set forth in this part. The Assistant Secretary for Community Planning and Development may be assisted by HUD officials in implementing the responsibilities established by this part. HUD will identify these HUD officials and their specific responsibilities through **Federal Register** notice.

§ 51.5 [Removed]

5. Section 51.5 is removed.

Subpart B—Noise Abatement and Control

6. Section 51.100 is amended by revising the introductory text of paragraph (a) and revising paragraph (b) to read as follows:

§ 51.100 Purpose and authority.

(a) It is the purpose of this subpart B to:

* * * * *

(b) *Authority.* Specific authorities for noise abatement and control are contained in the Noise Control Act of 1972, as amended (42 U.S.C. 4901 *et seq.*); and the General Services Administration, Federal Management Circular 75–2; *Compatible Land Uses at Federal Airfields.*

7. Section 51.101 is amended by:

a. Removing paragraph (a)(1)(iii); and

b. Revising paragraphs (a)(1) introductory text, (a)(1)(ii), (a)(2), and (a)(3) to read as follows:

§ 51.101 General policy.

(a) * * *

(1) *Planning assistance.* HUD requires that grantees give adequate consideration to noise exposures and sources of noise as an integral part of the urban environment when HUD assistance is provided for planning purposes, as follows:

* * * * *

(ii) Applicants shall take into consideration HUD environmental standards impacting the use of land.

(2) *Activities subject to 24 CFR part 58.* (i) Responsible entities under 24 CFR part 58 must take into consideration the noise criteria and standards in the environmental review process and consider ameliorative actions when noise sensitive land development is proposed in noise exposed areas. Responsible entities shall address deviations from the standards in their environmental reviews as required in 24 CFR part 58.

(ii) Where activities are planned in a noisy area, and HUD assistance is contemplated later for housing and/or other noise sensitive activities, the responsible entity risks denial of the HUD assistance unless the HUD standards are met.

(3) *HUD support for new construction.* HUD assistance for the construction of new noise sensitive uses is prohibited generally for projects with unacceptable noise exposures and is discouraged for projects with normally unacceptable noise exposure. (Standards of acceptability are contained in § 51.103(c).) This policy applies to all HUD programs providing assistance, subsidy or insurance for housing, manufactured home parks, nursing homes, hospitals, and all programs providing assistance or insurance for land development, redevelopment or any other provision of facilities and services which are directed to making land available for housing or noise sensitive development. The policy does not apply to research demonstration projects which do not result in new construction or reconstruction, flood insurance, interstate land sales egistration, or any action or emergency assistance under disaster assistance provisions or appropriations which are provided to save lives, protect property, protect public health and safety, remove debris and wreckage, or assistance that has the effect of restoring facilities substantially as they existed prior to the disaster.

* * * * *

8. Section 51.102 is amended by:

a. Removing paragraphs (a) and (d);

b. Redesignating paragraphs (b), (c), and (e) as paragraphs (a), (b), and (c), respectively;

c. Revising the introductory text of newly designated paragraph (b); and

d. Revising newly designated paragraph (c) to read as follows:

§ 51.102 Responsibilities.

* * * * *

(b) *Notice to applicants.* At the earliest possible stage, HUD program staff shall:

* * * * *

(c) *Interdepartmental coordination.* HUD shall foster appropriate coordination between field offices and other departments and agencies, particularly the Environmental Protection Agency, the Department of Transportation, Department of Defense representatives, and the Department of Veterans Affairs. HUD staff shall utilize the acceptability standards in commenting on the prospective impacts of transportation facilities and other noise generators in the Environmental Impact Statement review process.

9. Section 51.104 is amended by:

a. Removing paragraph (a)(1);

b. Redesignating the introductory text to paragraph (a) as paragraph (a)(1);

c. Revising paragraph (a)(2); and

d. Revising the introductory text of paragraph (b) and paragraphs (b)(1)(ii) and (b)(2) to read as follows:

§ 51.104 Special requirements.

(a) * * *

(2) *Normally unacceptable noise zones and unacceptable noise zones.* Approvals in Normally Unacceptable Noise Zones require a minimum of 5 decibels additional sound attenuation for buildings having noise-sensitive uses if the day-night average sound level is greater than 65 decibels but does not exceed 70 decibels, or a minimum of 10 decibels of additional sound attenuation if the day-night average sound level is greater than 70 decibels but does not exceed 75 decibels. Noise attenuation measures in Unacceptable Noise Zones require the approval of the Assistant Secretary for Community Planning and Development, or the Certifying Officer for activities subject to 24 CFR part 58. (See § 51.104(b)(2).)

(b) *Environmental review requirements.* Environmental reviews shall be conducted pursuant to the requirements of 24 CFR parts 50 and 58, as applicable, or other environmental regulations issued by the Department. These requirements are hereby modified for all projects proposed in the Normally Unacceptable and Unacceptable noise exposure zones as follows:

(1) * * *

(ii) When an EIS is required, the concurrence of the Program Assistant Secretary is also required before a project can be approved. For the purposes of this paragraph, an area will be considered as largely undeveloped unless the area within a 2-mile radius of

the project boundary is more than 50 percent developed for urban uses and infrastructure (particularly water and sewers) is available and has capacity to serve the project.

* * * * *

(2) *Unacceptable noise zone.* An EIS is required prior to the approval of projects with unacceptable noise exposure. Projects in or partially in an Unacceptable Noise Zone shall be submitted to the Assistant Secretary for Community Planning and Development, or the Certifying Officer for activities subject to 24 CFR part 58, for approval. The Assistant Secretary or the Certifying Officer may waive the EIS requirement in cases where noise is the only environmental issue and no outdoor noise sensitive activity will take place on the site. In such cases, an environmental review shall be made pursuant to the requirements of 24 CFR parts 50 or 58, as appropriate.

10. Section 51.105 is amended by revising paragraph (a)(1) to read as follows:

§ 51.105 Exceptions.

(a) * * *

(1) The project does not require an Environmental Impact Statement under provisions of § 51.104(b)(1) and noise is the only environmental issue.

* * * * *

11. Section 51.106 is amended by revising paragraph (a)(4) introductory text to read as follows:

§ 51.106 Implementation.

(a) * * *

(4) *Use of areawide acoustical data.* HUD encourages the preparation and use of areawide acoustical information, such as noise contours for airports. Where such new or revised contours become available for airports (civil or military) and military installations they shall first be referred to the HUD State Office (Environmental Officer) for review, evaluation and decision on appropriateness for use by HUD. The HUD State Office shall submit revised contours to the Assistant Secretary for Community Planning and Development for review, evaluation and decision whenever the area affected is changed by 20 percent or more, or whenever it is determined that the new contours will have a significant effect on HUD programs, or whenever the contours are not provided in a methodology acceptable under § 51.106(a)(1) or in other cases where the HUD State Office determines that Headquarters review is warranted. For other areawide acoustical data, review is required only where existing areawide data are being utilized and where such data have been changed to reflect changes in the measurement methodology or underlying noise source assumptions. Requests for determination on usage of new or revised areawide data shall include the following:

* * * * *

Subpart C—Siting of HUD-Assisted Projects Near Hazardous Operations Handling Conventional Fuels or Chemicals of an Explosive or Flammable Nature

12. Section 51.200 is amended by revising the introductory text to read as follows:

§ 51.200 Purpose.

The purpose of this subpart C is to:

* * * * *

13. Section 51.201 is amended by revising the definition of "*Acceptable separation distance (ASD)*" to read as follows:

§ 51.201 Definitions.

Acceptable separation distance (ASD)—means the distance beyond which the explosion or combustion of a hazard is not likely to cause structures or individuals to be subjected to blast overpressure or thermal radiation flux levels in excess of the safety standards in § 51.203. The ASD is determined by applying the safety standards established by this subpart C to the guidance set forth in HUD Guidebook, "Siting of HUD-Assisted Projects Near Hazardous Facilities."

* * * * *

§ 51.202 [Amended]

14. Section 51.202 is amended by removing the first sentence of paragraph (a).

15. Section 51.203 is amended by adding a paragraph (d) to read as follows:

§ 51.203 Safety standards.

* * * * *

(d) Background information on the standards and the logarithmic thermal radiation and blast overpressure charts that provide assistance in determining acceptable separation distances are contained in Appendix II to this subpart C.

16. Section 51.206 is revised to read as follows:

§ 51.206 Implementation.

This subpart C shall be implemented for each proposed HUD-assisted project by the HUD approving official or responsible entity responsible for review of the project. The implementation procedure will be part of the environmental review process in accordance with the procedures set forth in 24 CFR parts 50 and 58.

17. Section 51.207 is revised to read as follows:

§ 51.207 Special circumstances.

The Secretary or the Secretary's designee may, on a case-by-case basis, when circumstances warrant, require the application of this subpart C with respect to a substance not listed in Appendix I to this subpart C that would create thermal or overpressure effect in excess of that listed in § 51.203.

Subpart D—Siting of HUD Assisted Projects in Runway Clear Zones at Civil Airports and Clear Zones and Accident Potential Zones at Military Airfields

§ 51.300 [Amended]

18. Section 51.300 is amended by removing paragraph (a) and removing the paragraph designation of paragraph (b).

19. Section 51.302 is amended by revising the first sentence in paragraph (a) to read as follows:

§ 51.302 Coverage.

(a) These policies apply to HUD programs which provide assistance, subsidy or insurance for construction, land development, community development or redevelopment or any other provision of facilities and services which are designed to make land available for construction. * * *

* * * * *

20. Section 51.303 is amended by revising paragraph (a)(3) to read as follows:

§ 51.303 General policy.

* * * * *

(a) * * *

(3) Special notification requirements for Runway Clear Zones and Clear Zones. In all cases involving HUD assistance, subsidy, or insurance for the purchase or sale of an existing property in a Runway Clear Zone or Clear Zone, HUD (or the responsible entity or recipient under 24 CFR part 58) shall advise the buyer that the property is in a Runway Clear Zone or Clear Zone, what the implications of such a location are, and that there is a possibility that the property may, at a later date, be acquired by the airport operator. The buyer must sign a statement acknowledging receipt of this information.

* * * * *

21. Section 51.304 is revised to read as follows:

§ 51.304 Responsibilities.

(a) The following persons have the authority to approve actions in Accident Potential Zones:

(1) For programs subject to environmental review under 24 CFR part 58: the Certifying Officer of the responsible entity as defined in 24 CFR part 58.

(2) For all other HUD programs: the HUD approving official having approval authority for the project.

(b) The following persons have the authority to approve actions in Runway Clear Zones and Clear Zones:

(1) For programs subject to environmental review under 24 CFR part 58: The Certifying Officer of the responsible entity as defined in 24 CFR part 58.

(2) For all other HUD programs: the Program Assistant Secretary.

Dated: March 7, 1996.

Henry G. Cisneros,

Secretary.

[**Note:** This appendix will not be codified in title 24 of the CFR.]

Appendix I

Responsibility for Administering HUD's Environmental Criteria and Standards

Section

1. Purpose.
2. General Responsibilities in the Administration of HUD's Environmental Criteria and Standards.
3. Responsibilities in the Administration of HUD's Noise Abatement and Control Standards.

1. Purpose

HUD's environmental criteria and standards are set forth in 24 CFR part 51. The Assistant Secretary for Community Planning and Development is responsible for administering these regulations. However, § 51.3 states that the "Assistant Secretary * * * may be assisted by HUD officials in implementing the responsibilities established by" 24 CFR part 51. The purpose of this appendix is to identify these HUD officials and their specific duties.

It is unnecessary to codify this information in title 24 of the Code of Federal Regulations. Providing this information through **Federal Register** notice will allow HUD to better assist its clients and maintain up-to-date environmental standards. HUD will update this appendix as necessary.

Section 2 of this appendix describes the general responsibilities in administering HUD's environmental criteria and standards. These duties are applicable across-the-board to all the requirements established by 24 CFR part 51. Section 3 of this appendix is more limited in scope and complements the duties described in Section 2. Section 3 sets forth the responsibilities in administering HUD's noise abatement and control standards, which are described in subpart B to 24 CFR part 51.

2. General Responsibilities in the Administration of HUD's Environmental Criteria and Standards

HUD approving officials shall assure that adopted environmental regulations are implemented in relation to program decisions and recommendations. They shall also monitor projects to assure that mitigation measures are implemented.

3. Responsibilities in the Administration of HUD's Noise Abatement and Control Standards

(a) *Authority to approve projects.* (1) HUD approving officials shall make decisions on proposed projects with acceptable noise exposures, including projects where increased noise levels are considered acceptable because of non-acoustic benefits under 24 CFR 51.105(a). HUD approving officials may also approve projects in normally unacceptable noise exposed areas where adequate sound attenuation is provided and where the project does not require an Environmental Impact Statement under 24 CFR 51.104(b).

(2) Other approvals in normally unacceptable noise exposed areas require the concurrence of the Program Assistant Secretary.

(3) Requests for approvals of projects or portions of projects with unacceptable noise exposure shall be referred through the HUD approving official to the Assistant Secretary for Community Planning and Development for approval pursuant to 24 CFR 51.104(b).

(4) In cases where the HUD approving official determines that an important precedent or issue is involved, such cases shall be referred with recommendations to the Assistant Secretary for Community Planning and Development.

(b) *Technical assistance.* Technical assistance in the measurement, estimation, interpretation, or prediction of noise exposure is available from the Office of Community Planning and Development and the Office of Policy Development and Research. Field office questions shall be forwarded through the HUD approving official to the Assistant Secretary for Community Planning and Development or his/her designee.

Part XI

Department of Transportation

Federal Highway Administration

49 CFR Part 391
Qualifications of Drivers; Vision and Diabetes; Limited Exemptions; Final Rule

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

49 CFR Part 391

[FHWA Docket No. MC–96–2]

RIN 2125–AD73

Qualification of Drivers; Vision and Diabetes; Limited Exemptions

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Final rule.

SUMMARY: The FHWA announces a final determination and final rule to allow those drivers currently holding valid waivers from both the vision and diabetes standards contained in the Federal Motor Carrier Safety Regulations (FMCSRs) to continue to operate in interstate commerce after March 31, 1996. This action is directed solely at those drivers who have been granted temporary waivers to participate in either the Federal vision waiver study or the Federal diabetes waiver study, who numbered 2210 and 116, respectively, as of March 1, 1996. The FHWA believes that allowing this special group of drivers to continue to drive after March 31, 1996, is consistent with the public interest and safe operation of commercial motor vehicles (CMV). This action is necessary because the waiver program will be terminated on March 31, 1996, and without this action, the drivers will no longer be qualified to operate in interstate commerce after that date. With this final rule, the FHWA allows these drivers to continue operations, subject to certain operating conditions. This action also includes a technical amendment to relocate an existing provision so that all limited exemptions from driver qualification standards can be found in the same subpart.

EFFECTIVE DATE: This final rule and technical amendment are effective March 31, 1996.

FOR FURTHER INFORMATION CONTACT: The FHWA has established a telephone number to receive inquiries regarding this action. Contact Ann Dulaney at (703) 448–3094. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION: Section 206(f) of the Motor Carrier Safety Act of 1984 (MCSA), Pub. L. No. 98–554, 98 Stat. 2835 (codified at 49 U.S.C. 31136(e)) allows the Secretary of Transportation to issue waivers from the Federal Motor Carrier Safety Regulations only after a determination that such waivers are consistent with the public interest and the safe operation of CMVs. The safety performance data collected under the vision and diabetes waiver programs were used as the basis for this determination. Historically, the FHWA has issued limited waivers and does not intend to enter into any large scale program of exemptions. A separate research effort would form the basis for any future adjustments, if warranted, to the current vision and diabetes standards.

Vision Waiver Program Background

The FHWA announced its vision waiver study in a notice of final disposition on July 16, 1992 (57 FR 31458). The intent of the program was to obtain valuable information on the relationship between visual capacity [1] and the ability to operate a CMV safely. This vision waiver study program was initiated as part of an overall regulatory review of the medical qualification standards applicable to interstate CMV drivers. For a complete description of the waiver program, see the FHWA's October 6, 1994, notice of determination; request for comments, at 59 FR 50887.

A. Court Decision

On August 2, 1994, the U.S. Court of Appeals for the D.C. Circuit found that the agency's determination that the waiver program will not adversely affect the safe operation of CMVs lacked empirical support in the record and accordingly, the court found that the FHWA failed to meet the exacting requirements of section 2505(f) (now 49 U.S.C. 31136(e)). *Advocates for Highway and Auto Safety* v. *FHWA*, 28 F.3d 1288, 1294. Consequently, the Court concluded that the FHWA's adoption of the waiver program was contrary to law, and vacated and remanded the rule to the agency.

B. Proceedings After the Court Decision

On November 17, 1994, the FHWA published a notice of final determination in the **Federal Register** (59 FR 59386) extending the validity of the vision waivers through March 31, 1996. The FHWA's decision was based, in part, on data collected on the group of waived drivers indicating that they had performed and continued to perform more safely than drivers in the general population of commercial drivers. The notice announced plans to develop and impose more stringent performance conditions to further reduce safety risks to the waived drivers and highway users. For more complete information on the FHWA's actions after the court decision, see 59 FR 50887 (October 6, 1994) and 61 FR 606 (January 8,1996).

Diabetes Waiver Program Background

On July 29, 1993, the FHWA published in the **Federal Register** a notice of final disposition allowing certain insulin-using diabetic drivers to operate CMVs in interstate commerce for a 3-year period. The purpose of the waiver study program was to collect data on the driving experience of a group of insulin-using drivers and use that information to support amending, if warranted, the current diabetes requirement.[2] Approximately 140 drivers were accepted into the diabetes waiver program. For a complete description of the diabetes waiver program, see 57 FR 48011 (October 11, 1992) and 58 FR 40690 (July 29, 1993).

The August 2, 1994, court decision in *Advocates* called into question the FHWA's ability to issue waivers to insulin-treated diabetic drivers because of the similar approach used to pre-qualify drivers for participation in the diabetes waiver program.

Accordingly, the FHWA notified the diabetes waiver drivers, in separate mailings on March 28, 1995, of the court's decision and changes to the Vision and Diabetes Waiver Programs that allowed both programs to continue until March 31, 1996. The FHWA established stricter performance conditions for all participants, and enhanced the FHWA's monitoring of the performance of the waived drivers in order to ensure compliance with the statutory test as construed by the court.

Comments

The FHWA has received over 960 separate comments to the docket in response to the January 8, 1996, notice of proposed rulemaking (NPRM). The majority of comments were from drivers in the waiver programs, their families, and employers, all of whom favored the FHWA's proposal to allow waived drivers in the vision and diabetes waiver programs to continue driving in interstate commerce after March 31, 1996. Their comments addressed their safe driving records and the significant economic and emotional hardships that would likely befall them without the relief proposed in the NPRM. Other commenters in favor of the proposal include the National Private Truck Council (NPTC), the Owner- Operator Independent Drivers Association (OOIDA), the American Association of Motor Vehicle Administrators (AAMVA), the State of Utah Department of Public Safety, the U.S. Equal Employment Opportunity Commission (EEOC), the Disabilities Law Project, the American Optometric Association (AOA), Eglis K. Bogdanovics, M.D., the International Brotherhood of Teamsters, Teamsters, Chauffeurs, Warehousemen and Helpers (Local Union No. 110), Teamsters "General" (Local Union No. 200), the International Union of Operating Engineers (IUOE) and the Institute for Public Representation of the Georgetown University Law Center.

While the majority of the commenters supported the NPRM as proposed, some supported it with slight modifications. Some of the waived drivers believed that the required medical monitoring, especially the requirement for an annual physical examination pursuant to § 391.43, instead of every 2 years as is required of other drivers, was burdensome, expensive and unnecessary. One supporter believed that the proposed level of medical monitoring was insufficient and made recommendations for additional monitoring. Other supporters of the NPRM contended that the FHWA's proposal did not go far enough and urged the FHWA to extend its proposed grandfathering rights to other similarly qualified drivers who were not currently participating in the waiver programs and/or to amend its physical qualification standards to allow individual determination of the ability to drive, rather than blanket exclusions.

Phillips Petroleum Company supported the proposal for drivers currently holding vision waivers, but opposed it for those drivers holding diabetes waivers, stating that the insulin-using diabetic drivers pose a higher medical risk with potentially disastrous consequences. The American Trucking Associations (ATA) supported a "case-by case review that considered the merits of individual waived drivers," but opposed the broad issuance of waivers stating that the "analysis doesn't justify grandfathering all waived drivers."

Four commenters, the Advocates for Highway and Auto Safety (AHAS), the Insurance Institute for Highway Safety (IIHS), Philip A. Shelton, M.D., and Mr. Bernard Gustavsen, one of the waived drivers, opposed the NPRM. The comments of the AHAS and IIHS addressed the reliability and accuracy of the FHWA's risk assessment, use of the General Estimate System [3] (GES) as a comparison group, existing scientific evidence of the increased crash risk of drivers with diabetes and vision-impairments and other factors which, they contend, support their position that the FHWA should not grant grandfather rights to the drivers holding a valid Federal vision or diabetes waiver on March 31, 1996. Dr. Shelton, chairman of the Medical Advisory Board of the Department of Motor Vehicles of the State of Connecticut, believed that the FHWA's NPRM, as proposed, was without merit and created a privileged class of drivers. Mr. Gustavsen stated that he opposed the waiver program and believed that all rules and regulations prior to the waiver should remain enforced and be carried out to the fullest degree; however, it is not clear whether Mr. Gustavsen understands that, without his waiver of the current vision standard or grandfather rights after March 31, 1996, he would not qualify to operate a CMV in interstate commerce.

These comments are more fully discussed below.

Discussion of the Comments

A. In Favor

The Disabilities Law Project, a non-profit law firm representing individuals with disabilities including several waived drivers, believed that unsafe drivers have been effectively screened out of the waiver program and that the good driving performance of these remaining drivers as well as the proposed medical monitoring requirements will ensure the continued safe driving of this group of drivers. Furthermore, this firm believes that the FHWA's proposed actions are "consistent with national policy as expressed in the Rehabilitation Act of 1973 and the Americans with Disabilities Act to facilitate the employment of qualified individuals with disabilities."

The NPTC, a national association representing more than 1100 companies that utilize proprietary trucks in their business activities, believed the FHWA's proposal will be an important step in the FHWA's overall efforts to establish performance-based standards. It cited the drivers safe driving performance and emphasized the need to continue the medical monitoring. The NPTC believed "the conditions FHWA has put into place will effectively screen out any unsafe drivers and safeguard the operation of CMVs."

Egils K. Bogdanovics, M.D., a practicing endocrinologist and board member of the American Diabetes Association (Connecticut Affiliate) commented as a member of the Medical Advisory Board of the Department of Motor Vehicles of the State of Connecticut in support of the NPRM. Dr. Bogdanovics stated that he was not surprised by the safe performance of the diabetes drivers, and cited the waiver program data to support his belief that motivated insulin-treated diabetics can "scrupulously avoid hypoglycemia" and operate CMVs safely.

The AOA strongly supported the FHWA's proposal to allow the drivers in the vision waiver program to continue operating CMVs in interstate commerce after March 31,1996; however, they were silent on whether waived drivers in the diabetes program should be allowed to continue driving. The AOA believed that an examination by an ophthalmologist or optometrist as part of the medical requirements for operating under the proposed grandfather provision was appropriate.

The AAMVA commented in support of the NPRM, but expressed some reservations concerning the drivers in the diabetes waiver program. Specifically, AAMVA was concerned about the potential effects of hypoglycemia on CMV drivers. The American Diabetes Association, in earlier comments to FHWA docket MC–87–17, noted that mild hypoglycemia resulting in minor cognitive effects is not an immediately threatening emergency, although it should be addressed immediately by ingesting glucose. The FHWA believes that such ingestion can occur quickly and without stopping the vehicle. Therefore, it is requiring that the diabetic drivers carry a source of rapidly absorbable glucose while driving. Individuals with severe hypoglycemic reactions or hypoglycemic unawareness were excluded from participating in the program. The FHWA believes that today's medical technology for screening individuals for severe hypoglycemia and the proposed medical monitoring requirements, including an annual examination by a endocrinologist, ensure that such individuals will be detected and removed from the pool of diabetic drivers operating under § 391.64.

The OOIDA, a national trade association representing the interests of

[1] The current Federal vision standard for CMV drivers requires: distant visual acuity of at least 20/40 (Snellen) in each eye without corrective lenses or visual acuity separately corrected to 20/40 (Snellen) or better with corrective lenses, distant binocular acuity of at least 20/40 (Snellen) in both eyes with or without corrective lenses, field of vision of at least 70 degrees in the horizontal meridian in each eye, and the ability to recognize the colors of traffic signals and devices showing standard red, green, and amber. 49 CFR 391.41(b)(10).

[2] The Federal diabetes standard for CMV drivers requires no established medical history or clinical diagnosis of diabetes mellitus currently requiring insulin for control. 49 CFR 391.41(b)(3).

[3] The GES is a national survey conducted by the National Highway Traffic Safety Administration and was selected for use as the best measure of the prevailing national norm relative to large truck accidents.

a large number of independent owner-operators and professional drivers at both the Federal and State level, urged the FHWA to allow the waived drivers to continue to operate in interstate commerce, stating that the drivers "have earned the privilege .... as evidenced by their safety record." The OOIDA also believed that the medical monitoring requirements were sound and that the affected drivers would not object to these requirements in order to continue driving after March 31,1996.

The IBT, IUOE, and the EEOC, like OOIDA, supported the FHWA's proposal to allow the waived drivers to operate in interstate commerce after March 31, 1996, but they also urged the FHWA to move beyond this proposed action and change the physical qualification requirements to allow individual assessments of a driver's ability to safely operate a CMV in interstate commerce. They cited the good driving performance of the waived drivers and, therefore, concluded that the drivers were not a high risk group.

Comments in the form of a legal brief were filed on behalf of two self-employed interstate truck drivers by the Institute for Public Representation of the Georgetown University Law Center. Both of the drivers are petitioners in the United States Court of Appeals for the 8th Circuit, appealing the FHWA's decision to deny them waivers from the vision standard. The comments were strongly supportive of the proposed action, but strongly critical of the FHWA's failure to extend the exemption to all other drivers "identically situated." The brief contends that the FHWA has *de facto* amended the standard, and that the two drivers are now qualified under the amended standard.

The FHWA disagrees that these drivers are "identically situated." Since neither has participated in the waiver program, neither has been subject to the same performance standards, reporting requirements and monitoring. The FHWA also disagrees that the standard has been changed, but the agency is continuing its efforts to conduct the research necessary to enable it to make the changes that are indicated when that work is completed. The remaining arguments made in the comments are best left for resolution by the court in the pending litigation.

The FHWA agrees that this group of drivers is not a high risk group and will use their performance data to support allowing them to continue driving after March 31, 1996. However, it does not plan to use this data for any future adjustments to the vision and diabetes standards; nor does the FHWA plan to reopen the waiver programs in light of the Court decision in *Advocates for Highway and Auto Safety* v. *Federal Highway Administration,* (28 F. 3d 1288, D.C. Circuit 1994). The FHWA recognizes that there were weaknesses in the waiver study design and believes that the waiver study has not produced, by itself, sufficient evidence upon which to develop new vision and diabetes standards. The waived group of drivers has perform as well as or better than a similar group drawn from the general population of CMV drivers because of the waiver program preselection criteria and conditions. The FHWA's goal is to adopt driver physical qualification standards that are more performance-oriented; that is, more reflective of the actual physical requirements that foster safe operation of commercial vehicles. Therefore, the FHWA has undertaken comprehensive research to develop parameters for a more performance-based vision standard for all commercial drivers and has initiated plans to conduct a retrospective study to examine the risk associated with permitting insulin-using diabetic individuals to operate commercial motor vehicles (CMVs).

Many waived drivers who supported the proposal stated that the requirement for an annual physical qualification examination and certification, instead of every two years as required for other drivers, will be burdensome to drivers both financially and in terms of time off from work to get the examination. Other waived drivers believed that any further monitoring of their physical condition beyond the current requirements for drivers operating in interstate commerce is unwarranted for the above stated reasons and because their good driving performance proves that they are not a high risk group.

The FHWA has determined that the requirements for an annual physical qualification examination pursuant to § 391.43 and annual medical examinations by ophthalmologist or optometrist and endocrinologists are not overly burdensome in light of the facts that this group of drivers has physical conditions that would otherwise disqualify them from interstate operations pursuant to § 391.41(b)(10) and § 391.41(b)(3) of the FMCSRs and that an individual's medical or physical condition may deteriorate over time. In fact, some drivers' waivers were canceled because the disqualifying condition for which they were waived had worsened or they had developed other medical problems or conditions that caused them to be otherwise unqualified pursuant to § 391.41. Therefore, the FHWA will require the annual physical qualification examination and certification in addition to an annual eye examination for the vision impaired drivers and an annual examination by an endocrinologist for diabetic drivers as an extra precaution to ensure the continued safe operation of these drivers.

The ATA, a national trade association representing the trucking industry, commented in opposition to the broad issuance of waivers, but stated it would support a case-by-case evaluation that considered the merits of individual waived drivers. Notwithstanding the safe performance of the drivers in the waiver program, the FHWA's decision to allow this group of vision and diabetes waived drivers to operate CMVs in interstate commerce has been and continues to be based on the individual assessment of each driver's compliance with the waiver program conditions, including driving performance and medical requirements. Initially, to determine eligibility for participation in the waiver programs, individual determinations were made on the basis of complete data submitted. Each driver's application was individually examined, any missing information was required to be furnished, and each driver was measured against the waiver standards to assure that all the conditions were met. Recognizing that this group of waived drivers could potentially include some subpar drivers who individually would present an unacceptable risk, the FHWA took steps to identify and remove such drivers. The FHWA's monitoring systems, which have been in effect since the inception of the programs, were later enhanced to more promptly identify subpar performers among the waived group to ensure that safety was maintained. The FHWA's periodic verification of the waived drivers' reported accidents and citations through each driver's State motor vehicle record (MVR) was increased to monthly monitoring. Additionally, medical reports from the waived drivers have been reviewed and verified. Therefore, the FHWA has determined that the 2326 drivers in the vision and diabetes waiver programs have individually merited partial exemption from §§ 391.41(b)(10) or 391.41(b)(3).

The ATA commented that the NPRM provided "too little control" over the drivers in the waiver programs. It suggested that the FHWA should augment its proposed monitoring program by requiring (1) Copies of the annual physical qualification examination and certification pursuant to § 391.43 and the medical examinations by the appropriate medical specialists be sent directly to the FHWA to be included in a database of waived drivers, (2) that information concerning the driver's activities at the time of an insulin reaction (hypoglycemia) be reported, (3) FHWA notification to each driver 45 days in advance of the expiration of the current physical qualification certificate, and (4) the medical examiner to provide copies of the required certifications to the employer and driver. Although the ATA considered the monitoring conditions for operating under the proposed grandfather provisions to be the foundation for an appropriate monitoring program, the FHWA believes its proposed monitoring program, regarding medical requirements and performance, is an extra precaution that enlarges the current system of safeguards in place for all CMV drivers in the general population. All of the drivers who will be operating under this grandfather provision will be subject to State or Federal enforcement or licensing sanctions and, in most cases, to the penalty provisions of the commercial drivers' license regulations (49 CFR Part 383). Furthermore, the FMCSRs currently require the medical examiner to provide a copy of the medical certificate to the motor carrier. In addition, the FMCSRs do not preclude employing motor carriers, the first level enforcers under the regulatory scheme for the FMCSRs, from imposing additional requirements to ensure that their drivers meet the requirements under § 391.41. Many motor carriers obtain copies of the completed medical examination form to keep on file while others will require certification by a medical examiner of their choice even though the driver has a current medical examiner's certificate. Some employers require both. The provisions in § 391.64 will not preclude motor carriers or other employers from obtaining additional information on employees who will be operating under this grandfather provision.

Furthermore, the FHWA believes that the entire medical determination process can best be delivered through a State-administered program linked to the issuance and renewal of CDLs. After the recent completion of six pilot demonstration programs to verify these States' ability to integrate the medical determination process with the CDL process, the FHWA recommended that this medical transfer to the States be handled through a negotiated rulemaking process to begin sometime in the summer 1996. The FHWA believes that merging the medical determination process with the CDL process will provide further scrutiny of the performance of all commercial drivers. Therefore, the FHWA has determined that the monitoring conditions, as outlined in the NPRM, are more than adequate to ensure the continued safe operation of these drivers when viewed in the framework of the safeguards in place for monitoring all commercial drivers. The proposed monitoring conditions will provide safeguards for employers while not imposing an undue burden on the grandfathered drivers.

The ATA expressed concern over potential changes to the medical certificate as a result of this action and in light of additional changes that may be forthcoming as a result of the FHWA's plans for revising the medical examination form. Although the FHWA finds it necessary to change the medical certificate to verify that a driver is qualified to operate a CMV by operation under § 391.64, the FHWA is sensitive to ATA's concerns regarding an adequate lead time for informational changes to forms and to the ATA's economic concerns as a result of having to discard large inventories of current forms. Therefore, the FHWA will allow the current medical certificate form to be used until existing stocks are exhausted or until one year from the effective date of the change, whichever comes first, provided that medical examiners using existing forms make appropriate handwritten notations of the required information on such forms.

The ATA's comments included a recommendation for a final report on the FHWA's waiver programs. The FHWA will prepare a final report of its efforts in this area and will give consideration to the ATA's suggestions for information to be addressed in the report. The report will be placed in the docket.

The ATA raised several issues concerning the risk assessment used by the FHWA to justify granting grandfather rights to the waived drivers after March 31, 1996. We believe that the ATA comments contain a misunderstanding of the data presented in the Risk Assessment Report. It stated that "in assessing the accident rate of drivers in the vision waiver program, it is reported that their rate was below that of the general commercial vehicle driver population except for the period January to June 1994." The ATA is erroneously combining statements from two different tables. The NPRM did state that the accident rates of these drivers were below that of the general commercial vehicle driver population rate. That statement applied to Tables 1 and 2 in the Risk Assessment Report which reported the rates for cumulative periods of time from the beginning of the program. The accident rate given for January to June 1994 (Table 4) was presented in the context of data to be used for a trend analysis of independent time periods and no comparison was made for that data relative to the general driver population. The statement of the higher rate for that period was made in the context that it represented a departure from the accident trend across time. Even with this departure, the overall accident trend was not increasing and, in fact, showed a decreasing trend.

The ATA also stated that there was a failure to analyze the accident experience of the drivers in the two groups, vision and diabetes, in the same manner. It is true that the accident rates of the two groups were viewed in a different manner relative to the national rate, but this was done because the numbers of drivers in the two groups were so disparate (over 2,000 in the vision group versus slightly more than 100 in the diabetes group) that the same method of analysis could not appropriately be used for both. In the vision group, confidence intervals were used to relate that group's accident rate to the national rate. This was done because the number of drivers was of sufficient size that the error of estimate for the accident rate would not be so large as to allow the rate to get too much above the national rate before safety concerns were alerted. Conversely, the small numbers in the diabetes group provide an error of estimate for their accident rate which is larger and, as a result, it was determined that the actual rate without confidence intervals would be compared to the national rate. When the diabetes group's rate became larger than the national rate, a more detailed scrutiny of the drivers was made. If the lower level of the confidence interval for the vision group's rate had become larger than the national rate, a similar type of scrutiny would have been done for that group. An overall approach of this type is accepted practice to protect patients in clinical trials that investigate the therapeutic use of pharmaceutical products.

The ATA and the AAMVA commented on the proposed requirement that the endocrinologist certify that the driver is free of insulin reactions (less than one documented, symptomatic hypoglycemic reaction per month). The AAMVA misinterpreted this requirement concerning hypoglycemis to mean that one hypoglycemic reaction per month

would be allowed, including severe hypoglycemic reactions. This was not the FHWA's intent. The FHWA continues to believe that individuals with severe hypoglycemia and hypoglycemia unawareness should be excluded from operating CMVs. At the same time, the FHWA believes that mild hypoglycemia is not an immediately threatening emergency, although it must be addressed within a few minutes by ingesting glucose. The reference, "less than one documented, symptomatic hypoglycemic reaction per month," was intended to provide guidelines to the endocrinologist and medical examiner for evaluating the status of the driver's diabetic condition for the preceding 12 months. This reference was included because the FHWA was anticipating the question, " What is meant by free of insulin reactions?" To clarify this issue, the FHWA believes that an individual is free of insulin reactions if he or she does not have severe hypoglycemia (i.e., episodes of altered consciousness requiring the assistance of another person to regain control) or hypoglycemia unawareness (i.e., the inability to recognize the early symptoms of hypoglycemia), and has less than one documented, symptomatic hypoglycemic reaction per month. Any one episode or a series of documented, symptomatic hypoglycemia reactions should be evaluated in terms of the individual's overall diabetic condition, and whether the individual, as a result of such reactions, is likely to experience any diminution in driving ability. The FHWA believes that the more frequent medical evaluation and self-monitoring requirements for operating under § 391.64 will ensure that the drivers operating under this grandfather provision who develop severe hypoglycemia or hypoglycemia unawareness will be identified and promptly removed from the pool of drivers.

B. In Opposition

The AHAS voiced strong opposition to the FHWA proposal to grant grandfather rights to the drivers in the vision and diabetes waiver program after March 21, 1996. In addition to rearguing the position it took in the court proceedings, the AHAS criticized the proposal to grandfather these drivers asserting that the FHWA relied on a monitoring program that it characterized as lacking precision and containing inaccuracies and inconsistencies. The AHAS stated that the comparison of Table 1 and Table 2 in the FHWA Risk Assessment (October 12, 1995) shows a number of incongruities and that it is difficult to perform cross-table comparisons.

These two tables in the Assessment were not intended to be compared. As is stated in the text of the assesment (page 2), Table 1 is a compilation of data presented in the various monitoring reports developed throughout the course of the program. The rates presented in that table represent all drivers who were in the program at the time of the particular monitoring report. Table 2, on the other hand, is a re-examination of the accident data for only those drivers who are still in the program as of October 1995 (as was stated in the text). Given that this is a re-examination of those drivers in October 1995, it is possible to retrospectively restructure the dates of accident rate presentation with information available at that later date. Since the tables were not intended for comparison, given that they are based on different sets of drivers at different time periods with different retrospective perspectives, the appearance of apparent incongruities is not surprising. This misapplication is, unfortunately, exacerbated by some typographical errors. In Table 1, the National Accident Rate for the June 1994 comparison should be 2.400 instead of 2.422. In addition, in Table 2, the year of the national accident rate for the June 1994 comparison should be 1992 rather than 1993.

Other apparent inconsistencies identified by AHAS are explained on the basis of how data are reported to GES and to the waiver program. For example, the AHAS stated that the national accident rate used for June 1993 (the 1991 rate of 2.13) is different from that used just two months later for August 1993 (the 1992 rate of 2.40). The use of different rates is related to the availability of data from GES. The results of the GES data acquisition process for any year usually become available in late summer or early fall for the subsequent year. The 1992 GES data were not available in June 1993 but became available by August 1993.

The AHAS also pointed out that, for June 1994, the smaller number of drivers in Table 2 had a larger number of accidents (293) than the number of drivers in Table 1 for that date (292). This is explained by the nature of delays in reporting. The accidents reported in June 1994 in Table 1 are for the complete reporting period prior to that date. The data reported in Table 2 is taken from complete data reported as of October 1995.

The AHAS has also observed that the drivers remaining in the program (Table 2) have persistently higher accident rates than those shown when the program had fuller participation. The fuller program data presented in the past contains drivers whose waivers were subsequently revoked for a variety of reasons, only one of which was prompted by the driver having an accident with a citation. Having an accident with a citation is a relatively rare event, and the preponderance of revocations occurs for reporting problems, such as failure to report medical evaluations, mileage, violations, and other required data. When these individuals are removed from the program, their vehicle miles traveled (VMT) are also removed from reports but, unless they also had accidents, there is no reduction in the overall number of accidents reported. Therefore, the accident rates per million VMT will naturally increase. Even with this increase, however, the accident rates of those remaining in the vision waiver group are still considerably lower than the national rate.

The AHAS has made several statements alluding to the inadequacy of the study design in the diabetes waiver program. The AHAS claimed that the inadequacies of the design undermine the ability of the FHWA to draw inferences from the results. The AHAS' understanding of the activities surrounding the diabetes waiver is inaccurate. The FHWA is *not* presently conducting a study to generalize the feasibility of issuing waivers to diabetic drivers. No inferences about a waiver program will be drawn from these results. No research study has been in place since the U.S. Court of Appeals' decision, cited above, regarding the waiver programs. Since that time, the program has focused on the monitoring of the drivers. This means that the procedures of inferential research do not apply in this circumstance. In its place, monitoring is conducted on multiple levels: in group monitoring to compare the waived drivers' accident rates to the national accident rate as a warning device, and thereafter, on a case-by-case basis if the group monitoring indicates this is necessary.

Since the FHWA changed the focus of the waiver program, the AHAS's comments concerning the study design have been resolved. For example, given that no inference is drawn, the size of the sample is irrelevant. Also, when the FHWA detects that the group accident rate in a monitoring report exceeds the national rate, it is not contrary to study methodology to use a case-by-case review, because the monitoring effort is not a study. Moving to a case review is a prudent step in the monitoring process. It is the same process as that used in clinical trials to protect patient safety.

The AHAS stated that the conduct of case reviews is not a valid means of conducting statistical analysis. In the context explained above, this claim is clearly not relevant since the focus of the data presentation in the diabetes monitoring report was comparative and not a statistical analysis with such facets as confidence intervals.

The AHAS also stated that case-by-case evaluations are entirely subjective since they are not based on such methods as accident reconstruction. The contrast offered here is hardly valid because accident reconstruction also has subjective components and is therefore not entirely objective. In like manner, the case level analysis conducted by the FHWA is not entirely subjective. The analysis at that level seeks to determine if the reporting police officer has issued a citation indicating that the driver may be at fault. The analysis also examines the accident report to detect if there is any evidence of driving behavior that could potentially indicate a hypoglycemic event, such as crossing the median, swerving, or driving off the road. In the cases where medical attention is given to the waivered driver, reports on glucose levels are obtained. Therefore, both methods involved some analytical decision making based on evidence.

The AHAS stated that the FHWA does not review GES data to eliminate accidents in which the truck driver was at fault. It is true that the FHWA did not do this, however, the FHWA did not compare the at-fault accident rate of the diabetic group to the GES data. A comparison was made for accidents when one vehicle was towed from the scene. This rate for the diabetes group was 0.783. It was pointed out by the Insurance Institute for Highway Safety that the rate should be compared with the national rate for tow away accidents, which was estimated by the University of Michigan's Transportation Research Institute (UMTRI) to be 0.911. In this case, the diabetes group's rate is lower than the national rate (0.783 vs 0.911).

The AHAS stated that there is a problem in the reporting process which involves a lag-time in revealing accidents in the diabetes waiver program. The FHWA recognizes that there is a lag in reporting accidents in the monitoring report, but notes that there is no lag in examining accidents as they are reported to the FHWA. The lag in reporting in the monitoring report is due to the delay in the reporting of vehicle miles traveled. Since the initial focus of the monitoring report is to compare the group accident rate to the national rate, it is necessary to have complete mileage data to construct the group accident rate. The accidents that are combined with relevant mileage must be from the same period of time, and mileage data reports lag behind the accident reports. Accidents must be reported within 15 days of their occurrence. Since accidents occur at random times, it is not possible to have mileage reported concurrently with accidents. However, since the accidents are usually reported first, they are examined to determine if action should be taken relative to a particular accident.

The AHAS commented on its previous objection to the diabetes waiver program that pointed out the safety dangers inherent in a plan that relies on close monitoring. The FHWA is aware that an individual under close or tight control has a greater propensity for episodes of hypoglycemia than an individual under less rigid control. However, as the FHWA stated in an earlier notice (58 FR 40690), it is not mandating tight control for the drivers who will be operating under § 391.64. As already mentioned, individuals with severe hypoglycemia or hypoglycemia unawareness were excluded from participating in the diabetes waiver study program. Such individuals will continue to be promptly identified, found unqualified, and removed from this pool of drivers by virtue of the more frequent medical evaluation and self-monitoring conditions for operating under § 391.64.

The IIHS, in its comments opposing the FHWA's NPRM, stated that "evidence continues to mount concerning the increased crash risk of drivers with diabetes." To support this, it submitted three studies (Dionne *et al.*, 1995; Koepsell *et al.* 1994; Cox *et al.* 1993) which are addressed below. While these studies are well-performed and their results are clearly defensible, a closer scrutiny suggests that they may not be as conclusive relative to the waiver group as IIHS implies. For example, the Dionne (1995) study seems to show that diabetic drivers of straight trucks have a 2.4 relative risk of accidents when compared to healthy drivers. Taken in isolation, this result is compelling. But viewed in the broader context of the study, it is less conclusive relative to FHWA's waiver program. In particular, this study also examined diabetic drivers of articulated trucks, and there was no significant relative risk for that group. The authors of the study state that it is difficult to explain why diabetic drivers of straight trucks show elevated risk while this result does not hold for articulated trucks. They speculate that the different results may be due to company owners being more rigorous in their selection of drivers for articulated trucks or that the results are due to different levels of disease severity in the two groups of diabetic drivers.

This study does not distinguish between diabetic drivers who are treated with insulin and those who are not. The authors also do not report the number of diabetic drivers in relation to truck type. In addition to not examining the interactive effects of disease severity, the potential moderating effects of other factors (e.g., age and driving behavior) are not analyzed. Thus, while the results are significant in the context of straight trucks, the overall lack of specificity strongly suggests that this outcome is preliminary and not directly applicable to the waiver group.

Koepsell *et al.* (1994) reported that they found more than a two-fold risk of crashes among diabetic drivers who were 65 years of age or older. This would be consistent with the degenerative nature of the disease relative to aging. However, the average age of the drivers in the diabetes waiver group is slightly over 43 with less than one percent (0.85%) 65 or older. That study, therefore, is not directly relevant for the present group of drivers.

Cox *et al.* (1993) reported that in a group of 25 Type I diabetics on a driving simulator, driving performance was significantly disrupted under conditions of moderate hypoglycemia. However, it seems reasonable that these study conditions, i.e. testing conducted under fasting conditions and IV insertions in the arms of individuals being tested, would, in and of themselves, affect overall performance. The limited relevance of these study findings to the drivers in the FHWA waiver programs is best represented by the Cox Study conclusion itself: "Because we used a simulator, it is not clear to what extent these data can be extrapolated to an individual's actual driving performance."

Regarding the crash risk of drivers with vision impairments, the IIHS cited the Rogers and Janke study of California heavy vehicle operators with vision impairments. This was a 1987 study conducted at the request of the FHWA. While the study findings for this visually impaired group showed that both their accident and conviction rates, adjusted for age, were significantly and substantially higher than those for visually nonimpaired drivers, the authors concluded that the "evidence presented could not be considered compelling in substantiating the federal standard, given the lack of good data on

possible exposure differences."
Although not cited by the IIHS, McKnight *et al.* (1985) concluded in their study of monocular and binocular truck drivers that an individual's style of driving was a more predictive measure of accident involvement than was visual status. They found that monocular drivers showed deficiencies on a number of clinical visual measures, but no differences were found between monocular and binocular drivers in tasks of actual driving performance (i.e., information interpretation, hazard detection, visual search, lane keeping, clearance judgment, and gap judgment).

The IIHS claimed that there are a number of fallacies in the reasoning that lead to the FHWA proposal. As a first fallacy, it claimed that the FHWA's reasoning is based on a relatively clean individual driving record predicting future low crash risk. The IIHS indicated that this reasoning is faulty because a study of crashes in California showed that two-thirds of the crashes in one year involved drivers who had no accidents in the preceding three years.

Although this is a cogent result for individual drivers, it is not reflective of the analysis conducted by the FHWA in making the determination to grandfather this group of drivers. The FHWA has determined that the current group, and only this group of drivers, as a group, does not present an increased risk on the road. That is, individuals may have unpredictable variability in accident behavior across time but groups are not necessarily that labile. Groups can have stable behavior over time when (1) preselected and (2) closely monitored. The FHWA believes that by examining individuals in this group, over the past three years, relative to a number of responsible behaviors, the surviving group has stable behavior relative to a total accident rate, a rate that is consistently lower than the national rate. Moreover, when the accident rates of the drivers to be grandfathered were examined in six-month periods, a significant decreasing trend (page 5, Risk Assessment) was observed. Hence, while the prediction of individual crash behavior is problematic, the fact that this group has a lower accident rate than the national rates with a significantly decreasing trend strongly support the FHWA's determination that they will not present increased risk by driving on the nation's roads, while being monitored.

Furthermore, the insurance industry continues to follow a practice of setting insurance rates based on accident and conviction information that becomes available to them, indicating by industry practice that they believe a pattern of convictions and/or accidents does indicate a higher risk of a future accident. Of course, the converse is more appropriate, i.e., the absence of convictions and/or accidents indicates a lower risk of a future accident—the so called "safe driver" in insurance premium-setting parlance. This is consistent with the findings of the many studies cited in the Notice of Final Determination of November 17, 1994 (59 FR 59386) which support the principle that past behavior, in terms of accidents and convictions, is still the best predictor of future performance. Thus the FHWA believes that in determining the relative risk of this group of waived drivers, the same information being used by the insurance industry is a valid measure that should be applied in making this decision regarding relative performance of the drivers in this study versus the pool of all drivers.

The IHS also claimed that GES is an inappropriate comparison group. It stated that this has been noted by FHWA's consultant, Dr. Thomas Songer, who pointed out that such factors as age and driving patterns cannot be controlled in this manner of comparison. It is true that ancillary factors cannot be controlled through a comparison with GES, but the FHWA believes that this type of control is not of primary interest in this situation where the decision involves safety on the roads in general. For example, a study in which a control group is selected, even randomly, and matched to the study group has as its intent the achievement of internal validity in the comparison. But, as is being increasingly pointed out in medical research where randomized trials are the basis of good science, these controlled studies which do not specifically address external validity have this as the chief potential weakness with their results (U.S. General Accounting Office, "Cross Design Synthesis; A New Strategy for Medical Effectiveness Research," March 1992, GAO/PEMD–92–18). It is believed that external validity is of primary concern in the decision to allow this group of drivers to continue in their professions and, as a result, GES is the best focus for this validity.

Another fallacy alleged by the IIHS involves the FHWA's statement that most waivered drivers are not at fault in their crash involvement. It stated that the problem concerns the subjective nature of fault determination. The IIHS is correct in this finding and in its claim that a waivered driver, while not at fault, could have an impaired ability to react quickly. However, the IIHS' claim is not germane here, given the behavior of the vision waiver group. Their accident rate, even with the foregoing possibility, is still lower than the national rate.

The IIHS is correct in its assertion that the FHWA has improperly characterized the GES data. The FHWA was incorrect to state that accidents are not included in GES unless one vehicle was towed from the accident scene. The diabetes waiver group accident rate of .783 under towed vehicle condition should not have been compared to the national rate of 2.39. The IIHS was correct in stating that the 0.783 rate should have been compared to the more appropriate rate (towaway crashes) calculated by UMTRI which was 0.911. However, 0.783 is still smaller than 0.911 and the rate ratio involving these two .783/.911=.859) is less than one. For this particular group of drivers, this piece of evidence suggests they are certainly not less safe than the average CMV driver.

The IIHS stated that a limitation of the program was the methods used to ascertain crash involvement and traffic violation citations. The IIHS stated that self-reporting of crashes and violations is problematic and the primary source of verification, motor vehicle records, is less than complete. It is true that self-reporting can be problematic and requires some form of verification. At present, the FHWA verifies the waivered drivers' accident and violation reports in three ways. In some cases, driver MVRs and driving histories are obtained directly from States. Verification is also conducted by obtaining driver records through a commercial provider that does screening for automobile and truck rental companies and insurers. In addition, the FHWA is able to obtain driver histories by querying the Commercial Driver License Information System (CDLIS). The CDLIS is a component of the national CDL program which has as one of its procedures the requirement that States communicate the relevant accident and violation information for out-of-State drivers to the State of their licensing.

The IIHS' comments that jurisdictions "are not forwarding all the convictions to the primary licensing" jurisdiction is an acknowledged traffic record problem. However, for CDL drivers this is now an issue subject to State compliance requirements. It is being addressed as part of the overall effectiveness of the CDL program. There are a number of efforts underway addressing the issue of convicting jurisdiction reporting to the licensing jurisdiction, including efforts to increase the awareness of various police organizations and courts regarding the requirements of the CDL program. The FHWA will continue to vigorously pursue this issue for all licensees.

Determination

After a thorough review of the comments submitted in response to the January 8, 1996, NPRM, the FHWA believes that grandfathering this group of waived drivers to continue operating CMVs in interstate commerce, subject to the operating conditions under § 391.64, is consistent with the public interest and the safe operation of CMVs, in accordance with the Motor Carrier Safety Act of 1984 (49 U.S.C. 31136(e) (1994)).

The FHWA has documented the safe driving performance over a six-year period for the vision waived drivers and over a five-year period for diabetes waived drivers and determined that this group of waived drivers will be allowed to continue driving in interstate commerce after March 31, 1996, based on continuous and sustained safe performance as a group. The underlying basis for this action is the performance data gathered to date and risk analysis performed on this data that show that the continued operation of both waived groups of drivers, who total 2328 as of March 1, 1996, will be consistent with the public interest and safe operation of CMVs. Prior to being admitted into the study, the waiver applicants had to demonstrate a three-year period of safe driving performance (i.e., no chargeable accidents and no more than one serious traffic violation). Since the program began, the data have shown that the driving performance of this group of waived drivers is better than the driving performance of all CMV drivers collectively, based on data obtained from the General Estimates Service (GES). Moreover, each driver in the vision and diabetes waiver programs has been closely monitored, in many cases for three years or more, and the poorest performers have been eliminated. Coupled with their 3-year good driving record preceding the waivers, their continued good driving during the waiver program has earned these drivers individually partial exemption from §§ 391.41(b)(10) and 391.41(b)(3), respectively.

In addition, the FHWA believes that the continued employment of individuals with demonstrated safe driving records is in the public's interest by allowing these individuals to gain employment in occupations of their choice, by promoting economic viability and furthering national policy and legislative goals articulated in both the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1992.

Therefore, the FHWA hereby amends 49 CFR part 391 to grant grandfather rights to all drivers holding a valid Federal vision or diabetes waiver on March 31, 1996. Under the grandfather provision, the FHWA will allow only those drivers who have been granted temporary waivers to participate in the Federal vision and diabetes waiver programs, numbering 2326 as of March 1, 1996, to continue to operate in interstate commerce beyond March 31, 1996, subject to certain operating conditions. This action will provide relief to these drivers who, notwithstanding the demonstrated abilities of the group, would otherwise not be permitted to operate a CMV in interstate commerce. These grandfather provisions are conditional, in order to ensure the continued safe operation of these drivers. In addition to the conditions regarding medical requirements discussed below, the FHWA will monitor the performance of these drivers through periodic checks.

Medical Requirements for Operating Under This Grandfather Provision

The FHWA recognizes that any person's medical or physical condition may deteriorate over time. Consequently, the FHWA will require a physical examination every year under § 391.43, instead of every 2 years as is required of other drivers, as an extra precaution to ensure the continued safe operation of these drivers. Under this provision, the waived drivers, like all other interstate drivers, must be otherwise physically qualified pursuant to § 391.41 of the FMCSRs.

In addition, in this final rule, the FHWA requires the grandfathered vision impaired drivers to obtain an annual vision examination by an ophthalmologist or optometrist indicating that they have been examined within the past two months and that the vision in the better eye is at least 20/40 acuity, corrected or uncorrected. This information must be submitted to the medical examiner at the time of the individual's annual physical qualification examination under part 391 of the FMCSRs.

Similarly, diabetic drivers grandfathered as a result of this action are required to obtain an annual examination by a board certified/eligible endocrinologist who must certify that the driver (1) has been examined within the past two months; (2) is free of insulin reactions; (3) has the ability and has demonstrated willingness to properly monitor and manage his/her diabetes; and (4) does not have a diabetic condition that would adversely affect his or her ability to operate a CMV. An individual is free of insulin reactions if he or she does not have severe hypoglycemia (i.e., episodes of altered consciousness requiring the assistance of another person to regain control) or hypoglycemia unawareness (i.e., the inability to recognize the early symptoms of hypoglycemia), and has less than one documented, symptomatic hypoglycemic reaction per month. These drivers will be required to carry a source of rapidly absorbable glucose and continue to monitor their blood glucose using a portable glucose monitoring device equipped with a computerized memory one hour prior to driving and approximately every four hours while driving. Upon request, the driver must submit his or her blood glucose logs to the endocrinologist and/or the medical examiner or when otherwise directed by an authorized agent of the FHWA. A copy of the endocrinologist's report must be submitted to the medical examiner at the time of the annual physical qualification examination under part 391 of the FMCSRs.

This final rule requires this group of drivers to carry a medical certificate stating: "Medically qualified by operation of 49 CFR 391.64." Drivers who do not provide a copy of the required information from the ophthalmologist/optometrist or the endocrinologist to the medical examiner at the time of their annual physical qualification examinations cannot be recertified to continue driving a CMV in interstate commerce under this grandfather provision.

Technical Amendment

In this final rule, the FHWA also relocates the provision in part 391 granting limited exemptions for intra-city zone drivers. The current provision, required under the Motor Carrier Act of 1988 (49 U.S.C. 31136(f)), is codified as paragraph (d) of 49 CFR 391.2, General Exemptions. This action redesignates the provision, without any substantive change, as § 391.62, where it is more properly included in subpart G, Limited Exemptions. Paragraph (d)(5)(i) of 49 CFR 391.2 is also being deleted as superfluous.

Executive Order 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

The FHWA has determined that this final rule is not a significant regulatory action under Executive Order 12866 or under the regulatory policies and procedures of the DOT. It is anticipated that the economic impact of this rule will be minimal because of its limited application and the small number of

affected drivers. Moreover, this action will not have any permanent effect on any existing safety standard. It will merely continue the status quo by grandfathering some 2,300 drivers who have been operating safely for substantial periods of time. Therefore, a full regulatory evaluation is not required.

The FHWA finds that this final rule is exempt from the 30-day delayed effective date requirement of U.S.C. 553(d) because it "grants or recognizes an exemption or relieves a restriction." Without this action, CMV drivers in the agency's diabetes and vision waiver studies would no longer be qualified to operate in interstate commerce after March 31, 1996, the date on which these programs would otherwise end. This final rule enables these drivers to continue operations, subject to certain operating and monitoring conditions, granting an exemption to the vision and diabetes standards of 49 C.F.R. 391.41 that would otherwise soon apply to these drivers.

Regulatory Flexibility Act

In compliance with the Regulatory Flexibility Act, 5 U.S.C. 601–612, the FHWA has evaluated the effects of this final rule on small entities. The FHWA believes that this action will not have a significant economic impact on a substantial number of small entities because this action is directed solely at a limited number and narrowly defined population of CMV drivers operating in interstate commerce. This action will not cause a major increase in costs or prices and, therefore, will not have a significant effect on the Nation's economy.

Executive Order 12612 (Federalism Assessment)

This rulemaking will amend 49 CFR part 391 pertaining to the qualification of CMV drivers. This action will allow CMV drivers who currently hold waivers from the Federal vision and diabetes requirements to continue operating in interstate commerce after March 31, 1996. This rulemaking has been analyzed in accordance with the principles and criteria contained in Executive Order 12612. Nothing in this rulemaking will directly preempt any State law or regulation:. This rulemaking will not limit the policymaking discretion of the States. Therefore, the FHWA has determined that this rulemaking does not have sufficient federalism implications to warrant the preparation of a separate Federalism Assessment.

Executive Order 12372 (Intergovernmental Review)

Catalog of Federal Domestic Assistance Program Number 20.217, Motor Carrier Safety. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.

Paperwork Reduction Act

This program does not contain a collection of information requirement for purposes of the Paperwork Reduction Act of 1995, Pub. L. 104–13.

Regulation Identification Number

A regulation identification number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

List of Subjects in 49 CFR Part 391

Driver qualifications, Highway safety, Motor carriers, Reporting and recordkeeping requirements, Safety, Transportation.

Issued on: March 20, 1996.

Rodney E. Slater,

Federal Highway Administration.

In consideration of the foregoing, the FHWA amends title 49, CFR, subtitle B, chapter III, part 391 as set forth below:

PART 391—QUALIFICATIONS OF DRIVERS

1. The authority citation for part 391 continues to read as follows:

Authority: 49 U.S.C. 504, 31133, 31136, and 31502; and 49 CFR 1.48.

§ 391.2 [Redesignated as § 391.62]

2. Part 391 is amended by redesignating § 391.2 as § 391.62 and revising it to read as follows:

§ 391.62 Limited exemptions for intra-city zone drivers.

The provisions of §§ 391.11(b)(1) and 391.41(b)(1) through (b)(11) do not apply to a person who:

(a) Was otherwise qualified to operate and operated a commercial motor vehicle in a municipality or exempt intracity zone thereof throughout the one-year period ending November 18, 1988;

(b) Meets all the other requirements of this section;

(c) Operates wholly within the exempt intracity zone (as defined in 49 CFR 390.5);

(d) Does not operate a vehicle used in the transportation of hazardous materials in a quantity requiring placarding under regulations issued by the Secretary under 49 U.S.C. chapter 51.; and

(e) Has a medical or physical condition which:

(1) Would have prevented such person from operating a commercial motor vehicle under the Federal Motor Carrier Safety Regulations contained in this subchapter;

(2) Existed on July 1, 1988, or at the time of the first required physical examination after that date; and

(3) The examining physician has determined this condition has not substantially worsened since July 1, 1988, or at the time of the first required physical examination after that date.

3. Section 391.64 is added to read as follows:

§ 391.64 Grandfathering for certain drivers participating in vision and diabetes waiver study programs.

(a) The provisions of § 391.41(b)(3) do not apply to a driver who was a participant in good standing on March 31, 1996, in a waiver study program concerning the operation of commercial motor vehicles by insulin-controlled diabetic drivers; *provided:*

(1) The driver is physically examined every year, including an examination by a board-certified/eligible endocrinologist attesting to the fact that the driver is:

(i) Otherwise qualified under § 391.41;

(ii) Free of insulin reactions (an individual is free of insulin reactions if that individual does not have severe hypoglycemia or hypoglycemia unawareness, and has less than one documented, symptomatic hypoglycemic reaction per month);

(iii) Able to and has demonstrated willingness to properly monitor and manage his/her diabetes; and

(iv) Not likely to suffer any diminution in driving ability due to his/her diabetic condition.

(2) The driver agrees to and complies with the following conditions:

(i) A source of rapidly absorbable glucose shalll be carried at all times while driving;

(ii) Blood glucose levels shall be self-monitored one hour prior to driving and at least once every four hours while driving or on duty prior to driving using a portable glucose monitoring device equipped with a computerized memory;

(iii) Submit blood glucose logs to the endocrinologist or medical examiner at the annual examination or when otherwise directed by an authorized agent of the FHWA;

(iv) Provide a copy of the endocrinologist's report to the medical examiner at the time of the annual medical examination; and

(v) Provide a copy of the annual medical certification to the employer for retention in the driver's qualification file and retain a copy of the certification on his/her person while driving for presentation to a duly authorized Federal, State or local enforcement official.

(b) The provisions of § 391.41(b)(10) do not apply to a driver who was a participant in good standing on March 31, 1996, in a waiver study program concerning the operation of commercial motor vehicles by drivers with visual impairment in one eye; *provided:*

(1) The driver is physically examined every year, including an examination by an ophthalmologist or optometrist attesting to the fact that the driver:

(i) Is otherwise qualified under § 391.41; and

(ii) Continues to measure at least 20/40 (Snellen) in the better eye.

(2) The driver provides a copy of the ophthalmologist or optometrist report to the medical examiner at the time of the annual medical examination.

(3) The driver provides a copy of the annual medical certification to the employer for retention in the driver's qualification file and retains a copy of the certification on his/her person while driving for presentation to a duly authorized federal, state or local enforcement official.

3. Section 391.43 is amended by redesignating paragraphs (e), (f) and (g) as paragraphs (f), (g) and (h), respectively; by adding a new paragraph (e); by revising the text preceding the Instructions in newly designated paragraph (f) and the text preceding the Certificate in newly designated paragraph (h); and by amending the medical examiner's certificate form at the end of newly designated paragraph (h) by adding a new listing after the words "_____ Qualified only when wearing a hearing aid" to read as follows:

§ 391.43 Medical examination; certificate of physical examination.

* * * * *

(e) Any driver operating under a limited exemption authorized by § 391.64 shall furnish the medical examiner with a copy of the annual medical findings of the endocrinologist, ophthalmologist or optometrist, as required under that section. If the medical examiner finds the driver qualified under the limited exemption in § 391.64, such fact shall be noted on the Medical Examiner's Certificate.

(f) The medical examination shall be performed, and its results shall be recorded, substantially in accordance with the following instructions and examination form. Existing forms may be used until current printed supplies are depleted or until March 31, 1997.

* * * * *

(h) The medical examiner's certificate shall be in accordance with the following form. Existing forms may be used until current printed supplies are depleted or until March 31, 1997, provided that the medical examiner writes down in pen and ink any applicable information contained in the following form: MEDICAL EXAMINER'S CERTIFICATE

* * * * *

__Qualified by operation of 49 CFR 391.64

* * * * *

4. In § 391.45, paragraph (b)(2) is revised to read as follows:

§ 391.45 Persons who must be medically examined and certified.

* * * * *

(b) * * *

(2) Any driver authorized to operate a commercial motor vehicle only with an exempt intracity zone pursuant to § 391.62, or only by operation of the exemption in § 391.64, if such driver has not been medically examined and certified as qualified to drive in such zone during the preceding 12 months; and

Office of Management and Budget

Budget Rescissions and Deferrals; Notice

OFFICE OF MANAGEMENT AND BUDGET

Budget Rescissions and Deferrals

To the Congress of the United States

In accordance with the Congressional Budget and Impoundment Control Act of 1974, I herewith report five proposed rescissions of budgetary resources, totaling $50 million. These rescission proposals affect the Department of Defense.

William J. Clinton

The White House,

March 13, 1996.

Of the funds made available under this heading in Public Law 104-32, $10,000,000 are rescinded.

Rescission Proposal No. R96-21

PROPOSED RESCISSION OF BUDGET AUTHORITY
Report Pursuant to Section 1012 of P.L. 93-344

AGENCY: Department of Defense	New budget authority..... $ 633,814,000 (P.L. 104-32)
BUREAU: Military Construction	Other budgetary resources.. $ 2,663,432,000
Appropriations title and symbol: Military construction, Army 216/02050	Total budgetary resources... $ 3,297,246,000
	Amount proposed for rescission..... $ 10,000,000
OMB identification code: 21-2050-0-1-051	**Legal authority (in addition to sec. 1012):** ☐ Antideficiency Act ☐ Other _____
Grant program: ☐ Yes ☒ No	
Type of account or fund: ☐ Annual ☒ Multi-year: September 30, 2000 (expiration date) ☐ No-Year	**Type of budget authority:** ☒ Appropriation ☐ Contract authority ☐ Other _____

JUSTIFICATION: This appropriation provides for acquisition, construction, and installation of, and equipment for, temporary or permanent public works, military installations, facilities, and real property for the Army as currently authorized by law, including personnel in the Army Corps of Engineers. This proposal would rescind appropriations that are no longer needed because inflation for FY 1996 is less than anticipated.

ESTIMATED PROGRAM EFFECT: The Department of the Army's construction program would not be changed by this rescission proposal.

OUTLAY EFFECT: (in thousands of dollars):

DEPARTMENT OF EDUCATION

[CFDA NO.: 84.314A]

Even Start Statewide Family Literacy Initiative Grants; Notice Inviting Applications for New Awards With Fiscal Year (FY) 1995 Funds

AGENCY: Department of Education.

Note to Applicants: This notice is a complete application package. Together with the statute authorizing the program and the Education Department General Administrative Regulations (EDGAR), the notice contains all of the information, application forms, and instructions needed to apply for a grant under this competition.

Purpose of Program: To enable States to plan and implement statewide family literacy initiatives under the Even Start Family Literacy Program. Initiative activities must be conducted through a consortium of State, local, and other institutions, organizations, or agencies.

Eligible Applicants: State office or agency.

Deadline for Transmittal of Applications: May 10, 1996

Deadline for Intergovernmental Review: July 9, 1996

Available Funds: $1,000,000.

Note: Under this program, States receiving grants must make available non-Federal contributions in an amount equal to not less than the Federal funds provided under the grant, as required by section 1202(c)(2) of the Elementary and Secondary Education Act (ESEA).

Estimated Range of Awards: $75,000–$250,000.

Estimated Average Size of Awards: $200,000.

Estimated Number of Awards: 5.

Note: This Department is not bound by any estimates in this notice.

Project Period: Up to 18 months.

Applicable Regulations: The Education Department General Administrative Regulations (EDGAR) as follows:

(1) 34 CFR Part 75 (Direct Grant Programs).

(2) 34 CFR Part 77 (Definitions that Apply to Department Regulations).

(3) 34 CFR Part 79 (Intergovernmental Review of Department of Education Programs and Activities).

(4) 34 CFR Part 80 (Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments).

(5) 34 CFR Part 81 (General Education Provisions Act—Enforcement).

(6) 34 CFR Part 82 (New Restrictions on Lobbying).

(7) 34 CFR Part 85 (Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants)).

Description of Program: States receiving funds under this grant authority will use these funds to plan and implement statewide family literacy initiatives under the Even Start Family Literacy Program to coordinate and integrate existing Federal, State, and local literacy resources including resources available under Even Start, the Adult Education Act, Head Start, and the Family Support Act of 1988. Initiative activities must be conducted through a consortium of State, local, and other institutions, organizations, or agencies. The State must make available non-Federal contributions in an amount not less than the Federal funds provided under the grant for the costs to be incurred by the consortium in carrying out the activities for which the grant is awarded.

Waiver of Reporting Requirement: Under the EDGAR, an applicant generally must submit an annual performance report to the Department. (See 34 CFR 75.720 and 80.40). However, in the interest of reducing burden at the State level, the Secretary has determined that a performance report is unnecessary until the end of the project period (up to 18 months), and therefore waives the requirement for a performance report at the end of the first year (unless the end of the first year coincides with the end of the project period). This waiver is in accordance with the Secretary's authority under these regulations.

Selection Criteria: (a)(1) The Secretary uses the following selection criteria to evaluate applications for grants under this competition.

(2) The maximum composite score for all of these criteria is 100 points.

(3) The maximum score for each criterion is indicated in parentheses.

(b) *The Criteria.*—(1) *Meeting the purposes of the authorizing statute.* (20 points). The Secretary reviews each application to determine how well the project will meet the purpose of section 1202(c) of the ESEA (Even Start Statewide Family Literacy Initiatives grants), which is to enable States to plan and implement statewide family literacy initiatives, through a consortium of entities, to coordinate and integrate existing Federal, State, and local literacy resources consistent with the purpose of the Even Start Family Literacy Program (Part B of Title I of the ESEA).

(2) *Extent of need for the project.* (20 points) The Secretary reviews each application to determine the extent to which the project meets specific needs recognized in section 1202(c) of the ESEA, including consideration of—

(i) The needs addressed by the project;

(ii) How the applicant identified those needs;

(iii) How those needs will be met by the project; and

(iv) The benefits to be gained by meeting those needs.

(3) *Plan of Operation.* (35 points) The Secretary reviews each application to determine the quality of the plan of operation for the project, including—

(i) The quality of the design of the project;

(ii) The extent to which the plan of management is effective and ensures proper and efficient administration of the project;

(iii) How well the objectives of the project relate to the purposes of the program;

(iv) The quality of the applicant's plan to use its resources and personnel to achieve each objective; and

(v) How the applicant will ensure that project participants who are otherwise eligible to participate are selected without regard to race, color, national origin, gender, age, or handicapping condition.

(4) *Quality of key personnel.* (7 points)

(i) The Secretary reviews each application to determine the quality of key personnel the applicant plans to use on the project, including—

(A) The qualifications of the project director (if one is to be used);

(B) The qualifications of each of the other key personnel to be used in the project;

(C) The time that each person referred to in paragraphs (b)(4)(i) (A) and (B) will commit to the project; and

(D) How the applicant, as part of the nondiscriminatory employment practices, will ensure that its personnel are selected for employment without regard to race, color, national origin, gender, age, or handicapping condition.

(ii) To determine personnel qualifications under paragraphs (b)(4)(i) (A) and (B), the Secretary considers—

(A) Experience and training in fields related to the objectives of the project; and

(B) Any other qualifications that pertain to the quality of the project.

(5) *Budget and cost effectiveness.* (5 points) The Secretary reviews each application to determine the extent to which—

(i) The budget is adequate to support the project; and

(ii) Costs are reasonable in relation to the objectives of the project.

(6) *Evaluation plan.* (10 points) The Secretary reviews each application to determine the quality of the evaluation plan for the project, including the extent to which the applicant's methods of evaluation—

(i) Are appropriate to the project; and

(ii) To the extent possible, are objective and produce data that are quantifiable.

(Cross-reference: See 34 CFR 75.590 Evaluation by the grantee.)

(7) *Adequacy of resources.* (3 points) The Secretary reviews each application to determine the adequacy of the resources that the applicant plans to devote to the project, including facilities, equipment, and supplies.

Intergovernmental Review of Federal Programs: This program is subject to the requirements of Executive Order 12372 (Intergovernmental Review of Federal Programs) and the regulations in 34 CFR Part 79.

The objective of the Executive Order is to foster an intergovernmental partnership and to strengthen federalism by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance.

Applicants must contact the appropriate State Single Point of Contact to find out about, and to comply with, the State's process under Executive Order 12372. Applicants proposing to perform activities in more than one State should immediately contact the Single Point of Contact for each of those States and follow the procedure established in each State under the Executive Order. If you want to know the name and address of any State Single Point of Contact, see the list published in the **Federal Register** on March 31, 1995 (60 FR 16714).

In States that have not established a process or chosen a program for review, State, areawide, regional, and local entities may submit comments directly to the Department.

Any State Process Recommendation and other comments submitted by a State Single Point of Contact and any comments from State, areawide, regional, and local entities must be mailed or hand-delivered by the date indicated in this notice to the following address: The Secretary, E.O. 12372—CFDA #84.314A, U.S. Department of Education, Room 6300, 600 Independence Avenue, SW, Washington, DC 20202.

Proof of mailing will be determined on the same basis as applications (see 34 CFR 75.102). Recommendations or comments may be hand-delivered until 4:30 p.m. (Washington, DC time) on the date indicated in this notice.

PLEASE NOTE THAT THE ABOVE ADDRESS IS NOT THE SAME ADDRESS AS THE ONE TO WHICH THE APPLICANT SUBMITS ITS COMPLETED APPLICATION. *DO NOT SEND APPLICATIONS TO THE ABOVE ADDRESS. INSTRUCTIONS FOR TRANSMITTAL OF APPLICATIONS:*

(a) If an applicant wants to apply for a grant, the applicant shall—

(1) Mail the original and two copies of the application on or before the deadline date to: U.S. Department of Education, Application Control Center, Attention: Patricia McKee (CFDA #84.314A), Compensatory Education Programs, Room 3633, Regional Office Building #3, 7th and D Streets, SW, Washington, DC 20202–4725 or

(2) Hand deliver the original and two copies of the application by 4:30 p.m. (Washington, DC time) on or before the deadline date to: U.S. Department of Education, Application Control Center, Attention: Patricia McKee (CFDA #84.314A), Compensatory Education Programs, Room 3633, Regional Office Building #3, 7th and D Streets, SW, Washington, DC 20202–4725.

(b) An applicant must show one of the following as proof of mailing:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the Secretary.

(c) If any application is mailed through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing:

(1) A private metered postmark.

(2) A mail receipt that is not dated by the U.S. Postal Service.

Notes: (1) The U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

(2) The Application Control Center will mail a Grant Application Receipt Acknowledgement to each applicant. If an applicant fails to receive the notification of application receipt within 15 days from the date of mailing the application, the applicant should call the U.S. Department of Education Application Control Center at (202) 708–9494.

(3) The applicant *must* indicate on the envelope and—if not provided by the Department—in Item 10 of the Application for Federal Assistance (Standard Form 424) the CFDA number—and suffix letter, if any—of the competition under which the application is being submitted.

Application Instructions and Forms: The appendix to this application is divided into three parts plus a statement regarding estimated public reporting burden and various assurances and certifications. These parts and additional materials are organized in the same manner that the submitted application should be organized and submitted. The parts and additional materials are as follows:

Part I: Application for Federal Assistance (Standard Form 424 (Rev. 4–88)) and instructions.

Part II: Budget Information—Non-Construction Programs (ED Form No. 524) and instructions.

Part III: Application Narrative.

Additional Materials: Estimated Public Reporting Burden.

Assurances—Non-Construction Programs (Standard Form 424B).

Certifications Regarding Lobbying; Debarment, Suspension, and Other Responsibility Matters; and Drug-Free Workplace Requirements (ED 80–0013).

Certification regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion—Lower Tier Covered Transactions (ED 80–0014, 9/90) and instructions. (**Note:** ED 80–0014 is intended for the use of grantees and should not be transmitted to the Department.)

Disclosure of Lobbying Activities (Standard Form LLL) (if applicable) and instructions; and Disclosure of Lobbying Activities Continuation Sheet (Standard Form LLL-A). (See *amendments by 61* **Federal Register** 1412 (1/19/96).)

Notice to all Applicants (Section 427 of the General Education Provisions Act).

An applicant may submit information on photostatic copies of the application, budget forms, assurances, and certifications. However, the application form, assurances, and certifications must each have an original signature. No grant may be awarded unless a completed application form, including the signed assurances and certifications, have been received.

For Further Information Contact: Patricia McKee, Compensatory Education Programs, Office of Elementary and Secondary Education, U.S. Department of Education, 600 Independence Avenue, SW., (4400, Portals), Washington, DC 20202–6132. Telephone (202) 260–0991. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

Information about the Department's funding opportunities including copies of application notices for discretionary grant competitions, can be viewed on the Department's electronic bulletin board (ED Board), telephone (202) 260–9950; or on the Internet Gopher Server

at GOPHER.ED.GOV (under Announcements, Bulletins, and Press Releases). However, the official application notice for a discretionary grant competition is the notice published in the **Federal Register**.

Program Authority: 20 U.S.C. section 6362(c).

Dated: March 18, 1996.

Gerald N. Tirozzi,

Assistant Secretary, Elementary and Secondary Education.

Standard Form 424 (REV 4-88)
Prescribed by OMB Circular A-102

Authorized for Local Reproduction

INSTRUCTIONS FOR THE SF 424

This is a standard form used by applicants as a required facesheet for preapplications and applications submitted for Federal assistance. It will be used by Federal agencies to obtain applicant certification that States which have established a review and comment procedure in response to Executive Order 12372 and have selected the program to be included in their process, have been given an opportunity to review the applicant's submission.

Item:	Entry:
1.	Self-explanatory.
2.	Date application submitted to Federal agency (or State if applicable) & applicant's control number (if applicable).
3.	State use only (if applicable).
4.	If this application is to continue or revise an existing award, enter present Federal identifier number. If for a new project, leave blank.
5.	Legal name of applicant, name of primary organizational unit which will undertake the assistance activity, complete address of the applicant, and name and telephone number of the person to contact on matters related to this application.
6.	Enter Employer Identification Number (EIN) as assigned by the Internal Revenue Service.
7.	Enter the appropriate letter in the space provided.
8.	Check appropriate box and enter appropriate letter(s) in the space(s) provided: — "New" means a new assistance award. — "Continuation" means an extension for an additional funding/budget period for a project with a projected completion date. — "Revision" means any change in the Federal Government's financial obligation or contingent liability from an existing obligation.
9.	Name of Federal agency from which assistance is being requested with this application.
10.	Use the Catalog of Federal Domestic Assistance number and title of the program under which assistance is requested.
11.	Enter a brief descriptive title of the project. If more than one program is involved, you should append an explanation on a separate sheet. If appropriate (e.g., construction or real property projects), attach a map showing project location. For preapplications, use a separate sheet to provide a summary description of this project.
12.	List only the largest political entities affected (e.g., State, counties, cities).
13.	Self-explanatory.
14.	List the applicant's Congressional District and any District(s) affected by the program or project.
15.	Amount requested or to be contributed during the first funding/budget period by each contributor. Value of in-kind contributions should be included on appropriate lines as applicable. If the action will result in a dollar change to an existing award, indicate *only* the amount of the change. For decreases, enclose the amounts in parentheses. If both basic and supplemental amounts are included, show breakdown on an attached sheet. For multiple program funding, use totals and show breakdown using same categories as item 15.
16.	Applicants should contact the State Single Point of Contact (SPOC) for Federal Executive Order 12372 to determine whether the application is subject to the State intergovernmental review process.
17.	This question applies to the applicant organization, not the person who signs as the authorized representative. Categories of debt include delinquent audit disallowances, loans and taxes.
18.	To be signed by the authorized representative of the applicant. A copy of the governing body's authorization for you to sign this application as official representative must be on file in the applicant's office. (Certain Federal agencies may require that this authorization be submitted as part of the application.)

SECTION C - OTHER BUDGET INFORMATION (see instructions)

ED FORM NO. 524

BILLING CODE 4000-01-C

Instructions for ED Form No. 524

General Instructions

This form is used to apply to individual U.S. Department of Education discretionary grant programs. Unless directed otherwise, provide the same budget information for each year of the multi-year funding request. Pay attention to applicable program specific instructions, if attached.

Section A—Budget Summary

U.S. Department of Education Funds

All applicants must complete Section A and provide a breakdown by the applicable budget categories shown in lines 1–11.

Lines 1–11, columns (a)–(e):
For each project year for which funding is requested, show the total amount requested for each applicable budget category.

Lines 1–11, column (f):
Show the multi-year total for each budget category. If funding is requested for only one project year, leave this column blank.

Line 12, columns (a)–(e):
Show the total budget request for each project year for which funding is requested.

Line 12, column (f):
Show the total amount requested for all project years. If funding is requested for only one year, leave this space blank.

Section B—Budget Summary

Non-Federal Funds

If you are required to provide or volunteer to provide matching funds or other non-Federal resources to the project, these should be shown for each applicable budget category on lines 1–11 of Section B.

Lines 1–11, columns (a)–(e):
For each project year for which matching funds or other contributions are provided, show the total contribution for each applicable budget category.

Lines 1–11, column (f):
Show the multi-year total for each budget category. If non-Federal contributions are provided for only one year, leave this column blank.

Line 12, columns (a)–(e):
Show the total matching or other contribution for each project year.

Line 12, columns (f):
Show the total amount to be contributed for all years of the multi-year project. If non-Federal contributions are provided for only one year, leave this space blank.

Section C—Other Budget Information

Pay attention to applicable program specific instructions, if attached.

1. Provide an itemized budget breakdown, by project year, for each budget category listed in Sections A and B.

2. If applicable to this program, enter the type of indirect rate (provisional, predetermined, final or fixed) that will be in effect during the funding period. In addition, enter the estimated amount of the base to which the rate is applied, and the total indirect expense.

3. If applicable to this program, provide the rate and base on which fringe benefits are calculated.

4. Provide other explanations or comments you deem necessary.

Instructions for Part III Application Narrative

Before preparing the Application Narrative an applicant should read carefully the description of the program and the selection criteria the Secretary uses to evaluate applications.

The narrative should encompass each function or activity for which funds are being requested and should—

1. Begin with an Abstract; that is, a summary of the proposed project;

2. Describe the proposed project in light of the selection criteria in the order in which the criteria are listed in this application package; and

3. Include any other pertinent information that might assist the Secretary in reviewing the application package, including—

(a) A description of the activities and services for which assistance is sought;

(b) A comprehensive statement of how the applicant will plan and implement a statewide family literacy initiative in accordance with section 1202(c) of the ESEA; and

(c) An assurance that the plan will be developed in consultation with the State, local, and other institutions, organizations, and agencies that will form the consortium and carry out the plan.

4. Include, in the application budget, a description of the non-Federal contributions that the State will make, in an amount not less than the Federal funds awarded under the grant, for the costs to be incurred by the consortium in carrying out the grant activities.

5. Provide the following in response to the attached "Notice to all Applicants": (1) a reference to the portion of the application in which information appears as to how the applicant is addressing steps to promote equitable access and participation, or (2) a separate statement that contains that information.

6. For any applicant *other* than the State educational agency, include a copy of the signed set of assurances specified in section 14306(a) of the ESEA (20 USC 8856(a)) that the applicant has filed with its SEA and that is applicable to this application.

The Secretary strongly requests the applicant to limit the Application Narrative to no more than 20 double-spaced, typed pages (on one side only), although the Secretary will consider applications of greater length. The Department has found that successful applications for similar programs generally meet this page limit.

Instructions for Estimated Public Reporting Burden

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control Number. The valid OMB control number for this information collection is 1810–0590. The time required to complete this information collection is estimated to average 7½ hours (or minutes) per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: U.S. Department of Education, Washington, D.C. 20202–4651. If you have comments or concerns regarding the status of your individual submission of this form, write directly to: Patricia McKee, Compensatory Education Programs, Office of Elementary and Secondary Education, U.S. Department of Education, 600 Independence Avenue, SW, Room 4400, Portals Building, Washington D.C. 20202–6132.

ASSURANCES — NON-CONSTRUCTION PROGRAMS

Note: Certain of these assurances may not be applicable to your project or program. If you have questions, please contact the awarding agency. Further, certain Federal awarding agencies may require applicants to certify to additional assurances. If such is the case, you will be notified.

As the duly authorized representative of the applicant I certify that the applicant:

1. Has the legal authority to apply for Federal assistance, and the institutional, managerial and financial capability (including funds sufficient to pay the non-Federal share of project costs) to ensure proper planning, management and completion of the project described in this application.
2. Will give the awarding agency, the Comptroller General of the United States, and if appropriate, the State, through any authorized representative, access to and the right to examine all records, books, papers, or documents related to the award; and will establish a proper accounting system in accordance with generally accepted accounting standards or agency directives.
3. Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.
4. Will initiate and complete the work within the applicable time frame after receipt of approval of the awarding agency.
5. Will comply with the Intergovernmental Personnel Act of 1970 (42 U.S.C. §§ 4728-4763) relating to prescribed standards for merit systems for programs funded under one of the nineteen statutes or regulations specified in Appendix A of OPM's Standards for a Merit System of Personnel Administration (5 C.F.R. 900, Subpart F).
6. Will comply with all Federal statutes relating to nondiscrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§ 1681-1683, and 1685-1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. § 794), which prohibits discrimination on the basis of handicaps; (d) the Age Discrimination Act of 1975, as amended (42 U.S.C.§§ 6101-6107), which prohibits discrimination on the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended, relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) §§ 523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. 290 dd-3 and 290 ee-3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. § 3601 et seq.), as amended, relating to nondiscrimination in the sale, rental or financing of housing; (i) any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and (j) the requirements of any other nondiscrimination statute(s) which may apply to the application.
7. Will comply, or has already complied, with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91-646) which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of Federal or federally assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of Federal participation in purchases.
8. Will comply with the provisions of the Hatch Act (5 U.S.C. §§ 1501-1508 and 7324-7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.
9. Will comply, as applicable, with the provisions of the Davis-Bacon Act (40 U.S.C. §§ 276a to 276a-7), the Copeland Act (40 U.S.C. § 276c and 18 U.S.C. §§ 874), and the Contract Work Hours and Safety Standards Act (40 U.S.C. §§ 327-333), regarding labor standards for federally assisted construction subagreements.

Standard Form 424B (4-88)
Prescribed by OMB Circular A-102

Authorized for Local Reproduction

10. Will comply, if applicable, with flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973 (P.L. 93-234) which requires recipients in a special flood hazard area to participate in the program andto purchase flood insurance if the total cost of insurable construction and acquisition is $10,000 or more.
11. Will comply with environmental standards which may be prescribed pursuant to the following: (a) institution of environmental quality control measures under the National Environmental Policy Act of 1969 (P.L. 91-190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in floodplains in accordance with EO 11988; (e) assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. §§ 1451 et seq.); (f) conformity of Federal actions to State (Clear Air) Implementation Plans under Section 176(c) of the Clear Air Act of 1955, as amended (42 U.S.C. § 7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended, (P.L. 93-523); and (h) protection of endangered species under the Endangered Species Act of 1973, as amended, (P.L. 93-205).
12. Will comply with the Wild and Scenic Rivers Act of 1968 (16 U.S.C. §§ 1271 et seq.) related to protecting components or potential components of the national wild and scenic rivers system.
13. Will assist the awarding agency in assuring compliance with Section 106 of the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470), EO 11593 (identification and protection of historic properties), and the Archaeological and Historic Preservation Act of 1974 (16 U.S.C. 469a-1 et seq.).
14. Will comply with P.L. 93-348 regarding the protection of human subjects involved in research, development, and related activities supported by this award of assistance.
15. Will comply with the Laboratory Animal Welfare Act of 1966 (P.L. 89-544, as amended, 7 U.S.C. 2131 et seq.) pertaining to the care, handling, and treatment of warm blooded animals held for research, teaching, or other activities supported by this award of assistance.
16. Will comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. §§ 4801 et seq.) which prohibits the use of lead based paint in construction or rehabilitation of residence structures.
17. Will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act of 1984.
18. Will comply with all applicable requirements of all other Federal laws, executive orders, regulations and policies governing this program.

SIGNATURE OF AUTHORIZED CERTIFYING OFFICIAL	TITLE
APPLICANT ORGANIZATION	DATE SUBMITTED

SF 424B (4-88) Back

CERTIFICATIONS REGARDING LOBBYING; DEBARMENT, SUSPENSION AND OTHER RESPONSIBILITY MATTERS; AND DRUG-FREE WORKPLACE REQUIREMENTS

Applicants should refer to the regulations cited below to determine the certification to which they are required to attest. Applicants should also review the instructions for certification included in the regulations before completing this form. Signature of this form provides for compliance with certification requirements under 34 CFR Part 82, "New Restrictions on Lobbying," and 34 CFR Part 85, "Government-wide Debarment and Suspension (Nonprocurement) and Government-wide Requirements for Drug-Free Workplace (Grants)." The certifications shall be treated as a material representation of fact upon which reliance will be placed when the Department of Education determines to award the covered transaction, grant, or cooperative agreement.

1. LOBBYING

As required by Section 1352, Title 31 of the U.S. Code, and implemented at 34 CFR Part 82, for persons entering into a grant or cooperative agreement over $100,000, as defined at 34 CFR Part 82, Sections 82.105 and 82.110, the applicant certifies that:

(a) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the making of any Federal grant, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal grant or cooperative agreement;

(b) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal grant or cooperative agreement, the undersigned shall complete and submit Standard Form - LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions;

(c) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subgrants, contracts under grants and cooperative agreements, and subcontracts) and that all subrecipients shall certify and disclose accordingly.

2. DEBARMENT, SUSPENSION, AND OTHER RESPONSIBILITY MATTERS

As required by Executive Order 12549, Debarment and Suspension, and implemented at 34 CFR Part 85, for prospective participants in primary covered transactions, as defined at 34 CFR Part 85, Sections 85.105 and 85.110 –

A. The applicant certifies that it and its principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;

(b) Have not within a three-year period preceding this application been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

(c) Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State, or local) with commission of any of the offenses enumerated in paragraph (1)(b) of this certification; and

(d) Have not within a three-year period preceding this application had one or more public transactions (Federal, State, or local) terminated for cause or default; and

B. Where the applicant is unable to certify to any of the statements in this certification, he or she shall attach an explanation to this application.

3. DRUG-FREE WORKPLACE (GRANTEES OTHER THAN INDIVIDUALS)

As required by the Drug-Free Workplace Act of 1988, and implemented at 34 CFR Part 85, Subpart F, for grantees, as defined at 34 CFR Part 85, Sections 85.605 and 85.610 –

A. The applicant certifies that it will or will continue to provide a drug-free workplace by:

(a) Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the grantee's workplace and specifying the actions that will be taken against employees for violation of such prohibition;

(b) Establishing an on-going drug-free awareness program to inform employees about–

(1) The dangers of drug abuse in the workplace;

(2) The grantee's policy of maintaining a drug-free workplace;

(3) Any available drug counseling, rehabilitation, and employee assistance programs; and

(4) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;

(c) Making it a requirement that each employee to be engaged in the performance of the grant be given a copy of the statement required by paragraph (a);

(d) Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under the grant, the employee will–

(1) Abide by the terms of the statement; and

(2) Notify the employer in writing of his or her conviction for a violation of a criminal drug statute occurring in the workplace no later than five calendar days after such conviction;

(e) Notifying the agency, in writing, within 10 calendar days after receiving notice under subparagraph (d)(2) from an employee or otherwise receiving actual notice of such conviction. Employers of convicted employees must provide notice, including position title, to: Director, Grants and Contracts Service, U.S. Department of Education, 400 Maryland Avenue, S.W. (Room 3124, GSA Regional Office Building No. 3),

Washington, DC 20202-4571. Notice shall include the identification number(s) of each affected grant;

(f) Taking one of the following actions, within 30 calendar days of receiving notice under subparagraph (d)(2), with respect to any employee who is so convicted–

(1) Taking appropriate personnel action against such an employee, up to and including termination, consistent with the requirements of the Rehabilitation Act of 1973, as amended; or

(2) Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency;

(g) Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a), (b), (c), (d), (e), and (f).

B. The grantee may insert in the space provided below the site(s) for the performance of work done in connection with the specific grant:

Place of Performance (Street address, city, county, state, zip code)

_____

_____

_____

Check ☐ if there are workplaces on file that are not identified here.

DRUG-FREE WORKPLACE (GRANTEES WHO ARE INDIVIDUALS)

As required by the Drug-Free Workplace Act of 1988, and implemented at 34 CFR Part 85, Subpart F, for grantees, as defined at 34 CFR Part 85, Sections 85.605 and 85.610 –

A. As a condition of the grant, I certify that I will not engage in the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance in conducting any activity with the grant; and

B. If convicted of a criminal drug offense resulting from a violation occurring during the conduct of any grant activity, I will report the conviction, in writing, within 10 calendar days of the conviction, to: Director, Grants and Contracts Service, U.S. Department of Education, 400 Maryland Avenue, S.W. (Room 3124, GSA Regional Office Building No. 3), Washington, DC 20202-4571. Notice shall include the identification number(s) of each affected grant.

As the duly authorized representative of the applicant, I hereby certify that the applicant will comply with the above certifications.

Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion – Lower Tier Covered Transactions

This certification is required by the Department of Education regulations implementing Executive Order 12549, Debarment and Suspension, 34 CFR Part 85, for all lower tier transactions meeting the threshold and tier requirements stated at Section 85.110.

Instructions for Certification

1. By signing and submitting this proposal, the prospective lower tier participant is providing the certification set out below.

2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

3. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

4. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of rules implementing Executive Order 12549. You may contact the person to which this proposal is submitted for assistance in obtaining a copy of those regulations.

5. The prospective lower tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated.

6. The prospective lower tier participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion—Lower Tier Covered Transactions," without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

7. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List.

8. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

9. Except for transactions authorized under paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

Certification

(1) The prospective lower tier participant certifies, by submission of this proposal, that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency.

(2) Where the prospective lower tier participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal.

Federal Use Only: Authorized for Local Reproduction Standard Form - LLL

INSTRUCTIONS FOR COMPLETION OF SF-LLL, DISCLOSURE OF LOBBYING ACTIVITIES

This disclosure form shall be completed by the reporting entity, whether subawardee or prime Federal recipient, at the initiation or receipt of a covered Federal action, or a material change to a previous filing, pursuant to title 31 U.S.C. section 1352. The filing of a form is required for each payment or agreement to make payment to any lobbying entity for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with a covered Federal action. Use the SF-LLL-A Continuation Sheet for additional information if the space on the form is inadequate. Complete all items that apply for both the initial filing and material change report. Refer to the implementing guidance published by the Office of Management and Budget for additional information.

1. Identify the type of covered Federal action for which lobbying activity is and/or has been secured to influence the outcome of a covered Federal action.

2. Identify the status of the covered Federal action.

3. Identify the appropriate classification of this report. If this is a followup report caused by a material change to the information previously reported, enter the year and quarter in which the change occurred. Enter the date of the last previously submitted report by this reporting entity for this covered Federal action.

4. Enter the full name, address, city, state and zip code of the reporting entity. Include Congressional District, if known. Check the appropriate classification of the reporting entity that designates if it is, or expects to be, a prime or subaward recipient. Identify the tier of the subawardee, e.g., the first subawardee of the prime is the 1st tier. Subawards include but are not limited to subcontracts, subgrants and contract awards under grants.

5. If the organization filing the report in item 4 checks "Subawardee", then enter the full name, address, city, state and zip code of the prime Federal recipient. Include Congressional District, if known.

6. Enter the name of the Federal agency making the award or loan commitment. Include at least one organizational level below agency name, if known. For example, Department of Transportation, United States Coast Guard.

7. Enter the Federal program name or description for the covered Federal action (item 1). If known, enter the full Catalog of Federal Domestic Assistance (CFDA) number for grants, cooperative agreements, loans, and loan commitments.

8. Enter the most appropriate Federal identifying number available for the Federal action identified in item 1 (e.g., Request for Proposal (RFP) number; Invitation for Bid (IFB) number; grant announcement number; the contract, grant, or loan award number; the application/proposal control number assigned by the Federal agency). Include prefixes, e.g., "RFP-DE-90-001."

9. For a covered Federal action where there has been an award or loan commitment by the Federal agency, enter the Federal amount of the award/loan commitment for the prime entity identified in item 4 or 5.

10. (a) Enter the full name, address, city, state and zip code of the lobbying entity engaged by the reporting entity identified in item 4 to influence the covered Federal action.

    (b) Enter the full names of the individual(s) performing services, and include full address if different from 10 (a). Enter Last Name, First Name, and Middle Initial (MI).

11. Enter the amount of compensation paid or reasonably expected to be paid by the reporting entity (item 4) to the lobbying entity (item 10). Indicate whether the payment has been made (actual) or will be made (planned). Check all boxes that apply. If this is a material change report, enter the cumulative amount of payment made or planned to be made.

12. Check the appropriate box(es). Check all boxes that apply. If payment is made through an in-kind contribution, specify the nature and value of the in-kind payment.

13. Check the appropriate box(es). Check all boxes that apply. If other, specify nature.

14. Provide a specific and detailed description of the services that the lobbyist has performed, or will be expected to perform, and the date(s) of any services rendered. Include all preparatory and related activity, not just time spent in actual contact with Federal officials. Identify the Federal official(s) or employee(s) contacted or the officer(s), employee(s), or Member(s) of Congress that were contacted.

15. Check whether or not a SF-LLL-A Continuation Sheet(s) is attached.

16. The certifying official shall sign and date the form, print his/her name, title, and telephone number.

Public reporting burden for this collection of information is estimated to average 30 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0046), Washington, D.C. 20503.

Department of Education

Education of Individuals With Disabilities: Personnel Training; Notice

DEPARTMENT OF EDUCATION

Training Personnel for the Education of Individuals With Disabilities—Grants for Personnel Training

AGENCY: Department of Education.

ACTION: Notice of proposed priority.

SUMMARY: The Secretary proposes a priority for the Training Personnel for the Education of Individuals with Disabilities—Grants for Personnel Training program administered by the Office of Special Education and Rehabilitative Services (OSERS) under the Individuals with Disabilities Education Act. The Secretary may use this priority in Fiscal Year 1996 and subsequent years. The Secretary takes this action to focus Federal assistance on identified needs to improve outcomes for children with disabilities. This proposed priority is intended to ensure wide and effective use of program funds.

DATES: Comments must be received on or before April 25, 1996.

ADDRESSES: All comments concerning the proposed priority should be addressed to: Linda Glidewell, U.S. Department of Education, 600 Independence Avenue SW., Room 3524, Switzer Building, Washington, D.C. 20202–2641.

FOR FURTHER INFORMATION CONTACT: Scott Brown, U.S. Department of Education, 600 Independence Avenue SW., Room 3522, Switzer Building, Washington, D.C. 20202–2641.

SUPPLEMENTARY INFORMATION: The Individuals with Disabilities Education Act (IDEA) directs the Secretary to develop and implement a plan for providing outreach services to minority entities and underrepresented populations to assist them in participating more fully in the discretionary programs under the Act (section 610(j)(2)(C)).

This proposed priority supports the National Education Goals by improving understanding of how to enable children and youth with disabilities to reach higher levels of academic achievement.

The Secretary will announce the final priority in a notice in the **Federal Register**. The final priority will be determined by responses to this notice, available funds, and other considerations of the Department. Funding of particular projects depends on the availability of funds, the content of the final priority, and the quality of the applications received. Further, the priority could be affected by enactment of legislation reauthorizing this program. The publication of this proposed priority does not preclude the Secretary from proposing additional priorities, nor does it limit the Secretary to funding only this priority, subject to meeting applicable rulemaking requirements.

Note: This notice of proposed priority does not solicit applications. A notice inviting applications under this competition will be published in the **Federal Register** concurrent with or following publication of the notice of final priority.

Priority

Under 34 CFR 75.105(c)(3), the Secretary proposes to give an absolute preference to applications that meet the following priority. The Secretary proposes to fund under this competition only applications that meet this absolute priority.

Proposed Absolute Priority—Outreach Services to Minority Entities to Expand Research Capacity

Background

The Congress has found that the Federal Government must be responsive to the growing needs of an increasingly diverse society and that a more equitable distribution of resources is essential for the Federal Government to meet its responsibility to provide an equal educational opportunity for all individuals. The Congress has concluded that the opportunity for full participation in awards for grants, cooperative agreements and contracts by Historically Black Colleges and Universities (HBCUs), other institutions of higher education whose minority enrollment is at least 25% (OMIs) and other eligible institutions as defined under section 312 of the Higher Education Act of 1965 (OEIs) is essential if we are to obtain greater success in the education of children from diverse backgrounds in special education.

This priority focuses on assisting HBCUs, OMIs and OEIs to prepare scholars for careers in research on special education and related services. This preparation shall consist of engaging both faculty and students at HBCUs, OMIs and OEIs in special education research activities. The activities focus on an area of critical emerging need which has material application in today's changing environment and will likely be the subject of future research efforts—*the special education of children in urban and high poverty schools with predominantly minority enrollments.* By building a cadre of experienced researchers on this important topic, the chances for full participation in awards for grants, cooperative agreements and contracts by HBCUs, OMIs and OEIs will be increased.

The association between socioeconomic status and enrollment in special education has been well documented. Available data from the National Longitudinal Transition Study (NLTS) show that 68% of students in special education live in a household where the income is less than $25,000 per year versus 39% of the general population of youth.

The problem of this association is heightened in urban school districts and, to a lesser extent, rural districts. NLTS data reveal that only 34% of students in special education live in suburban school districts compared to 48% of all youth. Data from the Office for Civil Rights indicate that 30% of all inner-city students live in poverty compared to 18% of students in non-inner city areas. Moreover, findings from the National Longitudinal Transition Study indicate that 47% of urban youth with disabilities live in households with an annual income of less than $12,000 (in 1986 dollars) compared to 34% of rural and 19% of suburban youth with disabilities (Valdes et al., 1990).

Urban school districts face a variety of challenges in meeting the educational needs of their students. Their schools often have high per student costs and limited financial resources. Their students are disproportionately poor and the population of individuals with limited English proficiency is among the fastest growing populations with special needs in some of these districts. This disproportionate representation of poor children in special education is also likely to be uniquely influenced by culturally diverse and urban settings, posing both opportunities and problems in the provision of special education services.

Priority

The Assistant Secretary establishes an absolute priority for a project to design and conduct a program of research by individuals who show promise of contributing to the program improvement activities authorized under the Individuals with Disabilities Education Act (IDEA). Each research activity of the program must implement the Congress' direction in section 610(j)(2) to support outreach activities to HBCUs, OMIs and OEIs to increase their participation in competition for research, demonstration and outreach grants, cooperative agreements and contracts funded under the IDEA. Activities shall include:

(1) Conducting research activities at HBCUs, OMIs and OEIs as explained below that link scholars at HBCUs, OMIs and OEIs with researchers at institutions with an established research capacity in a mentoring relationship to develop both individual and institutional research capacity at those HBCUs, OMIs and OEIs with a demonstrated need for capacity development; and

(2) Providing linkages between HBCUs, OMIs and OEIs with a demonstrated need for capacity development and institutions with an established research capacity to provide opportunities for researchers at those HBCUs, OMIs and OEIs to develop first hand experience in the grants and contracts application process.

All research activities must be conducted for the purpose of capacity building. The research program must include one or more projects that are focused on issues related to improving the delivery of special education services and educational results for children with disabilities in urban and high poverty schools with predominantly minority enrollments. The program must examine the association between minority status and identification for, evaluation for and placement in special education. Other possible research topics may include:

(1) Effective intervention strategies that make a difference in the provision of a Free Appropriate Public Education (FAPE);

(2) Practices to promote the successful inclusion of children with disabilities in a least restrictive environment (LRE);

(3) Strategies for establishing high expectations for children with disabilities and increasing their participation in the general curriculum provided to all children;

(4) Increasing effective parental participation in the educational process, especially for poor parents, minority parents, and parents with limited English proficiency;

(5) Effective disciplinary approaches, including behavioral management strategies, for ensuring a safe and disciplined learning environment;

(6) The effect of school-wide projects conducted under Title 1 of the Elementary and Secondary Education Act on the delivery of special education; or

(7) Effective practices for promoting the coordination of special education services with health and social services for children with disabilities and their families.

The program shall ensure that findings are communicated in appropriate formats for researchers. The program shall also ensure that if findings are of importance to other audiences, such as teachers, administrators and parents, they are made available to Department of Education's technical assistance, training and dissemination projects for distribution to those audiences.

Projects must demonstrate experience and familiarity in research on children with disabilities in urban and high poverty schools with predominantly minority enrollments. The project must also demonstrate experience in capacity development in special education research, as well as a thorough understanding of the strengths and needs of HBCUs, OMIs and OEIs.

The project must budget for two trips annually to Washington, DC for: (1) A two-day Research Project Directors' meeting; and (2) an additional meeting to meet and collaborate with the project officer of the Office of Special Education Programs (OSEP) and with other relevant OSEP funded projects. The project must also coordinate activities with the ongoing Policy Research Institute funded by OSEP.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding this proposed priority.

All comments submitted in response to this notice will be available for public inspection, during and after the comment period, in Room 3521, 300 C Street SW., Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

Program Authority: 20 U.S.C. 1431.

Department of Education

Training Personnel for the Education of Individuals With Disabilities; Grants for Personnel Training; Notice Inviting Applications for New Awards for Fiscal Year (FY) 1996; Notice

DEPARTMENT OF EDUCATION

[CFDA No.: 84.029G]

Training Personnel for the Education of Individuals With Disabilities; Grants for Personnel Training; Notice Inviting Applications for New Awards for Fiscal Year (FY) 1996

PURPOSE OF PROGRAM: The purpose of Training Personnel for the Education of Individuals with Disabilities Program—Grants for Personnel Training is to increase the quantity and improve the quality of personnel available to serve infants, toddlers, children and youth with disabilities.

ELIGIBLE APPLICANTS: Eligible applicants are institutions of higher education, and other appropriate nonprofit agencies.

APPLICABLE REGULATIONS: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, 79, 80, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR Part 318.

In some instances, the description of the absolute priority identified below differs from applicable regulatory provisions in 34 CFR 318. These changes, as well as any supplementary information provided under the priority that is not found in the regulations, represent interpretative guidance and are provided for purposes of clarification. These interpretations do not substantively change the regulations.

Note: The regulations in 34 CFR Part 86 apply to institutions of higher education only.

PRIORITY: Under 34 CFR 75.105(c)(3), and 34 CFR 318, the Secretary gives an absolute preference to applications that meet the following priority. The Secretary funds under this competition only those applications that meet this absolute priority:

Absolute Priority—Grants for Preservice Personnel Training (84.029G).

This priority supports projects designed to provide preservice preparation of personnel who serve infants, toddlers, children and youth with disabilities. Projects must address either:

(1) The development of new programs to establish expanded capacity for quality preservice training; or

(2) The improvement of existing programs designed to increase the capacity and quality of preservice training.

In addition, projects must address one or more of the following training components:

(1) *Preparation of Personnel for Careers in Special Education.* This component supports preservice preparation of personnel for careers in special education. Preservice training includes additional training for currently employed teachers seeking additional degrees, certifications, or endorsements. Training may occur at one or more of the following levels: baccalaureate, master's, or specialist. Under this component, "personnel" includes special education teachers, speech-language pathologists, audiologists, adapted physical education teachers, vocational educators, and instructive and assistive technology specialists.

(2) *Preparation of Related Services Personnel.* This component supports preservice preparation of individuals to provide developmental, corrective, and other supportive services that assist children and youth with disabilities to benefit from special education. These include paraprofessional personnel, therapeutic recreation specialists, school social workers, health service providers, physical therapists, occupational therapists, school psychologists, counselors (including rehabilitation counselors), interpreters, orientation and mobility specialists, respite care providers, art therapists, volunteers, physicians, and other related services personnel. For purposes of this component, the Department considers the term "interpreters" to be limited to interpreters for the deaf.

(i) Projects to train personnel identified as special education personnel under training component (1) are not appropriate for purposes of this component, even if those personnel may be considered related services personnel in other settings (e.g., speech language pathologists).

(ii) This component is not designed for general training. Projects must include inducements and preparation to increase the probability that graduates will direct their efforts toward supportive services to special education. For example, a project in occupational therapy (OT) might support a special focus in pediatric or juvenile psychiatric OT; support those students whose career goal is OT in the school; or provide for practica, and internships in school settings.

(3) *Training Early Intervention and Preschool Personnel.* This component supports projects that are designed to provide preservice preparation of personnel who serve infants, toddlers, and preschool children with disabilities, and their families. Personnel may be prepared to provide short-term services or long-term services that extend into a child's school program. The proposed training program must have a clear and limited focus on the special needs of children within the age range from birth through five, and must include consideration of family involvement in early intervention and preschool services. Training programs under this priority must have a significant interdisciplinary focus.

Applications Available: April 23, 1996.

Deadline for Transmittal of Applications: June, 10, 1996.

Deadline for Intergovernmental Review: August 10, 1996.

Estimated Number of Awards: 23.

Estimated Range of Awards: $100,000 to $480,000.

Project Period: Up to 36 months.

Available Funds: In fiscal year 1996, approximately $6,750,000 will be available to support an estimated 23 projects (grant awards) under this absolute priority (competition). While the total average award is estimated at $290,000, it is anticipated that the average range per component would be $100,000 to $160,000. Multi-year projects will be level funded unless there are increases in costs attributable to significant changes in activity level, and funds are available.

The Congress has not yet enacted a fiscal year 1996 appropriation for the Department of Education. The Department is publishing this notice in order to give potential applicants adequate time to prepare applications. The estimate of the amount of funds that will be available for this competition is based, in part, on the President's 1996 budget request and, in part, on the level of funding available for fiscal year 1995.

Potential applicants should note, however, that the Congress is considering proposals to reduce funding in 1996 for the Training Personnel for the Education of Individuals with Disabilities Program administered by the Department. Final action on the 1996 appropriation may require the Department to cancel this competition or to significantly reduce the number or size of grant awards that will be made under the competition announced in this notice.

Note: The Department of Education is not bound by any estimates in this notice.

WAIVER OF RULEMAKING: It is the practice of the Secretary to offer interested parties the opportunity to comment on proposed priorities in accordance with the Administrative Procedure Act (5 U.S.C. 553). However, this application notice restates existing priorities in 34 CFR 318. In addition, the Secretary has determined, pursuant to 5 U.S.C. 553(b)(A), that rulemaking requirements do not apply to the changes to applicable regulatory provisions contained in this notice. These changes reflect the Secretary's interpretation of existing regulations and are provided solely for purposes of clarification.

FOR APPLICATIONS AND GENERAL INFORMATION CONTACT: Marlene Spencer, U.S. Department of Education, 600 Independence Avenue, S.W., Switzer Building, Room 3072, Washington, D.C. 20202–2651. Telephone: (202) 205–9058. FAX: (202) 205–9070. Individuals who use a telecommunications device for the deaf (TDD) may call the TDD number: (202) 205–8953. Internet: Marlene_Spencer@ed.gov

FOR TECHNICAL INFORMATION CONTACT: Martha B. Bokee, U.S. Department of Education, 600 Independence Avenue, S.W., Room 3078, Switzer Building, Washington, D.C. 20202–2641. Telephone: (202) 205–5509. FAX: (202) 205–9070. Internet: Martha_Bokee@ed.gov

Information about the Department's funding opportunities, including copies of application notices for discretionary grant competitions, can be viewed on the Department's electronic bulletin board (ED Board), telephone (202) 260–9950; or on the Internet Gopher Server at GOPHER.ED.GOV (under Announcements, Bulletins, and Press Releases); or on the World Wide Web at http://www.ed.gov/money.html However, the official application notice for a discretionary grant competition is the notice published in the **Federal Register**.

Program Authority: 20 U.S.C. 1431.

Dated: March 20, 1996.

Howard R. Moses,

Acting Assistant Secretary for Special Education and Rehabilitative Services.

LIST OF PUBLIC LAWS

This is a list of public bills from the 104th Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–2470).

H.J. Res. 165/P.L. 104–118

Making further continuing appropriations for the fiscal year 1996, and for other purposes. (Mar. 22, 1996; 110 Stat. 829)

Last List March 22, 1996

Public Papers of the Presidents of the United States

Annual volumes containing the public messages and statements, news conferences, and other selected papers released by the White House.

Volumes for the following years are available; other volumes not listed are out of print.

George Bush

1990
(Book II) $41.00
1991
(Book I) $41.00
1991
(Book II) $44.00
1992
(Book I) $47.00
1992–93
(Book II) $49.00

William J. Clinton

1993
(Book I) $51.00
1993
(Book II) $51.00
1994
(Book I) $56.00

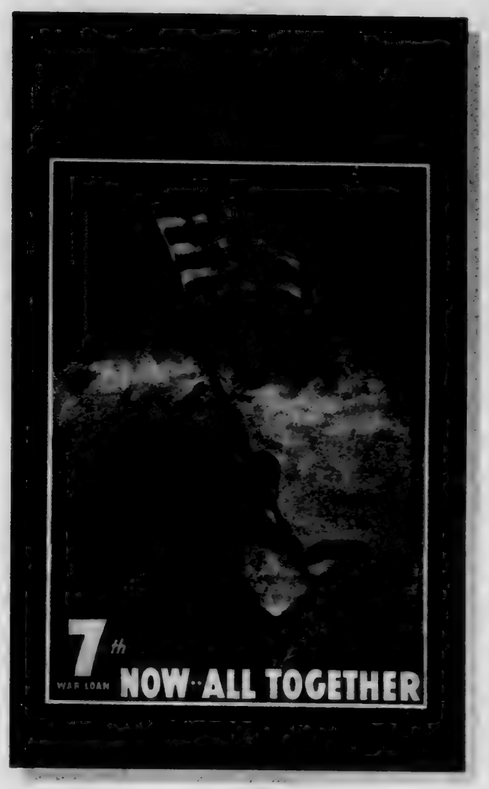
The United States Government Manual 1995/96



As the official handbook of the Federal Government, the *Manual* is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to contact about a subject of particular concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The *Manual* also includes comprehensive name and agency/subject indexes.

Of significant historical interest is Appendix C, which lists the agencies and functions of the Federal Government abolished, transferred, or renamed subsequent to March 4, 1933.

The *Manual* is published by the Office of the Federal Register, National Archives and Records Administration.

The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue includes a Table of Contents, lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements. Indexes are published quarterly.

Published by the Office of the Federal Register, National Archives and Records Administration.

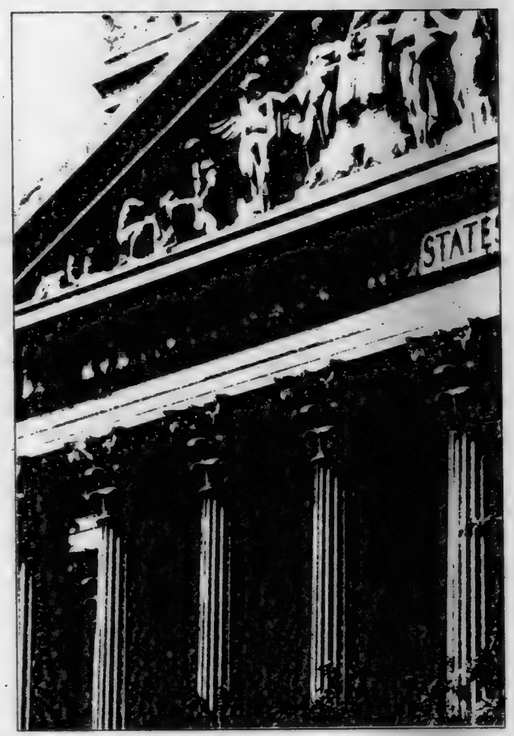
Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.



LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$26.00 per year.

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$24.00 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and Raleigh, NC, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. Free public access is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. Internet users can access the database by using the World Wide Web; the Superintendent of Documents home page address is http://www.access.gpo.gov/su_docs/, by using local WAIS client software, or by telnet to swais.access.gpo.gov, then login as guest, (no password required). Dial-in users should use communications software and modem to call (202) 512–1661; type swais, then login as guest (no password required). For general information about *GPO Access*, contact the *GPO Access* User Support Team by sending Internet e-mail to help@eids05.eids gpo.gov; by faxing to (202) 512–1262; or by calling (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except for Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $494, or $544 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $433. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 61 FR 12345.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Title 3—

The President

Proclamation 6873 of March 22, 1996

Greek Independence Day: A National Day of Celebration of Greek and American Democracy, 1996

By the President of the United States of America

A Proclamation

While Hellenic literature, art, architecture, and philosophy have profoundly influenced western civilization for over 2,000 years, democracy remains the most precious gift to our world from the Greeks of ancient times. This manner of government, placing authority directly into the hands of the people, has long fulfilled the needs and aspirations of freedom-loving nations around the world. Our founders chose to adopt the democratic system when declaring America's liberty, just as the Greek Constitution enshrines democracy as the governing rule of the Hellenic Republic.

It is one of history's great ironies that Greece, the birthplace of democracy, was subject for centuries to foreign domination, culminating in almost four hundred years of political suppression by the Ottoman Empire. The Greeks' age-old love of liberty remained strong, however, and in 1821, Greece began its successful struggle for self-determination.

Today, as we commemorate the one hundred and seventy-fifth anniversary of Greek independence, the citizens of Greece and the United States remember that with democracy come great responsibilities—to seek peaceful solutions to civil differences, to foster freedom and human rights in all nations, and to ensure that our laws continue to build upon our strong democratic foundation.

Standing shoulder to shoulder, Americans and Greeks fought for these principles on the battlefields of World War II and through the dark days of the Cold War. Today, while we celebrate Greek independence, we also remember all those around the world who still endure oppression and are denied economic, social, or political freedom. In recent years we have seen many nations break the bonds of tyranny, and we must continue to support others who seek to embrace democracy's promise. In doing so, we look forward to a day when people everywhere enjoy the rights and liberties that Greeks and Americans are so proud to share.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim March 25, 1996, as Greek Independence Day: A National Day of Celebration of Greek and American Democracy. I call upon all Americans to observe this day with appropriate ceremonies, activities, and programs.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-second day of March, in the year of our Lord nineteen hundred and ninety-six, and of the Independence of the United States of America the two hundred and twentieth.

William J. Clinton

Rules and Regulations

Federal Register
Vol. 61, No. 60
Wednesday, March 27, 1996

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 46

[Docket No. FV93–353]

RIN 0581–AB28

Regulations (Other Than Rules of Practice) Under the Perishable Agricultural Commodities Act, 1930 (PACA)

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department of Agriculture is revising the Regulations (other than Rules of Practice) Under the Perishable Agricultural Commodities Act (PACA) to include oil-blanched frozen fruits and vegetables as a commodity covered under the PACA. This rule will grant dealers in frozen oil-blanched products the same rights afforded dealers whose frozen product is water-blanched.

EFFECTIVE DATE: April 26, 1996.

FOR FURTHER INFORMATION CONTACT: J.R. Frazier, Assistant Chief, PACA Branch, Room 2095–So., Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, DC 20250, Phone (202) 720–4180.

SUPPLEMENTARY INFORMATION:

Executive Order 12866

This final rule is issued under the Perishable Agricultural Commodities Act (7 U.S.C. 499 *et. seq.*), as amended, hereinafter referred to as the "PACA." The Department of Agriculture is issuing this final rule in conformance with Executive Order 12866.

Executive Order 12778

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. It is not intended to have retroactive effect. This final rule will not preempt any State or local laws, regulation, or policies, unless they present an irreconcilable conflict with this rule. There are no administrative procedures which must be exhausted prior to any judicial challenge to the provisions of this rule.

Regulatory Flexibility Act

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), (5 U.S.C. 601 *et seq.*), the Administrator of the Agricultural Marketing Service (AMS) has certified that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. This is an action that is brought about at the request of the frozen fruit and vegetable industry and would benefit producers and small businesses that process and supply frozen fruits and vegetables by making available to them new remedies under the PACA.

This rule extends PACA coverage to include frozen fruits and vegetables that are oil-blanched, especially frozen french fried potato products. Under previous regulations, suppliers of these commodities suffered considerable financial losses because oil-blanched products were excluded by regulation from PACA coverage. This rule grants dealers in frozen oil-blanched products the same rights afforded dealers whose frozen product is water- blanched.

It is therefore not unduly or disproportionately burdensome on small businesses and in fact, rectifies the previous situation in which processors and suppliers were closed out of remedies with respect to oil-blanched product.

The PACA establishes a code of fair trading by prohibiting certain unfair practices in the marketing of fresh or frozen fruits and vegetables. The law requires that parties fulfill their contractual obligations including prompt pay, and provides a forum wherein persons who suffer damages can recover their losses.

The PACA also impresses a statutory trust for the benefit of unpaid sellers or suppliers on all perishable agricultural commodities received by a commission merchant, dealer or broker and all inventories of food or other products derived from the sale of such commodities or products. Sellers who preserve their eligibility are entitled to payment ahead of other creditors, from trust assets, of money owed on past due accounts.

Information submitted to this Agency by the Frozen Potato Products Institute indicates that frozen potato products represent the largest single frozen commodity shipped in the United States. This information further indicates that potatoes cannot be economically frozen and shipped long distances unless they first undergo oil blanching. As pointed out by the American Frozen Food Institute, oil blanching, like water and steam blanching inactivates enzymes without cooking the product. Water and steam blanched frozen fruits and vegetables are covered under the current regulations, oil-blanched frozen fruits and vegetables are not. To exclude such a substantial portion of the frozen food industry is inconsistent with the intent of the PACA to protect dealers in fresh or frozen fruits and vegetables.

Retailers who buy in interstate or foreign commerce must obtain a PACA license if they buy more than $230,000 of fruits and vegetables during a calendar year. Including oil-blanched product in the calculation of the $230,000 exemption may result in a marginal increase in retailers becoming subject to PACA, requiring them to purchase a PACA license at an annual cost of $400. However, the license fee for retailers is being phased out under the provisions of the Perishable Agricultural Commodities Act Amendments of 1995. By calendar year 1999, retailers will no longer be obligated to pay license fees though they must still be licensed. A marginal increase in the number of retailers subject to the PACA, is not significant compared to the benefits derived in the industry by including these commodities under the PACA.

The proposed rule was published in the **Federal Register** (59 FR 35487) on July 12, 1994. On September 12, 1994, Notice was given in the **Federal Register** (59 FR 46772) re-opening the comment period. That notice provided another comment period which ended October 12, 1994. Ten comments were received,

six in favor and four opposed to the proposed rule.

Three commentors representing retailers and wholesale grocers opposed the rule claiming that it would expand the PACA program.

It is true that the rule does expand the PACA program to a product line that is not currently covered, but only because the current regulations restrict the application of the meaning of "perishable agricultural commodity" as provided in the Act. Oil-blanched product is well within the definition of a perishable agricultural commodity as defined by the statute and is consistent with the industry view of the scope of the Act and the nature of the product. Including oil-blanched frozen fruits and vegetables does not unduly or disproportionately burden retailers. With this final rule, all sales of potato products, whether to wholesale distributors, or retailers, would be covered by the term "perishable agricultural commodity." Further, retailers would be less likely than other dealers to be affected by the rule because frozen oil-blanched product would be a small portion of their total business. However, continuing to exclude (frozen french fried potatoes) the largest single frozen commodity in the United States poses substantial risk to farmers, shippers, and processors who are extending credit without the trust protection the Act affords to other dealers.

Another commentor representing a major restaurant chain opposed the proposed rule because he thought the change might bring restaurants under the jurisdiction of the PACA, and argued that therefore, the economic impact of the rule has been underestimated. Restaurants traditionally have not been considered subject to the PACA by USDA or Congress unless the buying arm of the restaurant is a separate legal entity, and is buying for and/or reselling the product to another entity. Since restaurants are not subject to the PACA, this change in the regulation will not impact restaurants.

For the reasons stated, we are not making any changes to this final rule based on the above comments.

The commentors in favor of the proposal claimed that frozen potatoes cannot be shipped practically and commercially without being oil-blanched and that extending PACA to cover these products would protect processors and shippers and enhance the protection to farmers. They also pointed out that incorporating oil-blanched products into the regulations was consistent with the current policy of including water-blanched and steam-blanched product and would streamline the administration of PACA because it would no longer be necessary to distinguish oil-blanched from water or steam-blanched products. They also claimed that the proposed rule would improve marketing efficiency, thereby benefitting consumers and the potato industry.

After thoroughly analyzing the comments received and all other available information, the Department has concluded that issuing this rule is appropriate.

Based on the above, the Administrator of the AMS has determined that the issuance of this final rule will not have a significant economic effect on a substantial number of small entities.

After consideration of all relevant material presented, the comments received, and other available information, it is found that this regulation, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

List of Subjects in 7 CFR Part 46

Agricultural commodities, Brokers, Penalties, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR Part 46 of the Code of Federal Regulations is amended as follows:

PART 46—REGULATIONS (OTHER THAN RULES OF PRACTICE) UNDER THE PERISHABLE AGRICULTURAL COMMODITIES ACT, 1930

1. The authority citation for part 46 continues to read as follows:

Authority: Sec. 15, 46 Stat. 537; 7 U.S.C. 499o.

2. In section 46.2, paragraph (u) is revised to read as follows:

§ 46.2 Definitions.

* * * * *

(u) *Fresh fruits and fresh vegetables* include all produce in fresh form generally considered as perishable fruits and vegetables, whether or not packed in ice or held in common or cold storage, but do not include those perishable fruits and vegetables which have been manufactured into articles of food of a different kind or character. The effects of the following operations shall not be considered as changing a commodity into a food of a different kind or character: Water, steam, or oil blanching, chopping, color adding, curing, cutting, dicing, drying for the removal of surface moisture; fumigating, gassing, heating for insect control, ripening and coloring; removal of seeds, pits, stems, calyx, husk, pods, rind, skin, peel, et cetera; polishing, precooling, refrigerating, shredding, slicing, trimming, washing with or without chemicals; waxing, adding of sugar or other sweetening agents; adding ascorbic acid or other agents used to retard oxidation; mixing of several kinds of sliced, chopped, or diced fruits or vegetables for packaging in any type of containers; or comparable methods of preparation.

* * * * *

Dated: March 20, 1996.

Lon Hatamiya,

Administrator.

BILLING CODE 3410–02–P

---

7 CFR Parts 916 and 917

[Docket No. FV95–916–4–IFR]

Nectarines and Peaches Grown in California; Revision of Handling Requirements for Fresh Nectarines and Peaches

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim final rule with request for comments.

SUMMARY: This rule revises the handling requirements for California nectarines and peaches by modifying the grade, size, maturity, container, and pack requirements for fresh shipments of these fruits, beginning with 1996 season shipments. This rule enables handlers to continue shipping fresh nectarines and peaches meeting consumer needs in the interest of producers, handlers, and consumers of these fruits.

DATES: Effective April 1, 1996. Comments which are received by April 26, 1996 will be considered prior to issuance of any final rule.

ADDRESSES: Interested persons are invited to submit written comments concerning this rule. Comments must be sent in triplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2523–S, Washington, DC 20090–6456; or by facsimile at 202–720–5698. All comments should reference the docket number and the date and page number of this issue of the **Federal Register** and will be made available for public inspection at the office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Terry Vawter, Marketing Specialist, California Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, 2202 Monterey Street, Suite 102B, Fresno, California 93721; telephone: (209) 487–5901; or Kenneth Johnson, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2523–S, Washington, DC 20090–6456; telephone: (202) 720–2861.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement and Marketing Order Nos. 916 and 917 (7 CFR Parts 916 and 917) regulating the handling of nectarines and peaches grown in California, hereinafter referred to as the orders. The orders are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

The Department of Agriculture (Department) is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12778, Civil Justice Reform. This rule is not intended to have retroactive effect. This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after the date of the entry of the ruling.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities. The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are about 300 California nectarine and peach handlers subject to regulation under the orders covering nectarines and peaches grown in California, and about 1,800 producers of these fruits in California. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $5,000,000. A majority of these handlers and producers may be classified as small entities.

The Nectarine Administrative Committee (NAC) and the Peach Commodity Committee (PCC) met December 7, 1995, and unanimously recommended that the handling requirements for California nectarines and peaches be revised, respectively. These committees meet prior to and during each season to review the rules and regulations effective on a continuous basis for California nectarines and peaches under the orders. These committee meetings are open to the public, and interested persons may express their views at these meetings. The Department reviews committee recommendations and information, as well as information from other sources, and determines whether modification, suspension, or termination of the rules and regulations would tend to effectuate the declared policy of the Act.

Container and Pack Requirements (Nectarines)

Section 916.350 specifies container and pack requirements for fresh nectarine shipments. Paragraph (a)(4)(iv) of § 916.350 specifies the tray-pack size designations which must be marked on loose-filled or tight-filled containers, depending on the size of the fruit. The size designations specify the maximum number of nectarines in a 16-pound sample for each tray-pack size designation. This rule revises paragraph (a)(4)(iv) of § 916.350 by modifying one size designation for the weight-count standards in Column B of TABLE 1 for early-season and mid-season nectarine varieties and one size designation for the weight-count standards in Column B of TABLE 2. Continuing research conducted by the NAC indicate that early-season and mid-season fruit weighs less than late-season fruit and the weight-count standards were, therefore, modified for the past two seasons based on that consideration. Results from the 1995 season suggest that a minor modification of TABLE 1 and TABLE 2 is necessary to provide more accurate weight-count standards for early-season and mid-season nectarines, and late-season nectarines.

The NAC recommended these revised weight-count standards for nectarines after a comprehensive review of the appropriate relationships between the tray-pack containers and loose-filled or tight-filled containers for early-season and mid-season nectarine varieties, as well as late-season varieties. Specifically, the NAC's recommendation provides that the maximum number of nectarines of size 50 in a 16-pound sample of early-season and mid-season fruit is more appropriately 39 rather than 38. Also the maximum number of nectarines of size 50 in a 16-pound sample of late-season fruit is more appropriately 37 rather than 36.

Pack regulations provide for uniform packing practices. In particular, weight-count standards provide for equality between fruit packed in loose-filled or tight-filled containers and fruit packed in tray-pack styles.

According to the NAC, packers occasionally moved fruit from tray-pack styles of pack to loose-filled or tight-filled pack styles. This activity has led to an awareness that fruit which was of proper size when tray-packed exceeded the maximum number of nectarines for the 16-pound sample for corresponding loose-filled or tight-filled pack size. In some instances, these samples required an additional piece of fruit to meet the 16-pound weight requirement, thus causing the pack to be "marked" smaller than its equivalent tray-pack size. When packs are "marked" smaller this causes the container to be sold for a lower price.

Revised and refined weight-count standards should provide for more accurate marking of sizes when packed in loose-filled or tight-filled pack styles compared to equivalent sizes that are tray packed. These regulations provide for uniformly packed containers of nectarines. These regulations also attempt to assure equivalent returns for growers based on style of pack used.

This rule also further clarifies the definition of "tree ripe" added to section 916.350 paragraph (b) for the 1995 season. According to the NAC, "tree ripe" is an optional marking with regard to maturity that is stamped on containers of nectarines. Currently, the definition of tree ripe is based on the California Well Matured maturity requirement and is intended to be used for fruit which has been allowed to

ripen naturally by remaining longer on the tree. California Well Matured means that fruit has been picked at a maturity level distinctly more advanced than "mature." The definition of "tree ripe" was added in 1995 so that its meaning was consistent with other descriptive markings and provided a consistent minimum maturity level throughout the industry to the benefit of consumers. However, during the 1995 season, some handlers marked their boxes of fruit as "tree ripened." It has been recommended by the NAC that the terms "tree ripe", and "tree ripened", and other terms which denote an advanced level of maturity due to the fruit remaining on the tree for a longer period, are interchangeable terms indicative of the enhanced maturity of the fruit inside the box. Requiring containers of nectarines to be at a minimum California Well Matured in order to be marked "tree ripe" or "tree ripened," or other interchangeable terms such as "ripened on the tree", or "ripened on tree" will clarify the current regulation by specifying when the "tree ripe" or some similar marking using the words "tree" and "ripe", can be used and help to ensure that buyer expectations are met.

The NAC also recommended that a new container, that allows for markings on the lid of the container, be approved for nectarine shipments for the 1996 season only. The NAC will review the impact of the use of this container with shippers prior to the 1997 season.

The marketing order, under § 916.350, requires that all containers be marked with specific information (e.g. handler, grade, size, and variety) and that all such markings on nectarine containers have to be applied to the outside end of the container. This has been defined as any of the four sides of the container, but not on the lid. Currently, there is interest by handlers in containers that are reusable thus creating financial savings for handlers. There is now a reusable and recyclable container, a single layer, plastic, 12×20 inch box, that is available for use with nectarines. However, the design of the container, which has cooling slots in all of its sides, is such that the markings cannot easily be placed on the outside end of the container.

The NAC believes that allowing for markings to be placed on the container lid will facilitate the use of this plastic, reusable and recyclable container in compliance with marketing order requirements. Authorizing the use of this new container will allow handlers to reduce their container costs through the continued reuse of the container.

Maturity Requirements (Nectarines)

Section 916.356 specifies maturity requirements for fresh nectarines in paragraphs (a)(1) and (a)(1)(i), including TABLE 1. For fruit being inspected and certified as meeting the maturity requirements for "well matured", maturity determinations are generally in terms of maturity guides (e.g., color chips) specified in TABLE 1.

This rule revises paragraph (a)(1) by exempting yellow nectarine varieties from the requirement that a blush or red color be present on the skin of the nectarines. By their nature, yellow nectarine varieties fail to attain any color other than yellow on the skin of the fruit. The U.S. Standards for Grades of Nectarines requires that a blush or red color be present on the skin of the fruit in order for the fruit to be considered as U.S. No. 1 grade.

This rule also revises TABLE 1 of paragraph (a)(1)(i) of § 916.356 for nectarines to add the maturity guides for four nectarine varieties. Specifically, an addition to the maturity guides was recommended for Grand Diamond, King Jim, and Spring Brite at a maturity guide of L, and Rose Diamond at a maturity guide of J.

The NAC recommended these maturity requirement changes for these nectarine varieties based on a continuing review by the Shipping Point Inspection Service of their individual maturity characteristics, and the identification of the appropriate color chip corresponding to the "well matured" level of maturity for such variety.

Size Requirements (Nectarines)

Section 916.356 specifies size requirements for fresh nectarines in paragraphs (a)(2) through (a)(9). This rule revises § 916.356 to establish variety-specific size requirements for six nectarine varieties that were produced in commercially significant quantities of more than 10,000 packages for the first time during the 1995 season. This rule also modifies the variety-specific size requirements for two varieties of nectarines by reassigning those varieties.

Size regulations are put in place to improve fruit quality by allowing fruit to stay on the tree for a greater length of time. This increased growing time not only improves maturity and, therefore, the quality of the product, but also the size of the fruit. Increased size results in increases in the number of packed boxes of nectarines per acre. This provides greater consumer satisfaction, more repeat purchases, and, therefore, increases returns to growers. Varieties recommended for specific size regulation have been reviewed and recommendations are based on the characteristics of the variety to attain minimum size.

Paragraph (a)(3) is revised to include the Johnny's Delight and May Jim varieties; paragraph (a)(4) is revised to include the Arctic Rose variety; and paragraph (a)(6) in § 916.356 is revised to include the Flame Glo, Prima Diamond III, Prima Diamond IV, Prima Diamond VIII, and the White Jewels nectarine varieties.

This rule also revises § 916.356 to remove eleven nectarine varieties from the variety-specific size requirements specified in the section because less than 5,000 packages of each of these varieties were produced during the 1995 season. Paragraph (a)(2) of that section is revised to remove the Royal Delight nectarine variety. Paragraph (a)(4) is revised to remove the Sunfre variety, and paragraph (a)(4) is also revised to delete the May Jim variety. This variety was placed in this paragraph prior to the 1995 season. The variety matures to a smaller-than-average size when compared to other varieties in this paragraph. Based upon its sizing characteristics from the 1995 season, removal of the May Jim variety from this paragraph was recommended. Paragraph (a)(6) is revised to remove the Del Rio Rey, Independence, La Pinta, Late Le Grand, Royal Red, Son Red, Sun Grand, 181–119 (Sierra Star), and Nectarine 23 nectarine varieties. Paragraph (a)(6) is also revised to remove the Arctic Rose variety. This variety was placed in this paragraph prior to the 1995 season. The variety matures to a smaller-than-average size when compared to other varieties in this paragraph. Based upon its sizing characteristics from the 1995 season, removal of the Arctic Rose variety from this paragraph was recommended.

Nectarine varieties removed from the nectarine variety-specific list become subject to the non-listed variety size requirements specified in paragraphs (a)(7), (a)(8), and (a)(9) of § 916.356.

The NAC recommended these changes in the minimum size requirements based on a continuing review of the sizing and maturity relationships for these nectarine varieties, and consumer acceptance levels for various sizes of fruit. This rule is designed to establish minimum size requirements for fresh nectarines consistent with expected crop and market conditions.

Container and Pack Requirements (Peaches)

Section 917.442 currently specifies container and pack requirements for fresh peach shipments. Paragraph (a)(4)(iv) of § 917.442 specifies the tray-pack size designations which must be marked on loose-filled or tight- filled containers, depending on the size of the fruit. The size designations specify the maximum number of peaches in a 16-pound sample for each tray pack size designation. This rule revises paragraph (a)(4)(iv) of § 917.442 by modifying one size designation for the weight-count standards in Column B of TABLE 1 for early-season and mid-season peach varieties. Research conducted by the PCC indicated that early-season and mid-season fruit weighs less than late-season fruit and the weight-count standards were, therefore, modified for the past two seasons based on that consideration. Results from the 1995 season suggest that a minor modification of TABLE 1 is necessary to provide more accurate weight-count standards for early-season and mid-season peaches.

The PCC recommended the revised container marking requirement changes for peaches after a comprehensive review of the appropriate relationships between the tray-pack containers and loose-filled or tight-filled containers for early-season and mid-season peach varieties prior to the 1996 season. Specifically, the PCC's recommendation provides that the maximum number of peaches of size 54 in a 16-pound sample of early-season and mid-season fruit is more appropriately 44 rather than 43.

Pack regulations provide for uniform packing practices. In particular, weight-count standards provide equality between fruit packed in loose-filled or tight-filled containers and fruit packed in tray-pack styles.

According to the PCC, packers occasionally moved fruit from tray-pack styles of pack to loose-filled or tight-filled pack styles. This activity has led to an awareness, especially in regard to early-season varieties, that fruit which was of proper size when tray-packed exceeded the maximum number of nectarines for the 16-pound sample for corresponding loose-filled or tight-filled pack size. In this instance, these samples needed an additional piece of fruit to meet the 16-pound weight requirement, thus causing the pack to be "marked" smaller than its equivalent tray- pack size. When packs are "marked" smaller this causes the container to be sold for a lower price. During the 1994 season, new weight-count assignments for early varieties were in place. Research continued with the purpose of possible refinement of those weight-count assignments.

Revised and refined weight-count standards for early varieties should provide for more accurate marking of size when packed in loose-filled or tight-filled pack styles compared to equivalent sizes that are tray packed. These regulations provide for uniformly packed containers of peaches. These regulations also attempt to assure equivalent returns for growers based on style of pack used.

This rule also further clarifies the definition of "tree ripe" added to section 917.442 paragraph (b) for the 1995 season. According to the PCC, "tree ripe" is an optional marking with regard to maturity that is stamped on containers of peaches. Currently the definition of tree ripe is based on the California Well Matured maturity requirement and is intended to be used for fruit which has been allowed to ripen naturally by remaining longer on the tree. California Well Matured means that fruit has been picked at a maturity level distinctly more advanced than "mature." The definition of "tree ripe" was added in 1995 so that its meaning was consistent with other descriptive markings and provided a consistent minimum maturity level throughout the industry to the benefit of consumers. However, during the 1995 season, some handlers marked their boxes of fruit as "tree ripened." It has been recommended by the PCC that the terms "tree ripe" and "tree ripened" and other terms which denote an advanced level of maturity due to the fruit remaining on the tree for a longer period, are interchangeable terms indicative of the enhanced maturity of the fruit inside the box. Requiring containers of peaches to be at a minimum California Well Matured in order to be marked "tree ripe" or "tree ripened," or other interchangeable terms such as "ripened on the tree," or "ripened on tree" will clarify the current regulation by specifying when the "tree ripe" or some similar marking using the words "tree" and "ripe" can be used and help to ensure that buyer expectations are met.

The PCC also recommended that a new container, that allows for markings on the lid of the container, be approved for peach shipments for the 1996 season only. The PCC will review the impact of this container with shippers prior to the 1997 season.

The marketing order, under § 917.442, requires that all containers be marked with specific information (e.g. handler, grade, size, and variety) and that all such markings on peach containers have to be applied to the outside end of the container. This has been defined as any of the four sides of the container, but not on the lid. Currently, there is interest by handlers in containers that are reusable thus creating financial savings for handlers. There is now a reusable and recyclable container, a single layer, plastic, 12x20 inch box, that is available for use with peaches. However, the design of the container, which has cooling slots in all of its sides, is such that the markings cannot easily be placed on the outside end of the container.

The PCC believes that allowing for markings to be placed on the container lid will facilitate the use of this plastic, reusable and recyclable container in compliance with marketing order requirements. Authorizing the use of this new container will allow handlers to reduce their container costs through the continued reuse of the container.

Maturity Requirements (Peaches)

Section 917.459 specifies maturity requirements for fresh peaches in paragraph (a)(1), including TABLE 1. For fruit being inspected and certified as meeting the maturity requirements for "well matured", maturity determinations are generally in terms of maturity guides (e.g., color chips) specified in TABLE 1. This rule revises TABLE 1 of paragraph (a)(1)(ii) of § 917.459 for peaches to change the maturity guide for the Elegant Lady peach variety from a maturity guide M to a maturity guide L. The Early Delight peach variety has been recommended to be added with a maturity guide H and the May Sun variety has been recommended to be added with a maturity guide I.

The PCC recommended these maturity requirement changes for these peach varieties based on a continuing review by the Shipping Point Inspection Service of their individual maturity characteristics, and the identification of the appropriate color chip corresponding to the "well matured" level of maturity for such varieties.

Size Requirements (Peaches)

Section 917.459 specifies size requirements for fresh peaches in paragraphs (a)(2) through (a)(6), and paragraphs (b) and (c). This rule also revises § 917.459 to establish variety-specific size requirements for six peach varieties that were produced in commercially significant quantities of more than 10,000 packages for the first time during the 1995 season.

Size regulations are put in place to improve fruit quality by allowing fruit to stay on the tree for a greater length of time. This increased growing time not

only improves maturity, and, therefore, the quality of the product, but also size of the fruit. Increased size results in increases in the number of packed boxes of peaches per acre. This provides greater consumer satisfaction, more repeat purchases, and, therefore, increases returns to growers. Varieties recommended for specific size regulation have been reviewed and recommendations are based on the characteristics of the variety to attain minimum size.

In § 917.459 paragraph (a)(5) is revised to include the May Sun peach variety; and paragraph (a)(6) is revised to include the July Sun, Kaweah, Snow Giant, Snow King, and Sugar Giant peach varieties.

This rule also revises § 917.459 to remove eleven peach varieties from the variety-specific size requirements specified in that section, because less than 5,000 packages of each of these varieties were produced during the 1995 season. In § 917.459 paragraph (a)(2) of § 917.459 is revised to remove the Flordaprince peach variety; paragraph (a)(5) is revised to remove the First Lady, Merrill Gem, Royal May, Sierra Crest, Summer Crest, and 50–178 peach varieties; and paragraph (a)(6) is revised to remove the Angelus, August Delight, Parade, and Scarlet Lady peach varieties. Peach varieties removed from the variety- specific list become subject to the non-listed variety size requirements specified in paragraphs (b) and (c) of § 917.459.

The removal of the Flordaprince variety from paragraph (a)(2) results in there being no varieties regulated within size 96 for the 1996 season. Since the variety-specific list is subject to change from one season to another, the Department wishes to reserve paragraph number (a)(2) for future regulation of peaches at size 96.

The PCC recommended these changes in the minimum size requirements based on a continuing review of the sizing and maturity relationships for these peach varieties, and the consumer acceptance levels for various sizes fruit. This rule is designed to establish minimum size requirements for fresh peaches consistent with expected crop and market conditions.

This rule reflects the committees' and the Department's appraisal of the need to revise the handling requirements for California nectarines and peaches, as specified. The Department's determination is that this rule will have a beneficial impact on producers, handlers, and consumers of California nectarines and peaches.

This rule establishes handling requirements for fresh California nectarines and peaches consistent with expected crop and market conditions, and will help ensure that all shipments of these fruits made each season will meet acceptable handling requirements established under each of these orders. This rule will also help the California nectarine and peach industries provide fruit desired by consumers. This rule is designed to establish and maintain orderly marketing conditions for these fruits in the interest of producers, handlers, and consumers.

Based on the above, the Administrator of the AMS has determined that this rule will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant matters presented, the information and recommendations submitted by the committees, and other information, it is found that the rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined, upon good cause, that it is impracticable, unnecessary and contrary to the public interest to give preliminary notice prior to putting this rule into effect because: (1) California nectarine and peach growers and handlers should be apprised of this rule as soon as possible, since early shipments of these fruits are expected to begin about April 1; (2) this rule relaxes grade requirements for yellow-skinned nectarines and size requirements for several nectarine and peach varieties; (3) California nectarine and peach handlers are aware of these revised requirements that are non-controversial, administrative by nature, and similar to other recommendations made by the committees in prior seasons, and they will need no additional time to comply with such requirements; and (4) the rule provides a 30-day comment period, and any written comments received will be considered prior to any finalization of this interim final rule.

List of Subjects

7 CFR Part 916

Marketing agreements, Nectarines, Reporting and recordkeeping requirements.

7 CFR Part 917

Marketing agreements, Peaches, Pears, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR Parts 916 and 917 are amended as follows:

PART 916—NECTARINES GROWN IN CALIFORNIA

1. The authority citation for 7 CFR Part 916 continues to read as follows:

Authority: 7 U.S.C. 601–674.

2. Section 916.350 is amended by revising TABLE 1 and TABLE 2 of paragraph (a)(4)(iv), revising paragraph (b), and adding a new paragraph (c) to read as follows:

§ 916.350 California Nectarine Container and Pack Regulation.

(b) As used in this section, standard pack and fairly uniform in size shall have the same meanings as set forth in U.S. Standards for Grades of Nectarines (§§ 51.3145 to 51.3160) and all other terms shall have the same meaning as when used in the amended marketing agreement and order. No. 12B standard fruit box measures 2⅜ to 7⅛ × 11½ × 16⅛ inches, No. 22D standard lug box measures 2⅞ to 7⅛ × 13½ × 16⅛ inches, No. 22E standard lug box measures 8¾ x 13½ × 16⅛ inches, No. 22G standard lug box measures 7⅜ to 7½ × 13¼ × 15⅞ inches. All dimensions are given in depth (inside dimension) by width by length (outside dimension). Individual consumer packages means packages holding 15 pounds or less net weight of nectarines. "Tree ripe" means "tree ripened" and fruit shipped and marked as "tree ripe", "tree ripened", or any similar terms using the words "tree" and "ripe" must meet minimum California Well Matured standards.

(c) Each container of nectarines in plastic, 12×20 inch reusable and recyclable containers shall meet and bear, on the container lid, all applicable marking requirements under the order.

3. Section 916.356 is amended by revising paragraphs (a)(1) introductory text, Table 1, (a)(2) introductory text, (a)(3) introductory text, (a)(4) introductory text, and (a)(6) introductory text to read as follows:

§ 916.356 California Nectarine Grade and Size Regulation.

(a) * * *

(1) Any lot or package or container of any variety of nectarines unless such nectarines meet the requirements of U. S. No. 1 grade: Provided, that nectarines 2 inches in diameter or smaller, shall not have fairly light colored, fairly smooth scars which exceed an aggregate area of a circle ⅜ inch in diameter, and nectarines larger than 2 inches in diameter shall not have fairly light colored, fairly smooth scars which exceed an aggregate area of a circle ½ inch in diameter: Provided further, that an additional tolerance of 25 percent shall be permitted for fruit that is not well formed but not badly misshapen: Provided further, that all varieties of nectarines which fail to meet the U.S. No. 1 grade only on account of lack of blush or red color due to varietal characteristics shall be considered as meeting the requirements of this subpart. The Federal or Federal-State Inspection Service shall make final determinations on maturity through the use of color guides or such other tests as determined appropriate by the inspection agency.

(b) As used in this section, standard pack shall have the same meaning as set forth in U.S. Standards for Grades of Peaches (§§ 51.1210 to 51.1223) and all other terms shall have the same meaning as when used in the amended marketing agreement and order. No. 12B standard fruit box measures 2⅜ to 7⅛ x 11½ x 16⅛ inches, No. 22D standard lug box measures 2⅞ to 7⅛ x 13½ x 16⅛ inches, No.22E standard lug box measures 8¾ x 13½ x 16⅛ inches, No. 22G standard lug box measures 7⅜ to 7½ x 13¼ x 15⅞ inches. All dimensions are given in depth (inside dimension) by width by length (outside dimension). Individual consumer packages means packages holding 15 pounds or less net weight of nectarines. "Tree ripe" means the same as "tree ripened" and fruit shipped and marked as "tree ripe", "tree ripened", or any similar terms using the words "tree" and "ripe", must meet minimum California Well Matured standards.

(c) Each container of peaches in plastic, 12×20 inch reusable and recyclable containers shall meet and bear, on the container lid, all applicable marking requirements under the order.

3. Section 917.459 is amended by removing and reserving paragraph (a)(2), and revising Table 1 of paragraph (a)(1)(ii), (a)(5) introductory text, and (a)(6) introductory text to read as follows:

§ 917.459 California Peach Grade and Size Regulation.

(a) * * *
(1) * * *

(ii) If a grower or handler believes his/her fruit is meeting the appropriate maturity level but the fruit has not been so graded by the inspector, he/she may appeal the inspection by calling the officer-in-charge of the local Federal-State Inspection Service office to arrange for an on-site examination of the fruit.

7 CFR Part 920

[Docket No. FV95–920–4FR]

Kiwifruit Grown in California; Relaxation of Container Marking Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule relaxes the container marking requirements for kiwifruit packed under the Federal marketing order for kiwifruit grown in California. This relaxation reduces the number of kiwifruit containers required to be marked with the lot stamp number. This rule reduces handling costs and provides more flexibility in kiwifruit packing operations.

EFFECTIVE DATE: April 26, 1996.

FOR FURTHER INFORMATION CONTACT: Rose Aguayo, California Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, 2202 Monterey Street, suite 102B, Fresno, California 93721; telephone (209) 487–5901, Fax # (209) 487–5906; or Charles Rush, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2526–S, Washington, DC 20090–6456, telephone (202) 720–5127, Fax # (202) 720–5698.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Order No. 920 (7 CFR Part 920), as amended, regulating the handling of kiwifruit grown in California, hereinafter referred to as the "order." The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

The Department of Agriculture (Department) is issuing this final rule in conformance with Executive Order 12866.

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. This rule is not intended to have retroactive effect. This final rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity

is filed not later than 20 days after date of the entry of the ruling.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 65 handlers of California kiwifruit subject to regulation under the order and approximately 500 kiwifruit producers in the production area. Small agricultural service firms are defined by the Small Business Administration (13 CFR 121.601) as those whose annual receipts are less than $5,000,000, and small agricultural producers have been defined as those having annual receipts of less than $500,000. A majority of handlers and producers of California kiwifruit may be classified as small entities.

Under the terms of the marketing order, fresh market shipments of California kiwifruit are required to be inspected and are subject to grade, size, maturity, pack and container requirements. Current requirements include specifications that all containers of kiwifruit shall be plainly marked with the lot stamp number corresponding to the lot inspection conducted by an authorized inspector, except for individual consumer packages and containers that are being directly loaded into a vehicle for export shipment under the supervision of the Federal or Federal-State Inspection Service.

The Kiwifruit Administrative Committee (committee), the agency responsible for local administration of the marketing order, met on November 30, 1995, and recommended, by unanimous vote, to relax the container marking requirements by reducing the number of containers plainly marked with the lot stamp number from all containers to all exposed or outside containers of kiwifruit, but not less than 75 percent of the total containers on a pallet.

The marketing order authorizes under § 920.52(a)(3) the establishment of container marking requirements. Section 920.303(d) of the rules and regulations outlines the lot stamp number container marking requirements for fresh kiwifruit packed under the order.

The committee recommended relaxing the lot stamp number marking requirement because of changes in the produce retail industry. The committee anticipates that the current order language, which requires all containers to be plainly marked with the lot stamp number, will create a problem in the near future due to industry changes in container packaging configurations and pallet sizes. This relaxation allows the industry flexibility for future pallet size and container configurations.

Many products, outside the produce industry, are received by retailers on 48- by 40-inch pallets. The kiwifruit industry almost exclusively used the "LA Lug" container which fits on the 35- by 42-inch or 53- by 42-inch pallets until recent years. The "LA Lug" configuration does not create a center tier when stacked on these pallets. When kiwifruit shippers use 35- by 42-inch or 53- by 42-inch pallets, receivers must unload the pallets and restack the fruit on metric pallets, causing more damage to the fruit and more labor costs to the receiver. Because of retail buying patterns and the retail demand for operational consistency in pallet usage, the produce industry has been moving away from using the 35- by 42-inch or 53×42 inch pallets and has been moving towards using a standard grocery-industry metric pallet measuring 48- by 40-inches. The committee anticipates that the retail usage of the metric pallet will continue to increase because: (1) Retailer and handler trucking and transportation costs for produce stacked on metric pallets are less than for produce stacked on 35- by 42-inch and 53- by 42-inch pallets, (2) retailer labor and disposal costs are less when metric pallets are utilized, and (3) receiving areas are steadily being remodeled to handle metric pallets. In the 1995/1996 season, approximately one percent of the industry's 9.3 million trays equivalents were packed in "shoe" box containers. The "shoe" box container (12×20 inches) is one of two new containers which is stacked in eight columns on a 48- by 40-inches metric pallet, and is configured in a manner which leaves one side of each container exposed. The other container that fits on the metric pallet is the "mum" box container. The "mum" box container (13.3×16 inches) is stacked nine columns on a pallet with the center column inaccessible to lot stamp numbering after the containers are placed on the pallet during block inspection. In block inspection, the inspection occurs after the pallets have been packed, strapped, and been placed in storage. In-line inspection is performed during the packing process, prior to palletization and storage.

The industry's usage of block and in-line inspection methods is fairly evenly split with approximately 50 percent of the handlers using in-line inspection and 50 percent using block inspection. The majority of block inspections are conducted in the northern part of California while in-line inspections are conducted primarily in the southern part of California.

The committee's recommendation to relax the container marking requirement will not significantly lower the number of containers being inspected or bearing the lot stamp number. Of the 81 containers stacked on a metric pallet during block inspection, nine containers (the center tier—approximately 11 percent of the pallet) will not be lot stamp numbered. The center tiers of all pallets will be randomly inspected by the Federal or Federal-State Inspection Service for all marketing order requirements. When the industry utilizes in-line inspection, both the "shoe" and "mum" containers are accessible to lot stamp number marking and inspection, as they are being stacked on the pallet.

There is unanimous support in the industry to reduce the lot stamp number container marking requirement.

Several other alternatives were suggested during the public meeting. One alternative discussed by the committee was to require all containers to continue to be lot stamp numbered. Maintaining the requirement for lot stamp numbers to be placed on all containers increases handler labor costs, slows handler operations, increases handler restrapping costs, as well as increases inspection costs. It was the consensus of the committee that such a requirement will be cost prohibitive as each block-inspected pallet will have to be manually pulled apart to enable the lot stamp number to be placed on the nine-column center tier containers.

Another alternative suggested was to eliminate the block-inspection method and require all handlers to use the in-line inspection method. During in-line inspection, containers will be stamped with the lot stamp number prior to being stacked on the pallet. This will have a serious financial impact on the industry, especially among small growers and handlers, due to a large increase in inspection costs. This suggestion was unacceptable to the industry as it will be cost prohibitive and could force small growers and handlers out of business.

Another alternative examined was to establish regulations prohibiting the use of any containers that create an inaccessible center when stacked on pallets. This alternative was not acceptable as it will not allow the industry to make necessary container changes to meet changing retailer needs and will be an excessive restriction.

This final rule, which relaxes the lot stamp number requirement, impacts all handlers in the same manner and was viewed by the committee as the least restrictive and best solution. Relaxing the lot stamp number requirement solves the problems caused by changes in pallet sizes and container configurations as well as spares the industry future financial hardship. It allows the industry flexibility for future pallet size and container configurations.

A proposed rule concerning this relaxation was issued on January 24, 1996, and published in the **Federal Register** on February 1, 1996, (61 FR 3604). That rule provided a 30-day comment period which ended March 4, 1996. No comments were received.

Based on the above, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant matter presented, the information and recommendations submitted by the committee, and other available information, it is found that this action will tend to effectuate the declared policy of the Act.

List of Subjects in 7 CFR Part 920

Kiwifruit, Marketing agreements.

For the reasons set forth in the preamble, 7 CFR Part 920 is amended as follows:

PART 920—KIWIFRUIT GROWN IN CALIFORNIA

1. The authority citation for 7 CFR Part 920 continues to read as follows:

Authority: 7 U.S.C. 601–674.

2. In Section 920.303 paragraph (d) is revised to read as follows:

§ 920.303 Container marking regulations.

* * * * *

(d) All exposed or outside containers of kiwifruit, but not less than 75 percent of the total containers on a pallet, shall be plainly marked with the lot stamp number corresponding to the lot inspection conducted by an authorized inspector; except for individual consumer packages and containers that are being directly loaded into a vehicle for export shipment under the supervision of the Federal or Federal-State Inspection Service.

Dated: March 20, 1996.

Eric M. Forman,

Deputy Director, Fruit and Vegetable Division.

[FR Doc. 96–7436 Filed 3–26–96; 8:45 am]

BILLING CODE 3410-02-P

FEDERAL RESERVE SYSTEM

12 CFR Part 265

[Docket No. R–0918]

Rules Regarding Delegation of Authority

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board is amending its Rules Regarding Delegation of Authority to authorize the Board's General Counsel to deny a request for stay of the effective date of a Board order. The Board itself would retain sole discretion to grant a request for stay of the effectiveness of any decision. This amendment corrects an unintentional omission from the Rules Regarding Delegation of Authority.

EFFECTIVE DATE: March 27, 1996.

FOR FURTHER INFORMATION CONTACT: Robert deV. Frierson, Assistant General Counsel (202/452–3711), or Christopher Greene, Attorney (202/452–2263), Legal Division. For users of Telecommunications Device for the Deaf (TDD) *only*, please contact Dorothea Thompson (202/452–3544), Board of Governors of the Federal Reserve System, 20th and C Streets, NW., Washington, DC 20551.

SUPPLEMENTARY INFORMATION: In 1987, the Board, pursuant to its authority under the Bank Holding Company Act and section 11(k) of the Federal Reserve Act, delegated to its General Counsel authority to deny a request for stay of the effective date of a Board order (52 FR 48805, December 28, 1987). The Board reorganized its Rules Regarding Delegation of Authority (12 CFR part 265) in 1991 to make it easier to locate specific delegations (56 FR 25614, June 5, 1991). In taking this action, the General Counsel's authority to deny a request for stay of the effective date of an action taken by the Board was unintentionally omitted from the amended Rules Regarding Delegation of Authority. This final rule corrects this omission.

Public Comment

The provisions of 5 U.S.C. 553 relating to notice, public participation, and deferred effective date have not been followed in connection with the adoption of this amendment because the change to be effected is technical and procedural in nature and does not constitute a substantive rule subject to the requirements of that section.

Regulatory Flexibility Act

No significant impact on small entities is expected.

Paperwork Reduction Act of 1995

In accordance with section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Ch. 35; 5 CFR 1320 Appendix A.1), the Board reviewed the rule under the authority delegated to the Board by the Office of Management and Budget. No collections of information pursuant to the Paperwork Reduction Act are contained in the rule.

List of Subjects in 12 CFR Part 265

Authority delegations (Government agencies), Banks, banking, Federal Reserve System.

For the reasons set forth in the preamble, the Board amends 12 CFR Part 265 as set forth below:

PART 265—RULES REGARDING DELEGATION OF AUTHORITY

1. The authority citation for Part 265 continues to read as follows:

Authority: 12 U.S.C. 248 (i) and (k).

2. In § 265.6, paragraph (a)(1) is revised to read as follows:

§ 265.6 Functions delegated to General Counsel.

* * * * *

(a) *Procedure*—(1) *Reconsideration of Board action.* Pursuant to § 262.3(i) of this chapter (Rules of Procedure) to determine whether or not to grant a request for reconsideration or whether to deny a request for stay of the effective date of any action taken by the Board with respect to an action as provided in that part.

* * * * *

By order of the Secretary of the Board of Governors of the Federal Reserve System, March 22, 1996.

Jennifer J. Johnson,

Deputy Secretary of the Board.

Cooperative Agreements With Commercial Firms

AGENCY: Office of Procurement, Contract Management Division, NASA.

ACTION: Final rule.

SUMMARY: Current NASA regulations at 14 CFR part 1260 describe the use of cooperative agreements with educational institutions and non-profit organizations. This final regulation establishes the requirements for cooperative agreements with commercial firms.

EFFECTIVE DATE: March 27, 1996.

FOR FURTHER INFORMATION CONTACT: Mr. T. Deback, (202) 358–0431.

SUPPLEMENTARY INFORMATION:

Background

NASA published a proposed rule in the **Federal Register** on June 27, 1995 (60 FR 33163). Interested parties were invited to submit comments. Almost 100 comments were received. All comments were considered in developing this final revision. The following section presents a summary of the major comments received and a response to each comment. Other changes have been made to improve clarity and readability.

Comment: The draft coverage requires synopsizing cooperative agreements awarded as a result of unsolicited proposals. This is not required by statute and may result in informing competitors of planned R&D and give them an opportunity to submit competing proposals thereby discouraging submission of innovative proposals from industry.

Response: As a general rule, it is important to be as open as possible about the expenditure of public funds and this principal led to requiring synopses of unsolicited proposals. It is recognized, however, that innovative proposals must be protected; therefore the policy allows the same exclusions as FAR 5.202(a)(8) which addresses a waiver to synopses requirements in the case of unique or innovative concepts.

Comment: The coverage requires that FAR cost principles be utilized for cooperative agreements. There is no statutory requirement for this and it will require commercial firms to establish special accounting procedures. Recommend flexible tracking of costs.

Response: Government policy is expressed in OMB Circular A–110 which states in Paragraph 27 that "The allowability of costs incurred by commercial organizations and those nonprofit organizations listed in Attachment C to Circular A–122 is determined in accordance with the provisions of the Federal Acquisition Regulation (FAR) at 48 CFR part 31".

Comment: Proposed rule appears to incorporate many features of a contract vs an assistance instrument. Proposed rule should be substantially rewritten.

Response: The proposed rule does contain some contractual aspects, but only those that are required by law or to ensure that public funds are appropriately expended. For example, the preaward certification requirements, treatment of property in a cooperative agreement, and much of the intellectual property coverage are required by law. Other aspects of the policy such as milestone payments, technical officer responsibilities, and liability and risk of loss are adaptations of contract language deemed necessary to protect both the recipient and NASA.

Comment: We note that the proposed rule provides for milestone billings. While this is a reasonable approach to managing the flow of funds, we are concerned that some may view these milestones as "go-no-go" decision points rather than a measure of progress against a recipient's best efforts. This area of the proposed regulation requires careful crafting so as to avoid inadvertently introducing a level of certainty that is not appropriate to cooperative agreements.

Response: The milestones are, in fact, "go-no-go" decision points. If a milestone cannot be met, the recipient should carefully consider revoking the agreement.

Comment: The proposed rule should be further clarified to provide that IR&D can be used for work performed under subcontracts issued pursuant to the cooperative agreement. This clarification is required to eliminate potential IR&D unallowability due to the interpretation that second tier work is required by contract. The definition should also recognize the possibility that the company's contribution may be Manufacturing and Production Engineering (M&PE) costs.

Response: IR&D costs may be recovered under other Government awards as an allowable cost only by the recipient (an individual firm or members of a consortium). While these costs of the recipient may be expended under subcontracts, the subcontractor may not recover any expenditures as IR&D costs.

Costs incurred by a recipient which may be classified as M&PE costs will generally not be permitted to be recovered under other Government awards.

Comment: "Resource Contribution" This term includes "in-kind contributions" which is not defined elsewhere, even though "cash contributions" are defined. The term "in-kind" is also used elsewhere in the proposed rule. This is an area where significant misunderstandings can arise and the term should be defined. We suggest that NASA use the definition in the now superseded OMB Circular A–110, Attachment E, Paragraph 2.d. (1976).

Response: The term "in-kind contribution" has been removed from the regulation and replaced with "non-cash" to avoid misunderstanding.

Comment: "Revocation" This definition needs to recognize mutuality as opposed to the proposed version which describes cancellation of NASA sponsorship, inferring one-sided activity.

Response: Agree. The definition has been amended.

Comment: A number of comments were received regarding the treatment of patent rights issues. For the most part, the treatment of patent rights is controlled by legislation and not within the purview of the agency to amend.

Response: NA

Comment: Section 1274.204 Evaluation and Selection. (a) As written, the regulation states that a typical CAN will have only one technical evaluation factor, e.g., technology transfer, enhancing U.S. competitiveness, etc. It then describes any number of more detailed "subfactors" which should be used, e.g., "level of commitment (contribution of private resources to the project)". In our view the "single" evaluation factor described is really not an evaluation factor, but rather the objective of the cooperative agreement. The "subfactors" appear to be the real evaluation factors. We recommend the regulation be revised accordingly.

Response: Many of the subfactors stated for evaluation could be consideration for any type of award (contract, grant, or cooperative agreement). It is the single evaluation factor that establishes cooperative agreement nature of the evaluation and ensures that the subfactors are evaluated within the scope and intent of a cooperative agreement structure.

Comment: When the total value of the agreement is less than $5m, the regulation says "Cost and [sic] pricing data should not normally be required." We strongly recommend that the word "normally" be deleted. Cost or pricing data should never be required for a cooperative agreement. Such a requirement is totally inappropriate for this type of financial arrangement.

Response: The cooperative agreement policy is structured to minimize the bureaucratic impact on the recipient during the course of performance. Minimal reporting of any kind is required and no cost reporting is required (except in the event of termination). We still must ensure that Government funds are being expended wisely. This is accomplished through two specific means. The first is a careful analysis of the proposed cost. The second is ensuring that the milestones are accomplished. Other than cost or pricing data may be an integral part of ensuring that the proposed cost is reasonable since no other adequate means may be available. The guidance has been changed to indicate that cost or pricing data (i.e., certified cost and pricing data in accordance with FAR 15.8 following the changes required by FASA) should never be required.

Comment: Section 1274.401 Government Property. The guidance regarding the acquisition of property for use on a cooperative agreement further shows the "contract" nature of this proposed rule. This requirement indicates a NASA belief that a recipient will structure the costing for the cooperative agreement in such a way that NASA dollars fund certain work and the recipient's dollars will fund other work. In reality, many recipients will account for the costs of a total agreement, including purchases of equipment, billing only its share of the total. In this scenario, NASA does not fund specific work, but funds a percentage of the total. The proposed Cooperative Agreements language would require separation of tasks that is unnecessary for any other purpose of the recipient and only increases costs of all work.

Response: Statutorily, equipment purchased with Government funds is Government equipment. Since NASA has no interest in acquiring equipment procured under a cooperative agreement, it is in both the recipient's and NASA's best interests that equipment be provided as a non-cash contribution of the recipient.

Comment: Section 1274.701 Suspension or Revocation. We strongly support the language in this section which provides that *either party* may revoke the agreement if acceptable technical progress is not made or there is a shift in technical emphasis. We recommend this same bilateral treatment be provided for suspension. The cooperative agreement should provide like rights to both parties.

Response: Sections 1274.701 and 1274.922 have been amended to state that either party may suspend the cooperative agreement.

Comment: Section 1274.903 Responsibilities. (b) NASA Responsibilities. NASA must not contract with other than the recipient without the recipient reaching a non-disclosure agreement with the proposed NASA contractor prior to the placing of the contract. Notification to the recipient is insufficient to protect recipient's intellectual property.

Response: It is preferred that NASA contractors not perform NASA duties and responsibilities under a cooperative agreement, but at times, that may be unavoidable. Protection of the recipient's trade secrets and other confidential data is covered by § 1274.905(b)(2) and (b)(3). A separate non-disclosure agreement should not be required. Any inventions made by a NASA contractor as a result of doing work for NASA will not be disclosed if doing so would compromise Recipient's trade secrets. However, the contractor has the first option to retain title to inventions made while doing work for NASA that do not compromise Recipient's trade secrets.

Comment: The limitation on disputes to those arising three (3) months prior to the written notification of paragraph (d) is too limiting and should be expanded to six to twelve months to correct this. It is suggested that paragraph (c) be modified to clarify when the three (3) month period begins.

Response: Disagreements between NASA and its contractors and recipients occur on a regular basis, but are resolved at low levels within the respective organizations as they should be. This provision attempts to provide another avenue for disputes in those extremely rare instances where resolution at the lower levels fails. The clause has been rewritten to clarify when the three (3) month period begins.

Comment: We strongly disagree with this paragraph which states that "all preceding payment milestones must be completed before payment can be made for the next payment milestone". Activities captured in milestones are not necessarily sequential in nature. Payment milestones are supposed to provide a mechanism for triggering payment of the NASA pre-agreed contribution at the accomplishment of the particular milestone.

Response: In order to ensure that a cooperative agreement is completed and that neither party "games" the other, it is critical that payment for milestones be made in the order that the milestones are established. It is important to note that the milestones are primarily established by the recipient and negotiated with NASA, so the recipient is able to establish milestones which represent the work to be accomplished sequentially under the cooperative agreement.

Comment: Section 1274.911(b)(4)(i)—In this paragraph the term "Administrator" is used. If it is to mean the same as that in § 1272.102, then the term should be included in the "Definition" section of the provision. If another person is intended, the paragraph should be revised.

Response: The definition of "Administrator" in § 1274.912(a)(1) has been added to the Definitions in 1274.911.

Comment: Section 1274.911(b)(6)—In line 10 it is unclear who in NASA can approve the waiver. This should be clarified.

Response: The Associate Administrator for Procurement has been substituted for NASA.

Comment: Section 1274.915—Restrictions on Sale or Transfer of Technology to Foreign Firms or Institutions. This clause gives NASA the right to, in effect, block the sale of a company to a foreign firm. We strongly recommend this clause be deleted.

Response: The purpose of cooperative agreements is to enhance US competitiveness, create jobs, improve the balance of payments, etc. These objectives may or may not be advanced by sale to a foreign firm but would form the basis of NASA's decision. The clause does not give NASA the right to prevent the sale; it only provides for consultation between the parties to determine how to best protect the Government's interests. If an acceptable solution cannot be reached, the agreement could be terminated.

Regulatory Flexibility Act

NASA certifies that this regulation will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

Paperwork Reduction Act

Under 5 CFR 1320.5(b)(2)(i), NASA is required to inform potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number. Under 5 CFR 1320.5(b)(2)(ii)(C), this paragraph meets that requirement as follows: information collection has been approved under OMB control number 2700–0092.

List of Subjects in 14 CFR Part 1274

Grant programs, Business and industry.

Tom Luedtke,

Deputy Associate Administrator for Procurement.

Accordingly, part 1274 is added to 14 CFR chapter V to read as follows:

PART 1274—COOPERATIVE AGREEMENTS WITH COMMERCIAL FIRMS

Subpart A—General

1274.101 Purpose.
1274.102 Definitions.
1274.103 Effect on other issuances.
1274.104 Deviations.
1274.105 Approval of Cooperative Agreement Notices (CANs) and cooperative agreements.

Subpart B—Pre-Award Requirements

1274.201 Purpose.
1274.202 Solicitations and proposals.
1274.203 Intellectual property.
1274.204 Evaluation and selection.
1274.205 Award procedures.
1274.206 Document format and numbering.
1274.207 Distribution of cooperative agreements.

Subpart C—Administration

1274.301 Delegation of administration.
1274.302 Transfers, novations, and change of name agreements.

Subpart D—Government Property

1274.401 Government property.

Subpart E—Procurement Standards

1274.501 Subcontracts.

Subpart F—Reports and Records

1274.601 Retention and access requirements for records.

Subpart G—Suspension or Termination

1274.701 Suspension or termination.

Subpart H—After-the-Award Requirements

1274.801 Purpose.
1274.802 Closeout procedures.
1274.803 Subsequent adjustments and continuing responsibilities.

Subpart I—Other Provisions and Special Conditions

1274.901 Other provisions and special conditions.
1274.902 Purpose.
1274.903 Responsibilities.
1274.904 Resource Sharing Requirements.
1274.905 Rights in Data.
1274.906 Designation of New Technology Representative and Patent Representative.
1274.907 Disputes.
1274.908 Milestone Payments.
1274.909 Term of this Agreement.
1274.910 Authority.
1274.911 Patent Rights.
1274.912 Patent Rights—Retention by the Recipient (Large Business).
1274.913 Patent Rights—Retention by the Recipient (Small Business).
1274.914 Requests for Waiver of Rights—Large Business.
1274.915 Restrictions on Sale or Transfer of Technology to Foreign Firms or Institutions.
1274.916 Liability and Risk of Loss.
1274.917 Additional Funds.
1274.918 Incremental Funding.
1274.919 Cost Principles and Accounting Standards.
1274.920 Responsibilities of the NASA Technical Officer.
1274.921 Publications and Reports: Non-Proprietary Research Results.
1274.922 Suspension or Termination.
1274.923 Equipment and Other Property.
1274.924 Civil Rights.
1274.925 Subcontracts.
1274.926 Clean Air-Water Pollution Control Acts.
1274.927 Debarment and Suspension and Drug-Free Workplace.
1274.928 Foreign National Employee Investigative Requirements.
1274.929 Restrictions on Lobbying.
1274.930 Travel and Transportation.
1274.931 Electronic Funds Transfer Payment Methods.
1274.932 Retention and Examination of Records.

Appendix A to Part 1274—Contract Provisions

Appendix B to Part 1274—Reports

Appendix C to Part 1274—Listing of Exhibits

Authority: 31 U.S.C. 6301 to 6308; 42 U.S.C. 2451 *et seq.*

Subpart A—General

§ 1274.101 Purpose.

(a) This part establishes uniform administrative requirements for NASA cooperative agreements awarded to commercial firms. Cooperative agreements are ordinarily entered into with commercial firms to—

(1) Support research and development,

(2) Provide technology transfer from the Government to the recipient, or

(3) Develop a capability among U.S. firms to potentially enhance U.S. competitiveness.

(b) An award may not be made to a foreign government. Award to foreign firms is not precluded. The approval of the Associate Administrator for Procurement is required to exclude foreign firms from submitting proposals.

§ 1274.102 Definitions.

Administrator. The Administrator or Deputy Administrator of NASA.

Associate Administrator for Procurement. The head of the Office of Procurement, NASA Headquarters (Code H).

Cash contributions. The recipient's cash outlay, including the outlay of money contributed to the recipient by third parties.

Closeout. The process by which a NASA determines that all applicable administrative actions and all required work of the award have been completed by the recipient and NASA.

Commercial item. The definition in 48 CFR 2.101 (FAR) is applicable.

Cooperative agreement. As defined by 31 U.S.C. 6305, cooperative agreements are financial assistance instruments used to stimulate or support activities for authorized purposes and in which the Government participates substantially in the performance of the effort. This regulation covers only cooperative agreements with commercial firms. Cooperative agreements with universities and non-profit organizations are covered by 14 CFR part 1260.

Cost sharing or matching. That portion of project or program costs not borne by the Federal Government except that the recipient's contribution may be reimbursable under other Government awards as allowable IR&D costs pursuant to 48 CFR 1831.205–18 (NFS).

Date of completion. The date on which all work under an award is completed or the date on the award document, or any supplement or amendment thereto, on which NASA sponsorship ends.

Days. Calendar days, unless otherwise indicated.

Government furnished equipment. Equipment in the possession of, or acquired directly by, the Government and subsequently delivered, or otherwise made available, to a Recipient and equipment procured by the Recipient with Government funds under a cooperative agreement.

Grant Officer. A Government employee who has been delegated the authority to negotiate, award, or administer grants or cooperative agreements. A Contracting Officer may serve as a Grant Officer if authorized by installation procurement regulations.

Incremental funding. A method of funding a cooperative agreement where the funds initially allotted to the cooperative agreement are less than the award amount. Additional funding is added as described in § 1274.918.

Recipient. An organization receiving financial assistance under a cooperative agreement to carry out a project or program. A recipient may be an individual firm, a consortium, a partnership, etc.

Resource contribution. The total value of resources provided by either party to the cooperative agreement including both cash and non-cash contributions.

Support contractor means a NASA contractor performing part or all of the NASA responsibilities under a cooperative agreement.

Suspension. An action by NASA or the recipient that temporarily discontinues efforts under an award, pending corrective action or pending a decision to terminate the award. Suspension of an award is a separate action from suspension under Federal agency regulations implementing Executive Order 12549, 51 FR 6370, 3 CFR, 1986 Comp., p. 189 and Executive Order 12689, 54 FR 34131, 3 CFR, 1989 Comp., p. 235, "Debarment and Suspension."

Technical Officer. The official of the cognizant NASA office who is responsible for monitoring the technical aspects of the work under a cooperative agreement. A Contracting Officer's Technical Representative may serve as a Technical Officer.

Termination. The cancellation of a cooperative agreement in whole or in part, by either party at any time prior to the date of completion.

§ 1274.103 Effect on other issuances.

For awards subject to this part, all administrative requirements of codified program regulations, program manuals, handbooks and other nonregulatory materials which are inconsistent with the requirements of this part shall be superseded, except to the extent they are required by statute, or authorized in accordance with the deviations provision in § 1274.104.

§ 1274.104 Deviations.

(a) *Exceptions.* The Associate Administrator for Procurement may grant exceptions for classes of or individual cooperative agreements from the requirements of this part when exceptions are not prohibited by statute.

(b) *Applicability.* A deviation is required for any of the following:

(1) When a prescribed provision set forth in this regulation for use verbatim is modified or omitted.

(2) When a provision is set forth in this part, but not prescribed for use verbatim, and the installation substitutes a provision which is inconsistent with the intent, principle, and substance of the prescribed provision.

(3) When a NASA form or other form is prescribed by this part, and that form is altered or another form is used in its place.

(4) When limitations, imposed by this regulation upon the use of a provision, form, procedure, or any other action, are not adhered to.

(c) *Request for deviations.* Requests for authority to deviate from this regulation will be forwarded to Headquarters, Program Operations Division (Code HS). Such requests, signed by the Procurement Officer, shall contain as a minimum:

(1) A full description of the deviation and identification of the regulatory requirement from which a deviation is sought.

(2) Detailed rationale for the request, including any pertinent background information.

(3) The name of the recipient and identification of the cooperative agreement affected, including the dollar value.

(4) A statement as to whether the deviation has been requested previously, and, if so, circumstances of the previous request(s).

(5) A description of the intended effect of the deviation.

(6) A copy of legal counsel's concurrence or comments.

§ 1274.105 Approval of Cooperative Agreement Notices (CANs) and cooperative agreements.

(a) As soon as possible after the initial decision is made by a Headquarters program office or Center procurement personnel to use the CAN process, the cognizant program office or procurement office shall notify the Associate Administrator for Procurement (Code HS) of the intent to use a CAN in all cases where the total Government funds to be awarded in response to CAN proposals is expected to equal or exceed $10 million. All such notifications, as described below, shall be concurred in by the Procurement Officer. This requirement also applies in those cases where an unsolicited proposal is received and a decision is made to award a cooperative agreement in which the recipient (or one or more members of a "team" of recipients) is a commercial firm and the total Government funds are expected to equal or exceed $10 million.

(b) The required notification is to be accomplished by sending an electronic mail (e-mail) message to the following address at NASA Headquarters: can@mercury.hq.nasa.gov. The notification must include the following information, as a minimum:

(1) Identification of the cognizant center and program office;

(2) Description of the proposed program for which proposals are to be solicited;

(3) Rationale for decision to use a CAN rather than other types of solicitations;

(4) The amount of Government funding to be available for awards;

(5) Estimate of the number of cooperative agreements to be awarded as a result of the CAN;

(6) The percentage of cost-sharing to be required; and

(7) Tentative schedule for release of CAN and award of cooperative agreements.

(c) Code HS will respond by e-mail message to the sender, with a copy of the message to the Procurement Officer, within 5 working days of receipt of this initial notification. The response will address the following:

(1) Whether Code HS agrees or disagrees with the appropriateness for using a CAN for the effort described;

(2) Whether Code HS will require review and approval of the CAN before its issuance;

(3) Whether Code HS will require review and approval of the selected offeror's cost sharing arrangement (e.g., cost sharing percentage; type of contribution (cash, labor, etc.)); and

(4) Whether Code HS will require review and approval of the resulting cooperative agreement(s).

(d) If a response from Code HS is not received within 5 working days of notification, the program office or center may proceed with release of the CAN and award of the cooperative agreements as described.

Subpart B—Pre-Award Requirements

§ 1274.201 Purpose.

Sections 1274.202 through 1274.207 prescribe forms and instructions and address other pre-award matters.

§ 1274.202 Solicitations and proposals.

(a) Consistent with 31 U.S.C. 6301(3), NASA uses competitive procedures to award cooperative agreements whenever possible. An award will normally be made as a result of a Cooperative Agreement Notice (CAN) which envisions a cooperative agreement as the award instrument. A Commerce Business Daily synopsis or a synopsis on the NASA Acquisition Internet Service will be used to publicize the CAN.

(b) *Unsolicited Proposals.* (1) An award may be made as a result of an unsolicited proposal. The unsolicited proposal must evidence a unique and innovative idea or approach which is not the subject of a current or anticipated solicitation. When a cooperative agreement is awarded as a result of an unsolicited proposal, a Commerce Business Daily synopsis or a synopsis on the NASA Acquisition Internet Service will be used to provide an opportunity for other firms/consortia to express an interest in the agreement

unless the exception in 48 CFR 5.202(a)(8) (FAR) applies. Respondents should be given a minimum of thirty days to respond. If interest is expressed, a decision must be made to proceed with the award or to issue a solicitation for competitive proposals.

(2) Prior to an award made as the result of an unsolicited proposal, the award must be approved by the Procurement Officer if NASA's total resource contribution is below $5 million. Center Director approval is required if NASA's total resource contribution is $5 million or more. For Headquarters cooperative agreements, approval by the Associate Administrator for Procurement is required if NASA's total resource contribution is $5 million or more.

(c) *Cost and payment matters.* (1) The expenditure of Government funds by the Recipient and the allowability of costs recognized as a resource contribution by the Recipient shall be governed by the FAR cost principles, 48 CFR part 31. If the Recipient is a consortium which includes non-commercial entities as members, cost allowability for those members will be determined as follows: Allowability of costs incurred by State, local or federally-recognized Indian tribal governments is determined in accordance with the provisions of OMB Circular A–87, "Cost Principles for State and Local Governments." The allowability of costs incurred by non-profit organizations is determined in accordance with the provisions of OMB Circular A–122, "Cost Principles for Non-Profit Organizations." The allowability of costs incurred by institutions of higher education is determined in accordance with the provisions of OMB Circular A–21, "Cost Principles for Educational Institutions." The allowability of costs incurred by hospitals is determined in accordance with the provisions of Appendix E of 45 CFR part 74, "Principles for Determining Costs Applicable to Research and Development Under Grants and Contracts with Hospitals." Recipient's method for accounting for the expenditure of funds must be consistent with Generally Accepted Accounting Principles.

(2) A substantial resource contribution on the part of the Recipient is required. The Recipient is expected to contribute at least 50% of the total resources required to accomplish the cooperative agreement. Recipient contributions may be either cash or non-cash or both. In those cases in which a contribution of less than 50% is anticipated from the Recipient, approval of the Associate Administrator for Procurement (Code HS) is required prior to award. The request for approval should address the evaluation factor in the solicitation and how the proposal accomplishes those objectives to such a degree that a share ratio of less than 50% is warranted.

(3) Cooperative agreements are funded by NASA in a fixed amount. Payments in fixed amounts will be made by NASA in accordance with "Milestone Billings" which are discussed in paragraph (c)(4) of this section. If the Recipient completes the final milestone, final payment is made, and NASA will have completed its financial responsibilities under the agreement. However, if the cooperative agreement is terminated prior to achievement of all milestones, NASA's funding will be limited to milestone payments already made plus NASA's share of costs required by the Recipient to meet commitments which had in the judgment of NASA become firm prior to the effective date of termination and are otherwise appropriate. In no event shall these additional costs or payment exceed the amount of the next payable milestone billing amount.

(4) Milestone billings is the method of payment to the Recipient under cooperative agreements. Performance based milestones are used as the basis of establishing a set of verifiable milestones for payment purposes. Each milestone payment shall be established so that the Government payment is at the same share ratio as the cooperative agreement share ratio. If the Recipient is a consortium, the Articles of Collaboration is required to contain an extensive list of performance based milestones that the consortium has agreed to. Generally, payments should not be made more than once monthly; ideally, payments will be made about every 60 to 90 days but in all cases should be made on the basis of verifiable, significant events as opposed to the passage of time. The last payment milestone should be large enough to ensure that the Recipient completes its responsibilities under the cooperative agreement (or funds should be reserved for payment until after completion of the cooperative agreement). The Government technical officer must verify completion of each milestone to the Grants Officer as part of the payment process. If the Government's projected cash contribution to a cooperative agreement exceeds $5 million, approval of the Milestone Payment clause, including the milestones and anticipated payments, by the Associate Administrator for Procurement (Code HS) is required prior to award. The request for approval should contain substantially the same information required by 48 CFR (NFS) 1832.7006.

(5) Cooperative agreements may be incrementally funded subject to the following:

(i) The total value of the NASA cash contribution is $50,000 or more.

(ii) The period of performance overlaps the succeeding fiscal year.

(iii) The funds are not available to fully fund the cooperative agreement at the time of award.

(6) Cost sharing requirements on cooperative agreements with commercial firms are based on section 23 of OMB Circular A–110, November 23, 1993. Only cash or certain non-cash resources are acceptable sources for the Recipient contribution to a cooperative agreement. Acceptable non-cash resources include such items as purchased equipment, equipment, labor, office space, etc. The actual or imputed value of intellectual property such as patent rights, data rights, trade secrets, etc., are not acceptable as sources for the Recipient contribution.

(7) Recipients shall not be paid a profit under cooperative agreements. Profit may be paid by the Recipient to subcontractors, if the subcontractor is not part of the offering team and the subcontract is an arms-length relationship.

(8) The Recipient's resource share of the cooperative agreement may be allocated as part of its IR&D program in accordance with a class deviation pursuant to 48 CFR 1831.205–18 (NFS).

(9) The CAN must provide a description of the non-cash Government contribution (personnel, equipment, facilities, etc.) as part of the Government's contribution to the cooperative agreement in addition to funding. The offeror may propose that additional non-cash Government resources be provided under two conditions. First, the offeror is responsible for verifying the availability of the resources and their suitability for their intended purpose and, second, those resources are part of the Government contribution (which must be matched by the Recipient) and paid for directly by the awarding organization.

(d) *Consortia as recipients.* (1) The use of consortia as Recipients for cooperative agreements is encouraged. Consortia will tend to bring to a cooperative agreement a broader range of capabilities and resources. A consortium is a group of organizations that enter into an agreement to collaborate for the purposes of the cooperative agreement with NASA. The agreement to collaborate can take the form of a legal entity such as a partnership or joint venture but it is not necessary that such an entity be created. A consortium may be made up of firms which normally compete for commercial or Government business or may be made up of firms which perform complementary functions in a given industry. The inclusion of non-profit or educational institutions, small businesses, or small disadvantaged businesses in the consortium could be particularly valuable in ensuring that the results of the consortium's activities are disseminated.

(2) Key to the success of the cooperative agreement with a consortium is the consortium's Articles of Collaboration, which is a definitive description of the roles and responsibilities of the consortium's members. It should also address to the extent appropriate: commitments of financial, personnel, facilities and other resources, a detailed milestone chart of consortium activities, accounting requirements, subcontracting procedures, disputes, term of the agreement, insurance and liability issues, internal and external reporting requirements, management structure of the consortium, obligations of organizations withdrawing from the consortia, allocation of data and patent rights among the consortia members, agreements, if any, to share existing technology and data, the firm which is responsible for the completion of the consortium's responsibilities under the cooperative agreement and has the authority to commit the consortium and receive payments from NASA, employee policy issues, etc.

(3) An outline of the Articles of Collaboration should be required as part of the proposal and evaluated during the source selection process.

(e) *Metric system of measurement.* The Metric Conversion Act, as amended by the Omnibus Trade and Competitiveness Act (15 U.S.C. 205) declares that the metric system is the preferred measurement system for U.S. trade and commerce.

§ 1274.203 Intellectual property.

(a) A cooperative agreement covers the disposition of rights relating to inventions and patents between NASA and the Recipient. If the Recipient is a consortium or partnership, rights flowing between multiple organizations in a consortium must be negotiated separately and formally documented, preferably in the Articles of Collaboration.

(b) Patent rights clauses are required by statute and regulation. The clauses exist for Recipients of the Agreement whether they are:

(1) Other than small business or nonprofit organizations (generally referred to as large businesses) or

(2) Small businesses or nonprofit organizations.

(c) There are five situations in which inventions may arise under a cooperative agreement: Recipient Inventions, Subcontractor Inventions, NASA Inventions, NASA Support Contractor Inventions, and Joint Inventions with Recipient.

(d)(1) *Recipient inventions.* (i) A Recipient, if a large business, is subject to section 305 of the National Aeronautics and Space Act of 1958 (42 U.S.C. 2457) relating to property rights in inventions. The term "invention" includes any invention, discovery, improvement, or innovation. Title to an invention made under a cooperative agreement by a large business Recipient initially vests with NASA. The Recipient may request a waiver under the NASA Patent Waiver Regulations to obtain title to inventions made under the Agreement. Such a request may be made in advance of the Agreement (or 30 days thereafter) for all inventions made under the Agreement. Alternatively, requests may be made on a case by case basis any time an individual invention is made. Such waivers are liberally and expeditiously granted after review by NASA's Invention and Contribution Board and approval by NASA's General Counsel. When a waiver is granted, any inventions made in the performance of work under the Agreement are subject to certain reporting, election and filing requirements, a royalty-free license to the Government, march-in rights, and certain other reservations.

(ii) A Recipient, if a small business or nonprofit organization, may elect to retain title to its inventions. The term "nonprofit organization" is defined in 35 U.S.C. 201(i) and includes universities and other institutions of higher education or an organization of the type described in section 501(c)(3) of the Internal Revenue Code. The Government obtains an irrevocable, nonexclusive, royalty-free license.

(2) *Subcontractor inventions.* (i) *Large business.* If a Recipient enters a subcontract (or similar arrangement) with a large business organization for experimental, developmental, research, design or engineering work in support of the Agreement to be done in the United States, its possessions, or Puerto Rico, section 305 of the Space Act applies. The clause applicable to large business organizations is to be used (suitably modified to identify the parties) in any subcontract. The subcontractor may request a waiver under the NASA Patent Waiver Regulations to obtain rights to inventions made under the subcontract just as a large business Recipient can (see paragraph (d)(1)(i) of this section). It is strongly recommended that a prospective large business subcontractor contact the NASA installation Patent Counsel or Intellectual Property Counsel to assure that the right procedures are followed. Just like the Recipient, any inventions made in the performance of work under the Agreement are subject to certain reporting, election and filing requirements, a royalty-free license to the Government, march-in rights, and certain other reservations.

(ii) *Non-profit organization or small business.* In the event the Recipient enters into a subcontract (or similar arrangement) with a domestic nonprofit organization or a small business firm for experimental, developmental, or research work to be performed under the Agreement, the requirements of 35 U.S.C. 200 *et seq.* regarding "Patent Rights in Inventions Made With Federal Assistance," apply. The subcontractor has the first option to elect title to any inventions made in the performance of work under the Agreement, subject to specific reporting, election and filing requirements, a royalty-free license to the Government, march-in rights, and certain other reservations that are specifically set forth.

(iii) *Work outside the United States.* If the Recipient subcontracts for work to be done outside the United States, its possessions or Puerto Rico, the NASA installation Patent Counsel or Intellectual Property Counsel should be contacted for the proper patent rights clause to use and the procedures to follow.

(iv) *Additional rights.* Notwithstanding paragraphs (d)(1) and (d)(2) (i) through (iii) of this section, and in recognition of the Recipient's substantial contribution, the Recipient is authorized, subject to rights of NASA set forth elsewhere in the Agreement, to:

(A) Acquire by negotiation and mutual agreement rights to a subcontractor's subject inventions as the Recipient may deem necessary, or

(B) If unable to reach agreement pursuant to paragraph (d)(2)(iv)(A) of this section, request that NASA invoke exceptional circumstances as necessary pursuant to 37 CFR 401.3(a)(2) if the prospective subcontractor is a small business firm or nonprofit organization, or for all other organizations, request that such rights for the Recipient be included as an additional reservation in a waiver granted pursuant to 14 CFR 1245.1. The exercise of this exception does not change the flow down of the

applicable patent rights clause to subcontractors. Applicable laws and regulations require that title to inventions made under a subcontract must initially reside in either the subcontractor or NASA, not the Recipient. This exception does not change that. The exception does authorize the Recipient to negotiate and reach mutual agreement with the subcontractor for the grant-back of rights. Such grant-back could be an option for an exclusive license or an assignment, depending on the circumstances.

(3) *NASA inventions.* NASA will use reasonable efforts to report inventions made by its employees as a consequence of, or which bear a direct relation to, the performance of specified NASA activities under an Agreement. Upon timely request, NASA will use its best efforts to grant Recipient first option to acquire either an exclusive or partially-exclusive, revocable, royalty-bearing license, on terms to be negotiated, for any patent applications and patents covering such inventions. This exclusive or partially-exclusive license to the Recipient will be subject to the retention of rights by or on behalf of the Government for Government purposes.

(4) *NASA support contractor inventions.* It is preferred that NASA support contractors be excluded from performing any of NASA's responsibilities under the Agreement since the rights obtained by a NASA support contractor could work against the rights needed by the Recipient. In the event NASA support contractors are tasked to work under the Agreement and inventions are made by support contractor employees, the support contractor will normally obtain rights in such inventions. However, if NASA has the right to acquire or has acquired title to such inventions, upon timely request, NASA will use its best efforts to grant Recipient first option to acquire either an exclusive or partially exclusive, revocable, royalty-bearing license, upon terms to be negotiated, for any patent applications and patents covering such inventions. This exclusive or partially-exclusive license to the Recipient will be subject to the retention of rights by or on behalf of the Government for Government purposes.

(5) *Joint inventions.* (i) NASA and the Recipient agree to use reasonable efforts to identify and report to each other any inventions made jointly between NASA employees (or employees of NASA support contractors) and employees of Recipient. For large businesses, the Associate General Counsel (Intellectual Property) may agree that the United States will refrain, for a specified period, from exercising its undivided interest in a manner inconsistent with Recipient's commercial interest. For small business firms and nonprofit organizations, the Associate General Counsel (Intellectual Property) may agree to assign or transfer whatever rights NASA may acquire in a subject invention from its employee to the Recipient as authorized by 35 U.S.C. 202(e). The grant officer negotiating the Agreement with small business firms and nonprofit organizations can agree, up front, that NASA will assign whatever rights it may acquire in a subject invention from its employee to the small business firm or nonprofit organization. Requests under this paragraph shall be made through the Center Patent Counsel.

(ii) NASA support contractors may be joint inventors. If a NASA support contractor employee is a joint inventor with a NASA employee, the same provisions apply as those for NASA Support Contractor Inventions. The NASA support contractor will retain or obtain nonexclusive licenses to those inventions in which NASA obtains title. If a NASA support contractor employee is a joint inventor with a Recipient employee, the NASA support contractor and Recipient will become joint owners of those inventions in which they have elected to retain title or requested and have been granted waiver of title. Where the NASA support contractor has not elected to retain title or has not been granted waiver of title, NASA will jointly own the invention with the Recipient.

(e) *Licenses to recipient(s).* (1) Any exclusive or partially exclusive commercial licenses are to be royalty-bearing consistent with Government-wide policy in licensing its inventions. It also provides an opportunity for royalty-sharing with the employee-inventor, consistent with Government-wide policy under the Federal Technology Transfer Act.

(2) Upon application in compliance with 37 CFR part 404—Licensing of Government Owned Inventions, all Recipients shall be granted a revocable, nonexclusive, royalty-free license in each patent application filed in any country on a subject invention and any resulting patent in which the Government obtains title. Because cooperative agreements are cost sharing cooperative arrangements with a purpose of benefiting the public by improving the competitiveness of the Recipient and the Government receives an irrevocable, nonexclusive, royalty-free license in each Recipient subject invention, it is only equitable that the Recipient receive, at a minimum, a revocable, nonexclusive, royalty-free license in NASA inventions and NASA contractor inventions where NASA has acquired title.

(3) *Notice requirements.* Once a Recipient has exercised its option to apply for an exclusive or partially exclusive license, a notice, identifying the invention and the Recipient, is published in the **Federal Register**, providing the public opportunity for filing written objections for 60 days.

(f) *Preference for United States manufacture.* Despite any other provision, the Recipient agrees that any products embodying subject inventions or produced through the use of subject inventions shall be manufactured substantially in the United States. The intent of this provision is to support manufacturing jobs in the United States regardless of the status of the Recipient as a domestic or foreign controlled company. However, in individual cases, the requirement to manufacture substantially in the United States, may be waived by the Associate Administrator for Procurement (Code HS) upon a showing by the Recipient that under the circumstances domestic manufacture is not commercially feasible.

(g) *Space Act agreements.* Invention and patent rights in cooperative agreements must comply with statutory and regulatory provisions. Where circumstances permit, a Space Act Agreement is available as an alternative instrument which can be more flexible in the area of invention and patent rights.

(h) *Data rights.* Data rights provisions can and should be tailored to best achieve the needs and objectives of the respective parties concerned.

(1) The data rights clause at § 1274.905 assumes a substantially equal cost sharing relationship where collaborative research, experimental, developmental, engineering, demonstration, or design activities are to be carried out, such that it is likely that "proprietary" information will be developed and/or exchanged under the agreement. If cost sharing is unequal or no extensive research, experimental, developmental, engineering, demonstration, or design activities are likely, a different set of clauses may be appropriate.

(2) The primary question that must be answered when developing data clauses is what does each party need or intend to do with the data developed under the agreement. Accordingly, the data rights clauses may be tailored to fit the circumstances. Where conflicting goals of the parties result in incompatible data provisions, grant officers for the Government must recognize that private companies entering into cooperative agreements bring resources to that relationship and must be allowed to reap an appropriate benefit for the expenditure of those resources. However, since serving a public purpose is a major objective of a cooperative agreement, care must be exercised to ensure the Recipient is not established as a long term sole source supplier of an item or service and is not in a position to take unfair advantage of the results of the cooperative agreement. Therefore, a reasonable time period (depending on the technology, two to five years after production of the data) may be established after which the data first produced by the Recipient in the performance of the agreement will be made public.

(3) Data can be generated from different sources and can have various restrictions placed on its dissemination. Recipient data furnished to NASA can exist prior to, or be produced outside of, the agreement or be produced under the agreement. NASA can also produce data in carrying out its responsibilities under the agreement. Each of these areas need to be covered.

(4) For data, including software, first produced by the Recipient under the agreement, the Recipient may assert copyright. Data exchanged with a notice showing that the data is protected by copyright must include appropriate licenses in order for NASA to use the data as needed.

(5) Recognizing that the dissemination of the results of NASA's activities is a primary objective of a cooperative agreement, the parties should specifically delineate what results will be published and under what conditions. This should be set forth in the clause of the cooperative agreement entitled "Publication and Reports." Any such agreement on the publication of results should be stated to take precedence over any other clause in the cooperative agreement.

(6) In accordance with section 303(b) of the Space Act, any data first produced by NASA under the agreement which embodies trade secrets or financial information that would be privileged or confidential if it had been obtained from a private participant, will be marked with an appropriate legend and maintained in confidence for an agreed to period of up to five years (the maximum allowed by law). This does not apply to data other than that for which there has been agreement regarding publication or distribution. The period of time during which data first produced by NASA is maintained in confidence should be consistent with the period of time determined in accordance with paragraph (h)(2) of this section, before which data first produced by the Recipient will be made public. Also, NASA itself may use the marked data (under suitable protective conditions) for agreed-to purposes.

§ 1274.204 Evaluation and selection.

(a) *General.* A single technical evaluation factor is typically used for CANs. That evaluation factor should be one of the following: providing research and development or technology transfer, enhancing U.S. competitiveness, or developing a capability among U.S. firms. Award to foreign firms is not precluded if the evaluation factor is satisfied. Subfactors could include such things as fostering U.S. leadership, potential to advance technologies anticipated to enhance U.S. competitiveness, timeliness of proposed accomplishments, private sector commitment to commercialization, identification of specific potential commercial markets, appropriateness of business risk, potential for broad impact on the U.S. technology and knowledge base, level of commitment (contribution of private resources to the project), appropriateness of team member participation and relationships, appropriateness of management planning, relevant experience, qualifications and depth of management and technical staff, quality and appropriateness of resources committed to the project, performance bench marks, technical approach, business approach/resource sharing, past performance, the articles of collaboration, etc.

(b) *Technical evaluation.* (1) Competitive technical proposal information shall be protected in accordance with 48 CFR 15.411 (FAR), Receipt of Proposals and quotations. Unsolicited proposals shall be protected in accordance with 48 CFR 15.508 (FAR), Prohibitions, and 48 CFR 15.509 (FAR), Limited use of data.

(2) The technical officer will evaluate proposals in accordance with the criteria in the CAN. Proposals selected for award will be supported by documentation as described in paragraph (c)(1) of this section. When evaluation results in a proposal not being selected, the proposer will be notified in accordance with the CAN.

(3) The technical evaluation of proposals may include peer reviews. Since the business sense of a cooperative agreement proposal is critical to its success, NASA should reserve the right to utilize appropriate outside evaluators to assist in the evaluation of such proposal elements as the business base projections, the market for proposed products, and/or the impact of anticipated product price reductions. The use of outside evaluators shall be approved in accordance with 48 CFR 1815.413–2(c)(2) (NFS). It is strongly recommended that a numerical scoring system be established to rank proposals. Data provided to outside evaluators should be protected in accordance with 48 CFR 1815.413–2(e) (NFS).

(4) Evaluation of unsolicited proposals must consider whether: the subject of the proposal is available to NASA from another source without restriction; the proposal closely resembles a pending competitive acquisition; and the research proposed demonstrates an innovative and unique method, approach, or concept. Organizations submitting unaccepted proposals will be notified in writing.

(c) *Documentation requirements.* For proposals selected for award, the technical officer will prepare and furnish to the grant officer the following documentation:

(1) For a competitively selected proposal, a signed selection statement and technical evaluation based on the evaluation criteria stated in the solicitation.

(2) For an unsolicited proposal, a justification for acceptance of an unsolicited proposal (JAUP) prepared by the cognizant technical office. The JAUP shall be submitted for the approval of the grant officer after review and concurrence at a level above the technical officer. The evaluator shall consider the following factors, in addition to any others appropriate for the particular proposal:

(i) Unique and innovative methods, approaches or concepts demonstrated by the proposal.

(ii) Overall scientific or technical merits of the proposal.

(iii) The offeror's capabilities, related experience, facilities, techniques, or unique combinations of these which are integral factors for achieving the proposal objectives.

(iv) The qualifications, capabilities, and experience of the proposed key personnel who are critical in achieving the proposal objectives.

(v) Current, open solicitations under which the unsolicited proposal could be evaluated.

(d) *Cost evaluation.* (1) The grant officer and technical team will determine whether the overall proposed cost of the project is reasonable and that the Recipient's contribution is valid, verifiable, and available. Commitments should be obtained and verified to the extent practical from the offeror or

members of the consortia that the proposed contributions can and will be made as specified in the proposal or statement of work.

(i) If the Recipient's verified share on a cooperative agreement equals or exceeds 50% of the total cost of the agreement and the total value of the agreement is less than $5 million, the cost evaluation of the offeror's proposal should focus on the overall reasonableness and timing of the proposer's contribution. Cost or pricing data should not be required and information other than cost or pricing data (defined in 48 CFR 15.801) (FAR) should not normally be required.

(ii) If the Recipient's share is projected to be less than 50% or the total value of the agreement is more than $5 million, a more in-depth analysis of the proposed costs should be undertaken. Only information other than cost or pricing data should be required. An analysis consistent with 48 CFR 15.805–3 through 15.805–5 (FAR) should be performed.

(2) As part of the evaluation of the cost proposal, the source of the recipient's contribution should be determined. Each of the cost elements contributed by the recipient and their amounts should be identified. If the contribution will consist at least in part of IR&D, the extent to which the IR&D may be recoverable from Government awards should be established. This will involve using the estimated Government participation rate of the recipient's General and Administrative indirect cost base for the period of the cooperative agreement. The results of the evaluation are to be documented in the cooperative agreement file.

(e) *Consortium.* If the cooperative agreement is to be awarded to a consortium, a completed, formally executed Articles of Collaboration is required prior to award.

(f) *Printing, binding, and duplicating.* Proposals for effort which involve printing, binding, and duplicating in excess of 25,000 pages are subject to the Government Printing and Binding Regulations, No. 26, February 1990, S. Pub. 101–9, U.S. Government Printing Office, Washington, DC 20402, (202) 512–1800, published by the Congressional Joint Committee on Printing. The technical office will refer such proposals to the Installation Central Printing Management Officer (ICPMO). The grant officer will be advised in writing of the results of the ICPMO review.

§ 1274.205 Award procedures.

(a) *General.* Multiple year cooperative agreements are encouraged, but normally they should not extend beyond two years.

(b) *Award above proposed amount.* Awards of cooperative agreements in response to competitive solicitations will not result in providing more NASA funds or resources than was anticipated in the Recipient's proposal. If additional funds or resources are deemed necessary, they will be provided by the Recipient and the Government cost share percentage will be adjusted downward.

(c) *Changes to cooperative agreements.* Cost growth or in-scope changes shall not increase the amount of NASA's contribution. Additional costs which arise during the performance of the cooperative agreement are the responsibility of the Recipient. Funding for work required beyond the scope of the cooperative agreement must be sought through the submission of a proposal which will be treated as an unsolicited proposal.

(d) *Bilateral award.* All cooperative agreements awarded under this regulation will be awarded on a bilateral basis.

(e) *Certifications and representations.* (1) *General.* Unless prohibited by statute or codified regulation, Recipients will be encouraged to submit certifications and representations required by statute, executive order, or regulation on an annual basis, if the Recipients have ongoing and continuing relationships with the agency. Annual certifications and representations shall be signed by responsible officials with the authority to ensure Recipients' compliance with the pertinent requirements.

(2) Civil rights requirements—nondiscrimination in certain Federally-funded programs. Recipients must furnish assurances of compliance with civil rights statutes specified in 14 CFR parts 1250 through 1252. Such assurances are not required for each cooperative agreement, if they have previously been furnished and remain current and accurate. Certifications to NASA are normally made on NASA Form 1206, which may be obtained from the grant officer. Upon acceptance, the grant officer will forward assurances to the NASA Office of Equal Opportunity Programs for recording and retention purposes.

(3) *Debarment certification.* NASA cooperative agreements are subject to the provisions of 14 CFR part 1265, Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide requirements for Drug-Free Workplace (Grants), unless excepted by §§ 1265.110 and 1265.610.

(4) *Lobbying certification.* A Lobbying Certification in accordance with 14 CFR part 1271 will be obtained prior to award.

(f) *Indemnification.* Indemnification under Public Law 85–804, as amended (50 U.S.C. 1431 *et seq.*) is not authorized for cooperative agreements.

§ 1274.206 Document format and numbering.

(a) *Formats.* Grant officers are authorized to use the format in Exhibit A of Appendix C of this part for the award of all cooperative agreements. Computer-generated versions and omission of inapplicable items are allowed.

(b) *Cooperative agreement numbering.* The identification numbering system for all cooperative agreements shall conform to 48 CFR 1804.7102–3 (NFS), except that a NCC prefix will be used in lieu of the NAS prefix.

§ 1274.207 Distribution of cooperative agreements.

Copies of cooperative agreements and modifications will be provided to: payment office, technical officer, administrative grant officer when delegation has been made, NASA Center for Aerospace Information (CASI), Attn: Document Processing Section, 800 Elkridge Landing Road, Linthicum Heights, Maryland 21090–2934, and any other appropriate recipient. Copies of the statement of work, contained in the Recipient's proposal and accepted by NASA, will be provided to the administrative grant officer and CASI. The cooperative agreement file will contain a record of the addresses for distributing agreements and supplements.

Subpart C—Administration

§ 1274.301 Delegation of administration.

Normally, cooperative agreements will be administered by the awarding activity.

§ 1274.302 Transfers, novations, and change of name agreements.

(a) *Transfer of cooperative agreements.* Novation is the only means by which a cooperative agreement may be transferred from one Recipient to another.

(b) *Novation and change of name.* All novation agreements and change of name agreements of the Recipient, prior to execution, shall be reviewed by NASA legal counsel for legal sufficiency prior to approval.

Subpart D—Government Property

§ 1274.401 Government property.

The accomplishment of a cooperative agreement may require the purchase of equipment for a wide range of purposes. If this equipment is purchased with Government funds, i.e., as part of the Government contribution to the cooperative agreement, it becomes Government property and must be disposed of in accordance with 48 CFR part 45 (FAR) at the conclusion of the cooperative agreement. In some cases, this may meet the needs of the parties. If, however, the Recipient may need the equipment to continue commercial efforts following the cooperative agreement, it should be purchased by the Recipient and included as a non-cash contribution of the Recipient. In this way, it is not procured, not even in part, with Government funds and the Government acquires no ownership interest. Procurement by the Recipient may be before or during the performance of the cooperative agreement.

Subpart E—Procurement Standards

§ 1274.501 Subcontracts.

Recipients are not authorized to issue grants or cooperative agreements to subrecipients. All contracts, including small purchases, awarded by Recipients and their contractors shall contain the procurement provisions of Appendix A to this part, as applicable and may be subject to approval requirements cited in § 1274.925.

Subpart F—Reports and Records

§ 1274.601 Retention and access requirements for records.

(a) This subpart sets forth requirements for record retention and access to records for awards to Recipients.

(b) Financial records, supporting documents, statistical records, and all other records pertinent to an award shall be retained for a period of three years from the date of submission of the final invoice. The only exceptions are the following:

(1) If any litigation, claim, or audit is started before the expiration of the 3-year period, the records shall be retained until all litigation, claims or audit findings involving the records have been resolved and final action taken.

(2) Records for real property and equipment acquired with Federal funds shall be retained for 3 years after final disposition.

(3) When records are transferred to or maintained by NASA, the 3-year retention requirement is not applicable to the Recipient.

(4) Indirect cost rate proposals, cost allocations plans, etc. as specified in paragraph (g) of this section.

(c) Copies of original records may be substituted for the original records if authorized by NASA.

(d) NASA shall request transfer of certain records to its custody from Recipients when it determines that the records possess long term retention value. However, in order to avoid duplicate record keeping, NASA may make arrangements for Recipients to retain any records that are continuously needed for joint use.

(e) NASA, the Inspector General, Comptroller General of the United States, or any of their duly authorized representatives, have the right of timely and unrestricted access to any books, documents, papers, or other records of Recipients that are pertinent to the awards, in order to make audits, examinations, excerpts, transcripts and copies of such documents. This right also includes timely and reasonable access to a Recipient's personnel for the purpose of interview and discussion related to such documents. The rights of access in this paragraph are not limited to the required retention period, but shall last as long as records are retained.

(f) Unless required by statute, NASA shall not place restrictions on Recipients that limit public access to the records of Recipients that are pertinent to an award, except when NASA can demonstrate that such records shall be kept confidential and would have been exempted from disclosure pursuant to the Freedom of Information Act (5 U.S.C. 552) if the records had belonged to NASA.

(g) This paragraph (g) applies to the following types of documents, and their supporting records: indirect cost rate computations or proposals, cost allocation plans, and any similar accounting computations of the rate at which a particular group of costs is chargeable (such as computer usage chargeback rates or composite fringe benefit rates).

(1) *If submitted for negotiation.* If the Recipient submits to NASA or the subrecipient submits to the Recipient the proposal, plan, or other computation to form the basis for negotiation of the rate, then the 3-year retention period for its supporting records starts on the date of such submission.

(2) *If not submitted for negotiation.* If the Recipient is not required to submit to NASA or the subrecipient is not required to submit to the Recipient the proposal, plan, or other computation for negotiation purposes, then the 3-year retention period for the proposal, plan, or other computation and its supporting records starts at the end of the fiscal year (or other accounting period) covered by the proposal, plan, or other computation.

Subpart G—Suspension or Termination

§ 1274.701 Suspension or termination.

A cooperative agreement provides both NASA and the Recipient the ability to terminate the agreement if it is in their best interests to do so. For example, NASA may terminate the agreement if the Recipient is not making anticipated technical progress, if the Recipient materially fails to comply with the terms of the agreement, if the Recipient materially changes the objective of the agreement, or if appropriated funds are not available to support the program. Similarly, the Recipient may terminate the agreement if, for example, technical progress is not being made, if the firms are shifting their technical emphasis, or if other technological advances have made the effort obsolete. NASA or the Recipient may also suspend the cooperative agreement for a short period of time if an assessment needs to be made as to whether the agreement should be terminated.

Subpart H—After-the-Award Requirements

§ 1274.801 Purpose.

Sections 1274.802 and 1274.803 contain closeout procedures and other procedures for subsequent disallowances and adjustments.

§ 1274.802 Closeout procedures.

(a) Recipients shall submit, within 90 calendar days after the date of completion of the cooperative agreement, all financial, performance, and other reports as required by the terms and conditions of the award. Extensions may be approved when requested by the Recipient.

(b) The Recipient shall account for any real and personal property acquired with Federal funds or received from the Federal Government in accordance with subpart D of this part.

§ 1274.803 Subsequent adjustments and continuing responsibilities.

The closeout of an award does not affect any of the following:

(a) Audit requirements in § 1274.933.

(b) Property management requirements in subpart D of this part.

(c) Records retention as required in § 1274.601.

Subpart I—Other Provisions and Special Conditions

§ 1274.901 Other provisions and special conditions.

The provisions set forth in this subpart are to be incorporated in and made a part of all cooperative agreements. The provisions at §§ 1274.902 through 1274.909 are to be incorporated in full text substantially as stated in this part. The provisions at §§ 1274.910 through 1274.933 will be by reference incorporated in an enclosure to each cooperative agreement (see Exhibit A of Appendix C of this part). For inclusion of provisions in subcontracts, see Subpart E—Procurement Standards of this part.

§ 1274.902 Purpose.

Purpose (FEB 1996)

The purpose of this cooperative agreement is to conduct a shared resource project that will lead to _____. This cooperative agreement will advance the technology developments and research which have been performed on _____. The specific objective is to _____. This work will culminate in _____.

[End of provision]

§ 1274.903 Responsibilities.

Responsibilities (FEB 1996)

(a) This cooperative agreement will include substantial NASA participation during performance of the effort. NASA and the Recipient agree to the following Responsibilities, a statement of cooperative interactions to occur during the performance of this effort. NASA and the Recipient shall exert all reasonable efforts to fulfill the responsibilities stated below.

(b) *NASA responsibilities.* Since NASA contractors may obtain certain intellectual property rights arising from work for NASA in support of this agreement, NASA will inform Recipient whenever NASA intends to use NASA contractors to perform technical engineering services in support of this agreement. The following responsibilities are hereby set forth with anticipated start and ending dates, as appropriate:

Responsibility	*Start*	*End*

(c) *Recipient responsibilities.* The Recipient shall be responsible for particular aspects of project performance as set forth in the technical proposal dated _____, attached hereto (or Statement of Work dated _____, attached hereto.). The following responsibilities are hereby set forth with anticipated start and ending dates, as appropriate:

Responsibility	*Start*	*End*

[End of provision]

§ 1274.904 Resource Sharing Requirements.

Resource Sharing Requirements (FEB 1996)

(a) NASA and the Recipient will share in providing the resources necessary to perform the agreement. NASA funding and non-cash contributions (personnel, equipment, facilities, etc.) and the dollar value of the Recipient's cash and/or non-cash contribution will be on a ____ (NASA) - ____ (Recipient) basis. Criteria and procedures for the allowability and allocability of cash and non-cash contributions shall be governed by section 23, "Cost Sharing or Matching," of OMB Circular A–110. The "applicable federal cost principles" cited in OMB Circular A–110 shall be determined in accordance with § 1274.919.

(b) The Recipient's share shall not be charged to the Government under this agreement or under any other contract, grant, or cooperative agreement, except to the extent that the Recipient's contribution may be allowable IR&D costs pursuant to 48 CFR 1831.205–18 (NFS).

§ 1274.905 Rights in Data.

Rights in Data (FEB 1996)

(a) *Definitions.*

Data, means recorded information, regardless of form, the media on which it may be recorded, or the method of recording. The term includes, but is not limited to, data of a scientific or technical nature, computer software and documentation thereof, and data comprising commercial and financial information.

(b) *Data categories—(1) General.* Data exchanged between NASA and Recipient under this cooperative agreement will be exchanged without restriction as to its disclosure, use or duplication except as otherwise provided in paragraphs (b)(2) through (6) of this provision.

(2) *Background data.* In the event it is necessary for Recipient to furnish NASA with Data which existed prior to, or produced outside of, this cooperative agreement, and such Data embodies trade secrets or comprises commercial or financial information which is privileged or confidential, and such Data is so identified with a suitable notice or legend, the Data will be maintained in confidence and disclosed and used by NASA and its contractors (under suitable protective conditions) only for the purpose of carrying out NASA's responsibilities under this cooperative agreement. Upon completion of activities under this agreement, such Data will be disposed of as requested by Recipient.

(3) *Data first produced by Recipient.* In the event Data first produced by Recipient in carrying out Recipient's responsibilities under this cooperative agreement is furnished to NASA, and Recipient considers such Data to embody trade secrets or to comprise commercial or financial information which is privileged or confidential, and such Data is so identified with a suitable notice or legend, the Data will be maintained in confidence for a period of [insert "two" to "five"] years after development of the data and be disclosed and used by ["NASA" or "the Government," as appropriate] and its contractors (under suitable protective conditions) only for [insert appropriate purpose; for example: experimental; evaluation; research; development, etc.] by or on behalf of ["NASA" or "the Government" as appropriate] during that period. In order that ["NASA" or the "Government", as appropriate] and its contractors may exercise the right to use such Data for the purposes designated above, NASA, upon request to the Recipient, shall have the right to review and request delivery of Data first produced by Recipient. Delivery shall be made within a time period specified by NASA.

(4) *Data first produced by NASA.* As to Data first produced by NASA in carrying out NASA's responsibilities under this cooperative agreement and which Data would embody trade secrets or would comprise commercial or financial information that is privileged or confidential if it had been obtained from the Recipient, will be marked with an appropriate legend and maintained in confidence for an agreed to period of up to (—) years [INSERT A PERIOD UP TO 5 YEARS] after development of the information, with the express understanding that during the aforesaid period such Data may be disclosed and used (under suitable protective conditions) by or on behalf of the Government for Government purposes only, and thereafter for any purpose whatsoever without restriction on disclosure and use. Recipient agrees not to disclose such Data to any third party without NASA's written approval until the aforementioned restricted period expires.

(5) *Copyright.* (i) In the event Data is exchanged with a notice indicating the Data is protected under copyright as a published copyrighted work, or are deposited for registration as a published work in the U.S. Copyright Office, the following paid-up licenses shall apply:

(A) If it is indicated on the Data that the Data existed prior to, or was produced outside of, this agreement, the receiving party and others acting on its behalf, may reproduce, distribute, and prepare derivative works for the purpose of carrying out the receiving party's responsibilities under this cooperative agreement; and

(B) If the furnished Data does not contain the indication of paragraph (b)(5)(i)(A) of this provision, it will be assumed that the Data was first produced under this agreement, and the receiving party and others acting on its behalf, shall be granted a paid up, nonexclusive, irrevocable, world-wide license for all such Data to reproduce, distribute copies to the public, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, by or on behalf of the receiving party. For Data that is computer software, the right to distribute shall be limited to potential users in the United States.

(ii) When claim is made to copyright, the Recipient shall affix the applicable copyright notice of 17 U.S.C. 401 or 402 and acknowledgment of Government sponsorship to the data when and if the data are delivered to the Government.

(6) *Oral and visual information.* If information which the Recipient considers to embody trade secrets or to comprise commercial or financial information which is privileged or confidential is disclosed orally or visually to NASA, such information must be reduced to tangible, recorded form (i.e., converted into Data as defined herein), identified and marked with a suitable notice or legend, and furnished to NASA within 10 days after such oral or visual disclosure, or NASA shall have no duty to limit or restrict, and shall not incur any liability for, any disclosure and use of such information.

(7) *Disclaimer of Liability.* Notwithstanding paragraphs (b)(2) through (6) of this provision, NASA shall not be restricted in, nor incur any liability for, the disclosure and use of:

(i) Data not identified with a suitable notice or legend as set in paragraph (b)(2) of this provision; nor

(ii) Information contained in any Data for which disclosure and use is restricted under paragraphs (b)(2) or (3) of this provision, if such information is or becomes generally known without breach of the above, is known to or is generated by NASA independently of carrying out responsibilities under this agreement, is rightfully received from a third party without restriction, or is included in data which Participant has, or is required to furnish to the U.S. Government without restriction on disclosure and use.

(c) *Marking of data.* Any Data delivered under this cooperative agreement, by NASA or the Recipient, shall be marked with a suitable notice or legend indicating the data was generated under this cooperative agreement.

(d) *Lower Tier Agreements.* The Recipient shall include this provision, suitably modified to identify the parties, in all subcontracts or lower tier agreements, regardless of tier, for experimental, developmental, or research work.

[End of provision]

§ 1274.906 Designation of New Technology Representative and Patent Representative.

Designation of New Technology Representative and Patent Representative (FEB 1996)

(a) For purposes of administration of the clause of this cooperative agreement entitled "PATENT RIGHTS—RETENTION BY THE CONTRACTOR (LARGE BUSINESS)" or "PATENT RIGHTS—RETENTION BY THE CONTRACTOR (SMALL BUSINESS)" the following named representatives are hereby designated by the Grant Officer to administer such clause:

Title	*Office Code*	*Address*
New Technology Representative		
Patent Representative		

(b) Reports of reportable items, and disclosure of subject inventions, interim reports, final reports, utilization reports, and other reports required by the clause, as well as any correspondence with respect to such matters, should be directed to the New Technology Representative unless transmitted in response to correspondence or request from the Patent Representative. Inquiries or requests regarding disposition of rights, election of rights, or related matters should be directed to the Patent Representative. This clause shall be included in any subcontract hereunder requiring "PATENT RIGHTS—RETENTION BY THE CONTRACTOR (LARGE BUSINESS)" clause or "PATENT RIGHTS—RETENTION BY THE CONTRACTOR (SMALL BUSINESS)" clause, unless otherwise authorized or directed by the Grant Officer. The respective responsibilities and authorities of the above-named representatives are set forth in 48 CFR 1827.375–3 (NFS).

[End of provision]

§ 1274.907 Disputes.

Disputes (FEB 1996)

(a) In the event that a disagreement arises, representatives of the parties shall enter into discussions in good faith and in a timely and cooperative manner to seek resolution. If these discussions do not result in a satisfactory solution, the aggrieved party may seek a decision from the Dispute Resolution Official under paragraph (b) of this provision. This request must be presented no more than (3) three months after the events giving rise to the disagreement have occurred.

(b) The aggrieved party may submit a written request for a decision to the _____ [Suggest this be the Center Director], who is designated as the Dispute Resolution Official. The written request shall include a statement of the relevant facts, a discussion of the unresolved issues, and a specification of the clarification, relief, or remedy sought. A copy of this written request and all accompanying materials must be provided to the other party at the same time. The other party shall submit a written position on the matters in dispute within thirty (30) calendar days after receiving this notification that a decision has been requested. The Dispute Resolution Official shall conduct a review of the matters in dispute and render a decision in writing within thirty (30) calendar days of receipt of such written position. Such resolution is not subject to further administrative review and, to the extent permitted by law, shall be final and binding.

[End of provision]

§ 1274.908 Milestone Payments.

Milestone Payments (FEB 1996)

(a) By submission of the first invoice, the Recipient is certifying that it has an established accounting system which complies with generally accepted accounting principles, with the requirements of this agreement, and that appropriate arrangements have been made for receiving, distributing, and accounting for Federal funds received under this agreement.

(b) Payments will be made upon the following milestones: [The schedule for payments may be based upon the Recipient's completion of specific tasks, submission of specified reports, or whatever is appropriate.]

Date	*Payment Milestone*	*Amount*

(c) Upon submission by the Recipient of invoices in accordance with the provisions of the agreement and upon certification by NASA of completion of the payable milestone, the grant officer shall authorize payment.

(d) A payment milestone may be successfully completed in advance of the date appearing in paragraph (b) of this provision. However, payment shall not be made prior to that date without the written consent of the Grant Officer.

(e) The Recipient is not entitled to partial payment for partial completion of a payment milestone.

(f) All preceding payment milestones must be completed before payment can be made for the next payment milestone.

(g) Invoices hereunder shall be submitted in the original and five copies to the Grant Officer for certification.

[End of provision]

§ 1274.909 Term of this Agreement.

Term of this Agreement (FEB 1996)

The agreement commences on the effective date indicated on the attached cover sheet and continues until the expiration date indicated on the attached cover sheet unless terminated by either party. If all resources are expended prior to the expiration date of the agreement, the parties have no obligation to continue performance and may elect to cease at that point. The parties may extend the expiration date if additional time is required to complete the milestones at no increase in Government resources. Provisions of this Agreement, which, by their express terms or by necessary implication, apply for periods of time other than that specified as the agreement term, shall be given effect, notwithstanding expiration of the term of the agreement.

[End of provision]

§ 1274.910 Authority.

Authority (FEB 1996)

This is a cooperative agreement as defined in 31 U.S.C. 6305 (the Chiles Act) and is entered into pursuant to the authority of 42 U.S.C. 2451 *et seq.* (the Space Act).

[End of provision]

§ 1274.911 Patent Rights.

Patent Rights (FEB 1996)

(a) *Definitions.*

(1) *Administrator* means the Administrator or Deputy Administrator of NASA.

(2) *Invention* means any invention or discovery which is or may be patentable or otherwise protectable under title 35 of the United States Code.

(3) *Made* when used in relation to any invention means the conception or first actual reduction to practice such invention.

(4) *Nonprofit organization* means a domestic university or other institution of higher education or an organization of the type described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)) and exempt from taxation under section 501(a) of the Internal Revenue Code (26 U.S.C. 501(a)), or any domestic nonprofit scientific or educational organization qualified under a State nonprofit organization statute.

(5) *Practical application* means to manufacture, in the case of a composition or product; to practice, in the case of a process

or method; or to operate, in the case of a machine or system; and, in each case, under such conditions as to establish that the invention is being utilized and that its benefits are, to the extent permitted by law or Government regulations, available to the public on reasonable terms.

(6) *Recipient* means: (i) The signatory Recipient party or parties; or (ii) The Consortium, where a Consortium has been formed for carrying out Recipient responsibilities under this agreement.

(7) *Small business firm* means a domestic small business concern as defined at 15 U.S.C. 632 and implementing regulations of the Administrator of the small Business Administration. (For the purpose of this definition, the size standard contained in 13 CFR 121.901 through 121.911 will be used.)

(8) *Subject invention* means any invention of a Recipient and/or Government employee conceived or first actually reduced to practice in the performance of work under this Agreement.

(b) *Allocation of principal rights.* (1) *Recipient inventions.* For other than Small Business Firm or Nonprofit organization Recipients, the "PATENT RIGHTS—RETENTION BY RECIPIENT (LARGE BUSINESS)" provision applies. For Small Business Firm and Nonprofit organization Recipients, the "PATENT RIGHTS—RETENTION BY RECIPIENT (SMALL BUSINESS)" provision applies.

(2) *NASA inventions.* NASA will use reasonable efforts to report inventions made by NASA employees as a consequence of, or which bear a direct relation to, the performance of specified NASA activities under this cooperative agreement and, upon timely request, NASA will use its best efforts to grant the Recipient or designated Consortium Member (if applicable) the first option to acquire either an exclusive or partially exclusive, revocable, royalty-bearing license, on terms to be subsequently negotiated, for any patent applications and patents covering such inventions, and subject to the license reserved in paragraph (b)(5)(i) of this provision. Upon application in compliance with 37 CFR Part 404—Licensing of Government Owned Inventions, the Recipient or each Consortium Member (if applicable), shall be granted a revocable, nonexclusive, royalty-free license in each patent application filed in any country on a subject invention and any resulting patent in which the Government acquires title. Each nonexclusive license may extend to subsidiaries and affiliates, if any, within the corporate structure of the licensee and includes the right to grant sublicenses of the same scope to the extent the licensee was legally obligated to do so at the time the cooperative agreement was signed.

(3) *NASA contractor inventions.* In the event NASA contractors are tasked to perform work in support of specified NASA activities under this cooperative agreement and inventions are made by contractor employees, and NASA has the right to acquire or has acquired title to such inventions, NASA will use reasonable efforts to report such inventions and, upon timely request, NASA will use its best efforts to grant the Recipient or designated Consortium Member (if applicable) the first option to acquire either an exclusive or partially exclusive, revocable, royalty-bearing license, upon terms to be subsequently negotiated, for any patent applications and patents covering such inventions, and subject to the license reserved in paragraph (b)(5)(ii) of this provision. Upon application in compliance with 37 CFR Part 404—Licensing of Government Owned Inventions, the Recipient or each Consortium Member (if applicable), shall be granted a revocable, nonexclusive, royalty-free license in each patent application filed in any country on a subject invention and any resulting patent in which the Government acquires title. Each nonexclusive license may extend to subsidiaries and affiliates, if any, within the corporate structure of the licensee and includes the right to grant sublicenses of the same scope to the extent the licensee was legally obligated to do so at the time the cooperative agreement was signed.

(4) *Joint NASA and recipient inventions.* NASA and Recipient agree to use reasonable efforts to identify and report to each other any inventions made jointly between NASA employees (or employees of NASA contractors) and employees of Recipient.

(i) For other than small business firms and nonprofit organizations the Administrator may agree that the United States will refrain from exercising its undivided interest in a manner inconsistent with Recipient's commercial interest and to cooperate with Recipient in obtaining patent protection on its undivided interest on any waived inventions subject, however, to the condition that Recipient makes its best efforts to bring the invention to the point of practical application at the earliest practicable time. In the event that the Administrator determines that such efforts are not undertaken, the Administrator may void NASA's agreement to refrain from exercising its undivided interest and grant licenses for the practice of the invention so as to further its development. In the event that the Administrator decides to void NASA's agreement to refrain from exercising its undivided interest and grant licenses for this reason, notice shall be given to the Inventions and Contributions Board as to why such action should not be taken. Either alternative will be subject to the applicable license or licenses reserved in paragraph (b)(5) of this provision.

(ii) For small business firms and nonprofit organizations, NASA may assign or transfer whatever rights it may acquire in a subject invention from its employee to the Recipient as authorized by 35 U.S.C. 202(e).

(5) *Minimum rights reserved by the Government.* Any license or assignment granted Recipient pursuant to paragraph (b)(2), (b)(3), or (b)(4) of this provision will be subject to the reservation of the following licenses:

(i) As to inventions made solely or jointly by NASA employees, the irrevocable, royalty-free right of the Government of the United States to practice and have practiced the invention by or on behalf of the United States; and

(ii) As to inventions made solely by, or jointly with, employees of NASA contractors, the rights in the Government of the United States as set forth in paragraph (b)(5)(i) of this provision, as well as the revocable, nonexclusive, royalty-free license in the contractor as set forth in 14 CFR 1245.108.

(6) *Preference for United States manufacture.* The Recipient agrees that any products embodying subject inventions or produced through the use of subject inventions shall be manufactured substantially in the United States. However, in individual cases, the requirement to manufacture substantially in the United States may be waived by the Associate Administrator for Procurement (Code HS) with the concurrence of the Associate General Counsel for Intellectual Property upon a showing by the Recipient that under the circumstances domestic manufacture is not commercially feasible.

(7) Work performed by the Recipient under this cooperative agreement is considered undertaken to carry out a public purpose of support and/or stimulation rather than for acquiring property or services for the direct benefit or use of the Government. Accordingly, such work by the Recipient is not considered "by or for the United States" and the Government assumes no liability for infringement by the Recipient under 28 U.S.C. 1498.

[End of provision]

§ 1274.912 Patent Rights—Retention by the Recipient (Large Business).

Patent Rights—Retention by the Recipient (Large Business) (FEB 1996)

(a) *Definitions.*

(1) *Administrator* means the Administrator of the National Aeronautics and Space Administration (NASA) or duly authorized representative.

(2) *Invention* means any invention or discovery which is or may be patentable or otherwise protectable under title 35 of the U.S.C.

(3) *Made,* as used in relation to any invention, means the conception or first actual reduction to practice such invention.

(4) *Nonprofit organization* means a domestic university or other institution of higher education or an organization of the type described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)) and exempt from taxation under section 501(a) of the Internal Revenue Code (26 U.S.C. 501(a)), or any domestic nonprofit scientific or educational organization qualified under a State nonprofit organization statute.

(5) *Practical application* means to manufacture, in the case of a composition or product; to practice, in the case of a process or method; or to operate, in case of a machine or system; and, in each, case, under such conditions as to establish that the invention is being utilized and that its benefits are, to the extent permitted by law or Government regulations, available to the public on reasonable terms.

(6) *Reportable item* means any invention, discovery, improvement, or innovation of the Recipient, whether or not the same is or may be patentable or otherwise protectable under title 35 of the United States Code, conceived or first actually reduced to practice in the performance of any work under this contract or in the performance of any work that is reimbursable under any clause in this contract providing for reimbursement of costs incurred prior to the effective date of this contract.

(7) *Small business firm* means a domestic small business concern as defined at 15 U.S.C. 632 and implementing regulations of the Administrator of the Small Business Administration. (For the purpose of this definition, the size standard contained in 13 CFR 121.901 through 121.911 will be used.)

(8) *Subject invention means* any reportable item which is or may be patentable or otherwise protectable under title 35 of the United States Code, or any novel variety of plant that is or may be protectable under the Plant Variety Protection Act (7 U.S.C. 2321 *et seq*).

(b) Allocation of principal rights—(1) *Presumption of title*—(i) Any reportable item that the Administrator considers to be a subject invention shall be presumed to have been made in the manner specified in paragraph (1) or (2) of section 305(a) of the National Aeronautics and Space Act of 1958 (42 U.S.C. 2457(a)) (hereinafter called "the Act"), and the above presumption shall be conclusive unless at the time of reporting the reportable item the Recipient submits to the Grants Officer a written statement, containing supporting details, demonstrating that the reportable item was not made in the manner specified in paragraph (1) or (2) of section 305(a) of the Act.

(ii) Regardless of whether title to a given subject invention would otherwise be subject to an advance waiver or is the subject of a petition for waiver, the Recipient may nevertheless file the statement described in paragraph (b)(1)(i) of this provision. The Administrator will review the information furnished by the Recipient in any such statement and any other available information relating to the circumstances surrounding the making of the subject invention and will notify the Recipient whether the Administrator has determined that the subject invention was made in the manner specified in paragraph (1) or (2) of section 305(a) of the Act.

(2) *Property rights in subject inventions.* Each subject invention for which the presumption of paragraph (b)(1)(i) of this provision is conclusive or for which there has been a determination that it was made in the manner specified in paragraph (1) or (2) of section 305(a) of the Act shall be the exclusive property of the United States as represented by NASA unless the Administrator waives all or any part of the rights of the United States, as provided in paragraph (b)(3) of this section.

(3) *Waiver of rights*—(i) Section 305(f) of the Act provides for the promulgation of regulations by which the Administrator may waive the rights of the United States with respect to any invention or class of inventions made or that may be made under conditions specified in paragraph (1) or (2) of section 305(a) of the Act. The NASA Patent Waiver Regulations, 14 CFR part 1245, subpart 1, have adopted the Presidential memorandum on Government Patent Policy of February 18, 1983, as a guide in acting on petitions (requests) for such waiver of rights.

(ii) As provided in 14 CFR part 1245, subpart 1, Recipients may petition, either prior to execution of the contract or within 30 days after execution of the Agreement, for advance waiver of rights to any or all of the inventions that may be made under an Agreement. If such a petition is not submitted, or if after submission it is denied, the Recipient (or an employee inventor of the Recipient may petition for waiver of rights to an identified subject invention within eight months of first disclosure of invention in accordance with paragraph (e)(2) of this provision or within such longer period as may be authorized in accordance with 14 CFR 1245.105. Further procedures are provided in the REQUESTS FOR WAIVER OF RIGHTS—LARGE BUSINESS provision.

(c) *Minimum rights reserved by the Government.* (1) With respect to each Recipient subject invention for which a waiver of rights is applicable in accordance with 14 CFR part 1245, subpart 1, the Government reserves—

(i) An irrevocable, royalty-free license for the practice of such invention throughout the world by or on behalf of the United States or any foreign government in accordance with any treaty or agreement with the United States; and

(ii) Such other rights as stated in 14 CFR 1245.107.

(2) Nothing contained in this paragraph (c) shall be considered to grant to the Government any rights with respect to any invention other than a subject invention.

(d) *Minimum rights to the Recipient.* (1) The Recipient is hereby granted a revocable, nonexclusive, royalty-free license in each patent application filed in any country on a Recipient subject invention and any resulting patent in which the Government acquires title, unless the Recipient fails to disclose the subject invention within the times specified in paragraph (e)(2) of this provision. The Recipient's license extends to its domestic subsidiaries and affiliates, if any, within the corporate structure of which the Recipient is a party and includes the right to grant sublicenses of the same scope to the extent the Recipient was legally obligated to do so at the time the contract was awarded. The license is transferable only with the approval of the Administrator except when transferred to the successor of that part of the Recipient's business to which the invention pertains.

(2) The Recipient's domestic license may be revoked or modified by the Administrator to the extent necessary to achieve expeditious practical application of the subject invention pursuant to an application for an exclusive license submitted in accordance with 14 CFR part 1245, subpart 2, Licensing of NASA Inventions. This license will not be revoked in that field of use or the geographical areas in which the Recipient has achieved practical application and continues to make the benefits of the invention reasonably accessible to the public. The license in any foreign country may be revoked or modified at the discretion of the Administrator to the extent the Recipient, its licensees, or its domestic subsidiaries or affiliates have failed to achieve practical application in that foreign country.

(3) Before revocation or modification of the license, the Recipient will be provided a written notice of the Administrator's intention to revoke or modify the license, and the Recipient will be allowed 30 days (or such other time as may be authorized by the Administrator for good cause shown by the Recipient) after the notice to show cause why the license should not be revoked or modified. The Recipient has the right to appeal, in accordance with 14 CFR 1245.211, any decision concerning the revocation or modification of its license.

(e) *Invention identification, disclosures, and reports.* (1) The Recipient shall establish and maintain active and effective procedures to assure that reportable items are promptly identified and disclosed to Recipient personnel responsible for the administration of this clause within six months of conception and/or first actual reduction to practice, whichever occurs first in the performance of work under this contract. These procedures shall include the maintenance of laboratory notebooks or equivalent records and other records as are reasonably necessary to document the conception and/or the first actual reduction to practice of the reportable items, and records that show that the procedures for identifying and disclosing reportable items are followed. Upon request, the Recipient shall furnish the Grants Officer a description of such procedures for evaluation and for determination as to their effectiveness.

(2) The Recipient will disclose each reportable item to the Grants Officer within two months after the inventor discloses it in writing to Recipient personnel responsible for the administration of this clause or, if earlier, within six months after the Recipient becomes aware that a reportable item has been made, but in any event for subject inventions before any on sale, public use, or publication of such invention known to the Recipient. The disclosure to the agency shall be in the form of a written report and shall identify the contract under which the reportable item was made and the inventor(s) or innovator(s). It shall be sufficiently complete in technical detail to convey a clear understanding, to the extent known at the time of the disclosure, of the nature, purpose, operation, and physical, chemical, biological, or electrical characteristics of the reportable item. The disclosure shall also identify any publication, on sale, or public use of any subject invention and whether a manuscript describing such invention has been submitted for publication and, if so, whether it has been accepted for publication at the time of disclosure. In addition, after disclosure to the agency, the Recipient will promptly notify the agency of the acceptance of any manuscript describing a subject invention for publication or of any on sale or public use planned by the Recipient for such invention.

(3) The Recipient shall furnish the Grants Officer the following:

(i) Interim reports every 12 months (or such longer period as may be specified by the Grants Officer) from the date of the contract, listing reportable items during that period, and certifying that all reportable items have been disclosed (or that there are no such

inventions) and that the procedures required by paragraph (e)(1) of this provision have been followed.

(ii) A final report, within three months after completion of the contracted work, listing all reportable items or certifying that there were no such reportable items, and listing all subcontracts at any tier containing a patent rights clause or certifying that there were no such subcontracts.

(4) The Recipient agrees, upon written request of the Grants Officer, to furnish additional technical and other information available to the Recipient as is necessary for the preparation of a patent application on a subject invention and for the prosecution of the patent application, and to execute all papers necessary to file patent applications on subject inventions and to establish the Government's rights in the subject inventions.

(5) The Recipient agrees, subject to 48 CFR 27.302(j) (FAR), that the Government may duplicate and disclose subject invention disclosures and all other reports and papers furnished or required to be furnished pursuant to this clause.

(f) *Examination of records relating to inventions.* (1) The Grants Officer or any authorized representative shall, pursuant to the Retention and Examination of Records provision of this cooperative agreement, have the right to examine any books (including laboratory notebooks), records, and documents of the Recipient relating to the conception or first actual reduction to practice of inventions in the same field of technology as the work under this contract to determine whether—

(i) Any such inventions are subject inventions;

(ii) The Recipient has established and maintained the procedures required by paragraph (e)(1) of this provision; and

(iii) The Recipient and its inventors have complied with the procedures.

(2) If the Grants Officer learns of an unreported Recipient invention that the Grants Officer believes may be a subject inventions, the Recipient may be required to disclose the invention to the agency for a determination of ownership rights.

(3) Any examination of records under this paragraph will be subject to appropriate conditions to protect the confidentiality of the information involved.

(g) *Subcontracts.* (1) Unless otherwise authorized or directed by the Grants Officer, the Recipient shall—

(i) Include this Clause Patent Rights—Retention by the Recipient—(Large Business) (suitably modified to identify the parties) in any subcontract hereunder (regardless of tier) with other than a small business firm or nonprofit organization for the performance of experimental, developmental, or research work; and

(ii) Include the clause Patent Right—Retention by the Recipient—(Small Business) (suitably modified to identify the parties) in any subcontract hereunder (regardless of tier) with a small business firm or nonprofit organization for the performance of experimental, developmental, or research work.

(2) In the event of a refusal by a prospective subcontractor to accept such a clause the Recipient—

(i) Shall promptly submit a written notice to the Grants Officer setting forth the subcontractor's reasons for such refusal and other pertinent information that may expedite disposition of the matter; and

(ii) Shall not proceed with such subcontract without the written authorization of the Grants Officer.

(3) The Recipient shall promptly notify the Grants Officer in writing upon the award of any subcontract at any tier containing a patent rights clause by identifying the subcontractor, the applicable patent rights clause, the work to be performed under the subcontract, and the dates of award and estimated completion. Upon request of the Grants Officer, the Recipient shall furnish a copy of such subcontract, and, no more frequently than annually, a listing of the subcontracts that have been awarded.

(4) The subcontractor will retain all rights provided for the Recipient in the clause of paragraph (g)(1)(i) or (1)(ii) of this provision, whichever is included in the subcontract, and the Recipient will not, as part of the consideration for awarding the subcontract, obtain rights in the subcontractor's subject inventions.

(5) Notwithstanding paragraph (g)(4) of this provision, and in recognition of the contractor's substantial contribution of funds, facilities and/or equipment to the work performed under this cooperative agreement, the Recipient is authorized, subject to the rights of NASA set forth elsewhere in this clause, to:

(i) Acquire by negotiation and mutual agreement rights to a subcontractor's subject inventions as the Recipient may deem necessary to obtaining and maintaining of such private support; and

(ii) Request, in the event of inability to reach agreement pursuant to paragraph (g)(5)(i) of this provision, that NASA invoke exceptional circumstances as necessary pursuant to 37 CFR 401.3(a)(2) if the prospective subcontractor is a small business firm or organization, or for all other organizations, request that such rights for the Recipient be included as an additional reservation in a waiver granted pursuant to 14 CFR part 1245, subpart 1. Any such requests to NASA should be prepared in consideration of the following guidance and submitted to the contract officer.

(A) *Exceptional circumstances.* A request that NASA make an "exceptional circumstances" determination pursuant to 37 CFR 401.3(a)(2) must state the scope of rights sought by the Recipient pursuant to such determination; identify the proposed subcontractor and the work to be performed under the subcontract; and state the need for the determination.

(B) *Waiver petition.* The subcontractor should be advised that unless it requests a waiver of title pursuant to the NASA Patent Waiver Regulations (14 CFR part 1245, subpart 1), NASA will acquire title to the subject invention (42 U.S.C. 2457). If a waiver is not requested or granted, the Recipient may request a license from NASA (see licensing of NASA inventions, 14 CFR part 1245, subpart 2). A subcontractor requesting a waiver must follow the procedures set forth in the attached clause REQUESTS FOR WAIVER OF RIGHTS—LARGE BUSINESS.

(h) *Preference for United States manufacture.* The Recipient agrees that any products embodying subject inventions or produced through the use of subject inventions shall be manufactured substantially in the United States. However, in individual cases, the requirement to manufacture substantially in the United States may be waived by the Associate Administrator for Procurement (Code HS) with the concurrence of the Associate General Counsel for Intellectual Property. upon a showing by the Recipient that under the circumstances domestic manufacture is not commercially feasible.

(i) *March-in rights.* The Recipient agrees that, with respect to any subject invention in which it has acquired title, NASA has the right in accordance with the procedures in 37 CFR 401.6 and any supplemental regulations of the agency to require the Recipient, an assignee or exclusive licensee of a subject invention to grant a nonexclusive, partially exclusive, or exclusive license in any field of use to a responsible applicant or applicants, upon terms that are reasonable under the circumstances, and if the Subcontractor, assignee, or exclusive licensee refuses such a request NASA has the right to grant such a license itself if the Federal agency determines that—

(1) Such action is necessary because the Recipient or assignee has not taken, or is not expected to take within a reasonable time, effective steps to achieve practical application of the subject invention in such field of use;

(2) Such action is necessary to alleviate health or safety needs which are not reasonably satisfied by the Recipient, assignee, or their licensees;

(3) Such action is necessary to meet requirements for public use specified by Federal regulations and such requirements are not reasonably satisfied by the Recipient, assignee, or licensees; or

(4) Such action is necessary because the agreement required by paragraph (i) of this provision has not been obtained or waived or because a licensee of the exclusive right to use or sell any subject invention in the United States is in breach of such agreement.

[End of provision]

§ 1274.913 Patent Rights—Retention by the Recipient (Small Business).

Patent Rights—Retention by the Recipient (Small Business) (FEB 1996)

(a) *Definitions.*

(1) *Invention* means any invention or discovery which is or may be patentable or otherwise protectable under title 35 of the U.S.C.

(2) *Made* when used in relation to any invention means the conception or first actual reduction to practice such invention.

(3) *Nonprofit organization* means a university or other institution of higher education or an organization of the type described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)) and exempt from taxation under section 501(a) of the Internal Revenue Code (26 U.S.C. 501(a)) or any nonprofit scientific or educational organization qualified under a state nonprofit organization statute.

(4) *Practical application* means to manufacture, in the case of a composition of product; to practice, in the case of a process or method, or to operate, in the case of a machine or system; and, in each case, under such conditions as to establish that the invention is being utilized and that its benefits are, to the extent permitted by law or Government regulations, available to the public on reasonable terms.

(5) *Small business firm* means a small business concern as defined at section 2 of Pub. L. 85–536 (15 U.S.C. 632) and implementing regulations of the Administrator of the Small Business Administration. For the purpose of this clause, the size standards for small business concerns involved in Government procurement and subcontracting at 13 CFR 121.901 through 121.911 will be used.

(6) *Subject invention* means any invention of the Subcontractor conceived or first actually reduced to practice in the performance of work under this Agreement.

(b) *Allocation of principal rights.* The Recipient may retain the entire right, title, and interest throughout the world to each subject invention subject to the provisions of this clause and 35 U.S.C. 203. With respect to any subject invention in which the Recipient retains title, the Federal Government shall have a nonexclusive, nontransferable, irrevocable, paid-up license to practice or have practiced for or on behalf of the United States the subject invention throughout the world.

(c) *Invention disclosure, election of title, and filing of patent application by Recipient.* (1) The Recipient will disclose each subject invention to NASA within two months after the inventor discloses it in writing to Recipient personnel responsible for patent matters. The disclosure to the agency shall be in the form of a written report and shall identify the contract under which the invention was made and the inventor(s). It shall be sufficiently complete in technical detail to convey a clear understanding to the extent known at the time of the disclosure, of the nature, purpose, operation, and the physical, chemical, biological or electrical characteristics of the invention. The disclosure shall also identify any publication, on sale or public use of the invention and whether a manuscript describing the invention has been submitted for publication and, if so, whether it has been accepted for publication at the time of disclosure. In addition, after disclosure to the agency, the Recipient will promptly notify the agency of the acceptance of any manuscript describing the invention for publication or of any sale or public use planned by the Recipient.

(2) The Recipient will elect in writing whether or not to retain title to any such invention by notifying NASA within two years of disclosure to the Federal agency. However, in any case where publication, on sale or public use has initiated the one-year statutory period wherein valid patent protection can still be obtained in the United States, the period for election of title may be shortened by the agency to a date that is no more than 60 days prior to the end of the statutory period.

(3) The Recipient will file its initial patent application on a subject invention to which it elects to retain title within one year after election of title or, if earlier, prior to the end of any statutory period wherein valid patent protection can be obtained in the United States after a publication, on sale, or public use. The Recipient will file patent applications in additional countries or international patent offices within either 10 months of the corresponding initial patent application of six months from the date permission is granted by the Commissioner of Patents and Trademarks to file foreign patent applications where such filing has been prohibited by a Secrecy Order.

(4) Requests for extension of the time for disclosure election, and filing under paragraphs (c)(1), (2), and (3) of this provision may, at the discretion of the agency, be granted.

(d) *Conditions when the Government may obtain title.* The Recipient will convey to NASA, upon written request, title to any subject invention—

(1) If the Recipient fails to disclose or elect title to the subject invention within the times specified in paragraph (c) of this provision, or elects not to retain title; provided, that the agency may only request title within 60 days after learning of the failure of the Recipient to disclose or elect within the specified times.

(2) In those countries in which the Recipient fails to file patent applications within the times specified in paragraph (c) of this provision; provided, however, that if the Recipient has filed a patent application in a country after the times specified in paragraph (c) of this provision, but prior to its receipt of the written request of the Federal agency, the Recipient shall continue to retain title in that country.

(3) In any country in which the Recipient decides not to continue the prosecution of any application for, to pay the maintenance fees on, or defend in reexamination or opposition proceeding on, a patent on a subject invention.

(e) *Minimum rights to Recipient and protection of the Recipient right to file.* (1) The Recipient will retain a nonexclusive, royalty-free license throughout the world in each subject invention to which the Government obtains title, except if the Recipient fails to disclose the invention within the times specified in paragraph (c) of this provision. The Recipient's license extends to its domestic subsidiary and affiliates, if any, within the corporate structure of which the Recipient is a party and includes the right to grant sublicenses of the same scope to the extent the Recipient was legally obligated to do so at the time the agreement was awarded. The license is transferable only with the approval of NASA, except when transferred to the successor of that part of the Recipient's business to which the invention pertains.

(2) The Contractor's domestic license may be revoked or modified by NASA to the extent necessary to achieve expeditious practical application of subject invention pursuant to an application for an exclusive license submitted in accordance with applicable provisions at 37 CFR part 404 and agency licensing regulations (if any). This license will not be revoked in that field of use or the geographical areas in which the Subcontractor has achieved practical application and continues to make the benefits of the invention reasonable accessible to the public. The license in any foreign country may be revoked or modified at the discretion of NASA to the extent the Subcontractor, its licensees, or the domestic subsidiaries or affiliates have failed to achieve practical application in that foreign country.

(3) Before revocation or modification of the license, NASA will furnish the Recipient a written notice of its intention to revoke or modify the license, and the Recipient will be allowed 30 days (or such other time as may be authorized by NASA for good cause shown by the Recipient) after the notice to show cause why the license should not be revoked or modified. The Recipient has the right to appeal, in accordance with applicable regulations in 37 CFR part 404 and 14 CFR part 1245, subpart 2, concerning the licensing of Government-owned inventions, any decision concerning the revocation or modification of the license.

(f) *Recipient action to protect the Government's interest.* (1) The Recipient agrees to execute or to have executed and promptly deliver to NASA all instruments necessary to:

(i) Establish or confirm the rights the Government has throughout the world in those subject inventions to which the Subcontractor elects to retain title; and

(ii) Convey title to the Federal agency when requested under paragraph (d) of this provision and to enable the Government to obtain patent protection throughout the world in that subject invention.

(2) The Recipient agrees to require, by written agreement, its employees, other than clerical and nontechnical employees, to disclose promptly in writing to personnel identified as responsible for the administration of patent matters and in a format suggested by the Recipient each subject invention made under contract in order that the Recipient can comply with the disclosure provisions of paragraph (c) of this provision, and to execute all papers necessary to file patent applications on subject inventions and to establish the Government's rights in the subject inventions. This disclosure format should require, as a minimum, the information required by paragraph (c)(1) of this provision. The Recipient shall instruct such employees, through employee agreements or other suitable educational programs, on the importance of reporting inventions in sufficient time to permit the filing of patent applications prior to U.S. or foreign statutory bars.

(3) The Recipient will notify NASA of any decisions not to continue the prosecution of a patent application, pay maintenance fees, or defend in a reexamination or opposition proceeding on a patent, in any country, not

less than 30 days before the expiration of the response period required by the relevant patent office.

(4) The Recipient agrees to include, within the specification of any United States patent application and any patent issuing thereon covering a subject invention the following statement, "This invention was made with Government support under (identify the agreement) awarded by NASA. The Government has certain rights in the invention."

(5) The Recipient shall provide the Grants Officer the following:

(i) A listing every 12 months (or such longer period as the Grants Officer may specify) from the date of the Agreement, of all subject inventions required to be disclosed during the period.

(ii) A final report prior to closeout of the Agreement listing all subject inventions or certifying that there were none.

(iii) Upon request, the filing date, serial number, and title, a copy of the patent application, and patent number and issue date for any subject invention in any country in which the Recipient has applied for patents.

(iv) An irrevocable power to inspect and make copies of the patent application file, by the Government, when a Federal Government employee is a co-inventor.

(g) *Subcontracts.* (1) Unless otherwise authorized or directed by the Grants Officer, the Recipient shall—

(i) Include this clause (Patent Rights—Retention by the Recipient (Small Business)), suitably modified to identify the parties, in all subcontracts, regardless of tier, for experimental, developmental, or research work to be performed by a small business firm or domestic nonprofit organization.

(ii) Include in all other subcontracts, regardless of tier, for experimental, developmental, or research work the patent rights clause (Patent Rights—Retention by the Recipient (Large Business)).

(2) In the event of a refusal by a prospective subcontractor to accept such a clause the Recipient—

(i) Shall promptly submit a written notice to the Grants Officer setting forth the subcontractor's reasons for such refusal and other pertinent information that may expedite disposition of the matter; and

(ii) Shall not proceed with such subcontract without the written authorization of the Grants Officer.

(3) The Recipient shall promptly notify the Grants Officer in writing upon the award of any subcontract at any tier containing a patent rights clause by identifying the subcontractor, the applicable patent rights clause, the work to be performed under the subcontract, and the dates of award and estimated completion. Upon request of the Grants Officer, the Recipient shall furnish a copy of such subcontract, and, no more frequently than annually, a listing of the subcontracts that have been awarded.

(4) The subcontractor will retain all rights provided for the Recipient in the clause under paragraph (g)(1)(i) or (g)(1)(ii) of this provision, whichever is included in the subcontract, and the Recipient will not, as part of the consideration for awarding the subcontract, obtain rights in the subcontractor's subject inventions.

(5) Notwithstanding paragraph (g)(4) of this provision, and in recognition of the contractor's substantial contribution of funds, facilities and/or equipment to the work performed under this cooperative agreement, the Recipient is authorized, subject to the rights of NASA set forth elsewhere in this clause, to:

(i) Acquire by negotiation and mutual agreement rights to a subcontractor's subject inventions as the Recipient may deem necessary to obtaining and maintaining of such private support; and

(ii) Request, in the event of inability to reach agreement pursuant to paragraph (g)(5)(i) of this provision that NASA invoke exceptional circumstances as necessary pursuant to 37 CFR 401.3(a)(2) if the prospective subcontractor is a small business firm or organization, or for all other organizations, request that such rights for the Recipient be included as an additional reservation in a waiver granted pursuant to 14 CFR part 1245, subpart 1. Any such requests to NASA should be prepared in consideration of the following guidance and submitted to the contract officer.

(A) *Exceptional circumstances.* A request that NASA make an "exceptional circumstances" determination pursuant to 37 CFR 401.3(a)(2) must state the scope of rights sought by the Recipient pursuant to such determination; identify the proposed subcontractor and the work to be performed under the subcontract; and state the need for the determination.

(B) *Waiver petition.* The subcontractor should be advised that unless it requests a waiver of title pursuant to the NASA Patent Waiver Regulations (14 CFR part 1245, subpart 1), NASA will acquire title to the subject invention (42 U.S.C. 2457). If a waiver is not requested or granted, the Recipient may request a license from NASA (see licensing of NASA inventions, 14 CFR part 1245, subpart 2). A subcontractor requesting a waiver must follow the procedures set forth in the REQUESTS FOR WAIVER OF RIGHTS—LARGE BUSINESS provision.

(h) *Reporting on utilization of subject inventions.* The Recipient agrees to submit, on request, periodic reports no more frequently than annually on the utilization of a subject invention or on efforts at obtaining such utilization that are being made by the Recipient or its licensees or assignees. Such reports shall include information regarding the status of development, date of first commercial sale or use, gross royalties received by the Recipient, and such other data and information as the agency may reasonably specify. The Recipient also agrees to provide additional reports as may be requested by the agency in connection with any march-in proceeding under-taken by the agency in accordance with paragraph (i) of this provision. As required by 35 U.S.C. 202(c)(5), the agency agrees it will not disclose such information to persons outside the Government without permission of the Recipient.

(i) *Preference for United States manufacture.* The Recipient agrees that any products embodying subject inventions or produced through the use of subject inventions shall be manufactured substantially in the United States. However, in individual cases, the requirement to manufacture substantially in the United States may be waived by the Associate Administrator for Procurement (Code HS) with the concurrence of the Associate General Counsel for Intellectual Property upon a showing by the Recipient that under the circumstances domestic manufacture is not commercially feasible.

(j) *March-in rights.* The Recipient agrees that, with respect to any subject invention in which it has acquired title, NASA has the right in accordance with the procedures in 37 CFR 401.6 and any supplemental regulations of the agency to require the Recipient, an assignee or exclusive licensee of a subject invention to grant a nonexclusive, partially exclusive, or exclusive license in any field of use to a responsible applicant or applicants, upon terms that are reasonable under the circumstances, and if the Subcontractor, assignee, or exclusive licensee refuses such a request NASA has the right to grant such a license itself if the Federal agency determines that—

(1) Such action is necessary because the Recipient or assignee has not taken, or is not expected to take within a reasonable time, effective steps to achieve practical application of the subject invention in such field of use;

(2) Such action is necessary to alleviate health or safety needs which are not reasonably satisfied by the Recipient, assignee, or their licensees;

(3) Such action is necessary to meet requirements for public use specified by Federal regulations and such requirements are not reasonably satisfied by the Recipient, assignee, or licensees; or

(4) Such action is necessary because the agreement required by paragraph (i) of this provision has not been obtained or waived or because a licensee of the exclusive right to use or sell any subject invention in the United States is in breach of such agreement.

(k) *Special provisions for contracts with nonprofit organizations.* If the Recipient is a nonprofit organization, it agrees that—

(1) Rights to a subject invention in the United States may not be assigned without the approval of NASA, except where such assignment is made to an organization which has one of its primary functions the management of inventions; *provided*, that such assignee will be subject to the same provisions as the Recipient;

(2) The Recipient will share royalties collected on a subject invention with the inventor, including Federal employee co-inventors (when NASA deems it appropriate) when the subject invention is assigned in accordance with 35 U.S.C. 202(e) and 37 CFR 401.10;

(3) The balance of any royalties or income earned by the Recipient with respect to subject inventions, after payment of expenses (including payments to inventors) incidental to the administration of subject inventions will be utilized for the support of scientific research or education; and

(4) It will make efforts that are reasonable under the circumstances to attract licensees of subject inventions that are small business firms, and that it will give a preference to a small business firm when licensing a subject invention if the Recipient determines that the small business firm has a plan or proposal for marketing the invention which, if executed, is equally as likely to bring the invention to practical application as any plans or proposals from applicants that are not small business firms; *provided* that the Recipient is also satisfied that the small business firm has the capability and resources to carry out its plan or proposal. The decision whether to give a preference in any specific case will be at the discretion of the Recipient. However, the Recipient agrees that the Secretary of Commerce may review the Contractor's licensing program and decisions regarding small business applicants, and the Recipient will negotiate changes to its licensing policies, procedures, or practices with the Secretary of Commerce when the Secretary's review discloses that the Recipient could take reasonable steps to more effectively implement the requirements of this paragraph (k)(4).

(l) A copy of all submissions or requests required by this clause, plus a copy of any reports, manuscripts, publications, or similar material bearing on patent matters, shall be sent to the installation Patent Counsel in addition to any other submission requirements in the cooperative agreement. If any reports contain information describing a "subject invention" for which the Recipient has elected or may elect title, NASA will use reasonable efforts to delay public release by NASA or publication by NASA in a NASA technical series, in order for a patent application to be filed, provided that the Recipient identify the information and the "subject invention" to which it relates at the time of submittal. If required by the Grants Officer, the Recipient shall provide the filing date, serial number and title, a copy of the patent application, and a patent number and issue date for any "subject invention" in any country in which the Recipient has applied for patents.

[End of provision]

§ 1274.914 Requests for Waiver of Rights—Large Business.

Requests For Waiver of Rights—Large Business (FEB 1996)

(a) In accordance with the NASA Patent Waiver Regulations, 14 CFR part 1245, subpart 1, waiver of rights to any or all inventions made or that may be made under a NASA contract or subcontract with other than a small business firm or a domestic nonprofit organization may be requested at different time periods. Advance waiver of rights to any or all inventions that may be made under a contract or subcontract may be requested prior to the execution of the contract or subcontract, or within 30 days after execution by the selected Recipient. In addition, waiver of rights to an identified invention made and reported under a contract or subcontract may be requested, even though a request for an advance waiver was not made or, if made, was not granted.

(b) Each request for waiver of rights shall be by petition to the Administrator and shall include an identification of the petitioner; place of business and address; if petitioner is represented by counsel, the name, address, and telephone number of the counsel; the signature of the petitioner or authorized representative; and the date of signature. No specific forms need be used, but the request should contain a positive statement that waiver of rights is being requested under the NASA Patent Waiver Regulations; a clear indication of whether the request is for an advance waiver or for a waiver of rights for an individual identified invention; whether foreign rights are also requested and, if so, the countries, and a citation of the specific Section or Sections of the regulations under which such rights are requested; and the name, address, and telephone number of the party with whom to communicate when the request is acted upon. Requests for advance waiver of rights should, preferably, be included with the proposal, but in any event in advance of negotiations.

(c) Petitions for advance waiver, prior to contract execution, must be submitted to the Grants Officer. All other petitions will be submitted to the Patent Representative designated in the contract.

(d) Petitions submitted with proposals selected for negotiation of a contract will be forwarded by the Grants Officer to the installation Patent Counsel for processing and then to the Inventions and Contributions Board. The Board will consider these petitions and where the Board makes the findings to support the waiver, the Board will recommend to the Administrator that waiver be granted, and will notify the petitioner and the Grants Officer of the Administrator's determination. The Grants Officer will be informed by the Board whenever there is insufficient time or information or other reasons to permit a decision to be made without unduly delaying the execution of the contract. In the latter event, the petitioner will be so notified by the Grants Officer. All other petitions will be processed by installation Patent Counsel and forwarded to the Board. The Board shall notify the petitioner of its action and if waiver is granted, the conditions, reservations, and obligations thereof will be included in the Instrument of Waiver. Whenever the Board notifies a petitioner of a recommendation adverse to, or different from, the waiver requested, the petitioner may request reconsideration under procedures set forth in 14 CFR 1245.112(b).

[End of provision]

§ 1274.915 Restrictions on Sale or Transfer of Technology to Foreign Firms or Institutions.

Restrictions on Sale or Transfer of Technology to Foreign Firms or Institutions (FEB 1996)

(a) The parties agree that access to technology developments under this Agreement by foreign firms or institutions must be carefully controlled. For purposes of this clause, a transfer includes a sale of the company, or sales or licensing of the technology. Transfers do not include:

(1) Sales of products or components;

(2) Licenses of software or documentation related to sales of products or components; or

(3) Transfers to foreign subsidiaries of the Recipient for purposes related to this Agreement.

(b) The Recipient shall provide timely notice to the Grants Officer in writing of any proposed transfer of technology developed under this Agreement. If NASA determines that the transfer may have adverse consequences to the national security interests of the United States, or to the establishment of a robust United States industry, NASA and the Recipient shall jointly endeavor to find alternatives to the proposed transfer which obviate or mitigate potential adverse consequences of the transfer.

[End of provision]

§ 1274.916 Liability and Risk of Loss.

Liability and Risk of Loss (FEB 1996)

(a) With regard to activities undertaken pursuant to this agreement, neither party shall make any claim against the other, employees of the other, the other's related entities (e.g., contractors, subcontractors, etc.), or employees of the other's related entities for any injury to or death of its own employees or employees of its related entities, or for damage to or loss of its own property or that of its related entities, whether such injury, death, damage or loss arises through negligence or otherwise, except in the case of willful misconduct.

(b) To the extent that a risk of damage or loss is not dealt with expressly in this agreement, each party's liability to the other party arising out of this Agreement, whether or not arising as a result of an alleged breach of this Agreement, shall be limited to direct damages only, and shall not include any loss of revenue or profits or other indirect or consequential damages.

[End of provision]

§ 1274.917 Additional Funds.

Additional Funds (FEB 1996)

Pursuant to this agreement, NASA is providing a fixed amount of funding for activities to be undertaken under the terms of this cooperative agreement. NASA is under no obligation to provide additional funds. Under no circumstances shall the Recipient undertake any action which could be construed to imply an increased commitment on the part of NASA under this cooperative agreement.

[End of provision]

§ 1274.918 Incremental Funding.

Incremental Funding (FEB 1996)

(a) Of the award amount indicated on the cover page of this agreement, only the obligated amount indicated on the cover page of this agreement is available for payment. NASA anticipates making additional allotments of funds as required.

(b) These funds will be obligated as appropriated funds become available without any action required of the Recipient. NASA is not obligated to make payments in excess of the total funds obligated.

[End of provision]

§ 1274.919 Cost Principles and Accounting Standards.

Cost Principles and Accounting Standards (FEB 1996)

The expenditure of Government funds by the Recipient and the allowability of costs recognized as a resource contribution by the Recipient (See clause entitled "Resource Sharing Requirements") shall be governed by the FAR cost principles, 48 CFR part 31. (If the Recipient is a consortium which includes non-commercial firm members, cost allowability for those members will be determined as follows: Allowability of costs incurred by State, local or federally-recognized Indian tribal governments is determined in accordance with the provisions of OMB Circular A–87, "Cost Principles for State and Local Governments." The allowability of costs incurred by non-profit organizations is determined in accordance with the provisions of OMB Circular A–122, "Cost Principles for Non-Profit Organizations." The allowability of costs incurred by institutions of higher education is determined in accordance with the provisions of OMB Circular A–21, "Cost Principles for Educational Institutions." The allowability of costs incurred by hospitals is determined in accordance with the provisions of Appendix E of 45 CFR part 74, "Principles for Determining Costs Applicable to Research and Development Under Grants and Contracts with Hospitals.") Recipient's method for accounting for the expenditure of funds must be consistent with Generally Accepted Accounting Principles.

[End of provision]

§ 1274.920 Responsibilities of the NASA Technical Officer.

Responsibilities of the NASA Technical Officer (FEB 1996)

(a) The NASA Grant Administrator and Technical Officer for this cooperative agreement are identified on the cooperative agreement cover sheet.

(b) The Grant Specialist shall serve as NASA's authorized representative for the administrative elements of all work to be performed under the agreement.

(c) The Technical Officer shall have the authority to issue written Technical Advice which suggests redirecting the project work (e.g., by changing the emphasis among different tasks), or pursuing specific lines of inquiry likely to assist in accomplishing the effort. The Technical Officer shall have the authority to approve or disapprove those technical reports, plans, and other technical information the Recipient is required to submit to NASA for approval. The Technical Officer is not authorized to issue and the Recipient shall not follow any Technical Advice which constitutes work which is not contemplated under this agreement; which in any manner causes an increase or decrease in the resource sharing or in the time required for performance of the project; which has the effect of changing any of the terms or conditions of the cooperative agreement; or which interferes with the Recipient's right to perform the project in accordance with the terms and conditions of this cooperative agreement.

[End of provision]

§ 1274.921 Publications and Reports: Non-Proprietary Research Results.

Publications and Reports: Non-Proprietary Research Results (FEB 1996)

(a) NASA encourages the widest practicable dissemination of research results at all times during the course of the investigation consistent with the other terms of this agreement.

(b) All information disseminated as a result of the cooperative agreement, shall contain a statement which acknowledges NASA's support and identifies the cooperative agreement by number.

(c) Prior approval by the NASA Technical Officer is required only where the Recipient requests that the results of the research be published in a NASA scientific or technical publication. Two copies of each draft publication shall accompany the approval request.

(d) Reports shall contain full bibliographic references, abstracts of publications and lists of all other media in which the research was discussed. The Recipient shall submit the following technical reports:

(1) A performance report for every year of the cooperative agreement (except the final year). Each report is due 60 days before the anniversary date of the cooperative agreement and shall describe research accomplished during the report period.

(2) A summary of research, which is due by 90 days after the expiration date of the cooperative agreement, regardless of whether or not support is continued under another cooperative agreement. This report is intended to summarize the entire research accomplished during the duration of the cooperative agreement.

(e) Performance reports and summaries of research shall display the following on the first page:

(1) Title of the cooperative agreement.

(2) Type of report.

(3) Period covered by the report.

(4) Name and address of the Recipient's organization.

(5) Cooperative agreement number.

(f) An original and two copies, one of which shall be of suitable quality to permit micro-reproduction, shall be sent as follows:

(1) Original—Grant Officer.

(2) Copy—Technical Officer.

(3) Micro-reproducible copy—NASA Center for Aerospace Information (CASI), Attn: Accessioning Department, 800 Elkridge Landing Road, Linthicum Heights, Maryland 21090–2934.

[End of provision]

§ 1274.922 Suspension or Termination.

Suspension or Termination (FEB 1996)

(a) This cooperative agreement may be suspended or terminated in whole or in part by the Recipient or by NASA after consultation with the other party. NASA may terminate the agreement, for example, if the Recipient is not making anticipated technical progress, if the Recipient materially fails to comply with the terms of the agreement, if the Recipient materially changes the objective of the agreement, or if appropriated funds are not available to support the program.

(b) Upon fifteen (15) days written notice to the other party, either party may temporarily suspend the cooperative agreement, pending corrective action or a decision to terminate the cooperative agreement. The notice should express the reasons why the agreement is being suspended.

(c) In the event of termination by either party, the Recipient shall not be entitled to additional funds or payments except as may be required by the Recipient to meet NASA's share of commitments which had in the judgment of NASA become firm prior to the effective date of termination and are otherwise appropriate. In no event, shall these additional funds or payments exceed the amount of the next payable milestone billing amount.

[End of provision]

§ 1274.923 Equipment and Other Property.

Equipment and Other Property (FEB 1996)

(a) NASA cooperative agreements permit acquisition of technical property required for the conduct of research. Acquisition of property costing in excess of $5,000 and not included in the approved proposal budget requires the prior approval of the Grant Officer unless the item is merely a different model of an item shown in the approved proposal budget.

(b) Recipients may not purchase, as a direct cost to the cooperative agreement, items of non-technical property, examples of which include but are not limited to office equipment and furnishings, air conditioning equipment, reproduction and printing equipment, motor vehicles, and automatic data processing equipment. If the Recipient requests an exception, the Recipient shall submit a written request for Grant Officer approval, prior to purchase by the Recipient, stating why the Recipient cannot charge the property to indirect costs.

(c) Under no circumstances shall cooperative agreement funds be used to acquire land or any interest therein, to acquire or construct facilities (as defined in 48 CFR 45.301 (FAR)), or to procure passenger carrying vehicles.

(d) The government shall have title to equipment and other personal property acquired with government funds. Such property shall be disposed of pursuant to 48 CFR 45.603 (FAR). The Recipient shall have title to equipment and other personal property acquired with Recipient funds. Such property shall remain with the Recipient at the conclusion of the cooperative agreement.

(e) Title to Government furnished equipment (including equipment, title to which has been transferred to the Government pursuant to 14 CFR 1260.408(d) prior to completion of the work) will remain with the Government.

(f) The Recipient shall establish and maintain property management standards for nonexpendable personal property and otherwise manage such property as set forth in 14 CFR 1260.507.

(g) Annually by October 31, the Recipient shall submit 2 copies of an inventory report which lists all Government furnished equipment and equipment acquired with Government funds in their custody as of September 30. The Recipient shall submit 2 copies of a final inventory report by 60 days after the expiration date of the cooperative agreement. The final inventory report shall contain a list of all Recipient acquired equipment and a list of Government furnished equipment. Annual and final inventory reports shall reflect the elements required in 14 CFR 1260.507(a)(1) (i), (ii), (iii), (v) through (viii) and beginning and ending dollar value totals for the reporting period and be submitted to the grant officer. When Government furnished equipment is no longer needed, the Recipient shall notify the Grants Officer, who will provide disposition instructions.

[End of provision]

§ 1274.924 Civil Rights.

Civil Rights (FEB 1996)

Work on NASA cooperative agreements is subject to the provisions of Title VI of the Civil Rights Act of 1964 (Public Law 88–352; 42 U.S.C. 2000d–l), Title IX of the Education Amendments of 1972 (20 U.S.C. 1680 *et seq.*), section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794), the Age Discrimination Act of 1975 (42 U.S.C. 6101 *et seq.*), and the NASA implementing regulations (14 CFR parts 1250, 1251, and 1252).

[End of provision]

§ 1274.925 Subcontracts.

Subcontracts (FEB 1996)

(a) Recipients are not authorized to issue grants or cooperative agreements.

(b) NASA Grant Officer consent is required for subcontracts over $100,000, if not accepted by NASA in the original proposal. The Recipient shall provide the following information to the Grant Officer:

(1) A copy of the proposed subcontract.

(2) Basis for subcontractor selection.

(3) Justification for lack of competition when competitive bids or offers are not obtained.

(4) Basis for award cost or award price.

(c) The Recipient shall utilize small business concerns, small disadvantaged business concerns, Historically Black Colleges and Universities, minority educational institutions, and women-owned small business concerns as subcontractors to the maximum extent practicable.

[End of provision]

§ 1274.926 Clean Air-Water Pollution Control Acts.

Clean Air-Water Pollution Control Acts (FEB 1996)

If this cooperative agreement or supplement thereto is in excess of $100,000, the Recipient agrees to notify the Grant Officer promptly of the receipt, whether prior or subsequent to the Recipient's acceptance of this cooperative agreement, of any communication from the Director, Office of Federal Activities, Environmental Protection Agency (EPA), indicating that a facility to be utilized under or in the performance of this cooperative agreement or any subcontract thereunder is under consideration to be listed on the EPA "List of Violating Facilities" published pursuant to 40 CFR 15.20. By acceptance of a cooperative agreement in excess of $100,000, the Recipient:

(a) Stipulates that any facility to be utilized thereunder is not listed on the EPA "List of Violating Facilities" as of the date of acceptance;

(b) Agrees to comply with all requirements of section 114 of the Clean Air Act, as amended (42 U.S.C. 7414) and section 308 of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1318) relating to inspection, monitoring, entry, reports and information, and all other requirements specified in the aforementioned sections, as well as all regulations and guidelines issued thereunder after award of and applicable to the cooperative agreement; and

(c) Agrees to include the criteria and requirements of this provision in every subcontract hereunder in excess of $100,000, and to take such action as the Grant Officer may direct to enforce such criteria and requirements.

[End of provision]

§ 1274.927 Debarment and Suspension and Drug-Free Workplace.

Debarment and Suspension and Drug-Free Workplace (FEB 1996)

NASA cooperative agreements are subject to the provisions of 14 CFR part 1265, Government-wide Debarment and Suspension (Nonprocurement) and Government-wide requirements for Drug-Free Workplace, unless excepted by 14 CFR 1265.110 or 1265.610.

[End of provision]

§ 1274.928 Foreign National Employee Investigative Requirements.

Foreign National Employee Investigative Requirements (FEB 1996)

(a) The Recipient shall submit a properly executed Name Check Request (NASA Form 531) and a completed applicant fingerprint card (Federal Bureau of Investigation Card FD–258) for each foreign national employee requiring access to a NASA Installation. These documents shall be submitted to the Installation's Security Office at least 75 days prior to the estimated duty date. The NASA Installation Security Office will request a National Agency Check (NAC) for foreign national employees requiring access to NASA facilities. The NASA Form 531 and fingerprint card may be obtained from the NASA Installation Security Office.

(b) The Installation Security Office will request from NASA Headquarters, International Relations Division (Code IR), approval for each foreign national's access to the Installation prior to providing access to the Installation. If the access approval is obtained from NASA Headquarters prior to completion of the NAC and performance of the cooperative agreement requires a foreign national to be given access immediately, the Technical Officer may submit an escort request to the Installation's Chief of Security.

[End of provision]

§ 1274.929 Restrictions on Lobbying.

Restrictions on Lobbying (FEB 1996)

This award is subject to the provisions of 14 CFR part 1271 "New Restrictions on Lobbying."

[End of provision]

§ 1274.930 Travel and Transportation.

Travel and Transportation (FEB 1996)

(a) For travel funded by the government under this agreement, section 5 of the International Air Transportation Fair Competitive Practices Act of 1974 (49 U.S.C. 40118) (Fly America Act) requires the Recipient to use U.S.-flag air carriers for international air transportation of personnel and property to the extent that service by those carriers is available.

(b) Department of Transportation regulations, 49 CFR part 173, govern Recipient shipment of hazardous materials and other items.

[End of provision]

§ 1274.931 Electronic Funds Transfer Payment Methods.

Electronic Funds Transfer Payment Methods (FEB 1996)

Payments under this cooperative agreement will be made by the Government either by check or electronic funds transfer (through the Treasury Fedline Payment System (FEDLINE) or the Automated Clearing House (ACH)), at the option of the Government. After award, but no later than 14 days before an invoice is submitted, the Recipient shall designate a financial institution for receipt of electronic funds transfer payments, and shall submit this designation to the Grant Officer or other Government official, as directed.

(a) For payment through FEDLINE, the Recipient shall provide the following information:

(1) Name, address, and telegraphic abbreviation of the financial institution receiving payment.

(2) The American Bankers Association 9-digit identifying number for wire transfers of the financing institution receiving payment if the institution has access to the Federal Reserve Communication System.

(3) Payee's account number at the financial institution where funds are to be transferred.

(4) If the financial institution does not have access to the Federal Reserve Communications System, name, address, and telegraphic abbreviation of the correspondent financial institution through which the financial institution receiving payment obtains wire transfer activity. Provide the telegraphic abbreviation and American Bankers Association identifying number for the correspondent institution.

(b) For payment through ACH, the Recipient shall provide the following information:

(1) Routing transit number of the financial institution receiving payment (same as American Bankers Association identifying number used for FEDLINE).

(2) Number of account to which funds are to be deposited.

(3) Type of depositor account ("C" for checking, "S" for savings).

(4) If the Recipient is a new enrollee to the ACH system, a "Payment Information Form," SF 3881, must be completed before payment can be processed.

(c) In the event the Recipient, during the performance of this cooperative agreement, elects to designate a different financial institution for the receipt of any payment made using electronic funds transfer procedures, notification of such change and the required information specified above must be received by the appropriate Government official 30 days prior to the date such change is to become effective.

(d) The documents furnishing the information required in this clause must be dated and contain the signature, title, and telephone number of the Recipient official authorized to provide it, as well as the Recipient's name and contract number.

(e) Failure to properly designate a financial institution or to provide appropriate payee bank account information may delay payments of amounts otherwise properly due.

[End of Provision]

§ 1274.932 Retention and Examination of Records.

Retention and Examination of Records (FEB 1996)

Financial records, supporting documents, statistical records, and all other records (or microfilm copies) pertinent to this cooperative agreement shall be retained for a period of 3 years, except that records for nonexpendable property acquired with cooperative agreement funds shall be retained for 3 years after its final disposition and, if any litigation, claim, or audit is started before the expiration of the 3-year period, the records shall be retained until all litigation, claims, or audit findings involving the records have been resolved. The retention period starts from the date of the submission of the final invoice. The Administrator of NASA and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any pertinent books, documents, papers, and records of the Recipient and of subcontractors to make audits, examinations, excerpts, and transcripts. All requirements of this provision shall apply to any subcontractor performing substantive work under this cooperative agreement.

[End of provisions]

Appendix A to Part 1274—Contract Provisions

All contracts awarded by a Recipient, including small purchases, shall contain the following provisions if applicable:

1. Equal Employment Opportunity—All contracts shall contain a provision requiring compliance with Executive Order 11246, 30 FR 12319, 12935, 3 CFR, 1964–1965 Comp., p. 339, Executive Order 11375, 32 FR 14199, 3 CFR, 1966–1970 Comp., p. 684, "Amending Executive Order 11246 Relating to Equal Employment Opportunity," and as supplemented by regulations at 41 CFR part 60, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor."

2. Copeland "Anti-Kickback" Act (18 U.S.C. 874 and 40 U.S.C. 276c)—All contracts in excess of $50,000 for construction or repair awarded by Recipients and subRecipients shall include a provision for compliance with the Copeland "Anti-Kickback" Act (18 U.S.C. 874), as supplemented by Department of Labor regulations (29 CFR part 3, "Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States"). The Act provides that each Recipient or subRecipient shall be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he is otherwise entitled. The Recipient shall report all suspected or reported violations to NASA.

3. Contract Work Hours and Safety Standards Act (40 U.S.C. 327–333)—Where applicable, all contracts awarded by Recipients in excess of $2,000 for construction contracts and in excess of $50,000 for other contracts, other than contracts for commercial items, that involve the employment of mechanics or laborers shall include a provision for compliance with sections 102 and 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327–333), as supplemented by Department of Labor regulations (29 CFR part 5). Under section 102 of the Act, each Recipient shall be required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than 1½ times the basic rate of pay for all hours worked in excess of 40 hours in the work week. Section 107 of the Act is applicable to construction work and provides that no laborer or mechanic shall be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

4. Rights to Inventions Made Under a Contract or Agreement—Contracts or agreements for the performance of experimental, developmental, or research work shall provide for the rights of the Federal Government and the Recipient in any resulting invention in accordance with 37 CFR part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements," and any implementing regulations issued by the awarding agency.

5. Clean Air Act, as amended (42 U.S.C. 7401 *et seq.*) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251 *et seq.*) Contracts, other than contracts for commercial items, of amounts in excess of $100,000 shall contain a provision that requires the Recipient to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. 7401 *et seq.*) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251 *et seq.*). Violations shall be reported to NASA and the Regional Office of the Environmental Protection Agency (EPA).

6. Byrd Anti-Lobbying Amendment (31 U.S.C. 1352)—Contractors who apply or bid for an award of $100,000 or more shall file the required certification. Each tier certifies to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any Federal contract, grant or any other award covered by 31 U.S.C. 1352. Each tier shall also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award. Such disclosures are forwarded from tier to tier up to the Recipient.

7. Debarment and Suspension (Executive Orders 12549 and 12689)—No contract shall be made to parties listed on the General Services Administration's List of Parties Excluded from Federal Procurement or Nonprocurement Programs in accordance with Executive Orders 12549 and 12689, "Debarment and Suspension." This list contains the names of parties debarred, suspended, or otherwise excluded by agencies, and contractors declared ineligible under statutory or regulatory authority other than Executive Order 12549. Contractors with awards that exceed the small purchase threshold shall provide the required certification regarding its exclusion status and that of its principal employees.

Appendix B to Part 1274—Reports

1. Individual procurement action report (NASA Form 507). The grant officer is responsible for submitting NASA Form 507 for all cooperative agreement actions.

2. Inventory listings of equipment. As provided in paragraph (g) of the provision in § 1274.923, an annual inventory listing of Government furnished equipment will be submitted by October 31 of each year. Upon receipt of each annual inventory listing, the administrative grant officer will provide 1 copy to the NASA installation financial management officer and 1 copy to the NASA installation industrial property officer. A final inventory report of Government furnished equipment and grantee acquired equipment is due 60 days after the end of the cooperative agreement, in accordance with the provision in 31274.923. Upon receipt of the final inventory report, the administrative grant officer will provide 1 copy to the technical officer and 1 copy to the NASA Installation industrial property officer.

3. Disclosure of lobbying activities (SF LLL). (a) Grant officers shall provide one copy of each SF LLL furnished under 14 CFR 1271.110 to the Procurement Officer for transmittal to the Director, Analysis Division (Code HC).

(b) Suspected violations of the statutory prohibitions implemented by 14 CFR part 1271 shall be reported to the Director, Contract Management Division (Code HK).

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 2, 153, 157, 201, 375 and 382

[Docket No. RM96–9–000]

Editorial Changes to Various Regulations To Conform References to Revised Part 154; Order No. 586; Final Rule

Issued March 21, 1996.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Final Rule.

SUMMARY: The Federal Energy Regulatory Commission is amending various regulations under the Natural Gas Act to conform to revisions to part 154 of the Commission's regulations under the Natural Gas Act which reorganized the filing requirements for interstate natural gas pipelines.

EFFECTIVE DATE: This final rule is effective April 26, 1996.

FOR FURTHER INFORMATION CONTACT: Richard A. White, Office of the General Counsel, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, (202) 208–0491.

SUPPLEMENTARY INFORMATION: In addition to publishing the full text of this document in the **Federal Register**, the Commission also provides all interested persons an opportunity to inspect or copy the contents of this document during normal business hours at 888 First Street, NE., Washington, DC 20426.

The Commission Issuance Posting System (CIPS), an electronic bulletin board service, provides access to the texts of formal documents issued by the Commission. CIPS is available at no charge to the user and may be accessed using a personal computer with a modem by dialing (202) 208–1397 if dialing locally or 1–800 856–3920 if dialing long distance. To access CIPS, set your communications software to 19200, 14400, 12000, 9600, 7200, 4800, 2400 or 1200bps, full duplex, no parity, 8 data bits, and 1 stop bit. The full text of this document will be available on CIPS indefinitely in ASCII and WordPerfect 5.1 format. The complete text on diskette in Wordperfect format may also be purchased from the Commission's copy contractor, La Dorn Systems Corporation, located in Room 2–A, 888 First Street NE., Washington, DC 20426.

Before Commissioners: Elizabeth Anne Moler, Chair; Vicky A. Bailey, James J. Hoecker, William L. Massey, and Donald F. Santa, Jr.

I. Introduction

The Federal Energy Regulatory Commission (Commission) is amending parts 2, 153, 157, 201, and 382 of its regulations to conform to changes in part 154 promulgated by the final rule issued September 28, 1995, in Docket No. RM95–3–000 (60 FR 52960, October 11, 1995). The changes to the Commission regulations are to be effective April 26, 1996.

II. The Revised Regulations

The final rule in Docket No. RM95–3–000 completely reorganized the regulations governing the filing requirements for interstate natural gas pipelines. Therefore, other regulations that reference part 154 must be conformed to reference the appropriate section of the revised regulations. Accordingly, the Commission is adopting these conforming changes to its regulations.

Section 2.55 contains a reference to former § 154.91 which contained the definition of "independent producer." Since former § 154.91 has been removed, the definition will be incorporated into paragraph (d) of revised § 2.55. This modification does not represent a change in Commission policy.

Section 2.64 concerns producer certificates. Producers no longer have to file for certificates with the Commission. The entire section has been removed.

Section 153.8 references former §§ 154.31 through 154.41. This section is modified to refer to revised §§ 154.101 through 154.111, and 154.301 through 154.403.

Section 157.103(d)(8) refers to former § 154.63. This section is modified to refer to subpart D of part 154.

Section 157.301(d) concerns waiver of requirements formerly required by §§ 154.92 through 154.94. These sections have been removed from the Commission's regulations by Order No. 567.[1] Accordingly, § 157.301(d) is removed.

Part 201, General Instruction 16, refers to former §§ 2.66 and 154.42. Section 2.66 was removed by Order No. 542[2] and § 154.42 was removed by Order No 567.[3] These sections were removed because the Natural Gas Wellhead Decontrol Act of 1989[4] made all "first sales" of natural gas no longer subject to Federal regulation. Because General Instruction 16 is predicated on the requirements of former §§ 2.66 and 154.42, General Instruction No. 16 is being removed.

Part 201, Gas Plant Instruction, 3.(17)(b) refers to former § 154.63. This reference will be changed to subpart D of revised part 154.

In part 375, the title of § 375.307 must be changed to reflect the renaming of the Office of Pipeline and Producer Regulation to the Office of Pipeline Regulation. The reference to §§ 154.303(e) and 154.63(a)(2) is changed to reference subpart D of part 154 in § 375.307(b)(1). In paragraph (b)(5), the reference to § 154.91 has been removed. Paragraph (f)(3), concerns applications for waiver of various fees. However, the fees are no longer required. Therefore, the references to §§ 381.201–206, 381.208, 381.209, 381.401, and 381.404 have been removed. Paragraph (f)(5) has been changed to refer to § 154.403.

The reference in § 382.103(c) to former § 154.67(c)(2)(iii) is modified to reflect that the subject of this section, interest calculations, is now found in revised § 154.501(d).

III. Public Reporting Burden

The Commission estimates the public reporting burden for the collection of information under the rule will not be affected.

Interested persons may send comments regarding this burden estimate or any other aspect of this information collection, including suggestions for reducing the burden by contacting the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426 [Attention: Michael Miller, Information Services Division, (202) 208–1415], and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington DC 20503 (Attention: Desk Officer for the Federal Energy Regulatory Commission), FAX: (202) 395–5167.

IV. Regulatory Flexibility Act Certification

[1] 68 FERC ¶ 61,135 (1994). Order No. 567 deleted certain regulations related to natural gas producer rate regulation that were either obsolete or nonessential in light of the deregulation of wellhead gas prices under the Natural Gas Wellhead Decontrol Act of 1989. Pub. L. No. 101–60; 103 Stat. 157 (1989).

[2] Deletion of Certain Outdated or Nonessential Regulations Pertaining to the Commission's Jurisdiction over Natural Gas, III FERC Stats. & Regs. ¶ 30,945 (1992).

[3] Removal of Outdated Regulations Pertaining to the Sales of Natural Gas Production, III FERC Stats. & Regs. ¶ 30,999 (1994).

[4] Pub. L. 101–60; 103 Stat. 157 (1989).

The Regulatory Flexibility Act (RFA)[5] requires agencies to prepare certain statements, descriptions and analyses of proposed rules that will have a "significant economic impact on a substantial number of small entities." The Commission is not required to make such analyses if a rule would not have such an effect.

The Commission believes that this rule will not have such an impact on small entities. Most filing companies regulated by the Commission do not fall within the RFA's definition of small entity.[6] Further, this rule merely changes the section number referenced within an existing regulation. Therefore, the Commission certifies that this rule will not have a significant economic impact on a substantial number of small entities.

V. Environmental Statement

The Commission has excluded certain actions not having a significant effect on the human environment from the requirement to prepare an environmental assessment or an environmental impact statement.[7] No environmental consideration is raised by the promulgation of a rule that is clarifying, corrective, or procedural or that does not substantially change the effect of legislation or regulations being amended.[8] The instant rule is purely procedural. Accordingly, no environmental consideration is necessary.

VI. Information Collection Statement

The Office of Management and Budget's (OMB) regulations[9] require that OMB approve certain information and recordkeeping requirements imposed by an agency. The following existing data collections are affected by this final rule but with no change in industry reporting burden: FERC–541, Gas Pipeline Certificates: Curtailment Plan (1902–0066); FERC–542, Gas Pipeline Rates: Initial Rates, Rate Change & Tracking Filing (1902–0070); FERC–544, Gas Pipeline Rates: Rate Change (formal) (1902–0153); FERC–545, Gas Pipeline Rates: Rate Change (NonFormal) (1902–0154); FERC–577, Environmental Impact Statement (1902–0128); FERC Form 2, Annual Report of Major Natural Gas Companies (1902–0028); and, FERC Form 2A, Annual Report of Nonmajor Natural Gas Companies (1902–0030); and, FERC–582, Oil, Gas and Electric Annual Charges (1902–0132).

The Commission is issuing this final rule to change the section references in existing regulations to conform to the revised part 154. The Commission uses the information to carry out its regulatory responsibilities pursuant to the Natural Gas Act. The Commission's Office of Pipeline Regulation uses the information to review rate filings by natural gas pipelines for the transportation of gas.

The Commission is submitting to the Office of Management and Budget a notification of these collections of information. Interested persons may obtain information on these reporting requirements by contacting the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426 [Attention: Michael Miller, Information Services Division, (202) 208–1415]. Comments on the requirements of this rule can be sent to the Office of Information and Regulatory Affairs of OMB, Washington, DC 20503, (Attention: Desk Officer for Federal Energy Regulatory Commission) FAX: (202) 395–5167.

VII. Administrative Findings and Effective Date

The Administrative Procedure Act (APA) exempts certain rules from notice and comment requirements.[10] Specifically, the APA exempts "rules of agency organization, procedure, or practice" from the requirements for notice and comment.[11] This change to referenced sections of part 154 to conform to changes in part 154 qualifies for exemption as a procedural rule because it does not affect the substantive rights of a party.

This order is effective April 26, 1996.

List of Subjects

18 CFR Part 2

Administrative practice and procedure, Electric power, Natural gas, Pipelines, Reporting and recordkeeping requirements.

18 CFR Part 153

Exports, Imports, Natural Gas, Reporting and recordkeeping requirements.

18 CFR Part 157

Administrative practice and procedure, Natural gas, Reporting and recordkeeping requirements.

18 CFR Part 201

Natural gas, Reporting and recordkeeping requirements, Uniform System of Accounts.

18 CFR Part 375

Authority delegations (Government agencies), Seals and insignia, Sunshine Act.

18 CFR Part 382

Administrative practice and procedure, Electric utilities Pipelines, Reporting and recordkeeping requirements.

By the Commission.

Lois D. Cashell,

Secretary.

In consideration of the foregoing, the Commission is amending parts 2, 153, 157, 201, 375 and 382, Chapter I, Title 18, Code of Federal Regulations, as set forth below.

PART 2—GENERAL POLICY AND INTERPRETATIONS

1. The authority citation for part 2 continues to read as follows:

Authority: 15 U.S.C. 717–717w, 3301–3432; 16 U.S.C. 791a-825r, 2601–2645; 42 U.S.C. 4321–4361, 7101–7352.

2. Section 2.55 is amended by revising paragraph (d) to read as follows:

§ 2.55 Definition of terms used in section 7(c).

* * * * *

(d) Taps. Taps on existing transmission pipelines which are installed solely for the purpose of enabling a purchaser or transporter to take delivery of gas from an independent producer. An independent producer means any person as defined in the Natural Gas Act who is engaged in the production or gathering of natural gas and who sells natural gas in interstate commerce for resale, but who is not engaged in the transportation of natural gas (other than gathering) by pipeline in interstate commerce.

§ 2.64 [Removed]

3. Section 2.64 is removed.

PART 153—APPLICATION FOR AUTHORIZATION TO EXPORT OR IMPORT NATURAL GAS

4. The authority citation for part 153 is revised to read as follows:

Authority: 15 U.S.C. 717b, 717o; E.O. 10485, 3 CFR, 1949–1953 Comp., p. 970, as amended by E.O. 12038, 3 CFR, 1978 Comp., p. 136.

5. Section 153.8 is revised to read as follows:

§ 153.8 Filing of contracts, rate schedules, etc.

Persons authorized to export natural gas from the United States to a foreign country or to import natural gas from a foreign country must file two full and complete copies of every contract and the amendments thereto, presently or hereafter effective, for such export or import, together with all rate schedules, agreements, leases or other writings, tariffs, classifications, rules and regulations relative to such export or import in the manner specified in part 154 of this chapter, except that the requirements of § 154.101 through § 154.111 and § 154.301 through 154.403 shall not be applicable.

PART 157—APPLICATIONS FOR CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY AND FOR ORDERS PERMITTING AND APPROVING ABANDONMENT UNDER SECTION 7 OF THE NATURAL GAS ACT

6. The authority citation for part 157 continues to read as follows:

Authority: 15 U.S.C. 717–717w, 3301–3432; 42 U.S.C. 7101–7352.

7. Section 157.103 is amended by revising paragraph (d)(8) to read as follows:

§ 157.103 Terms and conditions; other requirements.

* * * * *

(d) * * *

(8) Prohibitions against cost shifting. No costs originally allocated to a new service may subsequently be allocated to any other services without a filing under Subpart D of Part 154 and a determination by the Commission that the costs sought to be reallocated are in fact being incurred for the benefit of the other services.

* * * * *

§ 157.301 [Removed]

8. Section 157.301 is removed.

PART 201—UNIFORM SYSTEM OF ACCOUNTS PRESCRIBED FOR NATURAL GAS COMPANIES SUBJECT TO THE PROVISIONS OF THE NATURAL GAS ACT

9. The authority citation for Part 201 continues to read as follows:

Authority: 15 U.S.C. 717–717w, 3301–3432; 42 U.S.C. 7101–7352, 7651–7651o.

10. In Part 201, General Instructions, paragraph 16 is removed and reserved.

11. In Part 201, Gas Plant Instructions, paragraph 3(17)(b) remove the words "§ 154.63" and add, in their place, the words "subpart D of part 154".

PART 375—THE COMMISSION

12. The authority citation for Part 375 continues to read as follows:

Authority: 5 U.S.C. 551–557; 15 U.S.C. 717–717w, 3301–3432; 16 U.S.C. 791–825r, 2601–2645; 42 U.S.C. 7101–7352.

13. In section 375.307, the section heading and paragraphs (b)(1), (b)(5), (f)(3) and (f)(5) are revised to read as follows:

§ 375.307 Delegations to the Director of the Office of Pipeline Regulation.

* * * * *

(b) * * *

(1) Accept a tariff or rate schedule filing, except a major pipeline rate increase under section 4(e) of the Natural Gas Act and under subpart D of part 154, if it complies with all applicable statutory requirements, and with all applicable Commission rules, regulations, and orders for which a waiver has not been granted, or if a waiver has been granted by the Commission, if it complies with the terms of such waiver;

* * * * *

(5) Accept statements of eligibility filed under § 2.56(p) of this chapter by producers of natural gas, as defined in § 157.40 of this chapter.

* * * * *

(f) * * *

(3) Fees prescribed in §§ 381.207, 381.402, and 381.403 of this chapter in accordance with § 381.106(b) of this chapter;

* * * * *

(5) Section 154.403 of this chapter, as necessary, in order to rule on out-of-cycle purchased gas adjustment filings.

* * * * *

PART 382—ANNUAL CHARGES

14. The authority citation for part 382 continues to read as follows:

Authority: 5 U.S.C. 551–557; 15 U.S.C. 717–717w, 3301–3432; 16 U.S.C. 791a-825r, 2601–2645; 42 U.S.C. 7101–7352; 49 U.S.C. 60502; 49 App. U.S.C. 1–85.

§ 382.103 [Amended]

15. In § 382.103(c), the words "§ 154.67(c)(2)(iii)" are removed and the words "§ 154.501(d)" are added in their place.

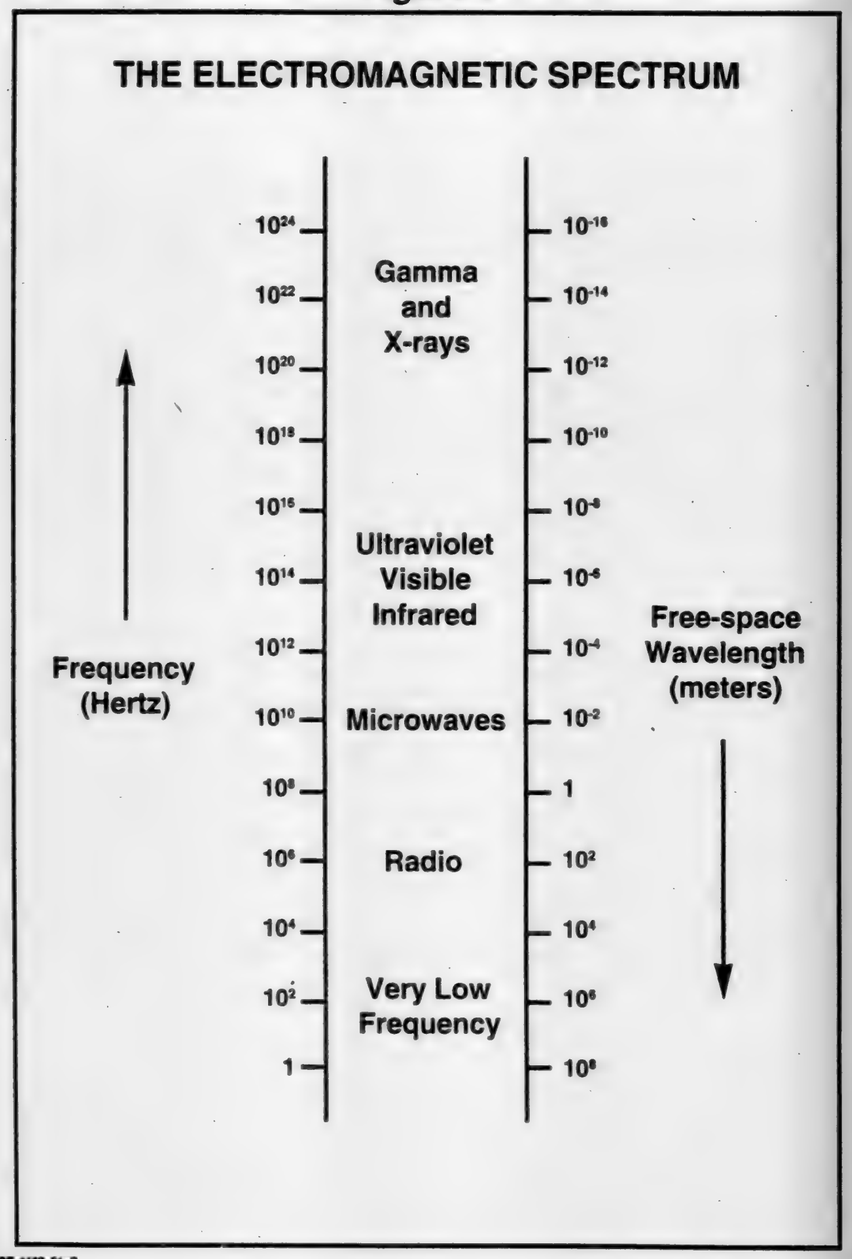
Records and Reports Regulations for Radiation Emitting Electronic Products; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a final rule that appeared in the **Federal Register** of September 19, 1995 (60 FR 48374). The document amended FDA regulations regarding the requirements for recordkeeping and reporting of adverse experiences and other information relating to radiation emitting electronic products. The document was published with inadvertent typographical errors. This document corrects those errors.

EFFECTIVE DATE: October 19, 1995.



FOR FURTHER INFORMATION CONTACT: Joanne Barron, Center for Devices and Radiological Health (HFZ–300), Food and Drug Administration, 2094 Gaither Rd., Rockville, MD 20850, 301–594–4654.

In FR Doc. 95–23130, appearing on page 48374 in the **Federal Register** of Tuesday, September 19, 1995, the following corrections are made:

1. On page 48381, "Figure 1" is republished to correct some inadvertent errors, as follows:

BILLING CODE 4160–01–F

Figure 1

BILLING CODE 4160-01-C

2. Beginning on page 48383, in table 1, is being republished to correct some inadvertent typographical errors, as follows:

Products	Manufacturer: Product reports § 1002.10	Supplemental reports § 1002.11	Abbreviated reports § 1002.12	Annual reports § 1002.13	Test records § 1002.30(a)[1]	Distribution records § 1002.30(b)[2]	Dealer & Distributor: Distribution records §§ 1002.40 and 1002.41
Diagnostic ultrasound			X				
Medical ultrasound other than therapy or diagnostic	X	X					
Nonmedical ultrasound			X				

[1]However, authority to inspect all appropriate documents supporting the adequacy of a manufacturer's compliance testing program is retained.
[2]The requirement includes §§ 1002.31 and 1002.42, if applicable.
[3]Report of Assembly (Form FDA 2579) is required for diagnostic x-ray components; see 21 CFR 1020.30(d)(1) through (d)(3).
[4]Systems records and reports are required if a manufacturer exercises the option and certifies the system as permitted in 21 CFR 1020.30(c).
[5]Determined using the isoexposure rate limit curve (IRLC) under phase III test conditions (1020.10(c)(3)(iii)).
[6]Annual report is for production status information only.
[7]Determination of the applicable reporting category for a laser product shall be based on the worst-case hazard present within the laser product.

§ 1002.3 [Corrected]

3. On page 48385, in the first column, in § 1002.3, in line 6, the comma is removed after the word "product" and in line 7, a comma is added after the word "purchaser".

Dated: March 19, 1996.

William K. Hubbard,

Associate Commissioner for Policy Coordination.

BILLING CODE 4160–01–F

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 3

RIN 2900–AH48

Examinations

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: This document adopts as a final rule, without change, an interim rule that amended the Department of Veterans Affairs (VA) adjudication regulations concerning compensation and pension claims filed by veterans, surviving spouses, or parents. With respect to language for authorizing VA examinations, this final rule provides that a VA examination will be authorized where there is a well-grounded claim for disability compensation or pension but the medical evidence accompanying the claim is not adequate for rating purposes. This final rule reflects statutory language and caselaw requirements concerning such VA examinations.

EFFECTIVE DATE: This final rule is effective March 27, 1996. (The interim rule was effective October 11, 1995.)

FOR FURTHER INFORMATION CONTACT: Paul Trowbridge, Consultant, Compensation and Pension Service, Veterans Benefits Administration, 810 Vermont Avenue, NW, Washington, DC 20420, telephone (202) 273–7210.

SUPPLEMENTARY INFORMATION: On October 11, 1995, VA published in the **Federal Register** (60 FR 52863) an interim final rule intended to clarify the circumstances under which a VA examination will be authorized. Interested parties were invited to submit written comments on or before December 11, 1995. We received no comments.

Based on the rationale set forth in the interim final rule, the provisions of the interim final rule are adopted as a final rule without change.

The Secretary certifies that this final rule will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. This final rule will directly affect VA beneficiaries but will not affect small businesses. Therefore, pursuant to 5 U.S.C. 606(b), this final rule is exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

The Catalog of Federal Domestic Assistance program numbers are 64.100, 64.104, 64.105, 64.106, 64.109, and 64.110.

List of Subjects in 38 CFR Part 3

Administrative practice and procedure, Claims, Disability benefits, Health care, Pensions, Veterans, Vietnam.

Approved: March 18, 1996.

Jesse Brown,

Secretary of Veterans Affairs.

BILLING CODE 8320–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[PP 5F4509/R2221; FRL–5357–9]

Meat Meal and Red Pepper; Exemption From the Requirement of a Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes an exemption from the requirement of a tolerance for residues of the active ingredients meat meal and red pepper in or on all raw agricultural commodities when applied as animal repellants in accordance with good agricultural practices. This exemption was requested by Lakeshore Enterprises.

EFFECTIVE DATE: The regulation becomes effective on March 27, 1996.

ADDRESSES: Written objections and hearing requests, identified by the docket number, [PP 5F4509/R2221], may be submitted to: Hearing Clerk (1900), Environmental Protection Agency, Rm. M3708, 401 M St., SW., Washington, DC 20460. A copy of any objections and hearing requests filed with the Hearing Clerk should be identified by the docket number and submitted to: Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring a copy of objections and hearing requests to Rm. 1132, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202. Fees accompanying objections shall be labeled "Tolerance Petition Fees" and forwarded: EPA Headquarters Accounting Operations Branch, OPP (Tolerance Fees), P.O. Box 360277M, Pittsburgh, PA 15251. An electronic copy of objections and hearing requests filed with the Hearing Clerk may be submitted to OPP by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov

Copies of electronic objections and hearing requests must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Copies of electronic objections and hearing requests will also be accepted on disks in WordPerfect 5.1 file format or ASCII file format. All copies of electronic objections and hearing requests must be identified by the docket number [PP 5F4509/R2221] . No Confidential Business Information (CBI) should be submitted through e-mail. Copies of electronic objections and hearing requests on this rule may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found below in this document.

FOR FURTHER INFORMATION CONTACT: By mail: Julie Fry, Biopesticides and Pollution Prevention Division, Office of Pesticide Programs (7501W), U. S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: 5th Floor CS1, 2800 Crystal Drive, Arlington, VA 22202, Telephone 703–308–8673, e-mail: fry.julie@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of February 7, 1996, EPA issued a notice that Lakeshore Enterprises had submitted pesticide petition 5F4509 to EPA, proposing to amend 40 CFR part 180 by establishing a regulation pursuant to section 408 of the Federal Food, Drug and Cosmetic Act (FFDCA), 21 U.S.C. 346a(d) to exempt from the requirement of a tolerance the residues of the biochemicals meat meal and red pepper (synonyms include capsicum, cayenne pepper, chile pepper) in or on all raw agricultural commodities when applied as animal repellants in accordance with good agricultural practices. The Agency received one comment opposing tolerance levels proposed for the pesticides described primarily based on possible roles of pesticides in neurotoxicity. The commentor also supported the promotion of "safe/safer" alternatives to toxic chemicals. The Agency believes that the subject active ingredients, meat meal and red pepper, don't pose a risk including risk of neurotoxicity based on their extended use without any reported adverse effects. Furthermore, both meat meal and red pepper fall in the category of "safe/safer" pesticides, as supported by the response of the commentor.

Product Chemistry

Meat Meal

Meat meal is a sterilized, animal food by-product produced at livestock rendering plants from clean, fresh animal proteins. It is composed of greater than or equal to 85% crude protein, greater than or equal to 8% crude fiber, less than or equal to 3% fat, and less than or equal to water. This composition may vary from the batch-to-batch, depending on the by-products rendered (traces of hair, stomach belchings and urine might occur unavoidably in good manufacturing processes.) The moisture is removed from the crude product and the dried meat meal is sterilized at a temperature ranging from 210 °F to 250 °F for at least 1 1/2 hours. No chemicals are added to the meat meal. The resulting product is an unconsolidated fibrous powder.

Red Pepper

Red pepper is natural, processed vegetable matter that has been part of the human diet for many years. Red pepper is made by dehydrating fresh red chili pepper pods (*Capsicum spp.*), processing the dried pods through a mill and sifter, then blending the varieties of pepper powder into a final product. Known constituents of red pepper include capsaicin oil (0.1 - 1%), the source of red pepper's pungent effect and capsanthin, a carotenoid pigment.

Human Health Risk Assessment

EPA waived the data requirements for residue chemistry and toxicology data pursuant to 40 CFR 177.110(b) because it was unnecessary. As discussed below, EPA already has adequate information to determine that meat meal and red pepper do not pose a human health hazard without the waived data.

Meat Meal

Meat meal is available from livestock rendering plants nationwide; it is widely distributed in commerce and available to the general public. It is used as an animal food/feed supplement and as organic fertilizer. No significant adverse effects from exposure to meat meal have been reported. The expected uses of meat as an olfactory animal repellant will include meat meal packaged in bags and applied in powder form around the base of plants. Meat meal will not be applied directly to the plant. Negligible human exposure is anticipated.

Meat meal is composed mainly of sterilized animal proteins and fats. These natural components do not persist in the environment because they biodegrade rapidly. Furthermore, meat meal has been identified by EPA as a List 4A-Minimum Risk Inert. This list, published in the **Federal Register**, September 28, 1994 (59 FR 49400), identifies substances "considered to be of minimal risk in pesticide products to human health when used as inert ingredients." These substances are also exempt from the requirement of tolerance when used as an inert ingredient. EPA believes that the risk from the use of meat meal on food is comparable whether it is used as an active or as an inert ingredient.

Red Pepper

Lack of toxicity of red pepper is supported by its long history of use by humans as a food additive/component without any indication of deleterious effects. Red peppers are ubiquitous in the cooking of many African countries and most of India, Ceylon and S.E. Asia. (*Capsicum spp*). Pepper exports amount to 176,000 tons annually (Ref. 1) (Rehm, S. and G. Espig. 1991. The Cultivated Plants of the Tropics and Subtropics - Cultivation, Economic Value, Utilization. Verlag Josef Margraf Scientific Books. Berlin, Germany. Pages 279–280). Red pepper is listed by the Food and Drug Administration as Generally Regarded as Safe (GRAS) in 21 CFR part 182. Furthermore, red pepper, a common food additive/component, also falls within the scope of the policy announced in the **Federal Register**, September 28, 1994 (59 FR 49400) which states "... EPA is announcing that substances commonly consumed as food will also be considered minimal risk, List 4A, even if they have previously not been used in pesticide products and are therefore not currently on the list. Substances commonly consumed as foods will be considered acceptable for use in all pesticide products, both food and nonfood use, and will not require a specific exemption from tolerance." EPA believes the risk from the use of red pepper on food is comparable whether it is used as an active or as an inert ingredient.

Conclusion

Based on the low toxicity of meat meal, a sterilized food by-product and

red pepper, a common additive/component of the human diet, the Agency concludes that establishment of a tolerance is not necessary to protect the public health. Therefore, the exemption from tolerance is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the **Federal Register**, file written objections to the regulation and may also request a hearing on those objections.
Objections and hearing requests must be filed with the Hearing Clerk, at the address given above (40 CFR 178.20). A copy of the objections and/or hearing requests filed with the Hearing Clerk should be submitted to the OPP docket for this rulemaking. The objections submitted must specify the provisions of the regulation deemed objectionable and the grounds for the objections (40 CFR 178.25). Each objection must be accompanied by the fee prescribed by 40 CFR 180.33(i). If a hearing is requested, the objections must include a statement of the factual issue(s) on which a hearing is requested, the objections must include a statement of the factual issue(s) on which a hearing is requested, the requestor's contentions on such issues, and a summary of any evidence relied upon by the objector (40 CFR 178.27). A request for a hearing will be granted if the Administrator determines that the material submitted shows the following: There is a genuine and substantial issue of fact; there is reasonable possibility that available evidence identified by the requestor would, if established, resolve one or more of such issues in favor of the requestor, taking into account uncontested claims or facts to the contrary; and resolution of the factual issue(s) in the manner sought by the requestor would be adequate to justify the action requested (40 CFR 178.32).

EPA has established a record for this rulemaking under docket number [PP 5F4509/R2221] (including any comments and data submitted electronically). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The public record is located in Room 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Electronic comments may be sent directly to EPA at:

opp-docket@epamail.epa.gov.

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this rulemaking, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer any copies of objections and hearing requests received electronically into printed, paper form as they are received and will place the paper copies in the official rulemaking record which will also include all comments submitted directly in writing. The official rulemaking record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

References Cited

The following reference is cited in this tolerance rule:

(1) Rehm, S. and G. Espig. (1991). The Cultivated Plants of the Tropics and Subtropics - Cultivation, Economic Value, Utilization. Verlag Josef Margraf Scientific Books. Berlin, Germany. pp. 279-280.

Under Executive Order 12866 (58 FR 51735, October 4, 1993), the Agency must determine whether the regulatory action is "significant" and therefore subject to all the requirements of the Executive Order (i.e., Regulatory Impact Analysis, review by the Office of Management and Budget (OMB)). Under section 3(f), the order defines "significant" as those actions likely to lead to a rule (1) having an annual effect on the economy of $100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities (also known as "economically significant"); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlements, grants, user fees, or loan programs; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive Order.

Pursuant to the terms of this Executive Order, EPA has determined that this rule is not "significant" and is therefore not subject to OMB review.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

Pursuant to Title II of the Unfunded Mandates Reform Act of 1995, Pub. L. 104–4, EPA has determined that this regulation does not impose a Federal mandate upon State, local, or tribal governments or the private sector and does not contain any regulatory requirements that might significantly or uniquely affect small governments because the regulation does not impose any enforceable duties upon those entities.

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: March 18, 1996.

Daniel M. Barolo,

Director, Office of Pesticide Programs.

Therefore, 40 CFR part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. In subpart D, by adding § 180.1164, to read as follows:

§ 180.1164 Food and food by-products; exemption from the requirement of a tolerance.

(a) Meat meal, a sterilized food by-product, is exempt from the requirement of a tolerance on all raw agricultural commodities when used as an olfactory animal repellent.

(b) Red pepper (*Capsicum spp.*) is exempt from the requirement of a tolerance on all raw agricultural commodities when used as a gustatory animal repellent.

RIN 2070–AB78

Pesticide Tolerance for Benzoic Acid

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the insecticide benzoic acid (3,5-dimethyl-1-(1,1-dimethylethyl)-2-(4-ethylbenzoyl) hydrazide), in or on the raw agricultural commodity apples. The regulation to establish a maximum permissible level for residues of the insecticide was requested in a petition submitted by the Rohm and Haas Co.

EFFECTIVE DATE: This regulation becomes effective March 27, 1996.

ADDRESSES: Written objections and hearing requests, identified by the docket number, [PP 4E4375/R2219], may be submitted to: Hearing Clerk (1900), Environmental Protection Agency, Rm. M3708, 401 M St., SW., Washington, DC 20460. A copy of any objections and hearing requests filed with the Hearing Clerk should be identified by the docket number and submitted to: Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring copy of objections and hearing requests to Rm. 1132, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202. Fees accompanying objections shall be labeled "Tolerance Petition Fees" and forwarded to: EPA Headquarters Accounting Operations Branch, OPP (Tolerance Fees), P.O. Box 360277M, Pittsburgh, PA 15251. An electronic copy of objections and hearing requests filed with the Hearing Clerk may be submitted to OPP by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov.

Copies of electronic objections and hearing requests must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Copies of electronic objections and hearing requests will also be accepted on disks in WordPerfect 5.1 file format or ASCII file format. All copies of electronic objections and hearing requests must be identified by the docket number [PP 4E4375/R2219] . No Confidential Business Information (CBI) should be submitted through e-mail. Copies of electronic objections and hearing requests on this rule may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found below in this document.

FOR FURTHER INFORMATION CONTACT: By mail: Richard P. Keigwin, Jr., Product Manager (PM) 10, Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 210, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, 703–305–6788; e-mail: keigwin.rick@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: EPA issued a notice (FRL–4948–2), published in the **Federal Register** of April 5, 1995 (60 FR 17357), which announced that Rohm and Haas Co. had submitted pesticide petition (PP) 4E4375 to EPA requesting that the Administrator, pursuant to section 408(d) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(d), establish a tolerance for residues of the insecticide benzoic acid (3,5-dimethyl-1,1-(1,1-dimethylethyl)-2-(4-ethylbenzoyl)hydrazide), in or on the raw agricultural commodity apples at 1.0 parts per million (ppm). As of February 29, 1996 there are no U.S. registrations for apples.

The scientific data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of the tolerance include:

1. A 1–year dog feeding study with a lowest-observable-effect level(LOEL) of 250 ppm (8.7 mg/kg/day for male and 8.9 mg/kg/day for female dogs) based on growth retardation in the male and in both sexes decreases in RBC, HCT, and HGB, increases in Heinz bodies, methemoglobin, MCV, MCH, reticulites, platelets, plasma total bilirubin, spleen weight, and spleen/body weight ratio, and liver weight and liver/body weight ratio. Hematopoiesis and sinusoidal engorgement occurred in the spleen, and hyperplasia occurred in marrow of the femur and sternum. The liver showed an increased pigment in the Kupffer cells. The no-observable-effect level (NOEL) for systemic toxicity is 50 ppm (1.8mg/kg/day for males and 1.9 mg/kg/day for females).

2. An 18–mounth mouse carcinogenicity study with no carcinogenicity observed at dosage levels up to and including 1,000 ppm (males 155 mg/kg/day; females 186 mg/kg/day).

3. A 2–year rat carcinogenicity study with no carcinogenicity observed at dosage levels up to and including 2,000 ppm (97 mg/kg/day and 125 mg/kg/day for males and females, respectively).

4. A 2–generation rat reproduction study with a NOEL of 150 ppm (12.1 mg/kg/day) for reproductive effects compared to a systemic NOEL of 10 ppm (0.85 mg/kg/day).

5. A rat developmental study with a NOEL of 1,000 mg/kg/day for developmental toxicity and a NOEL of 250 mg/kg/day for maternal toxicity.

6. A rabbit developmental study with a NOEL of 1,000 mg/kg/day for developmental toxicity.

7. Several mutagenicity tests which were all negative. These include an Ames assay with and without metabolic activation, an *in vivo* cytogenetic assay in rat bone marrow cells, an *in vitro* chromosome aberration assay in CHO cells, a CHO/HGPRT assay, a reverse mutation assay with *E. coli*, and an unscheduled DNA synthesis assay (UDS) in rat hepatocytes.

The reference dose (RFD), for chronic toxicity as defined in a 1–year chronic dog study is 0.018 mg/kg/day based upon a NOEL of 1.8 mg/kg/day in male dogs and applying an uncertainty factor of 100. Granting this use of benzoic acid (3,5-dimethyl-1-(1,1-dimethylethyl)-2-(4-ethylbenzoyl)hydrazide) on apples raises the theoretical maximum residue contribution (TMRC) for the overall U.S. population from 0.000001 mg/kg/day to 0.000792 mg/kg/day and represents 4.4% of the RFD. The TMRC for the highest exposed subgroup, non-nursing infants is raised from 0.000001 mg/kg/day to 0.008051 mg/kg/day and represents 44.7% of the RFD for that subgroup.

The metabolism of benzoic acid, (3,5-dimethyl-1-(1,1-dimethylethyl)-2-(4-ethylbenzoyl)hyrazide), is adequately understood.

An adequate analytical method, HPLC separation with UV detection, is available for enforcement purposes.

There are presently no actions pending against the continued registration of this chemical.

Based on the information and data considered, the Agency has determined that the tolerance established by amending 40 CFR part 180 will protect the public health. The pesticide is considered useful for the purposes for which the tolerance is sought. Therefore, the tolerance is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the **Federal Register**, file written objections to the regulation and may also request a hearing on those objections.
Objections and hearing requests must be filed with the Hearing Clerk, at the

address given above (40 CFR 178.20). A copy of the objections and/or hearing requests filed with the Hearing Clerk should be submitted to the OPP docket for this rulemaking. The objections submitted must specify the provisions of the regulation deemed objectionable and the grounds for the objections (40 CFR 178.25). Each objection must be accompanied by the fee prescribed by 40 CFR 180.33(i). If a hearing is requested, the objections must include a statement of the factual issue(s) on which a hearing is requested, the requestor's contentions on such issues, and a summary of any evidence relied upon by the objector (40 CFR 178.27). A request for a hearing will be granted if the Administrator determines that the material submitted shows the following: There is genuine and substantial issue of fact; there is a reasonable possibility that available evidence identified by the requestor would, if established, resolve one or more of such issues in favor of the requestor, taking into account uncontested claims or facts to the contrary; and resolution of the factual issue(s) in the manner sought by the requestor would be adequate to justify the action requested (40 CFR 178.32).

A record has been established for this rulemaking under the docket number [PP 4E4375/R2219] (including any comments and data submitted electronically). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The public record is located in Room 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

The official record for this rulemaking, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer any copies of objections and hearing requests received electronically into printed, paper form as they are received and will place the paper copies in the official rulemaking record which will also include all comments submitted directly in writing. The official rulemaking record is the paper record maintained at the Virginia address in "ADDRESSES" at the beginning of this document.

Under Executive Order 12866 (58 FR 51735, October 4, 1993), the Agency must determine whether the regulatory action is "significant" and therefore subject to all the requirements of the Executive Order (i.e., Regulatory Impact Analysis, review by the Office of Management and Budget (OMB)). Under section 3(f), the order defines "significant" as those actions likely to lead to a rule (1) having an annual effect on the economy of $100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities (also known as "economically significant"); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlements, grants, user fees, or loan programs; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive Order.

Pursuant to the terms of this Executive Order, EPA has determined that this rule is not "significant" and is therefore not subject to OMB review.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: March 15, 1996.

Stephen L. Johnson,

Director, Registration Division, Office of Pesticide Programs.

Therefore, 40 CFR part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. In § 180.482, by adding alphabetically to the table, an entry for the raw agricultural commodity "apples", to read as follows:

§ 180.482 Benzoic acid; tolerances for residues.

* * * * *

Commodities	Parts per million
Apples	1.0

RIN 2070–AC78

Pesticide Tolerance for 2,4-D

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is extending the tolerance for residues of the herbicide 2,4-D (2,4-dichlorophenoxyacetic acid) in or on the raw agricultural commodity soybeans. The Agency has not completed the regulatory assessment of its science findings; therefore, the Agency is extending this tolerance for 3 years.

EFFECTIVE DATE: This extension is effective March 27, 1996. The tolerance expires on December 31, 1998.

ADDRESSES: Written objection and hearing requests, identified by the docket number, [PP 4E3060/R2218], may be submitted to: Hearing Clerk (1900), Environmental Protection Agency, Rm. M3708, 401 M St., SW., Washington, DC 20460. Fees accompanying objections shall be labeled "Tolerance Petition Fees" and forwarded to: EPA Headquarters Accounting Operations Branch, OPP (Tolerance Fees), P.O. Box 360277M, Pittsburgh, PA 15251. A copy of any objections and hearing request filed with the Hearing Clerk should be identified by the docket number and submitted to: Public Response and Program Resources Branch, Field Operations Division (7506C); Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring a copy of objections and hearing requests to: Rm. 1132, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202. A copy of objections and hearing requests filed with the Hearing Clerk may also be submitted electronically by sending electronic mail (e-mail) to: oppdocket@epamail.epa.gov.

Copies of objections and hearing requests must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Copies of objections and hearing requests will also be accepted on disks in WordPerfect 5.1 file format or ASCII file format. All copies of objections and hearing requests in electronic form must be identified by the docket number [PP 4E3060/R2218]. No Confidential Business Information (CBI) should be submitted through e-mail. Electronic copies of objections and hearing requests on this rule may be filed online at many Federal Depository Libraries. Additional information on electronic submission can be found below in this document.

FOR FURTHER INFORMATION CONTACT: By mail: Joanne Miller, Product Manager (PM 23), Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 237, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, 703–305–6224, e-mail address: miller.joanne@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of February 7, 1996 (61 FR 4623), EPA issued a proposed rule that gave notice pursuant to section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA) (21 U.S.C. 346a), the Agency proposed to extend until December 31, 1998, a tolerance for residues of the herbicide 2,4-D (2,4-dichlorophenoxyacetic acid) in or on the raw agricultural commodity (RAC) soybeans at 0.1 parts per million (ppm).

There were no comments or requests for referral to an advisory committee received in response to this proposed rule.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above (40 CFR 178.20). A copy of the objections and/or hearing requests filed with the Hearing Clerk should be submitted to the OPP docket for this rulemaking. The objections submitted must specify the provisions of the regulation deemed objectionable and the grounds for the objections (40 CFR 178.25). Each objection must be accompanied by the fee prescribed by 40 CFR 180.33(i). If a hearing is requested, the objections must include a statement of the factual issue(s) on which the hearing is requested, the requestor's contentions on each such issue, and a summary of any evidence relied upon by the objector (40 CFR 178.27). A request for a hearing will be granted if the Administrator determines that the material submitted shows the following: There is a genuine and substantial issue of fact; there is a reasonable possibility that available evidence identified by the requestor would, if established, resolve one or more issues in favor of the requestor, taking into account uncontested claims or facts to the contrary; and resolution of the factual issue(s) in the manner sought by the requestor would be adequate to justify the action requested (40 CFR 178.32).

A record has been established for this rulemaking under docket number [PP 4E3060/R2218] (including objections and hearing requests submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4.30 p.m., Monday through Friday, excluding legal holidays. The public record is located in Room 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, Va.

Written objections and hearing requests, identified by the docket number [PP 4E3060/R2218] may be submitted to the Hearing Clerk (1900), Environmental Protection Agency, Rm 3708, 401 M St. SW., Washington, DC 20460. A copy of electronic objections and hearing requests filed with the Hearing Clerk can be sent directly to EPA at:

opp-Docket@epamail.epa.gov

A copy of electronic objections and hearing requests filed with the Hearing Clerk must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this rulemaking, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer any objections and hearing requests received electronically into printed, paper form as they are received and will place the paper copies in the rulemaking record which will also include all objections and hearing requests submitted directly in writing. The official record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

Under Executive Order 12866 (58 FR 51735, October 4, 1993), the Agency must determine whether the regulatory action is "significant" and therefore subject to review by the Office of Management and Budget (OMB) and the requirements of the Executive Order. Under section 3(f), the order defines a "significant regulatory action" as an action that is likely to result in a rule (1) having an annual effect on the economy of $100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities (also referred to as "economically significant"); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement, grants, user fees, or loan programs or the rights and obligation of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive Order.

Pursuant to the terms of the Executive Order, EPA has determined that this rule is not "significant" and is therefore not subject to OMB review.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: March 13, 1996.

Stephen L. Johnson,

Director, Registration Division, Office of Pesticide Programs.

Therefore, 40 CFR part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. In § 180.142 by revising paragraph (k), to read as follows,

§ 180.142 2,4-D; tolerances for residues.

* * * * *

(k) A tolerance that expires on December 31, 1998, is established for

residues of the herbicide 2,4-D (2,4-dichlorophenoxyacetic acid) resulting from the preplant use of 2,4-D ester or amine in or on the raw agricultural commodity as follows:

Commodity	Parts per million
Soybeans	0.1

Medicare and Medicaid Programs; Requirements for Physician Incentive Plans in Prepaid Health Care Organizations

AGENCY: Health Care Financing Administration (HCFA), HHS. Office of Inspector General (OIG), HHS.

ACTION: Final rule with comment period.

SUMMARY: This final rule amends the regulations governing Federally-qualified health maintenance organizations and competitive medical plans contracting with the Medicare program, and certain health maintenance organizations and health insuring organizations contracting with the Medicaid program. It implements requirements in sections 4204(a) and 4731 of the Omnibus Budget Reconciliation Act of 1990 that concern physician incentive plans.

The provisions of this final rule will also have an effect on certain entities subject to the physician referral rules in section 1877 of the Social Security Act (the Act) as amended by the Omnibus Budget Reconciliation Act of 1993 (OBRA '93). Section 1877 provides that, if a physician (or an immediate family member of the physician) has a financial relationship with certain entities (that is, has an ownership or investment interest in the entity or a compensation arrangement with the entity), the physician may not make a referral to the entity for the furnishing of certain health services for which payment otherwise may be made under the Medicare program. Additionally, effective December 31, 1994, section 1903(s) of the Act provides for denial of Federal financial participation payment under the Medicaid program to a State for expenditures for certain health services furnished to an individual on the basis of a physician referral that would result in denial of payment under the Medicare program if Medicare covered the services in the same manner as they are covered under the State plan.

Among other amendments, section 13562 of OBRA '93 sets forth an exception to the physician referral prohibition that, in effect, incorporates the provisions of this final rule. That is, it provides that, under certain circumstances, compensation received under a personal services arrangement that meets the physician incentive plan requirements established by the Secretary does not trigger the ban on referrals. Thus, the provisions of this final rule have implications for entities that would not have been affected at the time we published the proposed rule (December 14, 1992). (The proposed rule applied to only prepaid health plans that contract with Medicare or Medicaid under section 1876 or 1903(m) of the Act, respectively.) OBRA '93 applies the requirements to any prepaid health care organization that bills Medicare or Medicaid. The additional organizations that may be affected include preferred provider organizations, health maintenance organizations that do not contract with Medicare or Medicaid and are not Federally qualified, prepaid health plans that contract with Medicaid, and some States that contract with managed care organizations under the Medicaid program (including those that operate under a section 1115 waiver).

DATES: *Effective dates.* These regulations are effective on April 26, 1996.

Comment dates. To be considered, comments must be mailed or delivered to the appropriate address, as provided below and must be received by 5 p.m. on May 28, 1996.

Compliance dates. Affected organizations with contracts or agreements on March 27, 1996 must comply with (1) the applicable disclosure requirements at § 417.479(h)(1)(i) through (h)(1)(v) or with § 434.70(a)(3) of this rule by May 28, 1996 or by the renewal date of the contract or agreement, whichever is later, and (2) the survey requirement at § 417.479(g)(1)(iv) and the disclosure requirement at § 417.479(h)(1)(vi) by March 27, 1997. Affected organizations must comply with all other requirements by May 28, 1996.

ADDRESSES: Mail written comments (1 original and 3 copies) to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: OMC–010–FC, P.O. Box 26688, Baltimore, MD 21207.

If you prefer, you may deliver your written comments (1 original and 3 copies) to one of the following addresses:

Room 309–G, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201, or

Room C5–09–26, 7500 Security Boulevard, Baltimore, MD 21244–1850.

Because of staffing and resource limitations, we cannot accept comments by facsimile (FAX) transmission. In commenting, please refer to file code OMC–010–FC. Comments received timely will be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, in Room 309–G of the Department's offices at 200 Independence Avenue SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (phone: (202) 690–7890).

FOR FURTHER INFORMATION CONTACT: Medicare: Tony Hausner, (410) 786–1093. Medicaid: Beth Sullivan, (410) 786–4596. Office of Inspector General: Joel Schaer, (202) 619–0089.

SUPPLEMENTARY INFORMATION:

I. Background

A. Introduction

Prepaid health care organizations, such as health maintenance organizations (HMOs), competitive medical plans (CMPs), and health insuring organizations (HIOs), are entities that provide enrollees with comprehensive, coordinated health care in a cost-efficient manner. The goal of prepaid health care delivery is to control health care costs through preventive care and case management and provide enrollees with affordable, coordinated, quality health care services. Titles XVIII and XIX of the Social Security Act (the Act) authorize contracts with prepaid health care organizations (hereinafter referred to as "organizations" or "prepaid plans") for the provision of covered health services to Medicare beneficiaries and Medicaid recipients, respectively. Such organizations may contract under either a risk-based or cost-reimbursed contract.

B. Medicare

Section 1876 of the Act authorizes the Secretary to enter into contracts with eligible organizations (HMOs that have been Federally qualified under section 1310(d) of the Public Health Service Act and CMPs that meet the requirements of section 1876(b)(2) of the Act) to provide Medicare-covered services to beneficiaries and specifies the requirements the organizations must meet. Section 1876 of the Act also provides for Medicare payment at predetermined rates to eligible organizations that have entered into risk-based contracts under Medicare or for Medicare payment of reasonable costs to eligible organizations that have entered into cost-reimbursed contracts under Medicare. Implementing Federal regulations for the organization and operation of Medicare prepaid health care organizations, contract requirements, and conditions for payment are located at 42 CFR 417.400 through 417.694.

Risk-based organizations are paid a prospectively-determined per capita monthly payment for each Medicare beneficiary enrolled in the organization. This capitated payment is the projected actuarial equivalence of 95 percent of what Medicare would have paid if the beneficiaries had received services from fee-for-service providers or suppliers. Organizations paid on a risk basis are liable for any difference between the Medicare prepaid amounts and the actual costs they incur in furnishing services, and they are therefore "at risk."

Cost-reimbursed organizations are paid monthly interim per capita payments that are based on a budget. Later, a retrospective cost settlement occurs to reflect the reasonable costs actually incurred by the organization for the covered services it furnished to its Medicare enrollees.

C. Medicaid

Section 1903(m) of the Act specifies requirements that must be met for States to receive Federal financial participation (FFP) for their contracts with organizations (HMOs or HIOs) to furnish, either directly or through arrangements, specific arrays of services on a risk basis. Federal implementing regulations for these contract requirements and conditions for payment are located at 42 CFR part 434.

States determine the per capita monthly rates that are to be paid to risk-based organizations. FFP is available for these payments at the matching rate applicable in the State as long as HCFA determines that: (1) The HMO or HIO rates are actuarially sound; (2) the rates do not exceed the cost of providing the same scope of services, to an actuarially equivalent nonenrolled population group, on a fee-for-service basis; and (3) the contract meets the additional requirements at 42 CFR part 434 ("Contracts") and 45 CFR part 74 ("Administration of Grants").

II. Legislative History

Section 9313(c) of the Omnibus Budget Reconciliation Act of 1986 (OBRA '86), Public Law 99–509, prohibited, effective April 1, 1989, hospitals and prepaid health care organizations with Medicare or Medicaid risk contracts from knowingly making incentive payments to a physician as an inducement to reduce or limit services to Medicare beneficiaries or Medicaid recipients. Under the OBRA '86 provisions, parties who knowingly made or accepted these payments would have been subject to specified civil money penalties. Additionally, the provisions required that the Secretary report on incentive arrangements in HMOs and CMPs. Section 4016 of the Omnibus Budget Reconciliation Act of 1987 (OBRA '87), Public Law 100–203, extended the original implementation date for the OBRA '86 physician incentive provisions to April 1, 1991. Subsequently, sections 4204(a) and 4731 of the Omnibus Budget Reconciliation Act of 1990 (OBRA '90), Public Law 101–508, repealed, effective November 5, 1990, the prohibition of physician incentive plans in prepaid health care organizations and enacted requirements, effective January 1, 1992, for regulating these plans.

Specifically, section 4204(a)(1) of OBRA '90 added paragraph (8) to section 1876(i) of the Act to specify that each Medicare contract with a prepaid health care organization must stipulate that the organization must meet the following requirements if it operates a physician incentive plan:

- That it not operate a physician incentive plan that directly or indirectly makes specific payments to a physician or physician group as an inducement to limit or reduce medically necessary services to a specific individual enrolled with the organization.
- That it disclose to us its physician incentive plan arrangements in detail that is sufficient to allow us to determine whether the arrangements comply with Departmental regulations.
- That, if a physician incentive plan places a physician or physician group at "substantial financial risk" (as defined by the Secretary) for services not provided directly, the prepaid health care organization: (1) Provide the physician or physician group with adequate and appropriate stop-loss protections (under standards determined by the Secretary) and (2) conduct surveys of currently and previously enrolled members to assess the degree of access to services and the satisfaction with the quality of services.

Section 4204(a)(2) of OBRA '90 amended section 1876(i)(6)(A)(vi) of the Act to add violations of the above requirements to the list of violations that could subject a prepaid health care organization to intermediate sanctions and civil money penalties.

Section 4731 of OBRA '90 enacted similar provisions for the Medicaid program by amending sections 1903(m)(2)(A) and 1903(m)(5)(A) of the Act.

As noted earlier (in the "Summary" section), subsequent to the December 1992 publication of the proposed rule, the Omnibus Budget Reconciliation Act of 1993 (OBRA '93), Public Law 103–66, was enacted. Section 13562 of OBRA '93 amended section 1877 of the Act, which prohibits physician referrals to entities with which the physician (or an immediate family member) has a financial relationship (which can consist of either (1) an ownership or investment interest or (2) a compensation arrangement). OBRA '93 provides an exception to the section 1877 physician referral prohibition that incorporates the physician incentive plan rules implemented in this final rule. Under this exception, compliance with these physician incentive rules is one of several conditions that must be satisfied if a personal services compensation arrangement involves compensation that varies based on the volume or value of referrals.

This exception affects managed care organizations that were not specified in the December 1992 proposed rule on physician incentive plans. The proposed rule applied to only prepaid plans that contract with Medicare or Medicaid under section 1876 or 1903(m) of the Act, respectively. The OBRA '93 physician referral provisions, however, apply to any entity with an incentive plan that bills Medicare or Medicaid. The additional organizations that may be affected include preferred provider organizations, HMOs that do not contract with Medicare or Medicaid and are not Federally qualified, and prepaid health plans" (PHPs) that contract with Medicaid. (PHPs are organizations that are exempt from section 1903(m) of the Act.) Some States that contract with managed care organizations under the Medicaid program (including those that operate under a section 1115 waiver)

may also be affected. We believe that most prepaid health care organizations will not be affected by these provisions since they apply only if (1) the physician incentive plan includes services not furnished by the physician group, and (2) there is a compensation arrangement between the physician group and the entity furnishing the services.

III. Opportunity for Public Comment

Because there may be entities that were not affected by the proposed rule at the time it was published but are now affected, we are publishing this rule as a final rule with a 60-day comment period so that these newly-affected entities have an opportunity to comment. Note also, we will incorporate the OBRA '93 amendments to section 1877 of the Act into a final rule with comment covering the physician referral prohibition as it relates to referrals for clinical laboratory services. We will also publish a proposed rule to interpret or clarify these OBRA '93 amendments as they relate to referrals for all of the health services designated in section 1877 of the Act, including clinical laboratory services. Once these rules are published, entities will have had several opportunities to comment on the interaction between the physician referral prohibition in section 1877 and the physician incentive rules.

We are also providing the 60-day comment period because we are interested in receiving comments on the changes from the proposed rule. For example, we are particularly interested in receiving comments on the thresholds we have set for determining substantial financial risk and for determining per-patient stop loss limits.

Because of the large number of items of correspondence we normally receive on a rule, we are not able to acknowledge or respond to them individually. We will, however, consider all comments that we receive by the date specified in the **DATES** section of this preamble and, if we publish a subsequent document, we will respond to the comments in that document.

IV. Discussion of Physician Incentive Plans

Effective utilization control that identifies both underutilization and overutilization is essential for the efficient operation of prepaid health care organizations. A prepaid health care organization needs to minimize overutilization of services not only to prevent unnecessary spending, but also to reduce the risk of unnecessary and intrusive procedures. Nonetheless, a prepaid health care organization also needs to ensure that all medically necessary services are furnished both to protect patient health and to avoid the need for more costly care later. Medicare and Medicaid require both cost-reimbursed and risk organizations to have internal quality assurance programs, external quality review or medical audits, and other mechanisms to ensure proper delivery of health care services. Medicare and Medicaid contracts also are subject to periodic monitoring for compliance. In addition, sections 1876(i)(6) and 1903(m)(5) of the Act provide for intermediate sanctions and civil money penalties that may be imposed if an HMO or CMP fails substantially to provide medically necessary services. (Regulations implementing this authority were published on July 15, 1994 (59 FR 36072).

One mechanism many prepaid health care organizations use to encourage proper utilization is a financial incentive as part of a physician incentive plan. OBRA '90 defines a physician incentive plan as any compensation arrangement between an eligible organization and a physician or physician group that may directly or indirectly have the effect of reducing or limiting services furnished with respect to individuals enrolled in the organization.

A review and analysis of physician incentive plans in a sample of HMOs was conducted and presented in the Department's 1990 report to the Congress, "Incentive Arrangements Offered by Health Maintenance Organizations and Competitive Medical Plans to Physicians." The results showed a wide variety of incentive plans. There were differences in the types of incentive payments, the distribution of incentives, the basis for determining the incentive payments, and the parties or entities the incentives affected.

Physicians in prepaid health care organizations generally receive fee-for-service payments, salary, or capitation payments (a set dollar amount per patient) for the services they furnish. Financial incentives may be used with the various types of physician payments to encourage appropriate levels of referral services. Referral services are any specialty, inpatient, outpatient, or laboratory services that a physician arranges for but does not provide directly. Prepaid health care organizations may hold physicians or physician groups at risk for all or a portion of the cost of referral services so that they have a financial incentive to arrange for the furnishing of only medically necessary services. If the physician or physician group successfully controls the levels of referral services, the physician or group may receive additional compensation (an incentive payment) from the prepaid health care organization. The incentive payment may take the form of unused capitation, a returned withhold, or a bonus payment. Each of these methods is described below.

A capitation payment is a set dollar amount per patient per month that a prepaid health care organization pays to a physician or a physician group to cover a specified set of services, without regard to the actual number of services furnished to each person. The capitation may cover the physician's own services, referral services, or all medical services and/or administrative costs. If patient costs exceed the capitation amount, the physician or physician group must absorb these additional costs. If costs are below the capitation, the physician or physician group may keep the additional money.

Withholds are percentages of payments or set dollar amounts that a prepaid health care organization deducts from each physician's or physician group's payment (salary, fees, or capitation). The amount withheld is set aside in pools to pay for specialty referral services and inpatient hospital services. If referral costs exceed a prepaid health care organization's budget, part or all of the withhold may be forfeited depending on the terms of the physician's contract. If referral costs do not exceed the ceiling, part or all of the withhold may be returned to a physician or a physician group. Some plans limit the amount of the risk to the withhold; others hold the physician or physician group liable for amounts beyond the amount withheld.

Bonuses are payments prepaid health care organizations make to a physician or a physician group beyond the physician's set salary, fee-for-service payments, or capitation. Bonuses may be based on a physician's or physician group's level of referral services or may be based on the overall performance of the organization.

If the physician or physician group has excessive referrals (as defined by the prepaid health care organization), it may not receive any incentive funds. In addition, the prepaid health care organization may hold the physician or physician group liable for referral costs that exceed a specified threshold. The prepaid health care organization may also increase the physician's or physician group's withhold or make other changes in its incentive arrangements.

Many physician incentive plans incorporate stop-loss protection to limit the liability of the physician or physician group. Most often, the stop-loss protection limits a physician's maximum liability per patient to a specific dollar amount.

Other variables may affect the amount of risk or the effect of financial incentives on physicians; for example, whether incentive payments are calculated according to each individual physician's performance or according to a physician group's performance; the size of the physician group; the length of time over which performance is evaluated; the number of enrollees; and the amount of total income at risk. In addition, the relative health status of the patients involved affects the level of risk. If because of their health status the patients served require more services than the average enrollee, the risk increases. Conversely, if they are healthier than the average enrollee, the risk may be lower.

V. Provisions of the Proposed Regulations

On December 14, 1992, we published a proposed rule (57 FR 59024) that set forth our proposal for implementing the requirements of sections 1876(i) and 1903(m) of the Act as amended, respectively, by sections 4204(a) and 4731 of OBRA '90. Sections 1876(i)(8) and 1903(m)(2)(A)(x) of the Act require that physician incentive plans be regulated, and sections 1876(i)(6)(A) and 1903(m)(5)(A) provide penalties for violation of the regulation. To implement these provisions for Medicare, we proposed to impose new contract requirements pertaining to physician incentive plans. For Medicaid, we proposed new requirements for the granting of FFP for State Medicaid agency contracts with HMOs and HIOs. The requirements address—

- The scope of the regulation;
- Disclosure requirements;
- Criteria for the determination of substantial financial risk;
- Requirements for physician incentive plans that place physicians at substantial financial risk;
- Prohibition on certain physician payments; and
- Enforcement.

Each proposed requirement is summarized individually below. Readers who desire more specifics are referred to the proposed rule.

A. Scope

Because sections 4204(a)(2) and 4731 of OBRA '90 amended sections that govern Medicare and Medicaid contracts, but did not amend title XIII of the Public Health Service Act, which governs all Federally-qualified HMOs, we proposed to apply these requirements to only physician incentive plans that base incentive payments (in whole or in part) on services provided to Medicare beneficiaries or Medicaid recipients. Nonetheless, because relevant statutory language uses the term "individuals enrolled with the organization," which could be interpreted as all of an organization's enrollees, not just Medicare or Medicaid enrollees, we specifically sought comments regarding the proposed scope of the regulations.

B. Disclosure

We proposed that an HMO, CMP, or HIO disclose to HCFA (for Medicare) or to the State Medicaid agency (for Medicaid) information on physician incentive plans that affect Medicare beneficiaries or Medicaid recipients that is sufficient for us or the States to determine whether the organization is in compliance with our requirements. We also proposed when submittal of the information would be required.

C. Substantial Financial Risk

We proposed that a physician or physician group is considered to be at substantial financial risk if more than a specified percentage (the risk threshold) of the prepaid health care organization's total potential payments to the physician or physician group is at risk and the risk is based on the costs of services the physician or physician group does not provide (for example, referrals to specialists or the cost of inpatient care).

For purposes of determining substantial financial risk, we proposed to define payments as any amounts the organization pays physicians or physician groups for services they provide, plus amounts paid for administration and controlling levels or costs of referral services. We proposed that payments do not include bonuses or other forms of compensation that are not based on referral levels (such as bonuses based solely on the quality of care provided, patient satisfaction, and participation on committees).

Under our proposal, the risk threshold that determines substantial financial risk would depend on the frequency with which the health plan assesses or distributes incentive payments. We proposed that, for prepaid health care organizations that assess or distribute incentive payments no more often than annually, the risk threshold is 25 percent. The risk threshold we proposed for prepaid health care organizations that assess or distribute incentive payments more often than annually was 15 percent.

Often, prepaid health care organizations use more than one type of compensation arrangement. If more than one type of arrangement is used, we proposed to consider all the different risk arrangements placed on physicians or physician groups to determine whether they collectively exceeded either of the thresholds.

D. Requirements for Physician Incentive Plans That Place Physicians at Substantial Financial Risk

1. Enrollee Surveys

We proposed that HMOs, CMPs, and HIOs that place their physicians or physician groups at substantial financial risk must conduct enrollee surveys at least annually. We proposed that the surveys must—

- Either survey all current Medicare/Medicaid enrollees in the organization and those who have disenrolled (due to other than loss of eligibility in Medicaid) in the past 12 months, or survey a statistically valid sample of these same enrollees and disenrollees;
- Be designed, conducted, and results analyzed in accordance with commonly accepted principles of survey design and statistical analysis; and
- Address enrollees'/disenrollees' satisfaction with the quality of the services furnished and their degree of access to the services.

2. Stop-loss Protection

We proposed two levels of stop-loss protection depending on the incentive plan's risk threshold. If the risk threshold is 25 percent, the stop-loss protection must protect physicians and physician groups from losses greater than 30 percent of the payments for services they furnish, plus payments for administrative costs and controlling levels of referral services. If the risk threshold is 15 percent, the stop-loss protection must protect physicians and physician groups from losses greater than 20 percent of payments.

We proposed that the organization may provide the stop-loss protection directly or purchase it, or the physician or physician group may purchase it.

E. Prohibited Physician Payments

We proposed language reflecting section 1876(i)(8)(A)(i) of the Act, which provides that physician incentive plans may operate only if no specific payment is made directly or indirectly under the plan as an inducement to reduce or limit medically necessary services furnished to a specific enrollee. We

proposed that indirect payments include offerings of monetary value (such as stock options or waivers of debt) measured in the present or future.

F. Enforcement

We proposed that noncompliance with the proposed requirements discussed above could result in civil money penalties, intermediate sanctions, and/or contract termination (for Medicare) or withholding of FFP (for Medicaid). The civil money penalties would be limited to $25,000 for each determination of noncompliance. Under the intermediate sanctions provision, HCFA could (for Medicare) suspend the enrollment of individuals into noncompliant plans and HCFA (for Medicare) or the State (for Medicaid) could suspend payment for new enrollees until it is satisfied that the basis for the determination is not likely to recur. The process for applying civil money penalties and intermediate sanctions would be the same process as that proposed in the July 22, 1991, proposed rule on civil money penalties and intermediate sanctions (56 FR 33404).

VI. Analysis of and Responses to Public Comments

We received 41 timely comments on the December 1992 proposed rule. (Comments related to the provisions that were proposed in the July 1991 proposed rule on civil money penalties and intermediate sanctions and that were merely republished in the December 1992 proposed rule were not considered timely.) Commenters included prepaid plans, State agencies, national and local associations of managed care providers, physician associations, consumer advocacy groups, and an insurance industry trade association. This section of the preamble contains a summary of the comments and our responses.

Note: This final rule changes the CFR designation of a number of the proposed provisions. To aid the reader, we have provided in section VI. of this preamble, a crosswalk between the proposed provisions and the provisions of this final rule.

Scope of Regulation

Comment: Many commenters agreed with our position that the proposed rule should apply to only Medicare and Medicaid risk contracts. In contrast, one commenter believed protection should be extended to plans governed by title XIII of the Public Health Service Act but conceded that the scope of the authorizing legislation is not clear on this point. This commenter recommended that we seek congressional clarification of the intent of the statute.

Response: As indicated in the preamble to the proposed regulation (hereinafter referred to as the "proposed preamble"), the original legislation amended only titles XVIII and XIX of the Act. Subsequent legislation, however, applies to all physicians that furnish services under the Medicare or Medicaid program.

Comment: One commenter suggested that we apply the proposed requirements only if there is a greater risk for Medicare and Medicaid contracts than for commercial contracts.

Response: The legislation requires us to develop these regulations for Medicare and Medicaid prepaid plans but not for commercial plans. It does not provide us with flexibility to make this determination. Thus, we will examine only incentive plans between a prepaid plan and a physician or physician group that apply to Medicare and Medicaid enrollees. We will not examine the incentive plans as they relate to commercial enrollees, even if the commercial enrollees are in addition to Medicare and Medicaid enrollees. The only exception to this is if the plan uses the pooling methods described later in this preamble.

Comment: One commenter suggested that the Department of Health and Human Services should evaluate the feasibility of applying these regulations to accountable health plans or other health care delivery systems that may be created under health care reform.

Response: This suggestion does not fall within the scope of this rulemaking, which implements enacted legislation in regulations.

Comment: Some commenters stated that there are no published studies that link quality problems to physician incentive plans. They suggest, therefore, that the regulation be dropped. In addition, some commenters suggested that we are only responding to pressures from press reports. Furthermore, some commenters believed this rule would not improve quality of care and that it would only add to the cost of care.

One commenter believed that the proposed rule is too restrictive. The commenter stated that it would make far more sense to monitor the health outcomes of enrollees to ensure that they are receiving quality health care services than to micromanage the administrative arrangements within these health organizations.

Response: We reject these recommendations for the following reasons:

- OBRA '90 requires us to issue these regulations.
- While we acknowledged in the proposed preamble that no link between quality problems and incentive plans has been established, the issue has not been sufficiently examined. In the report to the Congress entitled "Incentive Arrangements Offered by Health Maintenance Organizations and Competitive Medical Plans to Physicians" (hereinafter referred to as the "Report"), no study is cited that directly tests the link. Instead the Report cites studies that show no differences in quality between prepaid plans and fee-for-service arrangements. From this evidence, the Report infers that incentive plans do not affect quality. It should be noted that studies to date have used limited outcome measures.

Furthermore, the OBRA '90 provisions that require these regulations were enacted after the submission of the Report, confirming legislative intent subsequent to the Report.

- HCFA is sponsoring quality assurance reform initiatives in both Medicare and Medicaid that will begin to develop outcome measures for HMOs. HCFA's first efforts contain some outcome measures. Future projects will develop even more of these measures. The state of the art in outcome measures is still in the early stages and, thus, at this time, they cannot serve as a reliable measure of potential underutilization.

While there is no guarantee that these requirements will result in improvements in the quality of care, the Congress was concerned with ensuring that underuse of necessary services does not occur. We are all concerned with ensuring adequate protection of beneficiaries and recipients so that they have access to all necessary and appropriate care. As indicated in both the proposed preamble and later in this document, we anticipate most prepaid plans will not incur significant additional costs because most of them already meet the requirements that are specified in this regulation.

Comment: A major organization suggested that we examine incentive plans only if quality problems are detected.

Response: We rejected this recommendation for the following reasons:

- The legislation does not provide for an exception if there is an absence of quality problems.
- As indicated in the Report, there are limitations in the quality studies and methodologies used to detect quality problems.

Prohibited Arrangements

Comment: One commenter recommended that we revise proposed

§ 417.479(c) ("Prohibited physician payments") to clarify that medically necessary services means medically necessary *covered* services.

Response: In this final rule, we have revised proposed § 417.479(c) (now designated as § 417.479(d)) to include all medically necessary services covered by the prepaid plan contract. We have included all services covered in the contract since some plans contain services in their Medicare and Medicaid contracts that are in addition to those covered under the regular Medicare or Medicaid program. Furthermore, as established under title XIX of the Act, if a plan contracts to provide early and periodic screening and diagnosis and treatment services, the plan is responsible for any medically necessary Medicaid covered services, regardless of whether these services are covered under the State plan.

Disclosure

Comment: Several commenters, including major organizations, requested that we require disclosure of the incentive plans to all enrollees at the time of enrollment. They believed that disclosure is necessary to protect patients and physicians.

In contrast, several commenters, also including major organizations, stated that incentive plans are proprietary information and, as such, should be exempt from disclosure under the Freedom of Information Act (FOIA).

Response: We agree that disclosure of the incentive plans to patients can aid them in ensuring that they receive needed services. This information in the hands of Medicare beneficiaries and Medicaid recipients will also help physicians to counter pressure from the prepaid plans to reduce services. At the same time, we want to protect the proprietary aspects of the information. To effectively balance these conflicting goals, this final rule adds new §§ 417.479(h)(3) and 434.70(a)(4) to require that prepaid plans provide a summary of three items of information to Medicare beneficiaries and Medicaid recipients, respectively, when they request it. The three items are identified in the next response. As the prepaid plans' experience with physician incentive plans and disclosure increases, we encourage them to voluntarily share summaries of the incentive plans with all enrollees. We have not asked that more information be provided for the following reasons:

- We do not want to put an undue burden on the prepaid plans.
- We do not require fee-for-service physicians to provide a notice that they have incentives to provide excessive services.
- Certain information in the incentive plans is proprietary information and is exempt from disclosure under the FOIA.

Comment: One commenter recommends we clarify what constitutes "sufficient information" for disclosure purposes.

Response: This final rule revises proposed §§ 417.479(h) and 434.70(a) to provide for two types of disclosure. Disclosure to HCFA and the States requires that prepaid plans submit information that describes (1) whether services not furnished by the physician or physician group are covered by the incentive arrangement (if only the services furnished by the physician or physician group are covered by the incentive plan, there is no need for disclosure of other aspects of the plan); (2) the type of incentive arrangement, for example, withhold, bonus, capitation; (3) the percent of the withhold or bonus, if any; (4) the amount and type of stop-loss protection; (5) the panel size and, if enrollees are pooled according to the principles discussed later, the method of pooling used; (6) in the case of capitated physicians or physician groups, capitation payments paid to primary care physicians for the most recent year broken down by percent for primary care services, referral services to specialists, hospital services, and other types of provider (for example, nursing homes and home health agencies) services; and (7) in the case of those prepaid plans that are required to conduct beneficiary surveys, the survey results. We are requesting the information described in item 6 so that we can determine whether additional standards are necessary in the future.

Disclosure to Medicare beneficiaries and Medicaid recipients requires that only a summary of the above information be made available if requested by the beneficiary. This information will indicate, 1) whether the prepaid plan uses a physician incentive plan that affects the use of referral services, 2) the type of incentive arrangement, 3) and whether stop-loss protection is provided. In addition, those prepaid plans that must conduct enrollee surveys must provide a summary of the survey results to those beneficiaries and recipients who request it.

Comment: One commenter stated that disclosure should not be needed *each* time there is any change in the incentive plan. A second commenter stated that we should require disclosure only initially and when changes occur relative to rules.

Response: We agree with these recommendations. Therefore, we have revised proposed § 417.479(h)(3) and proposed § 434.70(a)(2)(ii) to specify that an organization must provide information concerning any of the following changes in its incentive plan: A change as to the type of incentive plan; a change in the amounts of risk or stop-loss protection; or expansion of the risk formula to cover services not provided by the physician group which the formula had not included previously. We also specify that this information must be provided to HCFA at least 45 days (rather than the proposed 30 days) before the change takes effect. This latter change is made to make this rule consistent with existing § 417.428, which requires that HMOs and CMPs submit to HCFA all marketing information 45 days in advance of distribution. (Proposed § 417.479(h)(3) is now § 417.479(h)(2)(C)(ii).)

Comment: One commenter recommended that the due date for submission of the required information by organizations that have a contract with us be extended from 30 days after publication of the final rule to 60 days after publication. The commenter stated that 30 days is not sufficient for organizations to become aware of the rule, study its details, analyze their incentive plans, and formulate disclosures that meet the rule's requirements.

One commenter believed there should be a phase-in period for organizations to comply with the regulations. The commenter suggested that the phase-in period be the remainder of the term of the organization's existing provider contract.

Response: We agree that organizations should be given more than 30 days to comply with the provisions of this rule. Since 60 days for compliance is a standard time period used in many of our regulations, particularly in the Medicaid program, we have extended the time period in which organizations must comply with this rule to at least 60 days from the date of publication. Further, we now require that organizations with existing contracts with us comply with most of the disclosure requirements by the date of the contract renewal or at least 60 days from the date of publication of this final rule, whichever is later. We now require compliance with the disclosure requirement related to capitation data within 1 year from the date of publication of this rule. (See **DATES** section of this rule.)

Comment: One commenter believed that subcontracting poses an

impediment to an HMO's ability to comply with the disclosure requirement. The commenter stated that subcontracting will result in numerous contracts being subject to disclosure, particularly in the case of larger HMOs. This commenter also pointed out that the proposed rule does not address the extent to which subcontractors will be compelled to disclose information concerning incentive arrangements. The commenter stated that HMOs need to know the extent of the disclosure obligation of the HMO where subcontracting has resulted in incentive arrangements currently unknown to the HMO.

This same commenter believed that our estimate of 4 hours per organization to meet disclosure requirements is a serious underestimation given the complexity of current industry contracting practices. The commenter did not offer an alternate estimate.

Response: Under this final rule, if the prepaid plan contracts with a physician group that puts its individual physician members at substantial financial risk for services not provided, the prepaid plan must disclose to us (or in the case of Medicaid, to the State agency) any physician incentive plans between the physician group and its individual physicians that base compensation on the use or cost of services furnished to beneficiaries or recipients.

Additionally, if a prepaid plan contracts with an "intermediate entity" that, in turn, subcontracts with individual physicians or a physician group, the prepaid plan, under all circumstances, must disclose to us (or the State agency) any physician incentive plans between the intermediate entity and the individual physician or physician group that base compensation on the use or cost of services furnished to beneficiaries. This information is necessary to ensure that physicians are not placed at substantial financial risk for services not provided.

For purposes of this requirement, we define intermediate entities as organizations or individuals who contract with the prepaid plan and, in turn, subcontract with one or more physician groups. Thus, for example, an individual practice association (IPA) is an intermediate entity if it subcontracts with one or more physician groups. (It is simply a physician group when it is composed of a set of individual physicians and has no subcontracts with physician groups.) A physician hospital organization is also an example of an intermediate entity.

The information to be disclosed for each of the situations described above includes the following:

- Whether services not furnished by the physician or physician group are covered by the incentive plan. If only the services furnished by the physician or physician group are covered by the incentive plan, disclosure of other aspects of the plan need not be made.
- The type of incentive arrangement; for example, withhold, bonus, capitation.
- If the incentive plan involves a withhold or bonus, the percent of the withhold or bonus.
- The amount and type of stop-loss protection.
- The panel size and, if patients are pooled according to one of the permitted methods, which method is used.
- In the case of capitated physicians or physician group, capitation payments paid to primary care physicians for the most recent year broken down by percent for primary care services, referral services to specialists, and hospital and other types of provider services.
- In the case of those prepaid plans that are required to conduct beneficiary surveys, the survey results.

In subcontracting relations, if, under any circumstances, a physician group and/or individual physicians are put at substantial financial risk, the prepaid plan must conduct the beneficiary survey required by this rule and provide adequate stop-loss protection to the physician group and/or individual physicians. We have taken this position because recent investigations by HCFA of HMOs in a number of States has led us to conclude that, in subcontracting situations, some physicians have been put at substantial financial risk without adequate examination of the effect this has on the quality of care furnished to the enrollees.

We have set forth the above requirements in this final rule by adding a new paragraph (i) to § 417.479 (for Medicare) and revising proposed § 434.70(a) (for Medicaid). We have also revised the proposed definition of "physician group" at § 417.479(b) to clarify that an IPA is a physician group only if it is composed of individual physicians and has no subcontracts with physician groups.

We believe these additional requirements will increase the burden on prepaid health plans by an additional 4 hours, resulting in a total of 8 hours per organization to meet the disclosure requirements. The organization can either submit copies of its incentive plans or submit information that addresses the required items listed in § 417.479(h)(1).

We would welcome comments on our estimate of the burden imposed by the above requirements. We are particularly interested in receiving empirical data supporting any estimates the commenter may offer.

Comment: One commenter believed the disclosure requirements are excessively burdensome. This commenter noted that, as stated in the preamble of the proposed rule, the justification for these disclosure requirements is that, if the information is only disclosed during site visits, an organization could change its physician incentive plan shortly after the site visit, and we would not know of the new arrangement for 2 years. The commenter pointed out that there are many items of information that we review at site visits that could be changed shortly thereafter without our knowledge; for example, HMO marketing material, provider contracts, and quality assurance plans. The commenter pointed out that these are reviewed during site visits and not re-reviewed during the 2-year cycle. The commenter stated that the proposed rule offered no explanation for different treatment for incentive plans, and, therefore, the requirements are not based on an acceptable justification.

Response: Section 1876(i)(8)(A)(iii) of the Act requires that we obtain sufficient information to determine if substantial financial risk occurs, adequate stop-loss protection is provided, etc. As indicated in an earlier response, we have limited the amount of information prepaid plans are required to submit to HCFA and the States to information on just a few key items. As prescribed by legislation, marketing materials are submitted to us every year. Further, as a change from the proposed rule, we are requiring that we be notified of only significant changes in the incentive plan, rather than each change, thereby reducing the burden of this requirement.

Comment: One commenter suggested that HCFA use a simple disclosure form that can quickly be completed by HMO personnel and reviewed promptly by HCFA.

Response: HCFA will consider the feasibility of a form and, if it decides to adopt the recommendation, in accordance with the Paperwork Reduction Act of 1995, will publish a document in the **Federal Register** soliciting public comments on a proposed form.

Comment: One commenter recommended that disclosure not be required if the HMO essentially admits substantial financial risk by agreeing to comply with enrollee survey and stop-loss requirements.

Response: The statute requires that organizations disclose their incentive plan arrangements.

Comment: One commenter asked what timeframes an organization may anticipate for HCFA's review of its incentive arrangements.

Response: Timeframes for the review of incentive plans will be addressed in a forthcoming manual issuance. At this time, we anticipate that the average review time will be 60 days.

Implementation

Comment: One commenter recommended that the final rules provide an explicit mechanism for dealing with disputes arising from and during the determination of whether physicians are at substantial financial risk.

Response: We agree with the commenter that there should be procedures for these disputes. Details on the dispute procedures will be addressed in a forthcoming manual issuance.

Referral service

Comment: We proposed to define "referral services" as any specialty, inpatient, outpatient, or laboratory services that a physician or physician group orders or arranges, but does not provide directly. One commenter believed that this definition is ambiguous. The commenter questioned whether we intended to distinguish between the services provided by the prepaid plan's physician employees and services provided by independent contract physicians. The commenter believed that absent knowing our position on this issue, the terms "provide directly" in the definition is ambiguous. The commenter believed we should clarify that services provided by specialist physicians through a contract with the physician group would not constitute referral services. In addition, the commenter believed that "referral services" should be limited to services that a physician is not licensed to provide, such as hospital services.

Response: We disagree that the definition is ambiguous. We believe the problem the commenter had with this definition is related to the understanding of another term used in the definition, that is, the meaning of "physician group." We assume that what the commenter is really asking is "If a physician group contracts for services of a specialist, is the contract physician considered a member of the physician group?" We see this as the real issue because, if the contract physician is a member of the physician group, then services furnished by that physician would be services furnished directly by the group. Thus, the services would not be referral services.

We proposed to define "physician group" as a partnership, association, corporation, individual practice association, or other group that distributes income from the practice among members according to a prearranged plan unrelated to the members' referral levels. (For reasons that will be discussed later in this preamble, this final rule adopts a revised version of that definition. That is, we have deleted from the definition the phrase "according to a prearranged plan unrelated to the members' referral levels". We also no longer include an individual practice association in the definition.) According to this definition, a contract physician is not a member of the physician group.

We disagree with the comment that referral services should be limited to services that a physician is not licensed to provide. The legislation requires the Secretary to determine if the plan places the physicians at substantial financial risk for services not provided by the physician group. Thus, referrals to specialists who are not part of the group practice are considered referral services in the determinations of risk. It is these services that the legislation intended to address. Prepaid plans generally use primary care physicians as gatekeepers. These models encourage the primary care physician gatekeeper to not use specialist services if he or she can perform the services. We support these models. The legislation, however, is designed to prevent restrictions on necessary specialist care.

Substantial Financial Risk

Comment: Several commenters believed the definition of "substantial financial risk" is overly restrictive. They believed it fails to fulfill the goal of only identifying outliers because it fails to address the variables that affect risk. One commenter suggested that it be redrafted or, if HCFA is unwilling to redraft the definition, that organizations be given the choice of either complying with the regulation as written or demonstrating to HCFA that their incentive plan does not put physicians at substantial financial risk.

A number of commenters recommended, more specifically, that HCFA include the size of patient and physician pools (panels) in the risk formula threshold as, in their view, required by the legislation. On the other hand, one commenter stated that attempting to incorporate patient panel size as a risk factor would prove unduly complex and less workable than the approach contained in the proposed rule.

Response: We have reconsidered this issue and, in this final rule, we take panel size into account in determining adequate stop-loss requirements (See § 417.479(g)(2)(ii).) Analyses by Rossiter and Adamache (1990) (Health Care Financing Review, vol. 12, pp. 19–30) show that there is no significant variation in costs from year to year for counties with populations greater than 25,000. Based on these analyses, we have determined that physician groups with more than 25,000 patients are able to adequately spread risk and, therefore, are not at substantial financial risk, even if 100 percent of the physician group's income is at risk for referral services. This does not apply to panels of more than 25,000 patients as a result of pooling. (See § 417.479(f).) Pooling of patients is discussed later in this preamble.

As stated, our decision to set the threshold at 25,000 was based on the analyses done by Rossiter and Adamache. We would welcome information as to whether there are data that would support another threshold.

With regard to the suggestion that we allow organizations the choice of either complying with the regulation as written or demonstrating that their incentive plan does not put physicians at substantial financial risk, we would be interested in receiving comments on how we might implement such an exception process.

The remainder of this response applies to panels of less than 25,000 patients. As stated in the proposed preamble, the size of the patient or physician pool can have several theoretical effects on substantial financial risk. Furthermore, there is no empirical evidence that could guide us on the effects of these and other factors. We requested information in this regard in the proposed preamble. Nonetheless, while commenters suggested that size is a factor, none of the commenters provided information on the exact relationship between size and risk. Therefore, we have no basis for specifying this relationship. Finally, the legislation discusses panel size only in regard to stop-loss protection and not in regard to substantial financial risk.

Comment: One major organization stated that, under the proposed rule, prepaid plans that assess and/or distribute incentive payments more often than annually are subject to lower risk thresholds. It maintains that there are problems with this requirement as follows:

First, it contends that the term "assess" as used in this regard is not

clear. It might, the organization suggests, be interpreted to bar plans from communication with physicians as to their progress in meeting annual goals. The organization stated that it disagrees with any interpretation of this requirement that might prevent plans that distribute incentive payments annually from working with their physicians on their mutual cost containment goals on a more frequent basis.

Second, the proposed regulation does not achieve its goal of using an outlier approach in this area. Many organizations that use withhold and distribute, or assess, incentive payments more often than once a year exceed the 15 percent risk threshold. These organizations, however, fall within the 25 percent threshold set for plans distributing or assessing payments annually or less often.

Another commenter stated that the frequency of the assessment or distribution should not affect the level or risk necessary to qualify as substantial financial risk.

Response: The term "assess" is meant to refer to imposing a charge. It is not used in the meaning of an evaluation or appraisal of progress toward a goal.

We agree that a 15 percent threshold is not an outlier, since the median withhold is between 10 and 20 percent. Also, there is no evidence that making assessments or distributions more often than annually affects the amount of risk placed on physicians. While our rationale in the proposed rule was based upon reasonable assumptions as to the impact of more frequent assessments or distributions, we now agree that the 15 percent threshold is inconsistent with our intent to use an outlier approach. Therefore, we have eliminated making a distinction on the basis of the frequency of the assessment or distribution. We establish the 25 percent threshold in all cases. The 25 percent threshold is an outlier since it exceeds the median withhold of 10 to 20 percent. Proposed § 417.479 has been revised to reflect the elimination of the distinction.

Comment: One commenter stated that the proposed threshold for combination of withholds and bonuses does not identify only outliers. The commenter also stated that, in practice, physician performance will be either in the bonus area *or* in the withhold area; therefore, to limit the amount of financial risk that a physician will ultimately accept, it is not necessary to limit the combination. The commenter also pointed out that there is no evidence that upward variations on physician payments (bonuses) have the same potential to cause underutilization as downward variations (withholds).

Response: If organizations do not use a combination of withholds and bonuses, there is no problem with setting the same limit for the combinations as for withholds and bonuses individually. Since it is possible for plans to use combinations of withholds and bonuses, it is necessary to set a limit on the combination. As indicated in the proposed preamble, to avoid putting physicians at substantial financial risk, we determined it necessary to use the same threshold for the combination.

With regard to the last comment, we are not aware of any data on the effect of bonuses as opposed to withholds on physician behavior. We would, therefore, appreciate receiving any information in this regard.

Comment: Several commenters recommended that we lower the threshold.

Response: The proposed preamble had an extensive discussion of this issue. As we stated, because of the limited information available on this issue, the only logical approach is to use an outlier formula. Given this decision, the threshold of 25 percent that we proposed is consistent with the data that showed that the median withhold was between 10 to 20 percent. It is also consistent with the concept of substantial financial risk, which implies a greater than average risk. As indicated, the threshold is based on withhold data. Averaging in the organizations with capitation arrangements, which are the majority of organizations, and treating them as equal to 100 percent withhold would raise the threshold rather than lower it. We decided not to raise the threshold because that would not make a difference to the capitation arrangements. This would be so because, if capitation were considered equal to 100 percent withhold, all plans using capitation would be placing their physicians at substantial financial risk (unless the threshold were set at 100 percent). Furthermore, as indicated in the proposed preamble, the 25 percent withhold figure is within the range of discounts that physician groups frequently provide to various insurers. Physicians also lose similar amounts to bad debts.

Comment: One commenter suggested that we include the risk arrangements between the physician groups and their individual physicians, because the prepaid plan may use this strategy to circumvent the process. The commenter maintained that the statute does not specifically exclude these arrangements from scrutiny. The commenter pointed out that the statute defines an incentive plan as "any compensation arrangement between an eligible organization and a physician that may directly *or indirectly* have the effect of reducing * * *" [Emphasis added.] The commenter believed that the use of the words "or indirectly" indicates that the types of compensation arrangements should be looked at broadly.

Response: As stated in an earlier response, we are requiring a prepaid health plan that contracts with an intermediate entity to disclose information about the physician incentive plans that the entity has with physician groups or physicians. This will prevent a prepaid plan from creating intermediate entities merely to evade the requirements of this rule.

Furthermore, if the physician group subcontract with its physicians places the latter at substantial financial risk, the prepaid health plan must disclose the incentive arrangements. In order to minimize the burden on prepaid plans, we are not requiring disclosure of every incentive arrangement between physician groups and individual physicians, only of those under which the physicians are placed at significant financial risk.

In regard to the phrase "indirectly have the effect of reducing or limiting services," this phrase applies only to the arrangement between the plan and physician group. It does not apply to the relationship between the physician group and its individual physicians. "Indirect" as used in the statute refers to methods of compensation to the physician groups that are not strictly monetary, but can be considered the equivalent. Examples would include providing stocks, waivers of debt, or equipment.

The commenter has raised the issue of physician groups that have incentive arrangements with their individual physicians. As we examined this issue, we noted that the definition of "physician group" in proposed § 417.479(b) technically would exclude such a physician group, since it would *not* be a group that "distributes income from practice among members according to a * * * plan *unrelated to the members' referral levels.*" (Emphasis added.) It was not intended that any physician group fall outside the scope of our definition, and thus technically outside the scope of these regulations. We, accordingly, are deleting "according to a prearranged plan unrelated to the member's referral levels" from the definition of "physician group." It is also for this reason that we did not adopt any existing definitions of a physician group or group practice that may similarly have contained provisions that would exclude a group Congress intended to reach in this rule (for example, the existing definition of "medical group" at 42 CFR 417.1 or "group practice" in section 1877 of the Act.

We are also taking this opportunity to point out that, although we define a "physician incentive plan" as "any compensation arrangement between an *organization* and a physician or physician group that may directly or indirectly have the effect of reducing or limiting services furnished to Medicare beneficiaries or Medicaid recipients enrolled in the organization" [emphasis added], this definition also encompasses a compensation arrangement between an *entity* with which the organization contracts and physicians/physician groups and a compensation arrangement between a *physician group* and its individual physicians. This is because, although not a direct relationship, a linkage between the organization and the physician group or individual physicians has been established through the entity or physician group with which the organization contracts.

Comment: One commenter suggested that we not apply substantial financial risk to individual practice association (IPA) and direct contracting models. The commenter stated that there would be no loss if a few providers drop out.

Response: While the organization may not feel a loss, the enrollees may be concerned about the loss. Furthermore, this may be an indication that the incentive plans are having an undesired effect. The legislation requires us to apply these regulations to all prepaid plans. There is no justification for treating IPA and direct contracting models differently. If anything, since these models frequently involve contracts with individual physicians, these physicians are less in a position to spread risk and may be at even greater risk than other models.

Comment: Several commenters, including a major organization, raised the concern that they do not know the total payments and patient loads until the end of the year. They suggested that we substitute total potential payments, based on the most recent year's utilization and experience, in the substantial financial risk and stop-loss formulas.

Response: We agree that this option is acceptable, unless the organization has information that suggests a significantly different situation; for example, the addition of a major new contract. Appropriate revisions have been made to proposed § 417.479 to clarify this.

Comment: A major organization suggested that we substitute an actuarially derived threshold instead of an outlier approach.

Response: We reviewed this recommendation with several actuaries, including staff from HCFA's Office of the Actuary. We concluded that it is not feasible to make such an analysis. Actuaries can perform analyses for certain kinds of losses, such as loss of life or loss of income. However, the determination of what is a substantial loss of income to a physician or physician group is more of a subjective or policy decision than a measurable amount.

The actuaries also indicated that they could not perform such an analysis because there are no empirical data to indicate how physicians respond to different levels of financial risk.

Actuaries have supplied us with recommendations as to stop-loss protection, discussed later in this preamble. The recommendations result in different stop-loss requirements for different panel sizes. Also, as discussed earlier, we have determined that physicians or physician groups serving panels of over 25,000 patients are not at substantial financial risk. We are, however, interested in receiving current data on how physicians respond to different levels of financial risk.

Comment: One commenter raised a concern that the Internal Revenue Service (IRS) is developing policy on withholds that defines them as discounts that would not be tax-exempt.

Response: We have held discussions with the IRS to coordinate consistent policies and will continue to work with them.

Comment: One organization commented that the threshold should only apply to the aggregate group of physicians and not to individual physicians. It stated that its incentive plan is within the specified limits for physician groups, but will exceed the limits for individual physicians whose behavior exceeds certain norms.

Response: The legislation is concerned with whether a plan puts physicians or physician groups at substantial financial risk. Thus, the threshold policy applies to contracts between an organization and individual physicians, but only if the contract is specifically between the organization and an individual physician. As indicated earlier, we have not interpreted the legislation to apply to subcontracts between the physician group and its individual physicians.

Comment: A major organization asked if a contract for primary care services outside the service area equals referral services.

Response: Primary care services outside the service area are not "referral services." The prepaid plan, however, must ensure that all necessary services are available and accessible within the service area.

Comment: A major organization commented that the proposed regulation poses a problem for staff model HMOs in medically underserved areas (MUAs). The commenter stated that, because the salaries of many physicians in community health centers (CHCs) are low (because they are often working under a Federal student loan repayment program), the formula we use to determine the risk threshold results in a threshold that is artificially low for these HMO programs. The commenter added that, to impose additional administrative obligations on these community programs, because of their bonus payment arrangements for salaried physicians, would divert time, energy, and resources away from their mission of providing health services in MUAs.

Response: We share the concerns raised by this commenter. The low salaries do create an artificially lower threshold, and the centers have much more limited administrative resources. Nevertheless, these circumstances result in even greater pressures on these physicians to contain costs. With lower salaries, the physicians are more sensitive to factors that can affect their income. Therefore, it is even more appropriate to have the policies in this regulation apply to these centers. Unfortunately, we have not been able to develop a different policy for these centers. Note, however, that if an HMO contracts with a CHC, then, as indicated in an earlier response, these regulations would not apply to contracts between the centers and their physicians because they are subcontracts.

Capitation Arrangements With Physicians

Comment: Several commenters, including a major organization, stated that the threshold should not apply to capitation. Their argument was that the thresholds were based on withhold data and, further, that it is difficult to separate services furnished by the physicians from referral services. The commenters also claimed that we did not specify that the capitation applies only to referral services.

The commenters raised the concern that the capitation payments may include payments for services furnished directly by the physician group. Thus, they point out, we are limiting the

amount of risk a physician can accept for his or her own services. The commenters stated that to do so is beyond the mandate of the statute, which is intended to apply only to services not provided by the physician group.

Response: We gave this issue a great deal of thought. We decided, however, to continue with our proposed policy of applying a 25 percent threshold. To exempt capitation from the threshold could place physicians who are compensated in this manner at substantial financial risk, without subjecting the prepaid plans to the requirement either to set limits to the risk in the form of maximums and minimums, or provide adequate stop-loss protection and conduct beneficiary surveys as required by the statute. Furthermore, the commenters are incorrect; the proposed and final rules are concerned with referral services. If the incentive plan applies only to the services furnished by the physician group, these rules do not apply. The legislation specifies that we address services not furnished by the physician group. If the incentive plan applies to all services or just referral services, these rules apply.

The commenters are correct on these two points: our policy does affect services that the physician group directly provides if we are dealing with capitation for all services; and services furnished directly by the physician group or physician are not covered by the statute. However, when the capitation covers all services, we are not able to separate those service furnished directly from the referral services. And, since the referral services are our primary concern, we need to be inclusive rather than exclusive.

Comment: One commenter recommended that we not require the maximum and minimum formula for capitation arrangements if the organization can show that a 25 percent differential had not occurred in the past.

Response: While there is merit to this recommendation, we have decided to reject it. The legislation requires that organizations that place their physicians at substantial financial risk, as determined by the Secretary, provide stop-loss protection and conduct enrollee surveys. Thus, the formula is necessary for us to determine if substantial financial risk exists. Also, past behavior is no guarantee of future behavior. Thus, physicians could still feel the pressure if they are placed at substantial financial risk, regardless of past payments.

Comment: One commenter believed the rule should distinguish between a monthly capitation payment to a physician group that includes an amount for referral services, and an incentive plan assessment or payment.

Response: The applicability of the provisions of this rule depends upon the specific arrangements in the incentive plan. As stated earlier, if the incentive plan applies only to services directly furnished by the physician or physician group and does not cover referral services, the regulations do not apply. If the capitation includes payment for referral services, the provisions of § 417.479(f)(5) apply. If the organization capitates its physicians only for services they directly furnish and uses withholds or bonuses (or a combination of withholds and bonuses) as incentives to control referrals, the requirements of § 417.479(f)(5) concerning capitation do not apply. In this case, however, if the withholds or bonuses or combination of withholds and bonuses exceed the 25 percent risk threshold, the stop-loss and survey requirements of this rule apply.

Comment: One commenter suggested that, if a physician group achieves a patient population of approximately 250 members from a single capitated HMO, there is no longer a need for the risk protection.

Response: There is no evidence that supports this number. As indicated later in this preamble, we have set an exception for the stop-loss requirements that is based on panel size.

Comment: A number of commenters stated that the proposed rules, as they relate to capitated payment arrangements, do not accommodate common, longstanding contractual arrangements and should be withdrawn to permit additional study.

Response: The Group Health Association of America (GHAA) has supplied us with updated data as of the Winter 1993–94. Furthermore, Mathematica has published data from 1995. We took these data into account as we revisited our decisions regarding specific risk thresholds and issues concerning capitation and stop-loss protection. These data support the approach we have taken in this final rule. If more recent data exists, we would appreciate receiving it.

Comment: Several commenters stated that they capitate their physicians but also provide adequate stop-loss protection. They believed that these physicians are not at risk, because of the stop-loss protection.

Response: We agree in principle with this view. If an HMO has stop-loss protection in place that ensures that no more than 25 percent of a physician's or physician group's income is at risk, we would determine that the plan does not involve substantial financial risk.

Stop-Loss

Comment: A commenter recommended that we put physicians at risk beyond the stop-loss limit. The commenter believed that setting an absolute limit on the amount of risk that physicians can accept (that is, requiring stop-loss protection to cover the cost of referrals in excess of 30 percent of payments) obstructs an organization's ability to control physician behavior beyond that point. The commenter suggested that the stop-loss requirement be constructed to allow for continued, but limited, risk sharing. The commenter recommended that the organization be allowed to hold physicians or physician groups responsible for 20 percent of the cost of referrals beyond the point at which the stop-loss protection begins. The commenter stated that it does not believe the statute requires an absolute limit on the amount of risk, but instead only "adequate and appropriate" stop-loss protection.

Response: The approach suggested by this commenter is consistent with the policy used by a number of HMOs. The practice of requiring physicians to continue to share in the risk beyond a stop-loss limit makes the physicians sensitive to the need to avoid furnishing unnecessary services. Therefore, this final rule allows for continued, but limited, risk sharing beyond the point at which the stop-loss protection begins.

For those prepaid plans that provide an aggregate stop-loss policy, we are setting the required stop-loss limit at 25 percent. The prepaid plan will bear 90 percent of the losses beyond this level and the physicians will bear 10 percent of the losses. (See § 417.479(g)(2)(i).) Because we are adding a 90/10 ratio to the potential loss level, we believe it is necessary to reduce the proposed 30 percent stop-loss limit to 25 percent to compensate for the added element of risk sharing. Furthermore, the 25 percent level is consistent with the threshold we established for substantial financial risk.

The 90/10 split also applies to those plans that provide per patient stop-loss protection.

Comment: Several commenters, including major organizations, stated that aggregate stop-loss policies are not currently used and would be difficult to obtain. They recommended that patient, dollar, and/or specific disease protections be substituted.

Response: We have decided to allow plans to provide either aggregate or per-patient limit stop-loss policies. (See

§ 417.479(g)(2).) The amount of the per patient policy required to be considered adequate and appropriate will vary with the patient panel size and will be discussed later in this preamble. We reached this decision on the following basis.

We agree that some organizations might have trouble purchasing aggregate stop-loss policies or that it may be expensive to switch from a per patient limit to an aggregate policy. Since most organizations do not have such policies, this aggregate policy requirement would, at the least, cause a significant change in policy, which could be very difficult or expensive to implement. Furthermore, actuarial analyses indicate that aggregate coverage is unlikely to be needed.

On the other hand, there are some organizations that do provide aggregate stop-loss protection. Requiring them to switch to a per-patient limit would also be expensive. There are advantages and disadvantages to both aggregate and per-patient stop-loss coverage. Aggregate policies provide greater overall protection, while per-patient policies provide better protection at the individual patient level.

Both of these options provide reasonable protection for physicians and their patients. By providing an option, we have eliminated the burden organizations might face to switch policies.

We considered the recommendation to include specific disease protections. We reviewed the Department's preliminary plans for implementing the Medicare Catastrophic Coverage Act of 1988 (Public Law 100–203), major provisions of which were repealed before being implemented. The Department had not planned to specify any specific diseases as catastrophic and instead planned to use specific dollar levels to define "catastrophic" expenses.

Comment: Several commenters stated that the prepaid plans should not be required to pay for the cost of stop-loss protection. They believed they should be allowed to charge the physicians a reasonable premium for stop-loss protection.

Response: Section 1876(i)(8)(ii) of the Act reads, in relevant part, as follows:

(ii) If the plan places a physician or physician group at substantial financial risk * * * the organization—(I) provides stop-loss protection for the physician or group * * *.

In the case where the physician or physician group decides to purchase its own stop-loss protection, we interpret "provides" to mean that the organization either pays for the premium or reduces the level at which the stop-loss protection applies by the cost of the stop-loss. We also rejected the proposal of allowing HMOs to make available stop-loss protection rather than paying for it. Making available is not consistent with providing.

Thus, we provide, in § 417.479(g)(2)(iii), that the prepaid plan may either (1) Provide the stop-loss protection directly, (2) purchase the stop-loss protection, or (3) if the physician or physician group purchases the protection, pay the portion of the premium that covers its enrollees or reduce the level at which the stop-loss protection applies by the cost of the stop-loss. We are interested in any comments on this provision and alternative proposals.

Comment: Several commenters suggested that we establish a case-by-case exceptions process for stop-loss requirements.

Response: As stated previously for substantial financial risk, such a process would be administratively burdensome. Further, it would be difficult to make judgments.

Comment: One commenter, a major organization, disputed our statement that there is little information available regarding the impact of various factors on physician behavior.

Several commenters believed we should take patient panel size into account and exclude large panels from this requirement. Other commenters suggested that we have a higher stop-loss requirement, for example, $200,000 per patient, for larger panels. They noted that the legislation instructed us to take panel size into account for stop-loss protection. The commenters argued that, with a sufficiently large patient panel (generally a clinic), the physicians are able to spread the risk across all the patients.

In addition, several commenters pointed out that a number of physician groups have contracts with many different HMOs, particularly IPA models, and have the equivalent of a large panel spread out among the HMOs. The commenters recommended that HMOs that contract with these groups be exempt from the stop-loss requirements.

Response: Analyses by several actuarial firms and data from several HMOs support the position that having a large panel does reduce the level of risk. The data is also consistent with the findings of Rossiter and Adamache (1990) discussed previously. Based on these analyses, we have determined the limits specified in the following table (Table 1) for different panel sizes and have revised proposed § 417.479(g)(2) accordingly. Providing a higher stop-loss requirement (a higher stop-loss level is a lower level of protection) is consistent with the legislation, which specified that we take panel size into account.

TABLE 1.—STOP LOSS LIMITS PER PATIENT PANEL SIZE

Number of patients	Stop-loss limits per patient
Less than 1,000	$10,000
1,000 to 10,000	$30,000
10,000 to 25,001	$200,000
Greater than 25,000 (unpooled)	None
Greater than 25,000 (as a result of pooling).	$200,000

There are two ways physician groups can pool patients to meet the panel size requirements specified in the table: (1) Including commercial, Medicare, and/or Medicaid enrollees in the calculation of panel size, and (2) Pooling together, by the organization, of several physician groups into a single panel. Each method may lead to a panel size large enough to reduce the financial risk. These methods may be used to pool patients, provided they are consistent with the relevant contract between the physician or physician group and the prepaid plan. (For instance, if there are separate contracts for commercial, Medicare, and/or Medicaid enrollees, then, absent contractual provisions to the contrary, pooling would be precluded).

We consider physician groups whose panels are greater than 25,000 patients without pooling of patients as not at substantial financial risk. Thus, the organization would be exempt from stop-loss protection and beneficiary survey requirements.

For those groups whose panel size is greater than 25,000 patients as a result of pooling, the organization is required to provide stop-loss protection at the same level that is required if the panel size is between 10,000 to 25,000 patients ($200,000 per patient). This policy is adopted so that plans will not use pools to circumvent the stop-loss requirements. Furthermore, physicians may be at higher risk for panels that are pooled than panels that are not pooled since the former may experience greater variability in costs than the latter.

We have not established an increasing scale for the aggregate stop-loss option, except that those panels over 25,000 patients without pooling do not need aggregate stop-loss coverage. The scale does not need to increase because, since a percentage formula is used, the dollar

amount represented by the threshold rises as the panel size increases.

We are willing to consider policy alternatives that are supported by empirical data. We are interested in receiving public comments in this regard.

Surveys

Comment: Several commenters believed a survey of enrollee satisfaction should be required of all prepaid plans, not just those where there is substantial financial risk.

Response: While most prepaid plans do conduct surveys, there is no legislative requirement to do so except as prescribed by this regulation.

Comment: One commenter, a major organization, stated that the proposed rule is silent about what HCFA must do with the survey results. This organization proposed that the regulations explicitly require HCFA to (1) Annually review the results as they are filed, (2) share the complete results with the appropriate PRO, (3) take appropriate action if the results indicate a problem; and (4) ensure public access to the survey results by requiring that they be published and disseminated to interested parties by the PRO, the organization, or HCFA.

Response: We partially addressed this comment earlier in this preamble. The survey results will be submitted to plan managers in HCFA's central and regional offices. They will review the results in conjunction with PRO results, disenrollment data, reconsiderations, and related information, as part of ongoing compliance monitoring activities. As HCFA develops performance measures and report cards over the next several years, it will consider the best way to make the survey results available to consumers and providers.

Comment: One commenter suggested that disenrollees that move be excluded from the surveys.

Response: We agree with this recommendation since it may be very hard to locate these beneficiaries. Therefore, we have revised proposed § 417.479(g) accordingly.

Comment: One commenter, a major organization, requested that we specify that surveys do not need to be done more often than annually.

Response: This final rule, at § 417.479(g)(1)(iv), revises the requirement to specify that the survey must be conducted no later than 1 year from the effective date of the incentive plan, and at least every 2 years thereafter. As noted in the **DATES** section of this preamble, compliance with § 417.479(g)(1)(iv) is not required until 1 year after the effective date of this rule.

Medicaid

Comment: One commenter asked whether States have the option to prohibit incentive plans that place providers at a substantial financial risk. The commenter believed this option would eliminate the need to obtain and monitor stop-loss requirements and a member survey.

Response: Nothing in OBRA '90 prohibits States from placing more restrictive requirements under State law on the physician incentive plans of their HMO and HIO contractors. As a result, States do have the option of under State law prohibiting altogether incentive plans that place providers at substantial financial risk, regardless of any stop-loss arrangements and member satisfaction surveys used by the contractor. We point out, however, that the sanctions and penalties provided for under this final rule would apply only with respect to violations of the Federal requirements in this rule.

Comment: One commenter asked whether, if annual member surveys are already required under quality assurance standards, an additional member survey is necessary for those plans placing providers at substantial financial risk.

Response: No additional survey is required, as long as the survey conducted under the quality assurance standards meets the requirements specified at § 417.479(g) of this rule.

Comment: One commenter stated that sufficient time must be allowed for States to incorporate the new provisions in program rules and existing provider agreements.

Response: We agree with this comment. As a result, as stated in the **DATES** section of this preamble, the compliance date for most provisions is 60 days after publication of this final rule. This time period is the standard commonly used for implementation under Medicaid.

Comment: One commenter stated that incentive plans for physicians serving Medicaid recipients need to address access to primary and preventive services and quality of care services. The commenter stated that these plans must include incentives based on specific health outcomes, timely access to primary care, and enrollee satisfaction based on specific health outcomes.

Response: OBRA '90: (1) Prohibits certain physician incentive arrangements and (2) specifies two requirements to be met if other types of arrangements that place physicians at substantial financial risk are used. The statute does not go beyond these prohibitions and requirements to mandate the use of any particular type of incentive arrangements, including those described by the commenter. Accordingly, the rule does not include any requirements that certain types of incentives be used.

Comment: One State agency stated that incentive plans for physicians serving Medicaid must limit the payment of any incentives to once annually. The commenter believed this would decrease the possibility that physicians will cut back on services or refuse to treat individual patients because of fear of financial losses.

Response: OBRA '90 prohibited only one type of incentive arrangement: those that make specific payments, "directly or indirectly under the plan to a physician or physician group as an inducement to reduce or limit medically necessary services provided with respect to a specific individual enrolled with the organization." All other types of incentive arrangements are allowed, including those that place physicians at "substantial financial risk." (Those that place physicians at substantial financial risk must meet certain requirements for the provision of stop-loss protection for physicians and periodic enrollee satisfaction surveys.) The statute makes no provision, including the one recommended by the commenter, for banning other types of incentive plans. We cannot impose the restrictions on the incentive program that were recommended by the commenter. As noted above, however, OBRA '90 would not prohibit a State from imposing such a restriction under State law.

Comment: One commenter recommended that the reporting and other requirements for physician incentive plans be limited to only those HMOs, CMPs, or HIOs that institute percentage risk levels that are greater for the Medicaid and Medicare populations than for their commercial contracts.

Response: With respect to Medicaid, OBRA '90 amended section 1903(m)(2)(A) of the Act to condition a State's receipt of FFP for expenditures in prepaid capitation or other risk-based reimbursement contracts upon a contractor's adherence to the requirements for physician incentive plans also described in OBRA '90. The statute does not authorize the Secretary to exempt certain plans or State Medicaid contracts from compliance with these reporting and other requirements. Therefore, we cannot change the regulation as the commenter has proposed.

Comment: One commenter stated that the definitions of "substantial risk," "withhold," and "bonus" are too inflexible to meet the special needs related to the Medicaid program. Citing monthly eligibility variation and differences in payments based on varying Medicaid eligibility categories as examples of variables that can affect payment to a provider in any given period, the commenter questioned how, if incentive payments are based on end of year results and a percent sharing arrangement, a plan can know in advance if its providers will be at substantial risk.

Response: The maximum potential (as opposed to the actual) amount of withhold or bonus lost or awarded, respectively, determines whether a prepaid plan has placed a physician or physician group at substantial financial risk. If the plan places the practitioner at risk of losing more than 25 percent of his/her potential earnings, then the plan has placed the physician or physician group at substantial financial risk. The actual amount of withhold returned or not returned or bonus awarded or not awarded at the end of the assessment and disbursement period is not the determinant of substantial financial risk because money returned or awarded after care has already been delivered does not serve as an inducement. It is the promise of potential earnings (or the prospect of loss thereof) that serves as the inducement. Therefore, a prepaid plan does not need to know its end of year results in order to determine if it is placing its physicians and physician groups at substantial financial risk.

The minimum and maximum potential earnings, including the portions that are the result of incentive arrangements, should be known both to the plan and the physician or physician group under contract at the beginning of each risk assessment period. As a result, the regulation states that capitation arrangements in which the maximum and minimum possible payments are not clearly explained in the physician's or physician group's contract constitute substantial financial risk.

Comment: One commenter stated that the rules are not very clear on defining a number of terms. As examples, the commenter asked the following questions:

- What does "risk based on the levels or costs of referral services" mean? Are the "levels or costs" applied to an individual capitated physician, physician group, or organization?
- What if the amount allocated to cover referral services is placed in a pool account for debiting patient costs and the amount from these services that might be paid as part of the incentive plan depends on the performance of the larger pool formed by a number of separate physicians and these physicians pool accounts?
- What if the "capitation" amount actually paid to a physician is meant to cover that physician's services and involves a 15 percent withhold?

Response: In response to the first question, the term "referral services" is defined in § 417.479(c) of the regulation. In addition, the word "level" has been changed to "use" for greater clarity.

In response to the first two questions, it is important to note that, in general, the regulation does not attempt to address how a prepaid plan chooses to design or implement its physician incentive plan. Rather, it attempts to regulate one of the final products, that is, the maximum financial risk to which a physician or physician group may be exposed for referral services. Plans may use a variety of incentive arrangements, including those identified by the commenter, in structuring their physician incentive plans. However, prepaid plans should be able to determine or establish, as part of their physician incentive plans, the maximum financial risk, when the risk is based on referral services, to which a physician or physician group may be exposed under the physician incentive plan. If a plan is unable, based on the structure and operation of its incentive plan, to determine the amount of the financial risk, then, according to § 417.479(f)(5)(ii), we would determine that the plan places physicians or physician groups at "substantial financial risk" and the plan would be required to implement stop-loss protection and conduct enrollee surveys. As indicated previously, we have decided to allow a plan to pool patients for different physician groups.

In response to the third question, the threshold for withhold arrangements is established in § 417.479(f) of this final rule. This section would apply only if the withhold is based in part or in its entirety on utilization or costs of referral services. If the return of the withhold is based solely on the physicians' own services, then, under § 417.479(f) of this final rule, these regulations would not apply.

Comment: One commenter stated that the proposed rule does not allow for the differences found in HIOs, specifically that they have mandatory enrollment in a specific area, may be at-risk for retroactively eligible individuals, and may be responsible for an ongoing category of special members who are not capitated to a particular physician. The commenter noted that the cost of services to this population affects the incentive plan (withhold payment and surplus sharing). The commenter also specifically noted that the HIOs in California which are Medicaid only were not specifically addressed in the proposed rule.

Response: The Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA '85) generally subjected HIOs which were operational on or after January 1, 1986, to the same requirements as other organizations contracting with Medicaid agencies on a risk basis to provide or arrange for comprehensive services (HMOs). (Certain exceptions to this are allowed under the law.) Therefore, this proposed rule did not reiterate the fact that HIOs subject to the same requirements for HMOs are also subject to these requirements for physician financial incentive plans.

Further, OBRA '90 did not contain any provisions calling for the differential treatment of HIOs. Because of this, and the historical interest of the Congress in subjecting HIOs to the same standards as HMOs, we did not identify the need for differential treatment of HIOs in this regulation.

Comment: One commenter stated that the proposal on enrollee surveys excludes only those Medicaid enrollees who have disenrolled because of a loss of Medicaid eligibility. The commenter recommended we consider excluding those who disenroll from a prepaid plan because they moved from the plan's service area.

Response: As stated earlier, we agree that individuals who have disenrolled from the plan because they have moved outside of a plan's service area may be omitted from the plan's enrollee survey. The regulations text at § 417.479(g)(1) has been appropriately modified.

Comment: One commenter stated that, in addition to an enrollee survey, monitoring of the complaint/appeals process for the plan and the State's Medicaid fair hearing process would be another check on the quality of care and the denial of needed service.

Response: OBRA '90 does not address monitoring the complaint/appeals process for the plan and the State Medicaid fair hearing process in the State. However, monitoring the plan's complaint hearing process is the responsibility of the State Medicaid agency as part of its routine monitoring of its managed care contractors. In addition, HCFA routinely monitors a State's fair hearing process as part of the monitoring of each State's Medicaid plan. As a result, these areas are not included in these regulations.

Miscellaneous

Comment: One commenter recommended that we clarify the definition of "medically necessary services" as it applies in the prohibition on specific payment as an inducement to reduce or limit medically necessary services to a specific enrollee.

Response: We are preparing a final rule entitled "Medicare Program: Criteria and Procedures for Making Medical Services Coverage Decisions that Relate to Health Care Technology." This rule will specify the definition of medically necessary services that will apply for purposes of the prohibition in question. (The rule will be in response to a notice we published in the **Federal Register** on April 29, 1987, at 52 FR 15559, that requested comments on procedures for medical services coverage decisions.)

Comment: One commenter stated that managed care plans should be specifically directed to provide for effective physician participation in the development of incentive plans and other elements of the organization's management.

Response: Physicians have the opportunity for input before they sign a contract with the organization. Physicians have the opportunity to negotiate all aspects of the contract. Since the contract specifies the nature of the incentive arrangements, the physicians have an opportunity for input through the negotiation process.

Comment: Some commenters recommended that patients be allowed direct access to specialists and/or that the prepaid plan explain, as part of the enrollment contract, that patients have limited access to specialists.

Response: HCFA supports the practice of HMOs using gatekeepers to limit patients from direct access to specialists. HMOs have found this to be an effective way to limit inappropriate utilization and expenditures. HMOs are required to explain this practice as part of the enrollment.

Comment: Several commenters suggested that there be an appeals process for physicians and patients.

Response: HCFA requires prepaid plans to provide an appeals process for enrollees. For physicians, there are several arrangements. All physicians have an opportunity to informally appeal decisions through the plan's medical review board and through the contract negotiation process. In addition, for Medicare risk contractors, unaffiliated physicians can represent a Medicare beneficiary in an appeal to the prepaid plan. In the case of a cost contract, the physician can represent a beneficiary in an appeal to whichever entity (prepaid plan, carrier, or intermediary) made the determination.

VII. Provisions of the Final Regulations

The proposed rule is adopted, with the changes listed below. Many of these changes are discussed in section V. of this preamble. If the change is not discussed in section V, the reason for the change is given below.

Changes to Proposed § 417.479

- We add a new paragraph (a); and designated proposed paragraph (a) as paragraph (b). New paragraph § 417.479(a) is added to reflect the requirement at section 1876(i)(8) of the Act that each contract between HCFA and an eligible organization contain provisions related to physician incentive plans. This new paragraph also makes it clear why this provision is placed in part 417, subpart L (Medicare Contract Requirements).
- We designate paragraph (b) as paragraph (c) and revise the definition of "physician group" so that it no longer inadvertently excludes physician groups that pay their physicians using a methodology under which the amount of payment is affected by referrals. We also clarify, in that definition, that an IPA is a physician group only if it is composed of individual physicians and has no subcontracts with physician groups.
- We designate proposed (c) as paragraph (d). We also revise this paragraph to remove language that, because of the addition of new paragraph (a), became redundant. Also, in response to a comment, we change "to reduce or limit medically necessary services" to "to reduce or limit medically necessary services covered under the organization's contract".
- Proposed paragraph (d) is designated as paragraph (e). Additionally, the difference in risk threshold based on the frequency of distribution or assessment of incentive payments is removed.
- Proposed paragraph (e) is designated as paragraph (f) and is revised to—
  + Provide a definition of "potential payments" and clarify that it is these payments that are used in the calculation of the level of risk.
  + Provide that substantial financial risk does not exist if, without pooling, the patient panel size is 25,000 patients or more.
- Proposed paragraph (g) is revised to—
  + Specify that individuals who disenroll from a prepaid plan because they relocate outside the plan's service area need not be included in the enrollee survey.
  + Provide that, in the case of aggregate stop-loss protection, the protection must cover 90 percent of the costs of referral services (beyond allocated amounts) that exceed 25 percent of potential payments.
  + Establish, in the case of stop-loss protection based on a per-patient limit, requirements as to the amount of stop-loss protection that are based on patient panel size.
- Proposed paragraph (h) is revised to-
  + Specify the items of information that must be disclosed to HCFA and to Medicare beneficiaries and, in accordance with § 434.70(a)(3) and (a)(4), to the State Medicaid agency or recipient, respectively.
  + Include methods that may be used in the calculation of panel size.
  + Specify those types of changes in the incentive plan that must be reported to HCFA and require that this information be submitted to HCFA 45 days before implementing the changes.
  + Remove proposed paragraph (h)(5). The proposed paragraph addressed when organizations with existing contracts must comply with the disclosure requirements. Because that provision would become quickly irrelevant, we have decided to address this issue in the **DATES** section of this final rule, rather than by incorporation into the CFR.
  + Require that organizations provide Medicare beneficiaries a summary of the disclosure information, if they request it.
- We designate proposed § 417.479(i) as § 417.479(j). We add a new § 417.479(i) to specify requirements related to subcontracting arrangements.

Changes to Proposed § 434.70

- Proposed paragraph (a)(2) is revised to—
  + Require compliance with §§ 417.479(d) through (g) and the requirements related to subcontracts set forth at § 417.479(i) if the subcontract is for the provision of services to Medicaid recipients.
  + Specify the items of information that must be disclosed to the State agency.
  + Require that the organization provide certain information concerning the physician incentive plan to any Medicaid recipient who requests it.
  + Remove proposed paragraph (a)(2)(iv). The proposed paragraph addressed when organizations with existing contracts (agreements) must comply with the disclosure requirements. Because that provision would quickly become irrelevant, we have decided to address this issue in the **DATES** section of this final rule, rather than by incorporation into the CFR.

Crosswalk Between Proposed Rule and This Final Rule

Note that those provisions related to civil money penalties and intermediate sanctions that were included in the July 22, 1991, proposed rule and that were merely republished in the December 1992 proposed rule on physician incentive plans are not included in this final rule or in the following crosswalk.

Proposed	This rule
	§ 417.479(a)—new contents.
§ 417.479(a)	§ 417.479(b).
§ 417.479(b)	§ 417.479(c).
§ 417.479(c)	§ 417.479(d).
§ 417.479(d)	§ 417.479(e).
§ 417.479(e)	§ 417.479(f).
§ 417.479(f)	Content deleted.
§ 417.479(g)	§ 417.479(g).
§ 417.479(h)	§ 417.479(h).
	§ 417.479(i)—new contents.
§ 417.479(i)	§ 417.479(j).
§ 417.495(a)(7)	§ 417.500(a)(9).
§ 434.44(a)	§ 434.44(a).
	§ 434.70(a)(3) and (a)(4)—added.
§ 1003.100(b)(vi)	§ 1003.100(b)(vi).
§ 1003.101 (definitions).	§ 1003.101—only definition of "physician incentive plan" added by this rule.
§ 1003.103(e)(iv) through (e)(vi).	§ 1003.103(e)(iv) through (e)(vi).
§ 1003.106(a)(4)(vii)	§ 1003.106(a)(4)(vii).

VIII. Collection of Information Requirements

Under the Paperwork Reduction Act of 1995, we are required to provide 60-day notice in the **Federal Register** and solicit public comment before a collection of information requirement is submitted to the Office of Management and Budget (OMB) for review and approval. In order to fairly evaluate whether an information collection should be approved by OMB, section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 requires that we solicit comment on the following issues:

- Whether the information collection is necessary and useful to carry out the proper functions of our agency.
- The accuracy of our estimate of the information collection burden.
- The quality, utility, and clarity of the information to be collected.
- Recommendations to minimize the information collection burden on the affected public, including automated collection techniques.

Therefore, we are soliciting public comment on each of these issues for the following sections of this document that contain information collection requirements:

The information collection requirements in § 417.479(g)(1) (and § 434.70(a)(3) for Medicaid) concern organizations that operate incentive plans that place physicians or physician groups at substantial financial risk and require them to conduct annual enrollee surveys that include either all current Medicare/Medicaid enrollees in the organization and those who have disenrolled (other than because of loss of eligibility in Medicaid or relocation outside the organization's service area) in the past 12 months, or a sample of these same enrollees and disenrollees. These surveys must be designed, implemented, and analyzed in accordance with commonly accepted principles of survey design and statistical analysis. They must address enrollees/disenrollees satisfaction with the quality of services furnished and their degree of access to the services. We estimate that 200 organizations will conduct the surveys each year. We estimate that a total of approximately 90,000 enrollees will respond to the survey.

The information collection requirements in §§ 417.479(h)(1) and (h)(2), 417.479(i), and 434.70(a)(3) specify that disclosure concerning physician incentive plans must be made to HCFA or to the State, as appropriate. The requirements apply to physician incentive plans between eligible organizations and individual physicians or physician groups with whom they contract to furnish medical services to enrollees. The requirements apply only to physician incentive plans that base compensation on the use or cost of services furnished to Medicare beneficiaries or Medicaid recipients.

The disclosure must contain the following information:

(1) Whether services not furnished by the physician or physician group are covered by the incentive plan. (If not, disclosure of other aspects of the plan need not be made.)

(2) The type of incentive arrangement.

(3) If the incentive plan involves a withhold or bonus, the percent of the withhold or bonus.

(4) The amount and type of stop-loss protection.

(5) The patient panel size and, if patients are pooled, the pooling method used.

(6) In the case of capitated physicians or physician groups, capitation payments paid to primary care physicians for the most recent year broken down by percent for primary care services, referral services to specialists, and hospital and other types of provider services.

(7) In the case of prepaid plans that must conduct beneficiary/recipient surveys, the survey results.

An organization must provide the information upon application for a contract; upon application for a service area expansion; at least 45 days before implementing certain changes in its incentive plan, and within 30 days of a request by HCFA or the State. The respondents that will provide the information are HMOs, CMPs, HIOs, and certain subcontractor entities that contract with the Medicare program or States and have physician incentive plans. We estimate that approximately 600 organizations will submit the information.

Sections 417.479(h)(3) and 434.70(a)(4) require that the following information be provided to any Medicare beneficiary or Medicaid recipient, respectively, who requests it: Whether the plan uses a physician incentive plan that affects the use of referral services; if so, the type of incentive arrangement; whether stop-loss protection is provided; and, if a survey is required, a summary of the survey results. The respondents who will provide this information will be HMOs, CMPs, HIOs, that contract with the Medicare program or States and have physician incentive plans. We estimate that approximately 300 organizations will provide this information to a total of approximately 1,500 Medicare beneficiaries and 1,500 Medicaid recipients.

The table below indicates the annual number of responses for each regulation section in this final rule containing information collection requirements, the average burden per response in minutes or hours, and the total annual burden hours.

CFR section	Annual No. of responses	Annual frequency	Average burden per response	Annual burden hours
417.479(g)(1)	90,000	1	10 minutes	15,000
417.479(h) (1) and (2) and 417.479(i)	600	1	1 hour	600

CFR section	Annual No. of responses	Annual frequency	Average burden per response	Annual burden hours
417.479(h)(3)	1,500	1	10 minutes	250
434.70(a)(4)	1,500	1	10 minutes	250

We have submitted a copy of this final rule with comment period to OMB for its review of the above information requirements. A document will be published in the **Federal Register** when OMB approval is obtained.

If you comment on these information collection and recordkeeping requirements, please mail your comments to the following address: Health Care Financing Administration, Office of Financial and Human Resources, Management Planning and Analysis Staff, Room C2–26–17, 7500 Security Boulevard, Baltimore, MD 21244–1850.

IX. Regulatory Impact Statement

Consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612), we prepare a regulatory flexibility analysis unless the Secretary certifies that a rule will not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, all HMOs, CMPs, and HIOs are considered to be small entities.

In addition, section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 50 beds.

This final rule with comment period will amend the regulations governing prepaid health care organizations with Medicare or Medicaid risk contracts. Sections 4204(a) and 4731 of OBRA 1990 repealed the prohibition of physician incentive plans in prepaid health care organizations and enacted requirements, effective January 1, 1992, for regulating these plans.

One of the requirements imposed was that each Medicare contract with a prepaid health care organization stipulate that, if a physician incentive plan places a physician or physician group at "substantial financial risk" for services not provided directly, the prepaid health plan organization must: (1) Provide the physician or physician group with adequate and appropriate stop-loss protection, and (2) conduct surveys of currently and previously enrolled members to assess the degree of access to services and the satisfaction with the quality of services.

We received one comment that dealt with the impact statement in the proposed rule published in the **Federal Register** on December 14, 1992 (57 FR 59034). The commenter believed that the proposed rule would have a substantial impact on prepaid health care organizations. The commenter stated that it would be required to make significant changes to limit physician group participation in incentive programs. The commenter also believed the proposed rule would limit its ability to control costs and also result in higher administrative expenses. We believe most plans already meet a majority of our requirements, as indicated by the survey data collected by GHAA and Mathematica discussed in the preamble. We strongly believe that if physicians are at substantial financial risk, organizations must provide stop-loss protection to ensure that essential health care services are received by Medicare beneficiaries and Medicaid enrollees.

All of the approximately 600 HMOs, CMPs, and HIOs could be affected by the revised incentive plan disclosure requirements. We believe, however, that few incentive plans will require changes to comply with the regulations. In addition, since we expect that most current incentive plans already comply with the regulations, we believe that we will rarely need to impose intermediate sanctions or civil money penalties on prepaid health plan organizations that fail to provide covered medically necessary services. Further, we expect few additional surveys of currently and previously enrolled members will be necessary to assess the degree of access to services and the satisfaction with the quality of services. Thus, we believe that additional costs will be incurred by only a small number of organizations.

We are not preparing analyses for either the RFA or section 1102(b) of the Act because we have determined, and the Secretary certifies, that this rule will not have a significant economic impact on a substantial number of small entities or a significant impact on the operations of a substantial number of small rural hospitals. We will, however, publish a regulatory flexibility analysis and regulatory impact analysis if we receive comments and data that would enable us to do so.

In accordance with the provisions of Executive Order 12866, this regulation was reviewed by the Office of Management and Budget.

List of Subjects

42 CFR Part 417

Administrative practice and procedure, Health maintenance organization (HMO), Medicare, Reporting and recordkeeping requirements.

42 CFR Part 434

Grant programs—Health, Health maintenance organization (HMO), Medicaid, Reporting and recordkeeping requirements.

42 CFR Part 1003

Administrative practice and procedure, Fraud, Grant programs—Health, Health facilities, Health profession, Maternal and child health, Medicaid, Medicare, Penalties.

CHAPTER IV—HEALTH CARE FINANCING ADMINISTRATION, DEPARTMENT OF HEALTH AND HUMAN SERVICES

I. Chapter IV of title 42 is amended as set forth below:

PART 417—HEALTH MAINTENANCE ORGANIZATIONS, COMPETITIVE MEDICAL PLANS, AND HEALTH CARE PREPAYMENT PLANS

A. Part 417 is amended as follows:

1. The authority citation for part 417 is revised to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

2. A new § 417.479 is added to read as follows:

§ 417.479 Requirements for physician incentive plans.

(a) The contract must specify that an organization may operate a physician incentive plan only if—

(1) No specific payment is made directly or indirectly under the plan to a physician or physician group as an inducement to reduce or limit medically necessary services furnished to an individual enrollee; and

(2) The stop-loss protection, enrollee survey, and disclosure requirements of this section are met.

(b) *Applicability.* The requirements in this section apply to physician incentive plans between eligible organizations and individual physicians or physician groups with whom they contract to provide medical services to enrollees. These requirements apply only to physician incentive plans that base compensation (in whole or in part) on the use or cost of services furnished to Medicare beneficiaries or Medicaid recipients.

(c) *Definitions.* For purposes of this section:

Bonus means a payment an organization makes to a physician or physician group beyond any salary, fee-for-service payments, capitation, or returned withhold.

Capitation means a set dollar payment per patient per unit of time (usually per month) that an organization pays a physician or physician group to cover a specified set of services and administrative costs without regard to the actual number of services provided. The services covered may include the physician's own services, referral services, or all medical services.

Payments means any amounts the organization pays physicians or physician groups for services they furnish directly, plus amounts paid for administration and amounts paid (in whole or in part) based on use and costs of referral services (such as withhold amounts, bonuses based on referral levels, and any other compensation to the physician or physician group to influence the use of referral services). Bonuses and other compensation that are not based on referral levels (such as bonuses based solely on quality of care furnished, patient satisfaction, and participation on committees) are not considered payments for purposes of this subpart.

Physician group means a partnership, association, corporation, individual practice association, or other group that distributes income from the practice among members. An individual practice association is a physician group only if it is composed of individual physicians and has no subcontracts with physician groups.

Physician incentive plan means any compensation arrangement between an organization and a physician or physician group that may directly or indirectly have the effect of reducing or limiting services furnished to Medicare beneficiaries or Medicaid recipients enrolled in the organization.

Referral services means any specialty, inpatient, outpatient, or laboratory services that a physician or physician group orders or arranges, but does not furnish directly.

Risk threshold means the maximum risk, if the risk is based on referral services, to which a physician or physician group may be exposed under a physician incentive plan without being at substantial financial risk.

Withhold means a percentage of payments or set dollar amounts that an organization deducts from a physician's service fee, capitation, or salary payment, and that may or may not be returned to the physician, depending on specific predetermined factors.

(d) *Prohibited physician payments.* No specific payment of any kind may be made directly or indirectly under the incentive plan to a physician or physician group as an inducement to reduce or limit covered medically necessary services covered under the organization's contract furnished to an individual enrollee. Indirect payments include offerings of monetary value (such as stock options or waivers of debt) measured in the present or future.

(e) *General rule: Determination of substantial financial risk.* Substantial financial risk occurs when the incentive arrangements place the physician or physician group at risk for amounts beyond the risk threshold, if the risk is based on the use or costs of referral services. Amounts at risk based solely on factors other than a physician's or physician group's referral levels do not contribute to the determination of substantial financial risk. The risk threshold is 25 percent.

(f) *Arrangements that cause substantial financial risk.* For purposes of this paragraph, *potential payments* means the maximum anticipated total payments (based on the most recent year's utilization and experience and any current or anticipated factors that may affect payment amounts) that could be received if use or costs of referral services were low enough. The following physician incentive plans cause substantial financial risk if risk is based (in whole or in part) on use or costs of referral services and the patient panel size is not greater than 25,000 patients or is greater than 25,000 patients only as a result of pooling patients using a method set forth in paragraph (h)(1)(v) of this section:

(1) Withholds greater than 25 percent of potential payments.

(2) Withholds less than 25 percent of potential payments if the physician or physician group is potentially liable for amounts exceeding 25 percent of potential payments.

(3) Bonuses that are greater than 33 percent of potential payments minus the bonus.

(4) Withholds plus bonuses if the withholds plus bonuses equal more than 25 percent of potential payments. The threshold bonus percentage for a particular withhold percentage may be calculated using the formula—

Withhold %=−0.75 (Bonus %)+25%.

(5) Capitation arrangements, if—

(i) The difference between the maximum possible payments and minimum possible payments is more than 25 percent of the maximum possible payments; or

(ii) The maximum and minimum possible payments are not clearly explained in the physician's or physician group's contract.

(6) Any other incentive arrangements that have the potential to hold a physician or physician group liable for more than 25 percent of potential payments.

(g) *Requirements for physician incentive plans that place physicians at substantial financial risk.* Organizations that operate incentive plans that place physicians or physician groups at substantial financial risk must do the following:

(1) Conduct enrollee surveys. These surveys must—

(i) Include either all current Medicare/Medicaid enrollees in the organization and those who have disenrolled (other than because of loss of eligibility in Medicaid or relocation outside the organization's service area) in the past 12 months, or a sample of these same enrollees and disenrollees;

(ii) Be designed, implemented, and analyzed in accordance with commonly accepted principles of survey design and statistical analysis;

(iii) Address enrollees/disenrollees satisfaction with the quality of the services provided and their degree of access to the services; and

(iv) Be conducted no later than 1 year after the effective date of the incentive plan, and at least every 2 years thereafter.

(2) Ensure that all physicians and physician groups at substantial financial risk have either aggregate or per-patient stop-loss protection in accordance with the following requirements:

(i) If aggregate stop-loss protection is provided, it must cover 90 percent of the costs of referral services (beyond allocated amounts) that exceed 25 percent of potential payments.

(ii) If the stop-loss protection provided is based on a per-patient limit, the stop-loss limit per patient must be determined based on the size of the

patient panel. In determining patient panel size, the patients may be pooled using one of the methods set forth in paragraph (h)(1)(v) of this section if pooling is consistent with the relevant contract between the physician or physician group and the organization. Stop-loss protection must cover 90 percent of the costs of referral services that exceed the per patient limit. The per-patient stop-loss limit is as follows:

(A) Less than 1,000 patients—$10,000.

(B) 1,000 to 10,000 patients—$30,000.

(C) 10,000 to 25,001 patients—$200,000.

(D) Greater than 25,000 patients—

(*1*) Without pooling patients—none; and

(*2*) As a result of pooling patients—$200,000.

(iii) The organization may provide the stop-loss protection directly or purchase the stop-loss protection, or the physician or physician group may purchase the stop-loss protection. If the physician or physician group purchases the stop-loss protection, the organization must pay the portion of the premium that covers its enrollees or reduce the level at which the stop-loss protection applies by the cost of the stop-loss.

(h) *Disclosure requirements for organizations with physician incentive plans*—(1) *Disclosure to HCFA.* Each organization must provide to HCFA information concerning its physician incentive plans as required or requested. The disclosure must contain the following information in detail sufficient to enable HCFA to determine whether the incentive plan complies with the requirements specified in this section:

(i) Whether services not furnished by the physician or physician group are covered by the incentive plan. If only the services furnished by the physician or physician group are covered by the incentive plan, disclosure of other aspects of the plan need not be made.

(ii) The type of incentive arrangement; for example, withhold, bonus, capitation.

(iii) If the incentive plan involves a withhold or bonus, the percent of the withhold or bonus.

(iv) The amount and type of stop-loss protection.

(v) The panel size and, if patients are pooled according to one of the following permitted methods, the method used:

(A) Including commercial, Medicare, and/or Medicaid patients in the calculation of the panel size.

(B) Pooling together, by the organization, of several physician groups into a single panel.

(vi) In the case of capitated physicians or physician groups, capitation payments paid to primary care physicians for the most recent year broken down by percent for primary care services, referral services to specialists, and hospital and other types of provider (for example, nursing home and home health agency) services.

(vii) In the case of those prepaid plans that are required to conduct beneficiary surveys, the survey results.

(2) *When disclosure must be made to HCFA.* (i) An organization must provide the information required by paragraph (h)(1) of this section to HCFA—

(A) Upon application for a contract;

(B) Upon application for a service area expansion; and

(C) Within 30 days of a request by HCFA.

(ii) An organization must notify HCFA at least 45 days before implementing any of the following changes in its incentive plan:

(A) A change as to the type of incentive plan.

(B) A change in the amounts of risk or stop-loss protection.

(C) Expansion of the risk formula to cover services not furnished by the physician group that the formula had not included previously.

(3) *Disclosure to Medicare beneficiaries.* An organization must provide the following information to any Medicare beneficiary who requests it:

(i) Whether the prepaid plan uses a physician incentive plan that affects the use of referral services.

(ii) The type of incentive arrangement.

(iii) Whether stop-loss protection is provided.

(iv) If the prepaid plan was required to conduct a survey, a summary of the survey results.

(i) *Requirements related to subcontracting arrangements*—(1) *Physician groups.* An organization that contracts with a physician group that places the individual physician members at substantial financial risk for services they do not furnish must do the following:

(i) Disclose to HCFA any incentive plan between the physician group and its individual physicians that bases compensation to the physician on the use or cost of services furnished to Medicare beneficiaries or Medicaid recipients. The disclosure must include the information specified in paragraphs (h)(1)(i) through (h)(1)(vii) of this section and be made at the times specified in paragraph (h)(2) of this section.

(ii) Provide adequate stop-loss protection to the individual physicians.

(iii) Conduct enrollee surveys as specified in paragraph (g)(1) of this section.

(2) *Intermediate entities.* An organization that contracts with an entity (other than a physician group) for the provision of services to Medicare beneficiaries must do the following:

(i) Disclose to HCFA any incentive plan between the entity and a physician or physician group that bases compensation to the physician or physician group on the use or cost of services furnished to Medicare beneficiaries or Medicaid recipients. The disclosure must include the information required to be disclosed under paragraphs (h)(1)(i) through (h)(1)(vii) of this section and be made at the times specified in paragraph (h)(2) of this section.

(ii) If the physician incentive plan puts a physician or physician group at substantial financial risk for the cost of services the physician or physician group does not furnish—

(A) Meet the stop-loss protection requirements of this subpart; and

(B) Conduct enrollee surveys as specified in paragraph (g)(1) of this section.

(3) For purposes of paragraph (i)(2) of this section, an entity includes, but is not limited to, an individual practice association that contracts with one or more physician groups and a physician hospital organization.

(j) *Sanctions against the organization.* HCFA may apply intermediate sanctions, or the Office of Inspector General may apply civil money penalties described at § 417.500, if HCFA determines that an eligible organization fails to comply with the requirements of this section.

3. In § 417.500, the introductory text of paragraph (a) is republished, and a new paragraph (a)(9) is added to read as follows:

§ 417.500 Sanctions against HMOs and CMPs.

(a) *Basis for imposition of sanctions.* HCFA may impose the intermediate sanctions specified in paragraph (d) of this section, as an alternative to termination, if HCFA determines that an HMO or CMP does one or more of the following:

* * * * *

(9) Fails to comply with the requirements of §§ 417.479(d) through (i) relating to physician incentive plans.

* * * * *

PART 434—CONTRACTS

B. Part 434 is amended as follows:

1. The authority citation for part 434 continues to read as follows:

Authority: Secs. 1102 of the Social Security Act (42 U.S.C. 1302).

2. In § 434.44, the introductory text of paragraph (a) is republished, and paragraph (a)(1) is revised to read as follows:

§ 434.44 Special rules for certain health insuring organizations.

(a) A health insuring organization that first enrolls patients on or after January 1, 1986, and arranges with other providers (through subcontract, or through other arrangements) for the delivery of services (as described in §§ 434.21(b)) to Medicaid enrollees on a prepaid capitation risk basis is—

(1) Subject to the general requirements set forth in § 434.20(d) concerning services that may be covered and § 434.20(e) which sets forth the requirements for all contracts, the additional requirements set forth in §§ 434.21 through 434.38 and the Medicaid agency responsibilities specified in subpart E of this part; and

* * * * *

3. In § 434.67, the introductory text of paragraph (a) is republished, and a new paragraph (a)(5) is added to read as follows:

§ 434.67 Sanctions against HMOs with risk comprehensive contracts.

(a) Basis for imposition of sanctions. The agency may recommend that the intermediate sanction specified in paragraph (e) of this section be imposed if the agency determines that an HMO with a risk comprehensive contract does one or more of the following:

* * * * *

(5) Fails to comply with the requirements of §§ 417.479(d) through (g) of this chapter relating to physician incentive plans, or fails to submit to the State Medicaid agency its physician incentive plans as required or requested in § 434.70.

* * * * *

4. Section 434.70 is revised to read as follows:

§ 434.70 Condition for FFP.

(a) FFP is available in expenditures for payments to contractors only for the periods that—

(1) The contract—

(i) Meets the requirements of this part;

(ii) Meets the appropriate requirements of 45 CFR part 74; and

(iii) Is in effect;

(2) The HMO or HIO complies with the physician incentive plan requirements specified in §§ 417.479(d) through (g) of this chapter and the requirements related to subcontracts set forth at § 417.479(i) of this chapter if the subcontract is for the provision of services to Medicaid recipients;

(3) The HMO or HIO (or, in accordance with § 417.479(i) of this chapter, the subcontracting entity) has supplied the information on its physician incentive plan listed in §§ 417.479(h)(1) of this chapter to the State Medicaid agency. The information must contain detail sufficient to enable the State to determine whether the plan complies with the requirements of §§ 417.479(d) through (g) of this chapter. The HMO or HIO must supply this information to the State Medicaid agencies as follows:

(i) Upon application for a contract.

(ii) At least 45 days before implementing any of the following changes in its incentive plan:

(A) A change as to the type of incentive plan.

(B) A change in the amounts of risk or stop-loss protection.

(C) Expansion of the risk formula to cover services not furnished by the physician group that the formula had not included previously.

(iii) Within 30 days of a request by the State or HCFA; and

(4) The HMO or HIO has provided the information on physician incentive plans listed in § 417.479(h)(3) of this chapter to any Medicaid recipient who requests it.

(b) HCFA may withhold FFP for any period during which—

(1) The State fails to meet the State plan requirements of this part;

(2) Either party to a contract substantially fails to carry out the terms of the contract; or

(3) The State fails to obtain from each HMO or HIO contractor proof that it meets the requirements for physician incentive plans specified in §§ 417.479(d) through (g) and (i) of this chapter.

CHAPTER V—OFFICE OF INSPECTOR GENERAL—HEALTH CARE, DEPARTMENT OF HEALTH AND HUMAN SERVICES

II. 42 CFR part 1003 is amended as set forth below:

PART 1003—CIVIL MONEY PENALTIES, ASSESSMENTS AND EXCLUSIONS

1. The authority citation for part 1003 continues to read as follows:

Authority: 42 U.S.C. 1302, 1320a–7, 1320a–7a, 1320b–10, 1395mm, 1395ss(d), 1395u(j), 1395u(k), 1396b(m), 11131(c) and 11137(b)(2).

2. In § 1003.100, paragraph (b)(1) introductory text is revised and paragraph (b)(1)(vii) is revised to read as follows:

§ 1003.100 Basis and purpose.

* * * * *

(b) *Purpose.* * * *

(1) Provides for the imposition of civil money penalties and, as applicable, assessments against persons who—

* * * * *

(vii) Substantially fail to provide an enrollee with required medically necessary items and services, or who engage in certain marketing, enrollment, reporting, claims payment, employment or contracting abuses, or that do not meet the requirements for physician incentive plans for Medicare specified in §§ 417.479 (d) through (i) of this title;

* * * * *

3. Section 1003.101 is amended by adding, in alphabetical order, a definition for the term "Physician incentive plan" to read as follows:

§ 1003.101 Definitions.

* * * * *

Physician incentive plan means any compensation arrangement between a contracting organization and a physician group that may directly or indirectly have the effect of reducing or limiting services provided with respect to enrollees in the organization.

* * * * *

4. In § 1003.103, paragraph (f)(1) introductory text is republished, paragraphs (f)(1)(iv) and (f)(1)(v) are revised, and a new paragraph (f)(1)(vi) is added, to read as follows:

§ 1003.103 Amount of penalty.

* * * * *

(f)(1) The OIG may, in addition to or in lieu of other remedies available under law, impose a penalty of up to $25,000 for each determination by HCFA that a contracting organization has—

* * * * *

(iv) Misrepresented or falsified information furnished to an individual or any other entity under section 1876 or section 1903(m) of the Act;

(v) Failed to comply with the requirements of section 1876(g)(6)(A) of the Act, regarding prompt payment of claims; or

(vi) Failed to comply with the requirements of §§ 417.479 (d) through (i) of this title for Medicare, and §§ 417.479 (d) through (g) and (i) of this title for Medicaid, regarding certain prohibited incentive payments to physicians.

* * * * *

5. In § 1003.106, paragraph (a)(5) introductory text is republished; paragraphs (a)(5)(vii) and (a)(5)(viii) are redesignated as paragraphs (a)(5)(viii) and (a)(5)(ix), respectively; and a new paragraph (a)(5)(vii) is added to read as follows:

§ 1003.106 Determinations regarding the amount of the penalty and assessment.

(a) * * *

(5) In determining the appropriate amount of any penalty in accordance with § 1003.103(f), the OIG will consider, as appropriate—

* * * * * *

(vii) The extent to which the failure to provide medically necessary services could be attributed to a prohibited inducement to reduce or limit services under a physician incentive plan and the harm to the enrollee which resulted or could have resulted from such failure. It would be considered an aggravating factor if the contracting organization knowingly or routinely engaged in any prohibited practice which acted as an inducement to reduce or limit medically necessary services provided with respect to a specific enrollee in the organization;

BILLING CODE 4120–01–P

UTAH RECLAMATION MITIGATION AND CONSERVATION COMMISSION

43 CFR Part 10001

Operating Procedures

AGENCY: Utah Reclamation Mitigation and Conservation Commission.

ACTION: Final rule.

SUMMARY: This part establishes the final rule that describes the operating procedures of the agency established by the Central Utah Project Completion Act. The rule meets the requirement of the Administrative Procedure Act that directs each agency to publish its organizational structure and functions in the **Federal Register** for the guidance of the public.

EFFECTIVE DATE: February 5, 1996.

FOR FURTHER INFORMATION CONTACT: Michael C. Weland, Executive Director, Utah Reclamation Mitigation and Conservation Commission, 111 East Broadway, Suite 310, Salt Lake City, Utah, 84111. Telephone (801) 524–3146.

SUPPLEMENTARY INFORMATION: The final rule was adopted by the Utah Reclamation Mitigation and Conservation Commission in public session February 5, 1996.

List of Subjects in 43 CFR Part 10001

Administrative practice and procedures, Organization and functions (Government Agencies).

Chapter III of title 43 of the Code of Federal Regulations is amended to add new part as follows:

PART 10001—OPERATING PROCEDURES

Sec.

10001.1 Commissioners.
10001.2 Meetings.

Authority: Sec. 301, Pub. L. 102–575, 106 Stat 4625.

§10001.1 Commissioners.

(a) Three members of the Commission shall constitute a quorum.

(b) The affirmative vote of at least three members of the Commission in attendance at a meeting at which a quorum is present, on any matter within their duties and responsibilities, shall constitute the Commission's action, except as otherwise provided herein.

(1) The Commission may not take action on a matter not appearing on the published agenda for a particular meeting except upon the unanimous vote of the members present.

(2) Any proposed Commission action must be moved by a Commission member and seconded by another member before a vote may be taken by the Commission. Other questions of procedure will be decided by reference to generally accepted principles of parliamentary procedure, as determined by the Chairman or the Chairman's designee.

(3) A member who is present at a meeting of the Commission at which action on any matter is taken shall be presumed to have assented to the action taken unless that member's abstention or dissent shall have been entered into the minutes of the meeting or unless that member shall file a written dissent to such action with the Chairman before the adjournment of the meeting. A written dissent shall not apply to a member who voted in favor of such action.

(4) In a case where a member is recused due to a conflict in a particular matter, the member shall not be present during, nor take any part in, the proceedings on that matter and shall not be counted as having voted.

(5) No member of the Commission may appoint another individual, including another member, by proxy or otherwise, to assume his or her responsibilities or vote on his or her behalf as a member of the Commission.

(c) There shall be one office of Chairman of the Commission to be held by a member of the Commission.

(1) The Chairman shall be elected by an affirmative vote by at least three members of the Commission and shall hold office for one year, commencing immediately upon election, or until resignation from the office or the Commission.

(2) The Chairman shall be the presiding officer of the Commission and shall perform the following duties and responsibilities:

(i) Preside at all meetings of the Commission;

(ii) Vote on all matters requiring Commission action;

(iii) Execute all contracts, agreements, resolutions, and other documents approved and authorized by the Commission, except as otherwise delegated by the Commission;

(iv) Preside at ceremonial activities sponsored by the Commission and represent the Commission at other ceremonial activities upon invitation;

(v) Appoint any other member of the Commission to serve as Acting Chairman in the absence of the Chairman and Vice-Chairman; and

(vi) Serve as spokesperson for the Commission, unless otherwise directed by the Commission. When the Chairman or any other member of the Commission speaks as an individual member of the Commission, the Chairman or member shall state when he or she is representing his or her own views and not the consensus of the Commission as a whole.

(3) A member may not serve as Chairman for more than four consecutive full one-year terms.

(4) Whenever a vacancy occurs in the office of Chairman, the members shall at their next meeting elect a successor to fill the vacancy for the unexpired term.

(d) The Commission may, upon an affirmative vote by at least three members, elect one of its members to serve as Vice-Chairman.

(1) The Vice-Chairman, whenever such office may from time to time be established, shall perform all of the duties of the Chairman of the Commission when the Chairman is unable for any reason to act or when for any reason there is a vacancy in the office of Chairman.

(2) The term of office for the Vice-Chairman shall be one year, commencing immediately upon election unless otherwise established by the Commission.

(e) The Chairman or Vice-Chairman may be removed from office by an affirmative vote of at least four members of the Commission whenever in its judgment the best interests of the Commission would be served.

(f) Except as provided in paragraph (f)(1), of this section members of the Commission shall each be paid at a rate equal to the daily equivalent of the maximum of the annual rate of basic pay in effect for grade GS–15 of the General Schedule for each day (including travel time) during which they are engaged in the actual performance of duties vested in the Commission.

(1) Members of the Commission who are full-time officers or employees of the United States or the State of Utah shall receive no additional pay by reason of their service on the Commission.

(2) Members of the Commission who are eligible for compensation under this paragraph shall be paid for the performance of the following activities:

(i) Preparation for and attendance at regularly scheduled meetings of the Commission or Commission meetings called pursuant to § 10001.2(a);

(ii) Preparation for and attendance at Commission inspections of mitigation and conservation projects;

(iii) Preparation for and attendance at ceremonial activities sponsored by the Commission; and

(iv) Upon the prior or subsequent approval of the Commission, preparation for and attendance at other meetings, or the performance of any activities assigned by the Commission.

(g) All members of the Commission, as special or intermittent Federal employees, shall be entitled to advances or reimbursement of expenses incurred in the performance of the activities described in paragraph (f) of this section in accordance with the applicable Federal regulations.

§ 10001.2 Meetings.

(a) The Commission shall meet at least quarterly each year and may meet at the call of the Chairman or upon the request of a majority of its members.

(1) Commission members may participate in a Commission meeting through the use of conference telephone or similar communications equipment with the consent of the Chairman, provided that all members so participating, members at the meeting, and attending members of the public, can hear each other clearly at all times.

(2) All meetings of the Commission shall be open and public, and all persons are permitted to attend except when the Commission meets in executive or work session.

(i) Site visits by a quorum of the Commission are not considered to be meetings of the Commission; however, whenever feasible, interested members of the press will be invited to accompany the Commission on site visits.

(ii) Paragraph (a)(2) of this section shall not be interpreted so as to prohibit the removal of any person who willfully disrupts a meeting.

(3) The Commission may meet in executive session at any time and for any purpose authorized by law.

(i) It is the intention of the Commission that its meetings should generally be open and public, and that executive sessions should be held only when permitted by law or when the reasons for the executive session clearly exceed the merits of public disclosure.

(ii) A unanimous vote of the members present is required to move into executive session.

(iii) The Commission shall not authorize or approve any mitigation or conservation plan, amendment, or project while in executive session, and shall report a summary of all non-exempt information from such sessions at the next open meeting.

(iv) In the course of an executive session, any member may request that the matter under discussion be moved into an open meeting. Upon receiving such a request, the Chairman shall poll the members present in the executive session. If a majority agree to move the matter into an open meeting, the Chairman will close the discussion of the matter and schedule it for consideration at the next open meeting of the Commission.

(b) The agenda for each Commission meeting shall be established by the Chairman upon recommendation from any member of the Commission or the Executive Director and shall briefly set out all items of business expected to come before the Commission at the meeting for action, consideration, or information, and identify items upon which the Commission will accept public comment.

(1) The agenda shall specify the time and location of the meeting.

(2) At least seven calendar days prior to a Commission meeting, the Executive Director shall publish the agenda for the upcoming meeting by providing copies to all members of the Commission, to major news media, and to all individuals, agencies, and organizations who have requested in writing to be given notice of Commission meetings.

(3) The deadline for submission to the Executive Director of items for Commission meetings shall be ten business days prior to the date of the meeting as previously set by the Commission.

(4) Any person appearing before the Commission to comment on an agenda item shall do so only when called by the Chairman. They shall state their name clearly for the record and may then address the Commission on the issue then under consideration, subject to reasonable time limits on the issue and individual speakers as established by the Chairman.

(5) The Executive Director shall make available for inspection by the public, at the commencement of and during a Commission meeting, copies of the meeting agenda and of any written material that is not exempt from public disclosure and that has been distributed in advance of the meeting to the Commission members for action, consideration, or information at the meeting. If non-exempt written material is distributed to the members during the meeting, copies thereof shall be made available for public inspection at the same time or as soon thereafter as practicable.

(6) Any person desiring to appear and present an item for Commission consideration shall file a written request to do so with the Executive Director. The request shall state the nature of the matter to be considered by the Commission. The Chairman shall then determine whether the matter should be placed on the agenda for a Commission meeting or should be referred to the Executive Director.

(c) The Executive Director shall record, or have recorded, by tape recording and stenographic notes, official minutes of all open portions of Commission meetings.

(1) The written minutes shall contain the following information:

(i) the date, time, and location of the meeting, together with the names of all members present and absent, the names of all staff present, and a copy of the registration list of others attending the meeting;

(ii) the substance of all matters proposed, considered, or decided, including actions to go into executive session and summaries of non-exempt information from executive sessions;

(iii) the names of all individuals who appeared before the Commission and the substance in brief of their comments;

(iv) all motions (including the identity of the moving and seconding members),

votes, and major decisions of the Commission; and

(v) any other information a member requests be entered in the minutes.

(2) The draft of the written minutes shall be prepared and forwarded to the members by the Executive Director in a reasonable time after the meeting. The members shall inform the Executive Director or his or her designee of any proposed additions or corrections prior to the final draft being sent to the members with the packet of materials for the next Commission meeting.

(3) The Commission shall approve the written minutes at its next regularly scheduled meeting. Upon such approval, the Chairman shall certify the approval of the minutes by signing the original document. One year after adoption of the minutes, the Executive Director shall cause the tape recording of the meeting to be erased and all stenographic notes to be destroyed, unless otherwise directed by the Commission.

(4) Within a reasonable time after approval of the minutes by the Commission, the Executive Director shall make the approved minutes available for public inspection.

(5) The Executive Director shall provide copies of the certified minutes to each member and maintain the original of the certified minutes in the agency files and archives.

Joan Degiorgio,

Acting Executive Director.

BILLING CODE 4316–05–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 625

[Docket No. 960314074–6074–01; I.D. 030696C]

RIN: 0648–XX52

Summer Flounder Fishery; Emergency for the Scup Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Emergency interim rule.

SUMMARY: NMFS amends the regulations implementing the Summer Flounder Fishery Management Plan (Summer Flounder FMP) to establish management measures for the scup fishery. These measures are contained in an amendment to the Summer Flounder FMP that will be submitted for NMFS review shortly. Emergency implementation of these measures is necessary because of the overexploited status of the stock. This action establishes a minimum fish size for both the recreational and commercial fisheries, and implements a minimum codend mesh requirement for otter trawl vessels that possess 4,000 lb or more (1,814 kg or more) of scup harvested in or from the exclusive economic zone (EEZ).

EFFECTIVE DATE: This emergency interim rule is effective from March 22, 1996, through June 25, 1996.

ADDRESSES: Copies of documents supporting this action, including the environmental assessment, are available from David R. Keifer, Executive Director, Mid-Atlantic Fishery Management Council, Room 2115 Federal Building, 300 S. New Street, Dover, DE 19901-6790.

FOR FURTHER INFORMATION CONTACT: Regina L. Spallone, Fishery Policy Analyst, (508)281–9221.

SUPPLEMENTARY INFORMATION: The Mid-Atlantic Fishery Management Council (Council) began the development of a scup fishery management plan (scup FMP) in 1978. Although preliminary development work was done, a scup FMP was not completed.

In January 1990, the Council and the Atlantic States Marine Fisheries Commission (ASMFC) began the development of an amendment to the Summer Flounder FMP to manage scup. However, the development of an amendment to manage scup was delayed because of a series of other amendments to the Summer Flounder FMP. Work on a separate scup FMP was not resumed until 1993.

The Council and the ASMFC adopted a scup FMP for NMFS review in November 1995. The Council had accelerated its work on the scup FMP after the release in March 1995 of the Plenary Report of the 19th Stock Assessment Workshop (19th SAW). The 19th SAW report established that the scup spawning stock biomass was at a record low level, and warned that recruitment failure in a single year could collapse the fishery. The report urged immediate action to substantially reduce fishing mortality. To provide some protection to the stock immediately, the Council also voted in November 1995 to request emergency implementation on January 1, 1996, of some of the management measures contained in the proposed scup FMP. The efforts of the Council and NMFS to prepare and review the required documents associated with emergency action were delayed by the government shutdown from December 21, 1995, through January 7, 1996, and by additional shutdowns due to severe winter weather.

These delays have also affected the submission of the proposed scup FMP. In addition, subsequent to the adoption of the scup FMP by the Council, NMFS requested that the proposed scup FMP be incorporated into the Summer Flounder FMP, as an amendment, to reduce the number of separate FMPs and regulations. As a result, the Council shortly will submit the scup FMP for NMFS review as Amendment 8 to the Summer Flounder FMP.

The management unit for the fishery is scup (*Stenotomus chrysops*) in U.S. waters of the Atlantic Ocean from 35°15.3′ N. lat., the latitude of Cape Hatteras Light, N.C., northward to the U.S.-Canadian border.

Implementing regulations are authorized by the Magnuson Fishery Conservation and Management Act (Magnuson Act), and are found at 50 CFR part 625, subparts C and D. This action is consistent with the criteria contained in a "Notice of policy guidelines for the use of emergency rules" published at 50 CFR chapter VI (57 FR 375, January 6, 1992). The Council and NMFS agree that the biological status of the scup stock requires immediate action through this emergency interim rule for conservation and management measures to protect the stock while Amendment 8 undergoes Secretarial review. The measures contained in this action for minimum fish sizes and minimum mesh size are the same as those adopted by the Council for Amendment 8. However, issuance of this emergency rule in no way prejudges approval or disapproval of Amendment 8. Further, this emergency rule contains a gear restriction, the effective date of which will be delayed 15 days to provide adequate time for affected industry members to adjust.

Background

Abundance indices derived from NMFS trawl surveys and surveys conducted by the States of Rhode Island and Connecticut, and the Commonwealth of Massachusetts, indicate that the biomass of adult scup is at low levels. For example, the Northeast Fisheries Science Center's autumn offshore survey indices of scup (age 1+) abundance have declined dramatically in recent years. The 1993 index was the third lowest value observed in the time series and the 1994 index was the all-time lowest value since the survey began in 1967.

Reduced abundance is also evident in data collected from commercial otter trawl vessels. Standardized catch per unit effort (CPUE) of these vessels peaked in 1978 at greater than 2.5 metric tons (mt)/day. CPUE has since trended downward to about 1.0 mt/day in recent years. Based on the trawl survey and CPUE indices, the overall declining trend suggests that recent exploitation has reduced stock abundance substantially.

Additionally, the length frequency distribution of scup in commercial landings has shifted to smaller, younger fish, including young-of-year, indicating that the fishery is dependent primarily upon new year classes. Although scup may attain ages of 20 years, recent landings have been composed primarily of age 2 and 3 year old scup with a general absence of larger, older fish in the landed catch. This truncated age distribution also suggests a reduced population level.

All available information indicates that scup are overexploited and have been for several years. The scup advisory report issued from the 19th Stock Assessment Workshop Plenary Report in March 1995 stated that the current spawning stock biomass (SSB) is at a record low level and that recruitment has decreased in recent years. The report further warns that recruitment failure in a single year could collapse the fishery and that fishing mortality should be "substantially reduced immediately." The current condition of the resource is such that immediate action is required to reduce fishing mortality on fully-recruited fish and allow for increases in SSB and yield. In the absence of a strong year class, continued exploitation at current levels will lead to further decline in the SSB.

In light of the overexploited condition of the stock, the Council requested emergency implementation of a 9–inch total length (TL) minimum fish size for the commercial fishery, and a 7–inch TL minimum fish size for the recreational fishery. These measures are included among those proposed for implementation in the first year of management if Amendment 8 is approved.

Discards of small fish are extremely high in this fishery and are particularly acute during years of good recruitment when small fish are abundant. NMFS has found that establishing a minimum fish size without an accompanying minimum mesh requirement would increase the discard of small fish. Therefore, this emergency action also establishes a 4–inch (10.2–cm) minimum codend mesh size for otter trawl vessels when those vessels possess 4,000 lb or more (1,814 kg or more) of scup harvested in or from the EEZ. The 4,000–lb (1,814–kg) threshold for the minimum mesh size requirement was selected through an iterative process between the Council and industry representatives. It is considered to represent the level at which the directed fishery is differentiated from the bycatch fishery. This level is substantiated by the fact that trips of 4,000 lb (1814 kg) or more accounted for 80 percent of all landings of scup in 1992 and 1993. The measures are designed to reduce discarding of small scup by otter trawl vessels, increase yields, and allow more scup to reach sexual maturity and spawn.

Analyses of these measures indicate that implementation on an emergency basis may impose a short-term cost on some harvesters, although most already use the required mesh. The benefits of implementing this action include a reduction of discards of small fish and an improved economic return to the industry due to resulting increased yields. The benefits outweigh the costs to the industry of complying with these measures.

Classification

The Assistant Administrator Fisheries, NOAA (AA) has determined that this rule is necessary to respond to an emergency situation and is consistent with the Magnuson Act and other applicable law.

The AA finds that failure to implement the actions in this emergency rule could result in collapse of the fishery.

The foregoing constitutes good cause to waive the requirement to provide prior notice and an opportunity for public comment, pursuant to the authority set forth at 5 U.S.C. 553(b)(B), as such procedures would be contrary to the public interest. Similarly, the need to implement these measures in a timely manner to address a biological emergency constitutes good cause under 5 U.S.C. 553(d)(3) to waive the 30-day delay in effectiveness. However, a 15-day delay in effectiveness of the gear restriction contained in § 625.54, and a prohibition related to that measure in § 625.39(a)(3), is necessary to allow the industry sufficient time to adjust to this new requirement.

This emergency rule has been determined to be not significant for purposes of E.O. 12866.

The emergency rule is exempt from the requirements of the Regulatory Flexibility Act to prepare a regulatory flexibility analysis because this rule is not required to be issued with prior notice and opportunity for public comment.

List of Subjects in 50 CFR Part 625

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: March 20, 1996.

Gary Matlock,

Program Management Officer, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 625 is amended as follows:

PART 625—SUMMER FLOUNDER AND SCUP FISHERY

1. The authority citation for part 625 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. Subpart C, consisting of §§ 625.31, 625.32, 625.33, and 625.39, and subpart D, consisting of §§ 625.53 and 625.54 are added to read as follows:

Subpart C—General Provisions, Scup
625.31 Purpose and scope.
625.32 Definitions.
625.33 Relation to other laws.
625.39 Prohibitions.
Subpart D—Management Measures, Scup
625.53 Minimum sizes.
625.54 Gear restrictions.

Subpart C—General Provisions, Scup

§ 625.31 Purpose and scope.

The regulations in this part govern the conservation and management of scup.

§ 625.32 Definitions.

In addition to the definitions in the Magnuson Act and in § 620.2 of this chapter, the terms used in this part have the following meanings:

Charter or party boat means any vessel that carries passengers for hire to engage in fishing.

Commercial fishing means fishing that is intended to or results in the barter, trade or sale of fish.

Land means to begin offloading fish, to offload fish, or to enter port with fish.

Recreational fishing means fishing that is not intended to, nor does it result in, the barter, trade, or sale of fish.

Recreational fishing vessel means any vessel from which no fishing other than recreational fishing is conducted. Charter and party boats are considered recreational fishing vessels for purposes of the scup minimum size requirement.

Scup means the species *Stenotomus chrysops*.

Total length (TL) means the straight-line distance from the tip of the snout to the end of the tail (caudal fin) while the fish is lying on its side.

§ 625.33 Relation to other laws.

(a) The relation of this part to other laws is set forth in § 620.3 of this chapter and paragraph (b) of this section.

(b) Nothing in these regulations supersedes more restrictive state management measures.

§ 625.39 Prohibitions.

(a) In addition to the general prohibitions specified in § 620.7 of this chapter, it is unlawful for any person owning or operating a vessel fishing commercially for scup, which are harvested in or from the EEZ, to do any of the following:

(1) Land or possess at sea any scup, or parts thereof, that fail to meet the minimum fish sizes specified in § 625.53(a);

(2) Sell any scup harvested in or from the EEZ that fail to meet the minimum fish size specified in § 625.53(a).

(3) Possess 4,000 or more lb (1,814.4 or more kg) of scup harvested in or from the EEZ unless the vessel meets the minimum mesh size requirement specified in § 625.54(a).

(4) Fish with or possess nets or netting in the EEZ that do not meet the minimum mesh requirement, or that are modified, obstructed, constricted, or constructed with mesh in which the bars entering or exiting the knots twist around each other, if subject to the minimum mesh requirement specified in § 625.54, unless the nets or netting are stowed in accordance with § 625.24(d).

(5) Engage in recreational fishing in the EEZ while simultaneously conducting commercial fishing operations.

(b) It is unlawful for the owner or operator of any recreational fishing vessel, including party or charter boats, to: (1) Possess scup harvested in or from the EEZ smaller than the minimum size limit for recreational fishermen established pursuant to § 625.53(b);

(2) [Reserved]

(c) It is unlawful for any person to do any of the following:

(1) Purchase any scup harvested in or from the EEZ that fail to meet the minimum fish size specified in § 625.53(a).

(2) Possess any scup harvested in or from the EEZ that fail to meet the minimum fish size specified in § 625.53(b).

(3) Sell any scup harvested in or from the EEZ that fail to meet the minimum fish sizes specified in § 625.53(a).

(4) Land any scup harvested in or from the EEZ in fillet form with the skin removed.

Subpart D—Management Measures, Scup

§ 625.53 Minimum sizes.

(a) The minimum size for scup is 9 inches (22.9 cm) total length for all vessels engaged in commercial fishing.

(b) The minimum size for scup is 7 inches (17.8 cm) TL for all vessels that are engaged in recreational fishing.

(c) The minimum size applies to whole fish or any part of a fish found in possession, e.g., fillets.

§ 625.54 Gear restrictions.

(a) *General.* Applicable April 8, 1996, otter trawl vessels that land or possess 4,000 lb or more (1,814.4 kg or more) of scup harvested in or from the EEZ must fish with nets that have a minimum mesh size of 4 inches (10.2 cm) applied throughout the codend for at least 75 continuous meshes forward of the terminus of the net, or, for codends with less than 75 meshes, the minimum-mesh-size codend must be a minimum of one-third of the net, measured from the terminus of the codend to the head rope, excluding any turtle excluder device extension.

(b) *Mesh-size measurement.* Mesh sizes will be measured according to the procedure described in § 625.24(c).

(c) *Net modification and mesh obstruction and constriction.* Vessels are prohibited from modifying, obstructing, and/or constricting their nets as described in § 625.24(d) and (e).

(d) *Stowage of nets.* Applicable APril 8, 1996, otter trawl vessels retaining 4,000 lb or more (1,814.4 or more kg) of scup harvested in or from the EEZ, and subject to the minimum mesh requirement specified in paragraph (a) of this section may not have available for immediate use any net, or any piece of net, not meeting the minimum mesh size requirement, or mesh that is rigged in a manner that is inconsistent with the minimum mesh size. A net that conforms to the specifications specified in § 625.24(f) and that can be shown not to have been in recent use is considered to be not "available for immediate use."

RIN 0648–XX50

American Lobster Fishery; Emergency Gear Conflict Regulations

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Emergency interim rule.

SUMMARY: NMFS, by emergency interim rule, amends the regulations implementing the American Lobster Fishery Management Plan (FMP). This emergency rule implements a prohibition on mobile gear vessels fishing in newly defined Restricted Gear Areas I and II; a prohibition on lobster pot vessels fishing in and lobster pots in newly defined Restricted Gear Area III; and a requirement that all mobile gear vessels in Restricted Gear Areas I and II and all lobster pot (fixed gear) vessels in Restricted Gear Area III stow their gear while transiting the restricted gear areas. The intended effect is to reduce gear losses caused by use of fixed and mobile gear simultaneously in the same area.

EFFECTIVE DATE: April 1, 1996 through June 25, 1996. Restricted Gear Areas I and II will be closed to mobile gear for the duration of this emergency action. Restricted Gear Area III will be closed April 1, 1996 through April 30, 1996, to fishing by fixed gear vessels.

ADDRESSES: Copies of the Environmental Assessment supporting this action may be obtained from Douglas Marshall, Executive Director, New England Fishery Management Council (Council), 5 Broadway, Saugus, MA 01906–1097.

FOR FURTHER INFORMATION CONTACT: Paul H. Jones, Fishery Policy Analyst, 508–281–9273.

SUPPLEMENTARY INFORMATION:

Background

American lobster pot gear vessels began losing fixed gear in the offshore waters of Southern New England as a result of increased trawling by mobile gear fishers targeting monkfish during 1991. In 1992, offshore lobster fishers and some mobile gear fishers sought assistance from the Council. At that time, the Council believed that voluntary industry agreements were preferable to regulatory action. The Council helped several groups of fixed and mobile gear fishers draft and circulate the "Southern New England Offshore Gear Conflict Resolution." The agreement was initially effective, because the fishers designed it to allow them to fish their gear in the most productive areas and seasons. Both fixed and mobile gear fishers gave up access to fishing grounds when they were less productive to gain easier access to grounds during more productive seasons. Besides setting aside areas to separate fixed and mobile gear, the resolution stressed cooperation and good communication among the different fishing groups. Due to the resolution, the fishers reported much greater cooperation and significantly less gear loss.

During the 1994–95 season conflicts rapidly escalated as mobile gear fishers changed their fishing practices. The pursuit of alternative species, declining abundances of traditional species, additional regulations to reduce fishing on stressed fish stocks, and changing market conditions all have contributed to the recent increase in gear conflicts. New mobile gear fishers targeting monkfish with deepwater trawls frequently failed to recognize the agreement and gear conflicts increased.

Because of the increase in gear conflicts, the Council decided at its February 1995 meeting to hold additional meetings and reemphasize its support of the voluntary agreement. The Council also warned that regulations designed to reduce the gear conflicts would be developed if the voluntary agreement continued to be ineffective. Continued efforts by the Council to resolve the problem through voluntary means were not successful during the first half of 1995.

Due to these failed efforts and the anticipated economic hardship, the Council requested on August 21, 1995, that NMFS take Secretarial emergency action to implement segments of the voluntary agreement by regulation. On September 13, 1995, NMFS disapproved the request, because the situation described by the Council in the emergency request was a longstanding one and the recent escalation from increased monkfish trawling was known to the Council the previous fall, the proposed boundaries were unenforceable, and the Council had not proposed a permanent solution to the problem.

On October 25, 1995, the Council announced that gear conflicts had increased. The U.S. Coast Guard affirmed this statement by reporting that gear conflicts had almost doubled those for October 1994. Due to the unanticipated level of the increase in fishing effort for monkfish in areas where lobster fishers place their traps during the winter, the Council reiterated its request for Secretarial emergency action on October 25, 1995, and modified its August 21, 1995, request to include defined straight lines by latitude and longitude, rather than the fathom contoured lines defined in their last request. The Council's Gear Conflict Committee met on November 15, 1995, and boundaries defined by latitude and longitude for the two mobile gear and one fixed gear areas were developed to accommodate the ability of the U.S. Coast Guard to enforce the gear closure areas.

In recommending the emergency action, the Council stated that it recognizes that the action does not address all types of fixed gear conflicts, nor does it apply to all fishing areas within Southern New England. The failure of the current industry agreement to adequately manage the gear conflict is an unforeseen event, for which the Council had insufficient time to respond by developing amendments and implementing rules through the standard rulemaking process. Additionally, the magnitude of the conflict and the degree of economic hardship in the fixed gear fleet due to the conflict was unanticipated by the Council.

During the Council's October 25, 1995, meeting, NMFS informed the Council that development of permanent measures was a requisite for consideration of its request for Secretarial emergency action. At its December 13, 1995, meeting, the Council voted to hold public hearings on an action that will insert a framework mechanism in each of its FMPs through the amendment process to allow gear conflicts to be addressed in a timely manner in the future.

Although the development of these framework actions is moving forward, it will likely take several months for them to be completed and implemented, if approved. Due to the unanticipated levels of increases in effort by mobile gear vessels on monkfish and the time needed for the Council to develop measures to alleviate this problem, NMFS believes that emergency action is warranted.

NMFS concurs with the Council that this emergency action is necessary because substantial harm and disruption to the fishery is occurring on a scale unforeseen in previous seasons that threatens the economic liability of offshore lobster fishing operations. Direct economic losses to individual lobster vessels are reported by the Council to be as high as $75,000. The value of lost gear reported to the Council for a partial season by eight lobster vessels totaled more than $290,000. There are approximately 50 active lobster vessels fishing within the gear conflict areas. If the above data are extrapolated across the 50 vessel fleet, the direct economic loss as a result of lost gear is potentially $1.8 million.

The value of lobster landings during October through June, when operators of lobster vessels move their gear inshore, averaged more than $8.5 million for 1991–93. Landings data showing the magnitude of lost fishing opportunity during 1994 and 1995 are unavailable. Lobster fishers reported setting their gear in a severely closed band that had a significant effect on catch per trap. Even if the number of traps remained constant and catch per trap only declined 25 percent, the lost revenue could have totaled more than $2.1 million. The total estimated economic loss that could be prevented by taking emergency action is therefore nearly $4 million. The Council believes that the potential benefit of taking emergency action significantly exceeds the economic loss by trawlers targeting monkfish in the restricted gear areas, and greatly outweighs the value of advance notice and public comment. This action is consistent with the FMP objectives to minimize social, cultural, and economic dislocation in the lobster fishery.

The Council is actively pursuing viable means to mitigate the long-term gear conflicts, but recent conditions have caused rapid escalation of the conflicts and efforts to resolve this problem have only recently failed. These conditions include increased targeting of monkfish by mobile gear vessels, as reported to the Council by the U.S. Coast Guard on October 25, 1995. The emergency measures are a set of initial measures addressing the immediate interim need to begin the process of curtailing gear conflicts. These measures were selected rather than other options because they are relatively less controversial, as evidenced by the near unanimous support of the Council and because the area boundaries are more narrowly defined and more easily enforced.

The emergency action is expected to greatly reduce gear damage and economic loss. The Council believes, and NMFS agrees, that preventing the potential economic loss greatly outweighs the need for advance notice and public comment before taking action.

The closures will be known as Restricted Gear Areas I, II, and III. Restricted Gear Areas I and II will be closed to mobile gear (defined as trawls, beam trawls, and dredges) for the duration of this emergency action. Restricted Gear Area III will be closed upon implementation of this rule through April 30, 1996, to fishing by fixed gear vessels. Vessels may transit these areas if their gear is properly stowed.

Classification

NMFS has determined that this rule is necessary to respond to an emergency situation and is consistent with the

Magnuson Fishery Conservation and Management Act and other applicable law.

The Assistant Administrator for Fisheries, NOAA, also finds for good cause that the reasons justifying implementation of this rule on an emergency basis make it impracticable and contrary to the public interest to provide additional notice and opportunity for public comment, or to delay for 30 days the effective date of these emergency regulations, under the provisions of sections 553 (b) and (d) of the Administrative Procedure Act.

This emergency rule has been determined to be not significant for purposes of E.O. 12866.

This rule is exempt from the procedures of the Regulatory Flexibility Act to prepare a regulatory flexibility analysis because the rule is issued without opportunity for prior public comment, therefore, no analysis has been prepared.

List of Subjects in 50 CFR Part 649

Fisheries.

Dated: March 20, 1996.

Gary Matlock,

Program Management Officer, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 649 is amended as follows:

PART 649—AMERICAN LOBSTER FISHERY

1. The authority citation for part 649 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 649.2 definitions for "Beam trawl", "Dredge or dredge gear", "Fixed gear", "Mobile gear", and "Trawl" are added, in alphabetical order to read as follows:

§ 649.2 Definitions.

* * * * *

Beam trawl means gear consisting of a twine bag attached to a beam attached to a towing wire designed so that the beam does not contact the bottom. The beam is constructed with sinkers or shoes on either side that support the beam above the bottom or any other modification so that the beam does not contact the bottom. The beam trawl is designed to slide along the bottom rather than dredge the bottom.

* * * * *

Dredge or dredge gear means gear consisting of a mouth frame attached to a holding bag constructed of metal rings, or any other modification to this design, that can be or is used in the harvest of Atlantic sea scallops.

* * * * *

Fixed gear means lobster pot trawls.

* * * * *

Mobile gear means trawls, beam trawls, and dredges that are attached to a vessel at all times and which maneuver with that vessel.

* * * * *

Trawl means gear consisting of a net that is towed, including but not limited to beam trawls, pair trawls and Danish and Scottish seine gear.

* * * * *

3. In § 649.8, paragraphs (c)(11) and (c)(12) are added to read as follows:

§ 649.8 Prohibitions.

* * * * *

(c) * * *

(11) Enter or be in the areas described in § 649.23 (a)(1) and (b)(1) on a mobile gear fishing vessel, during the time periods specified in § 649.23 (a)(2) and (b)(2), except as provided in § 649.23 (a)(3) and (b)(3).

(12) Enter or be in, and no fixed gear may be deployed or remain in, the areas described in § 649.23(c)(1) on a fixed gear fishing vessel, during the time periods specified in § 649.23(c)(2), except as provided in § 649.23(c)(3).

* * * * *

4. Section 649.23 is added to subpart B to read as follows:

§ 649.23 Restricted gear areas.

(a) *Restricted Gear Area I.* (1) No mobile gear fishing vessel or person on a mobile gear fishing vessel, may enter, fish, or be in the following areas during the time period specified in paragraph (a)(2) of this section (Figure 4 to part 649), as defined by straight lines connecting the following points in the order stated, except as specified in paragraph (a)(3) of this section:

(2) *Duration.* No fixed gear fishing vessel or person on a fixed gear fishing vessel may enter, fish, or be in, and no fixed gear may be deployed or remain in, Restricted Gear Area III from April 1, 1996 through April 30, 1996, except as specified in paragraph (c)(3) of this section.

(3) *Transiting.* Vessels may transit Restricted Gear Area III as defined in paragraph (c)(1) of this section, provided that their gear is stowed in accordance with the provisions of paragraph (d)(2) of this section.

(d) *Gear stowage requirements.* (1) Mobile gear vessels transiting Restricted Gear Area I and Restricted Gear Area II specified under paragraphs (a)(1) and

(b)(1) of this section must stow their gear so it is not available for immediate use as follows:

(i) *Trawl vessel net stowage requirements.* A net that is stowed and is not available for immediate use conforms to one of the following specifications:

(A) A net stowed below deck, provided:

(*1*) It is located below the main working deck from which the net is deployed and retrieved;

(*2*) The towing wires, including the leg wires, are detached from the net; and

(*3*) It is fan-folded (flaked) and bound around its circumference; or

(B) A net stowed and lashed down on deck, provided:

(*1*) It is fan-folded (flaked) and bound around its circumference;

(*2*) It is securely fastened to the deck or rail of the vessel; and

(*3*) The towing wires, including the leg wires, are detached from the net; or

(C) A net that is on a reel and is covered and secured, provided:

(*1*) The entire surface of the net is covered with canvas or other similar material that is securely bound;

(*2*) The towing wires, including the leg wires, are detached from the net; and

(*3*) The codend is removed from the net and stored below deck; or

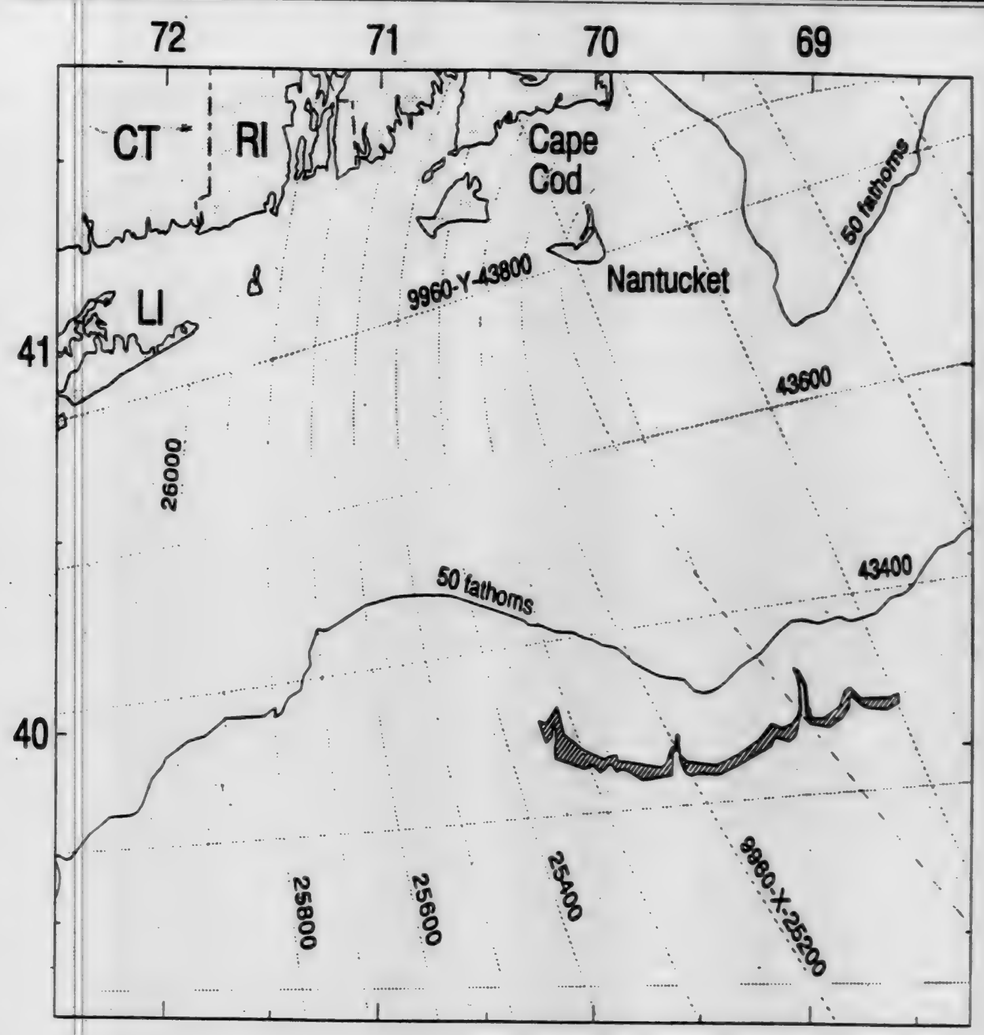
(D) Nets that are secured in a manner authorized in writing by the Regional Director.

(ii) *Scallop dredge and beam trawl stowage requirements.* A scallop dredge and beam trawl that is stowed and is not available for immediate use must:

(A) Detach the towing wire from the scallop dredge or beam trawl;

(B) Reel the wire up onto the winch; and

(C) Secure and cover the dredge or beam trawl so that it is rendered unusable for fishing.



(2) *Fixed gear stowage requirements.* Fixed gear vessels transiting Restricted Gear Area III specified under paragraphs (c)(1) of this section must stow their gear as follows so it is not available for immediate use:

(i) Secure all pots, buoys, and high flyers so that the gear is not available for immediate use and

(ii) The pots must not have trawl warps connected to the bridles and must be unbaited.

[Docket No. 960129018–6018–01; I.D. 032096B]

Groundfish of the Gulf of Alaska; Deep-water Species Fishery by Vessels using Trawl Gear in the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Closure.

SUMMARY: NMFS is prohibiting directed fishing for species that comprise the deep-water species fishery by vessels using trawl gear in the Gulf of Alaska (GOA). This action is necessary because the first seasonal bycatch allowance of Pacific halibut apportioned to the deep-water species fishery in the GOA has been caught.

EFFECTIVE DATE: 12 noon, Alaska local time (A.l.t.), March 21, 1996, until 12 noon, A.l.t., April 1, 1996.

FOR FURTHER INFORMATION CONTACT: Thomas Pearson, 907–486–6919.

SUPPLEMENTARY INFORMATION: The groundfish fishery in the GOA exclusive economic zone is managed by NMFS according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson Fishery Conservation and Management Act. Fishing by U.S. vessels is governed by regulations implementing the FMP at 50 CFR parts 620 and 672.

In accordance with § 672.20(f)(1)(i) the deep-water species fishery, which is defined at § 672.20(f)(1)(i)(B)(2) was apportioned 100 mt of Pacific halibut prohibited species catch for the first season, the period January 20, 1996, through March 31, 1996 (61 FR 4304, February 5, 1996).

The Director, Alaska Region, NMFS, has determined, in accordance with § 672.20(f)(3)(i), that vessels participating in the trawl deep-water species fishery in the GOA have caught the first seasonal bycatch allowance of Pacific halibut apportioned to that fishery. Therefore, NMFS is prohibiting directed fishing for each species and species group that comprise the deep-water species fishery by vessels using trawl gear in the GOA. The species and species groups that comprise the deep-water species fishery are: All rockfish of the genera *Sebastes* and *Sebastolobus*, Greenland turbot, Dover sole, Rex sole, arrowtooth flounder, and sablefish.

After the effective date of this closure the maximum retainable bycatch amounts, calculated using the retainable percentages at § 672.20(g), apply at any time during a trip.

Classification

This action is taken under 50 CFR 672.20 and is exempt from review under E.O. 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: March 21, 1996.

Richard W. Surdi,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

Proposed Rules

Federal Register

Vol. 61, No. 60

Wednesday, March 27, 1996

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 920

[Docket No. FV96–920–1]

Kiwifruit Grown in California; Continuance Referendum

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Referendum order.

SUMMARY: This document directs that a referendum be conducted among eligible growers of California kiwifruit to determine whether they favor continuance of the marketing order regulating the handling of kiwifruit grown in the production area.

DATES: The referendum will be conducted from June 3 through June 21, 1996. To vote in this referendum, growers must have been producing California kiwifruit during the period August 1, 1995, through May 31, 1996.

ADDRESSES: Copies of the text of the aforesaid marketing order may be obtained from the office of the referendum agent at 2202 Monterey Street, Suite 102B, Fresno, California 93721, or the Office of the Docket Clerk, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2525–S, Washington, DC 20090–6456.

FOR FURTHER INFORMATION CONTACT: Rose Aguayo, California Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Division, Agriculture Marketing Service, USDA, 2202 Monterey Street, Suite 102B, Fresno, California 93721; telephone (209) 487–5901; or Charles L. Rush, Marketing Order Administration Branch, Fruit and Vegetable Division, Agricultural Marketing Service, USDA, room 2536–S, P.O. Box 96456, Washington, DC 20090–6456; telephone (202) 720–3127.

SUPPLEMENTARY INFORMATION: Pursuant to Marketing Order No. 920 (7 CFR Part 920), hereinafter referred to as the "order" and the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act," it is hereby directed that a referendum be conducted to ascertain whether continuance of the order is favored by growers. The referendum shall be conducted during the period June 3 through June 21, 1996, among California kiwifruit growers in the production area. Only growers who were engaged in the production of California kiwifruit during the period of August 1, 1995, through May 31, 1996, may participate in the continuance referendum.

The Secretary of Agriculture (Secretary) has determined that continuance referenda are an effective means for ascertaining whether growers favor continuation of marketing order programs. The Secretary would consider termination of the order if less than two-thirds of the growers voting in the referendum and growers of less than two-thirds of the volume of California kiwifruit represented in the referendum favor continuance. In evaluating the merits of continuance versus termination, the Secretary will not only consider the results of the continuance referendum. The Secretary will also consider all other relevant information concerning the operation of the order and the relative benefits and disadvantages to growers, handlers, and consumers in order to determine whether continued operation of the order would tend to effectuate the declared policy of the Act.

In any event, section 8c(16)(B) of the Act requires the Secretary to terminate an order whenever the Secretary finds that a majority of all growers affected by the order favor termination, and such majority produced for market more than 50 percent of the commodity covered under such order.

In accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–13), the ballot materials to be used in the referendum herein ordered have been submitted to and approved by the Office of Management and Budget (OMB) and have been assigned OMB No. 0581–0149 for California kiwifruit. It has been estimated that it will take an average of 20 minutes for each of the approximately 500 growers of California kiwifruit to cast a ballot. Participation is voluntary. Ballots postmarked after June 21, 1996 will not be included in the vote tabulation.

Rose M. Aguayo and Kurt J. Kimmel of the California Marketing Field Office, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture (USDA), are hereby designated as the referendum agents of the Secretary to conduct such referendum. The procedure applicable to the referendum shall be the "Procedure for the Conduct of Referenda in Connection With Marketing Orders for Fruit, Vegetables, and Nuts Pursuant to the Agricultural Marketing Agreement Act of 1937, as Amended" (7 CFR Part 900.400 *et seq.*).

Ballots will be mailed to all growers of record and may also be obtained from the referendum agents and from their appointees.

Honey Research, Promotion, and Consumer Information Order—Amendment of the Rules and Regulations To Add HTS Code for Flavored Honey

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would add a new Harmonized Tariff Schedule (HTS) code number for imported flavored honey to the rules and regulations issued under the Honey Research, Promotion, and Consumer Information Order to provide authority for the U.S. Customs Service to collect an assessment on all imported, flavored honey.

DATES: Comments must be received by April 26, 1996.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposed rule to: Research and Promotion Branch, Fruit

and Vegetable Division, Agricultural Marketing Service (AMS), USDA, P.O. Box 96456, Room 2535–S, Washington, DC 20090–6456; fax (202) 205–2800. Three copies of all written material should be submitted, and they will be made available for public inspection at the Research and Promotion Branch during regular business hours. All comments should reference the docket number and the date and page number of this issue of the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Sonia N. Jimenez, Research and Promotion Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2535–So., Washington, D.C. 20090–6456; telephone (202) 720–9915.

SUPPLEMENTARY INFORMATION: This proposed rule is issued under the Honey Research, Promotion, and Consumer Information Act, as amended [104 Stat. 3904, 7 U.S.C. 4601 *et seq.*], hereinafter referred to as the Act.

This proposed rule has been issued in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12778, Civil Justice Reform. It is not intended to have retroactive effect. This rule would not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 10 of the Act, a person subject to an order may file a petition with the Secretary stating that such order, any provision of such order, or any obligation imposed in connection with such order is not in accordance with law; and requesting a modification of the order or an exemption from the order. Such person is afforded the opportunity for a hearing on the petition. After the hearing, the Secretary would rule in the petition. The Act provides that the district court of the United States in any district in which such person is an inhabitant, or has a principal place of business, has jurisdiction to review the Secretary's ruling on the petition, provided that a compliant is filed within 20 days after the date of entry of the ruling.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

There are an estimated 145 handlers, 510 producer-packers, 8,300 producers, and 350 importers who are currently subject to the provisions of the Order. The majority of these persons may be classified as small agricultural producers and small agricultural service firms. Small agricultural producers are defined by the Small Business Administration [13 CFR 121.601] as those having annual receipts of less than $500,000, and small service firms are defined as those having annual receipts of less than $5 million.

The Administrator of the AMS has determined that this rule would not have a significant economic impact on a substantial number of small entities.

In accordance with the Paperwork Reduction Act [44 U.S.C. Chapter 35], and OMB regulations [5 CFR Part 1320], the information collection and recordkeeping requirements contained in this action have been previously approved under OMB control number 0581–0093.

Background

The Honey Research, Promotion, and Consumer Information Order (Order) provides that each producer and importer shall pay to the Board a one cent per pound assessment rate on honey and honey products produced in or imported into the United States. Section 1240.5 of the Order defines honey products as products wherein honey is a principal ingredient.

In order for the U.S. Customs Service (Customs) to collect the assessments on imported honey and honey products, each product needs to be identified by an HTS Code. Since the Board inception, honey has been assessed by Customs under HTS code number 0409.00.00. However, there were no HTS codes for honey products.

The Board has identified flavored honey as a product containing approximately 99 percent honey. The Board estimates that 500,000 pounds of flavored honey are imported into the United States annually without the importer paying the required assessment. Therefore, at the recommendation of the Board, the Department requested the Committee for Statistical Annotation of Tariff Schedules (Committee) on the International Trade Commission to establish an HTS code for flavored honey. The Committee notified the Department on February 13, 1996, that a code has been established for flavored honey. The purpose of this rule is to add the new HTS code for flavored honey to the rules and regulations under the Order to provide authority for Customs to collect the assessment on all imported, flavored honey.

This proposed rule would add the new 2106.90.9988 HTS code for flavored honey to section 1240.115(e) of the rules and regulations issued under the Order. Flavored honey would be assessed at the one-cent-per-pound rate. A conversion factor is not necessary because the amount of honey in flavored honey is estimated at 99 percent of the total product. Customs will notify importers 60 to 90 days before it begins collecting the assessment on flavored honey. The notification will be made only after a final rule, if any, is issued on this action.

A 60-day comment period is provided to allow interested persons to respond to this proposal. All written comments timely received will be considered before a final determination is made on this matter.

List of Subjects in 7 CFR Part 1240

Advertising, Agricultural research, Honey, Imports, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR Part 1240 is proposed to be amended as follows:

PART 1240—HONEY RESEARCH, PROMOTION, AND CONSUMER INFORMATION ORDER

1. The authority citation for 7 CFR Part 1240 continues to read as follows:

Authority: 7 U.S.C. 4601–4612

2. In § 1240.115, paragraph (e) is revised to read as follows:

§ 1240.115 Levy of assessments.

* * * * *

(e) The U.S. Customs Service (USCS) will collect assessments on all honey or honey products where honey is the principal ingredient imported under its tariff schedule (HTS heading numbers 0409.00.00 and 21006.90.9988) at the time of entry or withdrawal for consumption and forward such assessment as per the agreement between the USCS and USDA. Any importer or agent who is exempt from payment of assessments pursuant to § 1240.42 (a) and (b) of the Order may apply to the Board for reimbursement of such assessment paid.

* * * * *

Dated: March 21, 1996.

Eric M. Forman,

Deputy Director, Fruit and Vegetable Division.

BILLING CODE 3410–02–P

FEDERAL ELECTION COMMISSION

11 CFR Part 104

[Notice 1996–10]

Electronic Filing of Reports by Political Committees

AGENCY: Federal Election Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Election Commission is seeking comment on proposed rules to implement an electronic filing system for reports of campaign finance activity filed with the agency. Although the agency has been working on the development of an electronic filing sytem for some time, the proposals in this Notice are also designed to reflect recent changes in the Federal Election Campaign Act of 1971. The proposed rules would establish requirements for filing reports electronically, including specifying the format for data to be submitted by filers, procedures for submitting amendments to reports, and methods of satisfying signature requirements under the law.

DATES: Comments must be received on or before May 28, 1996.

ADDRESSES: Comments must be in writing and addressed to: Ms. Susan E. Propper, Assistant General Counsel, 999 E Street, NW., Washington, DC 20463.

FOR FURTHER INFORMATION CONTACT: Ms. Susan E. Propper, Assistant General Counsel, 999 E Street, NW., Washington, DC 20463, (202) 219–3690 or (800) 424–9530.

SUPPLEMENTARY INFORMATION: On December 28, 1995, Public Law 104–79 amended the Federal Election Campaign Act of 1971 to require, *inter alia*, that the Commission create a system to "permit reports required by this Act to be filed and preserved by means of computer disk or any other electronic format or method, as determined by the Commission." 109 Stat. 791(1995), section 1(a). The new law requires this system to be available for reports covering periods after December 31, 1996. This means the new system will be in place for the first reports filed in the 1998 election cycle. The goals of such a system include more complete on line access to reports on file with the Commission, reduced paper filing and manual processing, and more efficient and cost-effective methods of operation for filers and for the Commission. Note that participation in the electronic filing program by committees and other persons filing reports will be voluntary.

There are a number of factors that should be considered before any system can be successfully implemented. The information must be submitted in a standardized format so that the Commission's computer system can read the information and locate all the different data elements that are part of a committee's report. At the outset, the Commission plans to accept reports filed electronically, store them, and make them available to the public. The information will then be processed by the Commission in the same manner as paper reports (i.e. creating paper copies for review and integration into the disclosure data base). Ultimately, the electronically filed material will be directly integrated into the Commission's data bases. While most electronic filing systems developed at the state and local level have required submission of paper reports along with electronic media, the FEC process does not include this requirement. In fact, committees choosing to file electronically would have to include all information found in a report in the electronic data submitted. When paper copies of reports are necessary for processing, the Commission will create those documents.

(**Note:** However, that certain forms and schedules have special requirements that may require submission of a paper copy under proposed paragraph (f).)

It is also important, however, that the system be designed in a fashion that allows committees to comply most easily with the Act's requirements. Thus, the Commission is developing methods for complying with statutory requirements such as submitting a report signed by the committee's treasurer, and to accommodate, for example, the need to file amendments to reports or to explain more fully certain transactions included on a committee's report. However, certain schedules and forms require signatures of third parties or submission of additional materials such as loan agreements. The Commission will need to design the format structure to include the information provided on these forms and schedules, but will also need a mechanism to meet the additional requirements of these documents.

The system being designed by the Commission will be available to all committees required to file reports with the Commission that wish to file in an electronic format. Public Law 104–79 changed the place of filing for committees that formerly filed with the Clerk of the House of Representatives. These committees, as well as those that have historically filed with the Commission, will have the opportunity to file under the new system. Proposed section 104.18 will set forth the requirements for electronic filing. Please note that committees that are required to file reports with the Secretary of the Senate will not be covered by the Commission's new rules.

The Commission welcomes comments from committees that will be affected by this change. Vendors with knowledge of the software concerns that might be involved in implementing such a system, and state and local jurisdictions that have had experience with electronic filing, are also encouraged to participate. Finally, end-users of campaign finance information, such as researchers and the media, may wish to offer their suggestions from a consumer's perspective.

Interested persons should also note that the Commission will be developing its record format specifications in a separate process at the same time it is considering these rules. Software vendors and committees that wish to comment or make suggestions regarding the format specifications should contact the Data Systems Division to be included on the list of those consulted.

Standard Format

Several different standardization issues are presented by the Commission's proposal. A key requirement is that any data submitted electronically be conveyed in the Commission-approved format. The agency has dealt with these concerns previously in the context of publicly financed presidential candidates and convention committees. To address those situations, the Commission issued its Computerized Magnetic Media Requirements (CMMR), which established format specifications for certain computerized data submitted by these committees. The CMMR specifies the record format for submitting data; that is, it specifies the "fields" (required information) that make up the records and how much space is allocated for each field of data. There are separate fields for receipt and disbursement records, consistent with the Act's reporting provisions.

A similar set of requirements is being developed for electronic filing of reports. These requirements will be contained in a document titled "The Federal Election Commission's Electronic Filing Specifications Requirements." As previously noted, the format specifications will be made available to interested persons for comment and suggestions as they are being developed. When completed, this document will be available from the Commission at no charge.

Another set of issues relates to the steps that will be necessary to integrate

the reports filed into the Commission's data base. Currently, the Commission uses the reports to enter certain selected data into its computer data base. For the most part, this data is limited to totals from the committees' summary pages, and information on contributions and independent expenditures. When the Commission first implements its electronic filing program in 1997, it expects to continue its cross-indexing of information from all reports, including those filed electronically. In addition, the Commission will maintain reports filed electronically in a separate data base, in order to preserve a record of what has been filed by each reporting entity. A copy of these records will be accessible on-line.

In the future, the Commission intends to structure its program so that the data submitted by reporting entities will be in a form that can be directly added to the agency's data base. This development may require the specification of standards for reporting certain categories of information, in order to maintain the accuracy and integrity of the Commission's current data base. This will ensure, for example, that all contributions made by PACs to a particular candidate are reported in the same way so they can be accurately attributed in the Commission's data base to that candidate. Currently, the Commission ensures that the correct recipient is identified in the data base, even though reporting entities may have described the recipient in slightly different ways. The Commission may also wish to establish a standard list of purposes for reported disbursements, which could in turn be based on the expense classifications used in a chart of accounts. Both of these issues could be addressed by making updated lists available through the Internet that could be downloaded by committees. Information from these lists could then be moved into reports, simplifying the reporting process for committees.

Acceptance of Reports Filed Electronically

A related issue addressed by the proposed rules concerns the need to ensure that reports filed electronically can be read by the Commission's computers. Data submitted in a format that does not meet the Commission's filing specifications and therefore does not permit the Commission's computers to read and locate required information will not be treated as a filed report under proposed paragraph 104.18(c). Similarly, a damaged disk that cannot be read by the computer system will not be accepted. In addition, filings that do not contain valid identifying information for the committee and the report being submitted, or that are not signed using one of the signature mechanisms provided by the rules, will not be considered filed. The Commission proposes to notify committees whose reports are not accepted.

To determine that a report submitted in an electronic format meets these requirements, the Commission is developing validation software that will check the submitted record structures to be sure they meet the requirements of the format specifications. This software will be available to committees at no charge, to enable them to run their reports against this program and ensure that their submission will not be rejected.

Another issue involves the method of submitting electronic reports. When the program first goes into effect in 1997, the Commission proposes to accept reports only on floppy disk. This approach will help ease the transition to accepting reports in this new format, since it is comparable to the Commission's past practice of accepting computerized media from Presidential campaigns. As soon as practicable, however, the Commission expects to initiate acceptance of reports through telecommunications. Among other things, since the law provides that reports are due on specified dates, this option would require the arrangement of a mechanism for handling a large influx of data during a compressed time period with intervening periods of no activity. As a guide to assessing the potential load factor involved in accepting reports via modem, the Commission encourages committees to comment on whether they are currently capable of submitting an electronic report via telecommunications and whether they perceive any problems with a system that allows reports to be filed in this manner.

Amended Reports

Proposed paragraph (d) would require that amendments to reports be filed in an electronic format if the original report was filed electronically, and that the amendment consist of a complete version of the report as amended, not just those portions of the earlier submission that are being changed. The Commission welcomes comments on how to address amendments, particularly with regard to whether the amendment should be a complete version of the report. This approach has the advantage of placing a complete revised copy of the report on the public file, and therefore would not require those reviewing a committee's records to piece later amendments of reports together with earlier submissions. However, filing a complete revised version would not immediately indicate what aspects of the earlier report had changed. Larger reports could pose a particular problem in this regard. In addition, the Commission encourages comments on whether one approach would be easier for committees to comply with than the other.

Signature Requirements

The Act requires that reports and statements shall be signed by the person responsible for filing them. See, 2 U.S.C. 434(a)(1) and (c). Public Law 104–79 directs the Commission to develop one or more methods for verifying reports filed electronically and states that such a verification will be treated the same as a signature for all purposes. In the initial phase of the new system, paragraph (e) of the proposed rule would require that filers utilize one of two methods for verifying their reports. Either a signed certification page would be submitted with the disk containing the electronic report, or the disk would contain a digitized version of the signed certification. When the Commission begins to accept reports filed by telecommunications, it plans to provide other methods for verification, such as providing an encryption key to the treasurer or allowing simultaneous mailing of a signature page, similar to the system being used by the Internal Revenue Service in its electronic filing program. Suggestions for other methods are welcome.

Certain schedules and forms must be filed with signatures from third parties, however. For example, the Act requires that Schedule E and Form 5, which are used to report independent expenditures, be notarized. Schedule C–1 (Loans and Lines of Credit from Lending Institutions) and Form 8 (Debt Settlement Plans) must be filed with signatures from lenders and creditors, respectively. In addition, Schedule C–1 must be accompanied by a copy of the relevant loan agreement. The electronic record format will be designed to include the data provided on these forms and schedules. However, to satisfy these additional requirements, proposed paragraph (f) would also require that either a signed version of these schedules and forms (and any accompanying materials) be digitized and submitted as a separate file in the electronic submission, or that a signed paper original of these schedules and forms (and accompanying materials) be submitted with the electronic media.

Additional Issues

For those commenters who are reporting entities, some additional information about the committee would be helpful to the Commission's inquiry. In particular, the Commission would be interested in whether the committee uses a computer to maintain its records and prepare its reports. If so, what data is maintained on the computer? For example, does the data include information regarding contributors, contributions to candidates, other receipts and disbursements? If the committee uses a software package to maintain this data and/or to prepare its reports, what package(s) does it use? Does this software incorporate all the information the committee needs to file its reports or is it necessary to bring in information from other sources?

In addition, the Commission would welcome comments indicating whether reporting committees plan to take advantage of this option. The Commission recognizes that, to be successful, any electronic filing program must accommodate to the extent possible the needs and capabilities of the filing community. A major factor to be considered in this regard is the high level of turnover among filers. A significant portion of the filing population is only involved in campaign finance disclosure for a relatively short period. This includes unsuccessful candidates as well as political committees that go out of existence after a few months or a year. Many committees, including those that have a more stable existence (such as party committees), operate largely with volunteers or experience frequent staff changes. Consequently, there also may be little staff continuity in some ongoing committees. Moreover, those that depend on volunteers may be disadvantaged by the limited time those individuals can devote to committee responsibilities.

However, other committees have a more permanent staff and are sophisticated in their use of computers and their knowledge of the law. These committees might have an easier time converting to an electronic filing format.

Therefore, a fundamental question on which the Commission welcomes comment concerns the potential benefits of an electronic filing system to filers and others. How can electronic filing make disclosure easier? Conversely, are there any perceived problems with the Commission's approach to electronic filing, whether from a procedural or technical perspective, and how can these problems be averted?

A related point concerns committees that begin filing electronically but for some reason are later unable to do so. Proposed paragraph (a) would require that committees continue to submit reports in an electronic format for the remainder of the calendar year in which they elect to begin filing electronically. This provision has been added for several reasons, including enabling the agency to efficiently administer the disclosure program and to ensure continuity in the means by which a committee's reports are placed on the public record. While these are important considerations for the Commission's administration of the Act, should the Commission attempt to distinguish committees with a genuine problem from those who simply decide to discontinue submitting electronic reports? If so, how could this be accomplished?

Information on the electronic capability of current filers would be helpful in assessing the community's readiness to move to this reporting format. Any other information the committee feels would be helpful to the Commission in its efforts to assess the ability of the regulated community to move to an electronic filing format would be appreciated.

Finally, the Commission is interested in the experience of other jurisdictions that have implemented an electronic filing program. What have these jurisdictions found to be the most effective means of introducing filers to the new system, without jeopardizing the integrity of their ongoing program? Since the Commission will not have a test period for filing reports electronically before it begins accepting these reports solely in electronic format, are there any concerns of committees that should be addressed?

List of Subjects in 11 CFR Part 104

Campaign funds, Political candidates, Political committees and parties, Reporting requirements.

Certification of No Effect Pursuant to 5 U.S.C. 605(B) (Regulatory Flexibility Act)

These proposed rules will not, if promulgated, have a significant economic impact on a substantial number of small entities. The basis for this certification is that no small entity is required to submit reports electronically under these proposed rules.

For the reasons set out in the preamble, it is proposed to amend subchapter A, Chapter I of title 11 of the Code of Federal Regulations as follows:

PART 104—REPORTS BY POLITICAL COMMITTEES

1. The authority citation for Part 104 would be amended as follows:

Authority: 2 U.S.C. 431(1), 431(8), 431(9), 432(d), 432(i), 434, 436(a)(8), 436(b).

§ 104.17 [Reserved]

2. Section 104.17 is reserved.

3. Section 104.18 would be added to read as follows:

§ 104.18 Electronic filing of reports (2 U.S.C. 432(d) and 434(a)(11)).

(a) *General.* A political committee that files reports with the Commission, as provided in 11 CFR Part 105, may choose to file its reports in an electronic format that meets the requirements of this section. If a committee chooses to file its reports electronically, and its first electronic report passes the Commission's validation program in accordance with paragraph (c) of this section, it must continue to file in an electronic format all reports covering financial activity for that calendar year.

(b) *Format specifications.* Reports filed electronically shall conform to the technical specifications, including file requirements, described in the Federal Election Commission's Electronic Filing Specifications Requirements. The data contained in the computerized magnetic media provided to the Commission shall be organized in the order specified by the Electronic Filing Specifications Requirements.

(c) *Acceptance of reports filed in electronic format.*

(1) Each committee that submits an electronic report shall check the report against the Commission's validation program before it is submitted, to ensure that the files submitted meet the Commission's format specifications and can be read by the Commission's computer system. Each report submitted in an electronic format under this section shall also be checked upon receipt against the Commission's validation program. The Commission's validation program is available on request and at no charge.

(2) A report that does not pass the validation program will not be accepted by the Commission and will not be considered filed. If a committee submits a report that does not pass the validation program, the Commission will notify the committee that the report has not been accepted.

(d) *Amended reports.* If a committee files an amendment to a report that was filed electronically, it shall also submit the amendment in an electronic format. The committee shall submit a complete version of the report as amended, and

not just the portions of the earlier report that are being amended.

(e) *Signature requirements.* The committee's treasurer, or any other person having the responsibility to file a designation, report or statement under this subchapter, shall verify the report in one of the following ways: by submitting a signed certification on paper that is submitted with the computerized media; or by submitting a digitized copy of the signed certification as a separate file in the electronic submission. Each verification submitted under this section shall certify that the person has examined the report or statement and, to the best of the signatory's knowledge and belief, it is true, correct and complete. Any verification under this section shall be treated for all purposes (including penalties for perjury) in the same manner as a verification by signature on a report submitted in a paper format.

(f) *Schedules and forms with special requirements.* The following list of schedules, materials, and forms have special signature and other requirements and reports containing these documents shall include, in addition to providing the required data within the electronic report, either a paper copy submitted with the committee's electronic report or a digitized version submitted as a separate file in the electronic submission: Schedule C–1 (Loans and Lines of Credit From Lending Institutions), including copies of loan agreements required to be filed with that Schedule, Schedule E (Itemized Independent Expenditures), Form 5 (Report of Independent Exepnditures Made and Contributions Received), and Form 8 (Debt Settlement Plan). The committee shall submit any paper materials together with the electronic media containing the committee's report.

(g) *Preservation of reports.* For any report filed in electronic format under this section, the treasurer shall retain a machine-readable copy of the report as the copy preserved under 11 CFR 104.14(b)(2). In addition, the treasurer shall retain the original signed version of any documents submitted in a digitized format under paragraphs (e) and (f) of this section.

Dated: March 22, 1996.

Lee Ann Elliott,

Chairman, Federal Election Commission.

BILLING CODE 6715–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 95–CE–84–AD]

Airworthiness Directives; The New Piper Aircraft, Inc. (Formerly Piper Aircraft Corporation) PA31, PA31P, PA31T, and PA42 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes to adopt a new airworthiness directive (AD) that would apply to certain The New Piper Aircraft, Inc. (Piper) PA31, PA31P, PA31T, and PA42 series airplanes. The proposed action would require inspecting for cracks beneath and in the area of the inboard aileron hinge bracket on the aileron spar and rib using dye penetrant methods, replacing any cracked aileron spar or rib, and replacing the inboard aileron hinge bracket with a hinge bracket of improved design. Several reports of cracks in the vicinity of the inboard aileron hinge bracket, aileron spar, and aileron rib prompted this proposed action. The actions specified by the proposed AD are intended to prevent structural failure of the aileron caused by cracks in the area of the inboard aileron hinge bracket, which, if not detected and corrected, could result in loss of control of the airplane.

DATES: Comments must be received on or before June 7, 1996.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 95–CE–84–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

Piper Service Bulletin (SB) No. 967, dated January 24, 1994, and Piper SB No. 974, dated October 19, 1994, may be obtained from The New Piper Aircraft, Inc., Attn: Customer Service, 2926 Piper Dr., Vero Beach, Florida, 32960. This information also may be examined at the Rules Docket at the address above.

FOR FURTHER INFORMATION CONTACT: Christina Marsh, Aerospace Engineer, FAA, Atlanta Aircraft Certification Office, Campus Building, 1701 Columbia Avenue, suite 2–160, College Park, Georgia 30337–2748; telephone (404) 305–7362; facsimile (404) 305–7348.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 95–CE–84–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 95–CE–84–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

The FAA has received several service difficulty reports (SDRs) on certain Piper PA31, PA31P, PA31T, and PA42 series airplanes reflecting a problem with cracks in the aileron spar in the area of the inboard aileron hinge brackets. The cracks are appearing in certain Piper airplanes having between 3,000 hours time-in- service (TIS) and 12,000 hours TIS. The cause of this condition is believed to be the location of the inboard aileron hinge bracket in relation to the aileron pushrod. The inboard aileron hinge bracket is located 2.06 inches from the center line of the pushrod whereas the outboard aileron hinge bracket is located 45.17 inches from the center line of the pushrod, with both brackets being identical in design. This arrangement causes the majority of the load to be transferred to the inboard hinge bracket, which in time could cause cracks to develop in the aileron spar or in the corresponding aileron rib in the area of the inboard aileron hinge bracket. As a result of the reported cracking, Piper has redesigned the inboard aileron hinge bracket to better distribute the load into the aileron spar web. A crack in the aileron spar or in the vicinity of inboard aileron hinge bracket, if left uncorrected, could possibly compromise the structural integrity of the aileron.

Piper has issued two service bulletins (SB), No. 967, dated January 24, 1994, and Piper SB No. 974, dated October 19, 1994, which specify procedures for inspecting the designated areas for cracks and replacing the aileron inboard hinge brackets with a part of improved design as a terminating action.

After examining the circumstances and reviewing all available information related to the incidents described above, the FAA has determined that AD action should be taken to prevent structural failure of the aileron caused by cracks in the area of the inboard aileron hinge bracket, which, if not detected and corrected, could result in loss of control of the airplane.

Since an unsafe condition has been identified that is likely to exist or develop in other Piper PA31, PA31P, PA31T, PA42 series airplanes of the same type design, the proposed AD would require:

- Inspecting the aileron spar beneath and in the area of the inboard aileron hinge bracket for cracks;
- If cracks are found in the area of the aileron spar, inspecting the aileron rib for cracks, and replacing the cracked spar assembly and any cracked rib;
- Replacing the inboard aileron hinge brackets with part number (P/N) 74461–02 (left) and P/N 74461–03 (right).

The FAA estimates that 2,501 airplanes in the U.S. registry would be affected by the proposed AD, that it would take approximately 2 workhours per airplane for the inspection and 5 workhours per airplane for the modification, with a total of 7 workhours to accomplish the proposed action, and that the average labor rate is approximately $60 an hour. Parts cost approximately $300 per airplane. Based on these figures, the total cost impact for the initial inspection and the modification of the proposed AD on U.S. operators is estimated to be $1,800,720 or $720 per airplane. This figure does not include the amount for repetitive inspections and is based on the assumption that all of the owners/operators of the affected airplanes have not inspected for cracks, repaired cracks, or incorporated the modification of this proposed AD. The FAA has no way of determining the number of repetitive inspections each owner/operator will incur before the proposed modification is accomplished.

Piper has informed the FAA that parts have been distributed to equip approximately 1,250 airplanes. Assuming that these distributed parts are incorporated on the affected airplanes, the cost of the proposed AD would be reduced by $900,000 from $1,800,720 to $900,720.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding a new AD to read as follows:

The New Piper Aircraft, Inc. (formerly Piper Aircraft Corporation): Docket No. 95–CE–84–AD.

Applicability: The following airplane models and serial numbers, certificated in any category:

Models	Serial Nos.
(The following aircraft should reference Piper Service Bulletin No. 974, dated October 19, 1994)	
PA31, PA31–300, and PA31–325.	31–2 through 31–8312019.
PA31–350	31–5001 through 31–8553002.
PA31P–350	31P–8414001 through 31P–8414050.
PA31T3	31T–8275001 through 31T–8475001, and 31T–5575001.
(The following aircraft should reference Piper Service Bulletin No. 967, dated January 24, 1994)	
PA31P	31P–1 through 31P–7730012, and 31P–03.
PA31T	31T–7400002 through 31T–7400009, and 31T–7520001 through 31T–8120104.
PA31T1	31T–7804001 through 31T–8304003, and 31T–1104004 through 31T–1104017.
PA31T2	31T–8166001 through 31T–8166078, and 31T–1166001 through 31T–1166008.
PA42	42–7800001 through 42–7800004, and 42–8001001 through 42–8001106.
PA42–720	42–8301001, 42–8301002, 42–5501003 through 42–5501023, 42–5501025 through 42–5501027, 42–5501129 through 42–5501031, 42–5501033, and 42–5501039 through 42–5501059.
PA42–720R	42–5501024, 42–5501028, 42–5501032, and 42–5501034 through 42–5501038.
PA42–1000	42–5527002 through 42–5527044.

Note 1: This AD applies to each airplane identified in the preceding applicability revision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (e) of this AD. The request should include an assessment of

the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Upon the accumulation of 3,000 hours time-in-service (TIS), or within the next 100 hours TIS after the effective date of this AD, whichever occurs later, unless already accomplished.

Note 2: The paragraph structure of this AD is as follows:

Level 1: (a), (b), (c), etc.
Level 2: (1), (2), (3), etc.
Level 3: (i), (ii), (iii), etc.

Level 2 and Level 3 structures are designations of the Level 1 paragraph they immediately follow.

To prevent structural failure of the aileron caused by cracks in the area of the inboard aileron hinge bracket, which, if not detected and corrected, could result in loss of control of the airplane, accomplish the following:

(a) Inspect (using dye penetrant methods) the area beneath and in the area of the inboard aileron hinge bracket on the aileron spar for cracks in accordance with the INSTRUCTIONS section of Piper Service Bulletin (SB) No. 967, dated January 24, 1994, or Piper SB No. 974, dated October 19, 1994, whichever service bulletin applies to the particular model and serial number.

(1) If cracks are found on the aileron spar:

(i) Prior to further flight, inspect the corresponding aileron rib at the inboard aileron hinge bracket location;

(ii) Prior to further flight, replace any cracked spar assembly and any cracked aileron rib in accordance with the applicable Maintenance Manual;

(iii) Prior to further flight, replace the inboard aileron hinge brackets with an inboard aileron hinge bracket of improved design, part number (P/N) 74461–02 (left) and P/N 74461–03 (right), in accordance with the INSTRUCTIONS section of Piper SB No. 967, dated January 24, 1994, or Piper SB No. 974, dated October 19, 1994, as applicable.

(2) If no cracks are found, prior to further flight, replace the inboard aileron hinge brackets with a part of improved design P/N 74461–02 (left) and P/N 74461–03 (right), in accordance with the INSTRUCTIONS section of Piper SB No. 967, dated January 24, 1994, or Piper SB No. 974, dated October 19, 1994, as applicable.

(b) If the inboard aileron hinge brackets, P/N 74461–02 (left) or P/N 74461–03 (right) have been ordered from the manufacturer but are not available, prior to further flight, and thereafter at intervals not to exceed 100 hours TIS, dye penetrant inspect beneath and in the vicinity of the inboard aileron hinge bracket for cracks in accordance with the INSTRUCTIONS section of Piper SB No. 967, dated January 24, 1994, or Piper SB No. 974, dated October 19, 1994, as applicable.

(c) If any one of the following occurs, prior to further flight, terminate the above repetitive inspections, replace any cracked aileron rib and any cracked spar assembly (if applicable), and replace the inboard aileron hinge bracket as specified in paragraph (a)(1)(iii) of this AD:

(1) Parts become available;

(2) An inboard aileron bracket hinge, aileron spar or aileron rib is found cracked; or

(3) 1,000 hours TIS are accumulated after the initial inspection required by this AD.

(d) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(e) An alternative method of compliance or adjustment of the compliance times that provides an equivalent level of safety may be approved by the Manager, FAA, Atlanta Aircraft Certification Office, Campus Building, 1701 Columbia Avenue, suite 2–160, College Park, Georgia 30337–2748. The request shall be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Atlanta Aircraft Certification Office.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Atlanta Aircraft Certification Office.

(f) All persons affected by this directive may obtain copies of the document referred to herein upon request to The New Piper Aircraft, Inc., Attn: Customer Service, 2926 Piper Dr., Vero Beach, Florida, 32960; or may examine this document at the FAA, Central Region, Office of the Assistant Chief Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Issued in Kansas City, Missouri, on March 20, 1996.

James E. Jackson,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

Coast Guard

33 CFR Parts 62 and 66

[CGD 94–091]

RIN 2115–AF14

Conformance of the Uniform State Waterways Marking System and the Western Rivers Marking System With the United States Aids to Navigation System

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: As part of the President's Regulatory Reinvention Initiative, the Coast Guard proposes to eliminate the Uniform State Waterway Marking System (USWMS), which is not widely used and may be confusing to the mariner. The Coast Guard also proposes to replace the solid-color crossing dayboards in the Western Rivers Marking System (WRMS) with the checkered non-lateral dayboards used in the United States Aids to Navigation System (USATONS); the latter dayboards would have the same meaning and be the same size and shape as the former, but would be easier to see. These changes would help mariners avoid misinterpreting navigational markers they might see when transiting different bodies of water now subject to different marking systems.

DATES: Comments are requested by April 26, 1996.

ADDRESSES: Comments may be mailed to the Executive Secretary, Marine Safety Council (G–LRA/3406) (CGD 94–091), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593–0001, or may be delivered to room 3406 at the same address between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (202) 267–1477.

The Executive Secretary maintains the public docket for this request for comments. Comments will become part of this docket and will be available for inspection or copying at room 3406, U.S. Coast Guard Headquarters, between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: LTJG Chad Asplund, Short Range Aids to Navigation Division, Telephone: (202) 267–1386.

SUPPLEMENTARY INFORMATION:

Request for Comments

The Coast Guard encourages interested persons to participate in this request for comments by submitting written data, views, or arguments. Persons submitting comments should include their names and addresses, identify this notice (CGD 94–091) and the specific section of this notice to which each comment applies, and give the reason for each comment. Please submit two copies of all comments and attachments in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. Persons wanting acknowledgment of receipt of comments should enclose stamped, self-addressed postcards or envelopes.

The Coast Guard will consider all comments received during the comment period. It may change this proposal in view of the comments.

The brevity of the comment period owes to three facts. First, an advanced notice of proposed rulemaking (ANPRM) has already sounded public opinion. Second, that opinion holds the two changes proposed here to be minor and non-controversial. Third, this rulemaking constitutes part of the President's Regulatory Reinvention Initiative.

The Coast Guard plans no public hearing. Persons may request a public hearing by writing to the Marine Safety Council at the address under **ADDRESSES**. The request should include the reason why a hearing would be beneficial. If it determines that the opportunity for oral presentations will aid this rulemaking, the Coast Guard will hold a public hearing at a time and place announced by later notice in the **Federal Register**.

Regulatory History

On December 29, 1995, the Coast Guard published an ANPRM in the **Federal Register** (60 FR 67345). It gave interested persons until February 9, 1996, to submit comments. The Coast Guard received two comments on that notice. One came from a trade association and the other from an independent consultant.

The ANPRM intended to gauge public opinion towards eliminating the USWMS, replacing the crossing dayboards in the WRMS, and allowing the aids to navigation in the WRMS a larger selection of flash characteristics from which to chose. The first two items were non-controversial; therefore, the Coast Guard here proposes eliminating the USWMS and replacing the crossing dayboards in the WRMS.

The issue of flash characteristics may be more important that the Coast Guard thought it would be. The Coast Guard has determined that more time is necessary to study this issue and may address it in a future rulemaking.

Background and Purpose

The USWMS wes created in 1966 to adequately mark State waters. It offers two types of aids to navigation, a system of regulatory markers as well as a system to supplement the USATONS. It features red and black buoys to mark lateral hazards. But 33 CFR 66.10–1(b) already allows the USATONS on all waterways in the United States. Many states already use the USATONS instead of the USWMS. The Coast Guard proposes eliminating the USWMS to move towards a unitary lateral aids to navigation system. This change would make the waterways less confusing for the mariner.

The WRMS was created to adequately mark the dynamic waterways of the Mississippi River and its Western counterparts. Some deviations from the USATONS were necessary for this. One of these is the use of crossing dayboards. These dayboards indicate where the river channel ("sailing line") crosses from one bank to the other. The dayboards currently used in the WRMS are either solid green or solid red. They are important aids, but can be difficult to see, especially the green dayboards against the overgrowth of trees that line the Western Rivers. The Coast Guard proposes replacing the (red or green) solid-color crossing dayboards used in the WRMS with the checkered (green-and-white or red-and-white) non-lateral dayboards used in the USATONS. The checkered non-lateral dayboards would retain the same meaning as the sold-color crossing dayboards, yet would be easier to see.

The purpose of these two proposed changes is to adequately mark the Uniform State Waterways and Western Rivers and reduce the number of systems of aids to navigation.

Consultation With Advisory Committee

The Coast Guard has consulted with the National Association of State Boating-Law Administrators (NASBLA) concerning elimination of the USWMS. NASBLA indicates this would be a minor, non-controversial change.

Discussion of Comments

1. Should crossing dayboards used in the WRMS be replaced by the non-lateral dayboards used in the USATONS?

The comments generally indicated that this change would entail a massive reeducation. The Coast Guard believes, with an adequate phase-in period and increased boaters' awareness, this change would not be problematic. The benefits gained from the increased visibility would far outweigh the possible confusion.

2. What is the best way to mark obstructions in the USWMS? Should the meaning of the red-and-white striped buoys in the USWMS be changed so such buoys mark safe water as in the USATONS?

The comments generally supported this change. They did express some concern towards boaters' reeducation. The Coast Guard has consulted with NASBLA, which believes this would be a minor, insignificant change. Very few states, if any, use the USWMS.

Discussion of Proposed Rule

The Coast Guard has weighed the needs of the mariner against the conflicts cited in the comments and has decided to propose eliminating the USWMS and replacing the solid-color crossing dayboards used in the WRMS with the checkered non-lateral dayboards used in the USATONS. Therefore, the Coast Guard is proposing the following changes to 33 CFR Parts 62 and 66:

Revise § 62.45(d)(6) to include mooring buoys and their light characteristics. The elimination of the USWMS, § 66.10, also removes the reference to the lighting characteristics on mooring buoys. § 62.45(d)(6) will be revised to place the requirements for lighting characteristics on mooring buoys in the regulatory text for the USATONS.

Revise § 62.51(b)(3) to replace diamond-shaped crossing dayboards, solid red or solid green as appropriate, with diamond-shaped crossing dayboards, checkered red-and-white or green-and-white, non-lateral dayboards similar to those used in the USATONS as appropriate.

Revise Part 66 to eliminate the USWMS by deleting Subpart 66.10. The USWMS is not used and is obsolete.

Regulatory Evaluation

This proposal is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. It has not been reviewed by the Office of Management and Budget under that Order. It is not significant under regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11010; February 26, 1979).

The Coast Guard expects the economic impact of this proposal to be minimal enough that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary. Eliminating the USWMS would ultimately save money for states still using this system. States could purchase the aids to navigation used in the USATONS, which are manufactured in bulk and should cost less than the aids peculiar to the USWMS. Replacing the solid-color crossing dayboards of the WRMS would cost the Federal government little additional money, since new ones would cost essentially the same as the current ones. The Coast Guard proposes to replace the current ones with the new ones when it would otherwise replace them in kind, so the cost will be similar to that of regular maintenance.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Cost Guard must consider whether this proposal, if adopted, would have a significant impact on a substantial number of small entities. "Small entities" may include (1) small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields and (2)

government jurisdictions with populations less than 50,000.

This proposal would have minimal impact on small entities. Eliminating the USWMS would not affect small entities; the USWMS is a system run by the State governments. Replacing the crossing dayboards on the WRMS would only affect the Federal government. Because it expects the impact of this proposal to be minimal, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposal, if adopted, would not have a significant economic impact on a substantial number of small entities. If, however, you think that your business or organization qualifies as a small entity and that this proposal would have a significant economic impact on your business or organization, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and in what way and to what degree this proposal would economically affect it.

Collection of Information

This proposal contains no increase in collection-of-information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this proposal under the principles and criteria contained in Executive Order 12612 and has determined that this proposal does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard considered the environmental impact of this proposal and concluded that, under paragraph 2.B.2.e(34)(a) of Commandant Instruction M164475.1B, this proposal is categorically excluded from further environmental documentation. Eliminating the USWMS and replacing the solid-color crossing dayboards in the WRMS would have no environmental implications. A Categorical Exclusion Determination is available in the rulemaking docket for inspection or copying where indicated under **ADDRESSES.**

List of Subjects

33 CFR Part 62

Navigation (water)

33 CFR Part 66

Intergovernmental relations, Navigation (water), Reporting and recordkeeping requirements.

For the reasons set out in the preamble, the Coast Guard proposes to amend 33 CFR Parts 62 and 66 as follows:

PART 62—UNITED STATES AIDS TO NAVIGATION SYSTEM

1. The authority citation for part 62 continues to read as follows:

Authority: 14 U.S.C. 85; 33 U.S.C. 1233; 43 U.S.C. 1333; 49 CFR 1.46.

§ 62.45 [Amended]

2. In § 62.45, paragraph (d)(6) is revised to read as follows:

* * * * *

(d) * * *

(6) Information and Regulatory Marks, and mooring buoys, display white lights of various rhythms.

* * * * *

§ 62.51 [Amended]

3. In § 62.51, paragraph (b)(3) is revised to read as follows:

* * * * *

(b) * * *

(3) Diamond-shaped non-lateral dayboards, checkered red-and-white or green-and-white, similar to those used in the USATONS, as appropriate, are used as crossing dayboards where the river channel crosses from one bank to the other.

* * * * *

PART 66—PRIVATE AIDS TO NAVIGATION

4. The authority citation for part 66 continues to read as follows:

Authority: 14 U.S.C. 83, 85; 43 U.S.C. 1333; 49 CFR 1.46.

Subpart 66.10—[Removed]

5. Subpart 66.10 is removed.

Dated: March 21, 1996.

Rudy K. Peschel,

Rear Admiral, U.S. Coast Guard, Chief, Office of Navigation Safety and Waterway Services.

[FR Doc. 96–7333 Filed 3–26–96; 8:45 am]

BILLING CODE 4910–14–M

---

33 CFR Part 67

[CGD 95–052]

RIN 2115–AF15

Testing of Obstruction Lights and Fog Signals on Offshore Facilities.

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: In keeping with the National Performance Review, the Coast Guard proposes to amend its testing procedures for obstruction lights and fog signals on Outer Continental Shelf facilities. Presently, manufacturers of lighting equipment must forward an application to each of the ten Coast Guard districts for approval. Fog signal equipment manufacturers must schedule and pay for Coast Guard representatives to observe their tests. This proposal would allow independent laboratories to conduct the tests using Coast Guard approved procedures. This would improve the quality control of the tests, reduce the administrative burden on the pubic, and minimize the cost to the Coast Guard.

DATES: Comments are requested by April 26, 1996.

ADDRESSES: Comments may be mailed to the Executive Secretary, Marine Safety Council (G–LRA/3406) (CGD 95–052), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593–0001, or may be delivered to room 3406 at the same address between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (202) 267–1477.

The Executive Secretary maintains the public docket for this rulemaking. Comments will become part of this docket and will be available for inspection or copying at room 3406, U.S. Coast Guard Headquarters, between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: LTJG Chad Asplund, Short Range Aids to Navigation Division, (202) 267–1386.

SUPPLEMENTARY INFORMATION:

Requests for Comments

The Coast Guard encourages interested persons to participate in this rulemaking by submitting written data, views, or arguments. Persons submitting comments should include their names and addresses, identify this rulemaking (CGD 95–052) and the specific section of this proposal to which each comment applies, and give the reason for each comment. Please submit two copies of all comments and attachments in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. Persons wanting acknowledgment of receipt of comments should enclose stamped, self-addressed postcards or envelopes.

The Coast Guard will consider all comments received during the comments period. It may change this proposal in view of the comments.

The Coast Guard plans no public hearing. Persons may request a public hearing by writing to the Marine Safety Council at the address under **ADDRESSES**. The request should include the reasons why a hearing would be beneficial. If it determines that the opportunity for oral presentations will aid this rulemaking, the Coast Guard will hold a public hearing at a time and

place announced by a later notice in the **Federal Register**.

Regulatory History

On January 10, 1996, the Coast Guard published a notice requesting comments in the **Federal Register** (61 FR 708). Interested persons were given until February 12, 1996, to submit comments. The Coast Guard received six letters commenting on the questions raised in the notice. Five of the letters came from owners of offshore structures and one letter came from an independent laboratory.

The January 10, 1996, notice asked questions about whether (1) the flash characteristics of obstruction lights should be changed from a quick-flashing rhythm to a Morse "U", (2) the candlepower requirements on obstruction lighting should be adapted to the new transmissivity tables developed by the Coast Guard, and (3) lights and fog signals should be tested by independent laboratories rather than by the Coast Guard. The Coast Guard has determined that more time is needed to study issues (1) and (2) and may address them in a future rulemaking project. This rulemaking is limited to issue (3).

Background and Purpose

The existing 33 CFR 67.05–10 states that manufacturers of lights must have their equipment approved by the District Commander and a permit must be issued before the equipment can be distributed. Currently the manufacturer must apply to each Coast Guard district in which the lights are to be operated. This proposal would amend this provision to require that the tests be conducted by an independent laboratory in accordance with Coast Guard procedures. The manufacturer would then forward one application and the test results of the independent laboratory to Commandant (G–NSR), U.S. Coast Guard, 2100 2nd Street SW., Washington, DC, 20593, for review.

Under 33 CFR 67.10–20, manufacturers of fog signals must apply to the Coast Guard and schedule to have a Coast Guard representative observe the test procedure. The test must be completed using equipment supplied and calibrated by the Coast Guard. The manufacturer must also bear the cost of Coast Guard personnel and test equipment. This requirement would be changed to require independent laboratories to conduct fog signal tests in accordance with existing Coast Guard procedures.

The amendments would relieve the financial and administrative burden from both the public and the government.

Discussion of Comments on Testing by Independent Laboratories

The comments were generally favorable towards this change. The consensus was that independent laboratory testing would improve quality and reduce the costs and administrative burden associated with inspection. However, one company commented that the existing procedures are adequate. In light of the favorable response to the testing issue, the Coast Guard is pursuing this change in this rulemaking project.

Discussion of Proposed Rules

(1) Proposed § 67.05–30 would be added to require testing of lights by independent laboratories. One sample of each product model would be tested. Once approved, the manufacturer and model numbers would be placed on a Coast Guard approved list which would be made available to the public. Information regarding testing procedures may be obtained from Commandant (G–NSR), U.S. Coast Guard, 2100 Second Street SW., Washington, DC 20593–0001.

(2) Existing § 67.10 would be amended to require testing of fog signals by independent laboratories. This procedure would be similar to that used for lights. One sample of each product model would be tested. Once approved, the manufacturer and model numbers would be placed on a Coast Guard approved list which would be made available to the public. Information regarding testing procedures may be obtained from Commandant (G–NSR), U.S. Coast Guard, 2100 Second Street SW., Washington, DC 20593–0001.

(3) Section 67.10–25, Application for tests, would be removed because of the proposed changes to § 67.10–20.

Regulatory Evaluation

This proposal is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that order. It has not been reviewed by the Office of Management and Budget under that order. It is not significant under regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11010; February 26, 1979).

The Coast Guard expects the economic impact of this proposal to be minimal enough that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary. The cost of testing each model of light by an independent laboratory is approximately $500.00 per test. This is an initial cost to the manufacturer and will only apply to the production sample tested. Once the sample passes the tests, its manufacturer and model numbers are placed on the approved list. Many manufacturers of lighting equipment are already using independent laboratories to conduct tests, and, therefore, would not incur additional costs.

The cost for testing fog signal equipment will be greatly reduced. Presently, the manufacturer has to bear all expenses of conducting the test including all expenses of the U.S. Government in sending a Coast Guard representative to the test. The expense to the manufacturer for Coast Guard personnel to observe a test is approximately $2,000.00. By having an independent laboratory conduct the test without Coast Guard representatives, manufacturers would save a minimum of $2,000.00. Manufacturers would submit one production sample to an independent laboratory for testing. Once the sample passes the tests, its manufacturer and model numbers are placed on an approved list. Manufacturers will see a significant savings by having independent laboratories conduct tests.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this proposal, if adopted, will have a significant impact on a substantial number of small entities. "Small entities" may include (1) small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields and (2) governmental jurisdictions with populations less than 50,000.

Small entities would not be affected by this proposal. The manufacturers of lighting and fog signal equipment are large corporations. If anything, small entities would benefit from this proposal by creating jobs for small independent laboratories. Because it expects the impact of this proposal to be minimal, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposal, if adopted, will not have a significant economic impact on a substantial number of small entities. If, however, you think that your business or organization qualifies as a small entity and that this proposal will have a significant economic impact on your business or organization, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and in what way and to what degree this proposal will economically effect it.

Collection of Information

This proposal contains no collection-of-information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this proposal under the principles and criteria contained in Executive Order 12612 and has determined that this proposal does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard considered the environmental impact of this proposal and concluded that, under paragraph 2.B.2.e(34)(a) of Commandant Instruction M16475.1B, this proposal is categorically excluded from further environmental documentation. Revision of the testing procedures for lighting and fog signal equipment will have no effect on the environment. A "Categorical Exclusion Determination" is available in the docket for inspection or copying where indicated under **ADDRESSES.**

List of Subjects in 33 CFR Part 67

Continental shelf, Navigation (water), Reporting and recording requirements.

For the reasons set out in the preamble, the Coast Guard proposes to amend 33 CFR part 67 as follows:

PART 67—AIDS TO NAVIGATION ON ARTIFICIAL ISLANDS AND FIXED STRUCTURES

1. The authority citation for part 67 continues to read as follows:

Authority: 14 U.S.C. 85, 633; 43 U.S.C. 1333; 49 CFR 1.46.

2. In subpart 67.05, § 67.05–30 is added to read as follows:

§ 67.05–30 Testing of obstruction lights.

Each obstruction light must be tested by an independent laboratory to ensure that it meets or exceeds the requirements in subparts 67.20, 67.25, and 67.30 of this part for the class of structure on which it is to be used. Information on the test procedure may be obtained from Commandant (G–NSR), U.S. Coast Guard, 2100 Second Street SW., Washington, DC 20593–0001.

3. Section 67.10–30 is revised to read as follows:

§ 67.10–20 Fog signal tests.

Each fog signal must be tested by an independent laboratory to ensure that it meets the required sound pressure levels in table A of this section. Information on the test procedure may be obtained from Commandant (G–NSR), U.S. Coast Guard, 2100 Second Street SW., Washington, DC 20593–0001.

§ 67.10–25 [Removed]

4. Section 67.10.25 is removed.

Dated: March 15, 1996.

Rudy K. Peschel,

Rear Admiral, U.S. Coast Guard, and Waterway Services.

RIN 2070–AB18

Diquat; Pesticide Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes to establish a tolerance for the plant growth regulator diquat [6,7-dihydrodipyrido (1,2-a:2',1'-c) pyrazinediium] derived from application of the dibromide salt and calculated as the cation in or on the imported raw agricultural commodities bananas and coffee at 0.05 part per million (ppm). Zeneca, Inc., petitioned for this proposed regulation to establish a maximum permissible level for the residues of the plant growth regulator.

DATES: Comments identified by the docket number, (PP 4E4365 and 4E4376/P645), must be received on or before April 26, 1996.

ADDRESSES: Submit written comments by mail to: Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Public Docket, Rm. 1132, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number (PP 4E4365 and 4E4376/P645). No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments on this proposed rule may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found below in this document.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures as set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential will be included in the public docket by EPA without prior notice. The public docket is available for public inspection in Rm. 1132 at the above address, from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Joanne I. Miller, Product Manager (PM-23), Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location, telephone number, and e-mail address: Rm. 237, CM #2, 1921 Jefferson Davis Highway, Arlington, VA, (703)-305-6224; e-mail: miller.joanne@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: Zeneca, Inc., P.O. Box 15458, Wilmington, DE 19850, has submitted pesticide petition (PP 4E4365 and 4E4376) to EPA. This petition requested that the Administrator, pursuant to the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(e), establish a tolerance for residues of the plant growth regulator diquat [6,7-dihydrodipyrido (1,2-a:2',1'-c) pyrazinediium derived from application of the dibromide salt and calculated as the cation in or on the raw agricultural commodity bananas at 0.02 ppm and coffee at 0.05 ppm. The petition for bananas was subsequently amended to raise the tolerance level to 0.05 ppm.

The data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of the tolerances include the following:

1. A 2-year chronic toxicity/carcinogenicity study in rats resulted in a systemic lowest-observed-effect level (LOEL) of 2.91 mg/kg/day in males and 3.64 mg/kg/day in females (expressed as diquat cation), and a systemic no-observed effect level (NOEL) of 0.58 mg/kg/day in males and 0.72 mg/kg/day in females (expressed as diquat cation).

2. A 1-year feeding study in dogs resulted in a systemic LOEL of 2.5 mg/kg/day and a systemic NOEL of 0.5 mg/kg/day in both sexes (expressed as diquat cation).

3. A 2-year feeding study in mice resulted in a systemic LOEL of 11.96 mg/kg/day in males and 16.03 mg/kg/day in females (expressed as diquat cation), and a systemic NOEL of 3.56 mg/kg/day in males and 4.78 mg/kg/day in females (expressed as diquat cation).

4. A developmental toxicity study in rats resulted in a maternal toxicity LOEL of 32 to 56 mg/kg/day and a maternal toxicity NOEL of 8 to 14 mg/kg/day (expressed as diquat cation), and a developmental toxicity LOEL of 32 to 56 mg/kg/day and a developmental toxicity NOEL of 8 to 14 mg/kg/day (expressed as diquat cation).

5. A developmental toxicity study in rabbits resulted in a maternal toxicity LOEL of 5.0 mg/kg/day and a maternal toxicity NOEL of 2.5 mg/kg/day (expressed as diquat cation). The developmental toxicity was not clearly established.

6. A recently submitted developmental toxicity study in rabbits resulted in a maternal toxicity LOEL of 3 mg/kg/day and a maternal toxicity NOEL of 1 mg/kg/day (expressed as diquat cation), and a developmental toxicity LOEL of 10 mg/kg/day and a developmental toxicity NOEL of 3 mg/kg/day (expressed as diquat cation).

7. A developmental toxicity study in mice resulted in a maternal toxicity LOEL of 2 mg/kg/day and a maternal toxicity NOEL of 1 mg/kg/day (expressed as diquat cation), and a developmental toxicity LOEL of 4 mg/kg/day and a developmental toxicity NOEL of 2 mg/kg/day (expressed as diquat cation).

8. A two-generation reproduction study on rats resulted in a systemic toxicity LOEL of 4 mg/kg/day and a systemic toxicity NOEL of 0.8 mg/kg/day (expressed as diquat cation), and a reproductive toxicity LOEL of 12 to 20 mg/kg/day and a reproductive toxicity NOEL of 4 mg/kg/day (expressed as diquat cation).

9. Diquat showed nonmutagenicity in one gene mutation test (Ames), two structural chromosome aberration tests (mouse micronucleus and dominant lethal in mice), and one test for other genotoxic effects (unscheduled DNA synthesis in rat hepatocytes *in vitro*). Positive results were seen in one gene mutation test (mouse lymphoma cell assay) and in one chromosome aberration test (human blood lymphocytes, depending on the concentration of diquat and the presence of the metabolic activation system).

10. Metabolism studies showed about 90% of the administered dose being eliminated in feces, indicating that diquat was poorly absorbed from the gastrointestinal tract. Following a subcutaneous injection to circumvent the intestine, nearly all of the administered dose was recovered in the urine within 2 days.

The Office of Pesticide Program's Health Effects Division's Carcinogenicity Peer Review Committee (CPRC) has classified diquat as a Group E carcinogen (no evidence of carcinogenicity) under the Agency's *Guidelines for Carcinogen Risk Assessment*, published in the **Federal Register** of September 24, 1986 (51 FR 33992). In its evaluation, CPRC gave consideration to body weight changes in a 2-year feeding study in mice and histopathological changes in the eyes in a 2-year chronic feeding/carcinogenicity study in rats.

The Reference Dose (RfD) is established at 0.005 mg/kg/day, based on a NOEL of 0.5 mg/kg/day from the chronic toxicity study in dogs and an uncertainty factor of 100. The Anticipated Residue Concentration (ARC) from the current actions is estimated at 0.00074 mg/kg/day of body weight/day for the general population and utilizes 15% of the RfD for the U.S. population. The ARC for the most exposed subgroup is 0.0024 mg/kg/day of body weight/day for nonnursing infants (less than 1-year old) and utilizes 48% of the RfD. Therefore, no appreciable risk is expected from the chronic dietary intake since the RfD is not exceeded for either the general population or any subgroup.

The nature of the residue is adequately understood for the purposes of the tolerances. An adequate analytical method, extraction with sulfuric acid with spectrometric detection, is available for enforcement purposes. The analytical method for enforcing these tolerances have been published in the *Pesticide Analytical Manual, Vol. II* (PAM II).

The pesticide is considered useful for the purposes for which it is sought, and the tolerances are capable of achieving the intended physical or technical effect. There are currently no actions pending against the registration of this chemical.

Based on the information and data considered, the Agency concludes that the proposed tolerances will protect the public health. Therefore, it is proposed that the tolerances be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains the ingredient listed herein, may request within 30 days after the publication of this document in the **Federal Register** that this proposal be referred to an Advisory Committee in accordance with section 408(e) of the FFDCA.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 4E4365 and 4E4376/P645). All written comments filed in response to this petition will be available in the Public Response and Program Resources Branch at the above address from 8 a.m. to 4:30 p.m., Monday through Friday, except legal holidays.

A record has been established for this proposal under docket number (PP 4E4365 and 4E4376/P645) (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays.

The public record is located in Room 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Electronic comments can be sent directly to EPA at:
opp-docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this proposal, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official rulemaking record which will also include all comments submitted directly in writing. The official rulemaking record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

Under Executive Order 12866 (58 FR 51735, October 4, 1993), the Agency must determine whether the regulatory

action is "significant" and therefore subject to all the requirements of the Executive Order (i.e., Regulatory Impact Analysis, review by the Office of Management and Budget (OMB)). Under section 3(f), the order defines "significant" as those actions likely to lead to a rule: (1) Having an annual effect on the economy of $100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities (also known as "economically significant"); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement, grants, user fees, or loan programs; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive Order.

Pursuant to the terms of this Executive Order, EPA has determined that this proposed rule is not "significant" and is therefore not subject to OMB review.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: March 20, 1996.

Stephen L. Johnson,

Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. In § 180.226, by adding new paragraph (c) to read as follows:

§180.226 Diquat; tolerances for residues.

* * * * *

(c) Tolerances are established for the plant growth regulator diquat [6,7-dihydrodipyrido (1,2-a:2',1'-c) pyrazinediium] derived from application of the dibromide salt and calculated as the cation in or on the following raw agricultural commodities:

Commodity	Parts per million
Bananas	0.05
Coffee	0.05

There are no U.S. registrations as of December 6, 1995.

BILLING CODE 6560-50-F

40 CFR Part 180

RIN 2070-AB18

[OPP-300418; FRL-5355-6]

Oxidized Pine Lignin, Sodium Salt; Tolerance Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that oxidized pine lignin, sodium salt (CAS Reg. No. 68201-23-0) be exempted from the requirement of a tolerance when used as an inert ingredient (surfactant or adjuvant to surfactant) in pesticide formulations. This proposed regulation was requested by LignoTech USA, Inc.

DATES: Comments, identified by the docket control number [OPP-300418], must be received on or before April 26, 1996.

ADDRESSES: By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person deliver comments to: Rm. 1128, Crystal Mall, Building #2, 1921 Jefferson Davis Highway, Arlington, VA.

ADDRESSES: The Agency invites any interested person who has concerns about the implementation of this action to submit written comments in triplicate to: By mail: Program Resources Section, Public Response and Program Resources Branch, Field Operations Division (7506C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1132, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number "OPP-300418." No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments on this document may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found in the SUPPLEMENTARY unit of this document.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 1132 at the Virginia address given above from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Amelia M. Acierto, Registration Support Branch, Registration Division (7505W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location, telephone number, and e-mail address: 2800 Crystal Drive North Tower, Arlington, VA, (703) 308-8375, e-mail acierto.amelia@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: LignoTech USA, Inc., 100 Highway 51 South, Rothschild, WI 54474-1998 submitted pesticide petition (PP) number 5E04471 to EPA requesting that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 346a(e), propose to amend 40 CFR 180.1001 (c) and (e) by establishing an exemption from the requirement of a tolerance for oxidized lignin, sodium salt when used as a surfactant or adjuvant to surfactant in pesticide formulations applied to growing crops or to raw agricultural commodities after harvest or to animals. Inert ingredients are all ingredients that are not active ingredients as defined in 40 CFR 153.125, and include, but are not limited to, the following types of ingredients (except when they have a pesticidal efficacy of their own): solvents such as alcohols and hydrocarbons; surfactants such as polyoxyethylene polymers and fatty acids; carriers such as clay and diatomaceous earth; thickeners such as carrageenan and modified cellulose; wetting, spreading, and dispersing agents; propellants in aerosol dispensers; microencapsulating agents; and emulsifiers. The term "inert" is not intended to imply nontoxicity; the ingredient may or may not be chemically active.

The data submitted in the petition and other relevant material have been evaluated. As part of the EPA policy statement on inert ingredients published in the **Federal Register** of April 22, 1987 (52 FR 13305), the Agency set forth a list of studies which would generally be used to evaluate the risks posed by the presence of an inert ingredient in a pesticide formulation. However, where it can be determined without that data that the inert ingredient will present minimal or no risk, the Agency generally does not require some or all of the listed studies to rule on the proposed tolerance or exemption from the requirement of a tolerance for an inert ingredient. The Agency has decided that no data, in addition to that described below, for oxidized lignin, sodium salt will need to be submitted. The rationale for this decision is described below:

1. Similar chemicals such as pine lignin (used as an absorbent) and sulfonated kraft lignin/lignosulfonates (used as a surfactant or related adjuvant to surfactant), are exempt from the requirement of a tolerance when used in pesticide formulations applied to growing crops or to raw agricultural commodities after harvest or to animals under 40 CFR 180.1001 (c) and (e).

2. Pine lignin, also known as kraft lignin, is a derivative of a natural plant polymer, lignin, which is the most abundant polymer in nature. Pine lignin is used as a raw material for oxidized kraft lignin as well as a starting material for pine-kraft lignin-based lignosulfonates. It is produced as a coproduct during the manufacture of paper via the kraft pulping process.

3. The toxicological data show that pine lignin, sulfonated pine lignin as well as oxidized pine lignin or lignosulfonates are of very low acute toxicity (LD50 >2 to >5 g/kg in rats and LC50 >1000 to >3000 mg/l in fish).

4. Pine lignin is classified as toxicity category IV in a skin irritation and eye irritation studies.

Based on the submitted toxicological data, physico-chemical properties of the sodium salt of oxidized kraft lignin, its structural similarity to related chemicals such as kraft lignin/lignosulfonates and pine/kraft lignin that have already been exempted under 40 CFR 180.1001(c) and (e), and the review of its use, the Agency has found that, when used as a surfactant or adjuvant to surfactant in pesticide formulations applied preharvest, postharvest or to animals in accordance with good agricultural practice, this ingredient is useful and a tolerance is not necessary to protect the public health. Therefore, EPA proposes that the exemption from the requirement of a tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this document in the **Federal Register** that this proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number [OPP-300418].

A record has been established for this proposal under docket number "OPP-300418" (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The public record is located in Rm. 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Electronic comments can be sent directly to EPA at:

opp-docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for the proposal as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official record which will also include all comments submitted directly in writing. The official rulemaking record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

The Office of Management and Budget has exempted this proposed rule from the requirements of section 3 of Executive Order 12866.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Recording and recordkeeping requirements.

Dated: March 13, 1996.

Stephen L. Johnson,

Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. Section 180.1001 is amended by revising the table in paragraphs (c) and (e) by adding and alphabetically inserting the inert ingredient, oxidized pine lignin to read as follows:

§180.1001 Exemptions from the requirement of a tolerance.

* * * * *

(c) * * *

Inert ingredients	Limits	Uses
Oxidized pine lignin, sodium salt (CAS Reg. No. 68201-23-0)	Maximum of 2% of formulation	Surfactant or adjuvant to surfactant

* * * * *

(e) * * *

Inert ingredients	Limits	Uses
Oxidized pine lignin, sodium salt (CAS Reg. No. 68201-23-0)	Maximum of 2% of formulation	Surfactant or adjuvant to surfactant

RIN 0648-XX55

American Lobster Fishery; Removal of Regulations

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS announces its initial determination to withdraw approval of the Fishery Management Plan for the American Lobster Fishery (FMP), and proposes to remove the regulations implementing the FMP. Withdrawal of FMP approval appears necessary, because changed circumstances have called into question whether this FMP is consistent with the national standards of the Magnuson Fishery Conservation and Management Act (Magnuson Act). The intended effect of this action is to ensure that Federal management of the American lobster fishery more closely complies with state-administered programs.

DATES: Comments on the proposed rule must be received on or before May 13, 1996.

ADDRESSES: Comments on the proposed rule should be sent to Dr. Andrew A. Rosenberg, Regional Director, Northeast Region, NMFS, One Blackburn Drive, Gloucester, MA 01930-3799.

Copies of the Environmental Assessment (EA) supporting this action and the regulatory impact review (RIR) are available from the same address.

FOR FURTHER INFORMATION CONTACT: Paul H. Jones, Fishery Policy Analyst, 508-281-9273.

SUPPLEMENTARY INFORMATION:

The subject FMP, prepared by the New England Fishery Management Council (Council), was approved and implemented in 1983. Implementing regulations are found at 50 CFR part 649. The FMP has been amended several times since implementation, most recently by Amendment 5. The purpose of Amendment 5 is to prevent overfishing through adoption of a stock rebuilding program in the exclusive economic zone (EEZ) to be developed by effort management teams (EMTs) to enhance the existing regulations, including those implemented by the individual coastal states and the Atlantic States Marine Fisheries Commission (ASMFC). Amendment 5 has not yet achieved this objective and on September 18, 1995 (60 FR 48086), NMFS published an advance notice of proposed rulemaking (ANPR) that requested comments from the public on options for lobster management. This proposed rule discusses the comments received as a result of the ANPR and the other circumstances that give rise to this proposed action to withdraw the FMP.

These options were discussed in the ANPR: Whether to withdraw the FMP and develop regulations under the Atlantic Coastal Fisheries Cooperative Management Act (ACFCMA), or proceed with development of a Secretarial fishery management plan, or some other option. NMFS stated that it wished to retain as many current measures as possible under the law, and especially desired to consider those measures proposed by the group of industry, government, and other non-government participants who constituted the EMTs. Written responses were received on the ANPR from the Council, the ASMFC, two state fishery agencies, three fishing associations, and one individual. Two comments favored withdrawal of the FMP and the development of regulations under the ACFCMA. Five comments requested that NMFS keep the current FMP in place while the ASMFC develops an amendment to its lobster coastal management plan (CMP). The one remaining comment was in favor of Secretarial action for the offshore lobster fishery.

There are several reasons to withdraw this FMP. In accordance with the goals of the initiative to reform the Federal regulatory system announced by the President on February 21, 1995, the lobster FMP can be eliminated without compromising resource management and conservation objectives. The American lobster fishery is prosecuted primarily in state waters from Maine to Virginia and these states have implemented protective measures under state law in addition to the ASMFC CMP. Final withdrawal of the FMP and its implementing regulations would only occur upon completion of an effective state management program, most likely developed by the ASMFC. The primary objective of the FMP has been to serve as a vehicle for coordinated management of the American lobster fishery throughout its range. The FMP was prepared to support the management efforts of the states. However, the need for a Magnuson Act fishery management plan for lobster is now in question, given the compliance authority included in the ACFCMA.

In addition, NMFS can no longer ensure that the FMP is, or can be amended to be, consistent with National Standard 1, which requires implementation of conservation and management measures to prevent overfishing. Fishing mortality for American lobster is occurring at a rate in excess of that in the overfishing definition, and Amendment 5 has not fostered the necessary cooperation between the Atlantic coastal states, the Council, and the ASMFC to address the problem. Withdrawal would allow the ASMFC to address the overfished condition of the stocks unhindered by the Council process.

Withdrawal would also ensure consistency with National Standard 7, which requires that conservation and management measures shall, where practicable, minimize costs and avoid unnecessary duplication. Prior to the implementation of the ACFCMA, interstate plans lacked effective compliance authority and states relied upon Federal regulations under the Magnuson Act to provide cohesiveness and compliance. This is no longer a problem, because the ACFCMA, as recently amended, now provides a mechanism for state compliance to coastal management plans implemented by the ASMFC and, therefore, is a more appropriate vehicle to support the effective implementation of these plans. As a result, in some instances where a coastal plan exists or is proposed, the Magnuson Act may be an unnecessary duplication.

Withdrawal of the FMP, provided that complementary Federal regulations are issued by NMFS under the ACFCMA, is consistent with the formal comments submitted by the ASMFC during the comment period on the ANPR. During the comment period, the ASMFC requested a status quo approach until the states, through ASMFC, determine where lobster management should go from here by amending its CMP for American lobster. The Maine Department of Marine Resources commented that management of lobster should transfer from the Council to the ASMFC immediately. The Connecticut Department of Environmental Protection requested that the FMP remain in place to allow the ASMFC time to develop its CMP. Timely withdrawal of this FMP and replacement by a state-administered CMP is consistent with the requests of these agencies.

Therefore, NMFS is publishing this proposed rule stating its intent to withdraw the FMP and remove its implementing regulations. Final action would be contingent upon appropriate action by the ASMFC that would allow NMFS to issue effective Federal regulations under the ACFCMA, as necessary.

Timing the withdrawal to coincide with implementation of an ASMFC CMP is necessary, because a lapse in the Federal regulations would suspend conservation measures in the EEZ. For instance, the Federal minimum size limit, the protective measures for egg-bearing lobsters, and the limited access permit program would lapse, jeopardizing conservation and canceling roughly 3,000 Federal limited access moratorium permits. The administrative and resource costs that would result from a lapse in the regulations would exceed the benefits of this action.

Amendment 5 to the FMP was approved on the basis that it established a participative process to reduce effort and prevent overfishing. As stated in the ANPR, NMFS supports the EMT concept and the prevention of overfishing objective of Amendment 5 and expects that the state management plan initiative will be guided by the national standards and guidelines to ensure effective conservation and management of the American lobster resource.

Classification

This proposed rule has been determined to be not significant for purposes of E.O. 12866.

At this time, the Assistant Administrator for Fisheries (AA) has not determined that the action this rule would implement is consistent with the national standards, other provisions of the Magnuson Act, and other applicable law. The AA, in making that determination, will take into account the data, views, and comments received during the comment period.

NMFS prepared a draft EA for this amendment that discusses the impact on the environment as a result of this rule. A copy of the draft EA may be obtained from NMFS (see **ADDRESSES**).

The Assistant General Counsel for Legislation and Regulation of the Department of Commerce has certified to the Chief Counsel for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities. As a result, a regulatory flexibility analysis was not prepared. This rule has no direct effect on the stock of lobster or the lobster fishery, since the management measures that would be removed via this action are expected to be implemented under the ACFCMA before withdrawal is complete. If NMFS intends to alter, add, or eliminate any regulations implemented under the FMP under the authority of the ACFCMA, an initial regulatory flexibility analysis will be done for those specific regulations at that time.

This rule does not contain a collection-of-information requirement for the purposes of the Paperwork Reduction Act.

This proposed rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under E.O. 12612.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Services

[TB–96–12]

Burley Tobacco Advisory Committee; Reestablishment of Committee

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice of reestablishment of committee.

SUMMARY: Notice is hereby given that the Secretary of Agriculture has reestablished the Burley Tobacco Advisory Committee for a period of 2 years.

FOR FURTHER INFORMATION CONTACT: John P. Duncan III, Director, Tobacco Division, AMS, USDA, 300 12th Street, S.W., Room 502 Annex Building, P.O. Box 96456, Washington, D.C. 20090–6456, (202) 205–0567.

SUPPLEMENTARY INFORMATION: The Committee, which reports to the Secretary through the Assistant Secretary for Marketing and Regulatory Programs, recommends opening dates and selling schedules for the burley marketing area which aid the Secretary in making an equitable apportionment and assignment of tobacco inspectors. The Committee consists of 39 members; 21 producers, 10 warehousemen, and 8 buyers, representing all segments of the burley tobacco industry and meets at the call of the Secretary. The Secretary has determined that the reestablishment of this Committee is in the public interest.

This notice is given in compliance with the Federal Advisory Committee Act (5 U.S.C. App.).

Dated: March 19, 1996.

Wardell C. Townsend,

Assistant Secretary for Administration.

[Docket No. PY–95–001]

Tentative Voluntary Poultry Grade Standards

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice; extension of test-market period.

SUMMARY: On March 30, 1995, the Agricultural Marketing Service (AMS) published a notice in the **Federal Register** (60 FR 16428) announcing a one-year test-market period for USDA grade-identified, boneless-skinless poultry legs and drumsticks, based on tentative grade standards. AMS is extending the test-market period beyond its scheduled end, April 1, 1996, until it makes a final determination about the tentative standards.

FOR FURTHER INFORMATION CONTACT: Larry W. Robinson, Chief, Grading Branch, Poultry Division, 202–720–3271.

SUPPLEMENTARY INFORMATION: On March 30, 1995, the Agricultural Marketing Service (AMS) published a notice in the **Federal Register** (60 FR 16428) announcing a one-year test-market period for USDA grade-identified, boneless-skinless poultry legs and drumsticks, based on tentative grade standards. The test-market period is scheduled to end April 1, 1996, after which the Agency will evaluate the test results. If AMS decides to amend the current poultry grade standards, a proposal with comment period will be published in the **Federal Register**. To allow processors to continue marketing these products while the Agency evaluates test results, AMS has determined that it is appropriate to extend the test-market period until a final determination is made about the tentative grade standards.

Dated: March 21, 1996.

Kenneth C. Clayton,

Acting Administrator.

Forest Service

Willamette Provincial Interagency Executive Committee (PIEC), Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Willamette PIEC Advisory Committee will meet on Thursday, April 18, 1996. The meeting will held in the Conference Room, at Salem District Office, Bureau of Land Management; 1717 Fabry Road SE; Salem, Oregon 97306; phone (503) 375–5646. The meeting is scheduled to begin at 9 a.m. and conclude at approximately 4 p.m. Topics tentatively scheduled on the agenda include: (1) Advisory Committee feedback on the Forest Health proposal from the Klamath Province and a presentation by the Small Log Utilization Group, (2) Discussion with federal managers about the short-term and long-term response to flood impacts on Forest Service and Bureau of Land Management lands in the Province, (3) Overview of Northwest Forest Plan monitoring strategy, (4) Group information sharing

The meeting is open to the public and opportunity will be available to address the Advisory Committee during a public forum. The public forum will follow the agenda topics mentioned above and will occur in the afternoon. Time allotted for individual presentations to the committee will be limited to 3–5 minutes each. Written comments are encouraged and can be submitted prior to the meeting.

FOR FURTHER INFORMATION CONTACT: For more information regarding this meeting, contact Neal Forrester, Designated Federal Official; Willamette National Forest, 211 East Seventh Avenue; Eugene, Oregon 97401; (541) 465–6924.

Dated: March 21, 1996.

Richard C. Stem,

Deputy Forest Supervisor.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–437–001]

Truck Trailer Axle and Brake Assemblies From Hungary; Termination of Antidumping Duty Investigation

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of termination of antidumping duty investigation.

SUMMARY: On December 1, 1995, the Department received a letter from counsel to Rockwell International Corporation ("the petitioner"). The letter notified the Department that the petitioner had no further interest in the suspended investigation on truck trailer axle-and-brake assemblies and parts thereof from Hungary and that it was, therefore, withdrawing the petition. On December 8, 1995, the Department requested parties to the proceeding to provide comments on the Department's proposal to terminate the suspended antidumping duty investigation on truck trailer axle-and-brake assemblies and parts thereof from Hungary. The Department is now terminating this suspended investigation.

EFFECTIVE DATE: March 27, 1996.

FOR FURTHER INFORMATION CONTACT: Steven Presing, Office of Agreements Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street & Constitution Avenue, N.W., Washington, D.C. 20230; telephone (202) 482–3793.

SUPPLEMENTARY INFORMATION:

Background

On February 12, 1981, the Department received a petition from counsel representing Rockwell International Corporation of Pittsburgh, Pennsylvania. The petitioner simultaneously filed a copy of the petition with the United States International Trade Commission (the Commission). The petition alleged that truck trailer axle-and-brake assemblies and parts thereof were being sold in the United States at less than fair value and that the truck trailer axle industry in the United States was being materially injured by reason of the importation of this merchandise. After conducting a summary review of the petition, the Department instituted an investigation, and notice was published in the **Federal Register** of March 11, 1981 (46 FR 16109).

On March 30, 1981, the Commission notified us that it had determined, as required by section 733(a) of the Act, that there was a reasonable indication that an industry in the United States was materially injured by reason of the importation of the subject imports. The Commission's determination and the reasons therefore were published in the **Federal Register** on April 8, 1981 (46 FR 21121).

On September 30, 1981, the Department preliminarily determined that truck trailer axle-and-brake assemblies were being sold in the United States at less than fair value. Notice of the preliminary affirmative antidumping determination was published in the **Federal Register** on September 17, 1981 (46 FR 46152).

In a letter dated October 29, 1981, counsel for the respondent Hungarian Railway Carriage and Machine Works (RÁBA) proposed to enter into a suspension agreement pursuant to section 734 of the Act and section 353.18 (19 CFR 353.18 (1994)) of the Department's regulations. On November 3, 1981, the Department provided copies of the proposed suspension agreement between RÁBA and the Department of Commerce to the petitioner for its consultation and to other parties to the proceeding for their comments. On December 1, 1981, Rockwell International Corporation (the petitioner) and Dana Corporation (a U.S. producer of the subject merchandise) submitted comments on the proposed suspension agreement. After considering all comments and consulting with the petitioner in accordance with section 734(e) of the Act, the Department determined that the criteria for suspension of an investigation pursuant to section 734(e) of the Act had been met.

On January 4, 1982, the Department published in the **Federal Register** a notice of suspension of antidumping duty investigation on truck trailer axles from Hungary (47 FR 66). The basis for the suspension of investigation was an agreement reached between the Department and RÁBA in which RÁBA agreed to revise its prices to eliminate sales of this merchandise to the United States at less than fair value.

Between January 1982 and June 1993, the suspension agreement was administered pursuant to the terms of the agreement. On June 9, 1993, the Department received a letter from RÁBA notifying the Department that RÁBA was withdrawing from the suspension agreement. In RÁBA's letter of withdrawal, RÁBA stated that it no longer possessed any physical capacity to manufacture truck trailer axles, and that its contractual obligations to provide truck trailer axles to its sole U.S. importer of the merchandise had terminated. Further, RÁBA stated that it had no intention for the foreseeable future of reinvesting in machinery and equipment in order to be able to manufacture truck trailer axles. Therefore, RÁBA stated that there was no purpose in continuing to maintain the suspension agreement, and that RÁBA was thereby withdrawing from it.

On June 21, 1993, the petitioner objected to RÁBA's withdrawal from the suspension agreement. The petitioner alleged that BPW–RÁBA, the company formed when RÁBA sold its truck trailer axle-producing facility to the German company BPW in 1991, was a successor in interest to RÁBA with regard to the suspension agreement. Therefore, the petitioner argued that BPW–RÁBA, and not RÁBA, was the proper party to withdraw from the suspension agreement.

In light of petitioner's objection regarding RÁBA's standing to withdraw from the suspension agreement, the Department, in a letter dated November 8, 1993, inquired into BPW–RÁBA's interest in the suspension agreement. The Department stated in the letter that if BPW–RÁBA indicated that it was not

interested in the suspension agreement, the Department would terminate the suspension agreement and resume the suspended investigation. Conversely, if BPW–RÁBA were to indicate that it was interested in the suspension agreement, the Department could initiate a changed circumstances administrative review to determine whether BPW–RÁBA should be treated as a successor in interest to RÁBA. The Department requested a response from BPW–RÁBA, indicating its interest in the continuation of the suspension agreement, no later than 60 days from the date of the letter. Absent a response from BPW–RÁBA by January 7, 1994, the Department would assume that BPW–RÁBA had no interest in the agreement and, therefore, the Department would resume the investigation.

On January 5, 1994, BPW–RÁBA notified the Department that the agreement seemed to have no relevance to it for the following reasons: 1) it had never been an exporter of truck trailer axles to the United States, although it had supplied RÁBA with certain truck trailer axle components; 2) it had stopped production of truck trailer axles for the United States in 1992; and 3) it had removed the truck trailer axle production equipment from its plant.

On May 5, 1994, the petitioner stated that they believed that BPW–RÁBA still produced axles, but that it was not currently exporting them to the United States. Rockwell stated that it would like the Department to inquire further into BPW–RÁBA's production capabilities. On September 29, 1994, the Department conducted a verification at the production facilities of BPW–RÁBA in Szombathely, Hungary. The primary purpose of the verification was to investigate BPW–RABA's claim that the agreement was no longer relevant due to BPW–RABA's cessation of production/exports of subject merchandise to the United States. Based on the verification, there was no evidence to support the claim that BPW–RÁBA was continuing to produce covered merchandise for the U.S. market. For further details of the verification, please see the verification report placed on the record.

On December 1, 1995, counsel to the petitioner notified the Department that Rockwell International Corporation had no further interest in the suspended investigation on truck trailer axle-and-brake assemblies and parts thereof from Hungary and that it was, therefore, withdrawing the petition.

On December 8, 1995, the Department notified parties to the proceeding of its intent to terminate the suspended investigation pursuant to § 353.17(a)(1) of the Department's regulations (19 CFR 353.17(a)(1)(1994)). We received comments from interested parties concerning the proposed termination on January 11, 1996.

Scope of Investigation

The merchandise covered by the investigation are those trailer axle-and-brake assemblies and parts thereof (the "product") imported under item numbers 692.32 and 692.60 of the Tariff Schedules of the United States (TSUS) or under item number 8716.40 and 8716.90 of the Harmonized Tariff Schedule (HTS) of the United States. This includes any parts which may be imported under any other TSUS category to be utilized in trailer axles. These parts include, but are not limited to the beam, spindle, brake spider, camshaft, brake shoes, and separate brake assemblies when imported for use on trailer axles. The agreement did not include separate brake assemblies and other parts which are to be utilized solely in truck components other than trailer axles.

Termination of Investigation

Under § 353.17(a) of the Department's regulations (19 CFR 353.17(a)(1994)) the Department may terminate an investigation if the petitioner withdraws the petition, after notifying all parties to the proceeding and after consultation with the International Trade Commission (ITC). Section 353.17(a) further provides that the Department may not terminate an investigation unless it concludes that the termination is in the public interest. We have notified all parties to the proceeding and have consulted with the ITC. We also conclude that termination of the investigation is in the public interest (see public interest assessment memo, March 6, 1996).

On December 1, 1995, Rockwell International Corporation notified the Department that it has no further interest in the suspended investigation on truck trailer axle-and-brake assemblies and parts thereof from Hungary and that it was, therefore, withdrawing its petition. Based on the Department's request for comments to the proposed termination, two letters were filed on January 11, 1996. Eaton Corporation (an importer of the subject merchandise) expressed its support for the proposed termination. Dana Corporation objected to the proposed termination. In its public interest assessment regarding the termination of the suspended investigaton , the Department addresses the objections raised by Dana Corporation.

Based on information contained in the record, the Department is terminating the antidumping duty investigation on truck trailer axle-and-brake assemblies and parts thereof from Hungary. This action is taken pursuant to section 734(a)(1) of the Tariff Act of 1930, as amended (19 U.S.C. 1673c(a)(2)), and § 353.17(a)(2) of Commerce's regulations (19 CFR 353.17(a)(2)(1994)).

Dated: March 14, 1996.

Susan G. Esserman,

Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–P

DEPARTMENT OF DEFENSE

Meeting of the Advisory Council on Dependents' Education

AGENCY: Department of Defense Education Activity, Office of the Secretary of Defense, DOD.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Advisory Council on Dependents' Education (ACDE). It also describes the functions of the Council. Notice of this meeting is required under the National Advisory Committee Act. Although the meeting is open to the public, because of space constraints, anyone wishing to attend the meeting should contact the point of contact listed below.

DATES: May 16, 1996, 8:30 a.m. to 5 p.m. and May 17, 1996, 8:30 a.m. to 1 p.m.

ADDRESSES: On May 16, 1996, the meeting will be held in the Secretary of Defense Conference Room (3E869) in the Pentagon. On May 17, 1996, the meeting will be held at the headquarters building of the Department of Defense Education Activity, 4040 N. Fairfax Drive, Room 904, Arlington, Virginia 22203–1635.

FOR FURTHER INFORMATION CONTACT: Ms. Pamela Williams, DoD Education Activity, 4040 N. Fairfax Drive, Arlington, Virginia 22203–1635; Telephone number: 703–696–4246, extension 124.

SUPPLEMENTARY INFORMATION: The Advisory Council on Dependents' Education is established under title XIV, section 1411, of Public Law 95–561, Defense Dependents' Education Act of 1978, as amended by title XII, section 1204(b) (3)–(5), of Public Law 99–145, Department of Defense Authorization Act of 1986 (20 U.S.C., chapter 25A, section 929, Advisory Council on Dependents' Education). The Council is cochaired by designees of the Secretary of Defense and the Secretary of Education. In addition to a representative of each of the Departments, 12 members are appointed jointly by the Secretaries of Defense and Education. Members include representatives of educational institutions and agencies, professional employee organizations and unions, unified military commands, school administrators, parents of DoDDS students, and one DoDDS student. The Director, DoDEA, serves as the Executive Secretary of the Council. The purpose of the Council is to advise the Secretary of Defense and the DoDDS Director about effective educational programs and practices that should be considered by DoDDS and to perform other tasks as may be required by the Secretary of Defense. The agenda includes reports about topics raised during ACDE team visits in October 1995, to DoD overseas schools in Germany, England, the Netherlands, and Belgium; the DoD Education Activity (DoDEA) Community Strategic Plan, to include communications, technology, assessment, budget, and organizational restructuring.

Dated: March 21, 1996.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Department of the Air Force

Intent To Grant an Exclusive Patent License

Pursuant to the provisions of Part 404 of Title 37, Code of Federal Regulations, which implements Public Law 96–517, the Department of the Air Force announces its intention to grant CeramOptec, Inc., a corporation of the State of New Jersey, an exclusive license under United States Patent Application S/N 08/365,002 filed in the name of Peter S. Durkin for a "Portable Pumped Laser System."

The license described above will be granted unless an objection thereto, together with a request for an opportunity to be heard, if desired, is received in writing by the addressee set forth below within sixty (60) days from the date of publication of this Notice. Copies of the patent application may be obtained, on request, from the same addressee.

All communications concerning this Notice should be sent to: Mr. Samuel B. Smith, Jr., Chief, Intellectual Property Branch, Commercial Litigation Division, Air Force Legal Services Agency, AFLSA/JACNP, 1501 Wilson Blvd., Suite 805, Arlington, VA 22209–2403, Telephone No. (703) 696–9033.

Department of the Army; Corps of Engineers

Availability of Surplus Land and Buildings Located at Defense Depot Memphis, TN

AGENCY: Army Corps of Engineers, DOD.

ACTION: Notice of availability.

SUMMARY: This notice identifies the surplus real property located at Defense Distribution Depot Memphis, Tennessee (DDMT). DDMT is located less than one mile North of Interstate 240 and one mile North of the Memphis Airport, in the southern sector of the city. Commercial rail adjoins the property.

SUPPLEMENTARY INFORMATION: This surplus property is available under the provisions of the Federal Property and Administrative Services Act of 1949 and the Base Closure Community Redevelopment and Homeless Assistance Act of 1994. Notices of interest should be forwarded to Memphis Depot Redevelopment Agency, Attention: Ms. Cindy

Buchanan, Executive Director, 2163 Airways Blvd., Building 144, Suite 140, Memphis, TN 38114 (telephone (901) 942–4939). For more information regarding particular properties identified in this notice (i.e., acreage, floor plans, existing sanitary facilities, exact street address), contact Mr. Jim Phillips, U.S. Army Engineer District, Mobile, ATTN: CESAM–RE–MD, P.O. Box 2288, Mobile, AL 36628–0001, (telephone (334) 694–3681); or Ms. Buchanan at the above address.

The surplus real property consists of two parcels containing 642 and 60 acres respectively and includes 1 administration building, 35 warehouse buildings, and 82 miscellaneous support buildings. The current range of uses include administrative, storage, maintenance, residential and recreational. Future uses may be influenced by environmental conditions.

Gregory D. Showalter,

Army Federal Register Liaison Officer.

DEPARTMENT OF EDUCATION

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Proposed collection; comment request.

SUMMARY: The Director, Information Resources Group, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before May 28, 1996.

ADDRESSES: Written comments and requests for copies of the proposed information collection requests should be addressed to Patrick J. Sherrill, Department of Education, 600 Independence Avenue, S.W., Room 5624, Regional Office Building 3, Washington, DC 20202–4651.

FOR FURTHER INFORMATION CONTACT: Patrick J. Sherrill (202) 708–8196. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Director of the Information Resources Group publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. OMB invites public comment at the address specified above. Copies of the requests are available from Patrick J. Sherrill at the address specified above.

Dated: March 21, 1996.

Gloria Parker,

Director, Information Resources Group.

Office of Elementary and Secondary Education

Type of Review: Revision.

Title: Title II—Dwight D. Eisenhower Professional Development Program Report Forms.

Frequency: Triennially.

Affected Public: Not-for-profit institutions, Federal Government, State, local or Tribal Gov't, SEAs and LEAs.

Annual Reporting and Recordkeeping Burden:

Responses: 52.

Burden Hours: 30.

Abstract: This will be used by the Department as one means of collecting information on the effectiveness of the program at the State and local levels. The data will be used to inform the Department and Congress on the progress of the State programs in meeting performance indicators. The information will assure statutory mandates are followed.

[CFDA No.: 84.004C and 84.00D]

Office of Elementary and Secondary Education; Desegregation of Public Education Programs—State Educational Agency and Desegregation Assistance Centers

ACTION: Extension notice.

SUMMARY: The purpose of this notice is to revise the closing date for receipt of applications for new awards for fiscal year (FY) 1996. On December 20, 1995, the Acting Assistant Secretary for Elementary and Secondary Education published in the **Federal Register** (60 FR 65643) an application receipt notice for two programs under Desegregation of Public Education. The two programs announced were CFDA No. 84.004C, State Educational Agency (SEA), and CFDA No. 84.004D, Desegregation Assistance Centers (DACs). The original deadline dates were January 31, 1996 for the SEA program and February 2, 1996 for the DAC program. Applications for these programs were not available until mid March. In order to give applicants sufficient time to develop and submit quality applications, the Secretary has extended the application deadline date.

Deadline for Transmittal of Applications: May 9, 1996. This deadline for transmittal of applications is for both programs.

Deadline for Intergovernmental Review: July 9, 1996.

Applications Available: March 26, 1996.

For Applications or Information Contact: Adell S. Washington, U.S. Department of Education, 600 Independence Avenue, S.W., Portals, Suite 4500, Washington, D.C. 20202–6140. Telephone (202) 260–2495. Fax (202) 205–0302. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday. Internet: Adell—Washington@ed.gov

Program Authority: 42 U.S.C. 2000c–2,2000c–5.

Dated: March 21, 1996.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Notice of Public Workshops On the Draft Environmental Impact Statement for the Nevada Test Site and Offsite Locations in the State of Nevada

AGENCY: Department of Energy.

ACTION: Notice of Public Workshops.

SUMMARY: The Department of Energy (DOE) in conjunction with the University of Nevada, Las Vegas, will conduct three additional public hearings in workshop format to solicit comments on the Draft Environmental Impact Statement (EIS) for the Nevada Test Site and Offsite Locations in the State of Nevada (DOE/EIS–0243).

DATES: The dates and locations for the public workshops are listed below. The Boulder City, Nevada meeting will be held at City Hall on April 8, 1996, from 6:00 to 9:00 p.m. The Caliente, Nevada meeting will be held at City Hall on April 16, 1996, from 6:30 to 9:00 p.m. The Tonopah, Nevada meeting will be held in the Commissioners Chambers at the Tonopah Court House on April 23, 1996, from 7:00 to 9.00 p.m.

ADDRESSES: Requests for a copy of the Draft EIS and written comments on the Draft EIS should be directed to: Dr. Donald R. Elle, Director, Environmental Protection Division, U.S. Department of Energy, Nevada Operations Office, P.O. Box 14459, Las Vegas, NV 89195–8066. Oral comments may be submitted at the public workshops or by calling the Nevada Test Site EIS Hotline, 1–800–405–1140 or (702) 295–1392. Comments may also be submitted via facsimile to (702) 295–1264 or via electronic mail at ntseis@nv.doe.gov.

FOR FURTHER INFORMATION CONTACT: For general information on the Department's NEPA process, please contact: Ms. Carol Borgstrom, Director, Office of NEPA Policy and Assistance, U.S. Department of Energy, 1000 Independence Avenue, S.W., Washington, DC 20585, 202–586–4600 or leave a message at 1–800–472–2756.

SUPPLEMENTARY INFORMATION: DOE released the Draft EIS to the public in February 1996 with a DOE notice in the **Federal Register** (61 FR 3924, February 2, 1996) and a U.S. Environmental Protection Agency notice in the **Federal Register** (61 FR 3932, February 2, 1996). Additional information on public hearings for the Draft EIS can be found in the DOE **Federal Register** notice. Written and/or oral comments on the Draft EIS are invited from the general public, other government agencies, and all other interested parties. Comments received or postmarked by May 3, 1996, whether written or oral, submitted directly to the Department, or presented during a public hearing, will be given equal consideration in preparation of the final EIS. Comments received or postmarked after that date will be considered to the extent practicable.

Issued in Washington, D.C., March 22, 1996.

Gary T. Palmer,

Environmental Specialist, Office of Environmental Support Defense Programs.

BILLING CODE 6450–01–P

Federal Energy Regulatory Commission

[Docket No. CP96–41–003]

Colorado Interstate Gas Company; Notice of Petition To Amend

March 21, 1996.

Take notice that on March 20, 1996, Colorado Interstate Gas Company (CIG), P.O. Box 1087, Colorado Springs, Colorado 80944, filed in Docket No. CP96–41–003 a petition to further amend its application filed in Docket No. CP96–41–000 to delete compressors at three compressor stations as well as an 858-foot segment of 18-inch pipeline and measurement facilities, all currently classified as transmission, from those facilities CIG wishes to transfer to its affiliate, CIG Field Services Company (Field Services), all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

CIG states that, at a technical conference convened on March 5, 1996, in Docket No. CP96–41–000, as amended, parties questioned the consistency of the proposed reclassification of compression facilities and also raised the issue of whether Field Services could fully recover the cost of providing gathering services using compressors proposed to be reclassified from transmission to gathering. To alleviate these concerns, CIG indicates that it now seeks to amend its pending application to retain as facilities owned and operated by CIG subject to the Commission's jurisdiction under the Natural Gas Act, the compressors at its Lakin, Morton, and Mocane Compressor Stations currently classified as transmission. It is indicated that these compression facilities consist of 31,700 horsepower. CIG also proposed to retain a 858-foot segment of pipeline with measurement facilities extending from the outlet of the Mocane Compressor Station to the Warren Processing Plant. CIG also proposes to include dehydrators at Mocane and Morton among its transmission assets. No other changes to the original application, as amended on February 23, 1996, are proposed.

CIG indicates that, as a result of the instant petition and a previous petition filed February 23, 1996, the net book value of facilities to be transferred to CIG Field Services Company will be reduced from $36,111,594 to $32,982,883.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before April 1, 1996, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Lois D. Cashell,

Secretary.

[FR Doc. 96–7355 Filed 3–26–96; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. ER96–118–002]

Eastex Power Marketing, Inc.; Notice of Filing

March 21, 1996.

Take notice that on March 1, 1996, Eastex Power Marketing, Inc. tender for filing a letter to expand upon prior representations regarding electric generation owned by affiliates of EPMI.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before April 3, 1996. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. ER96–1301–000]

Florida Power Corporation; Notice of Filing

March 21, 1996.

Take notice that on March 13, 1996, Florida Power Corporation (Florida Power), tendered for filing service agreements providing service to Eastern Power Marketing, Inc. pursuant to its open access transmission tariff (the T–2 Tariff). Florida Power requests that the Commission waive its notice of filing requirements and allow the agreements to become effective on March 14, 1996.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before April 3, 1996. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[Docket No. ID–2589–001]

Brian R. Foster; Notice of Filing

March 21, 1996.

Take notice that on January 3, 1996, Brian R. Foster (Applicant) tendered for filing an application under Section 305(b) of the Federal Power Act to hold the following positions: Director, Savannah Electric and Power Company; Executive Vice President, NationsBank of Georgia, National Association.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before April 1, 1996. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[Docket No. GT96–45–001]

Honeoye Storage Corporation; Notice of Electronic Tariff Filing

March 21, 1996.

Take notice that on March 18, 1996, Honeoye Storage Corporation (Honeoye) filed a diskette containing in electronic format its FERC Gas Tariff, Second Revised Volume No. 1, Honeoye states that the filing does not involve any change in rates or services.

Honeoye also states that the filing was made to comply with the FERC Order No. 582 issued September 28, 1995.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed as provided in Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717–01–M

[Docket Nos. RP91–203–060 and RP92–132–047 (Phase II—PCB Issues)]

Tennessee Gas Pipeline Company; Notice of Compliance Filing

March 21, 1996.

Take notice that on March 18, 1996, Tennessee Gas Pipeline Company tendered for filing as part of its FERC Gas Tariff, Fifth Revised Volume No. 1, the tariffff sheets in Appendix A to the filing, to become effective on July 1, 1995 and thereafter, as indicated.

Tennessee asserts that the purpose of this filing is to comply with the Commission's orders issued November 29, 1995 and February 20, 1996, in FERC Docket Nos. RP91–203 and RP92–132 (Phase II—PCB issues) by which the Commission approved the Stipulation and Agreement filed May 15, 1995 in this proceeding ("PCB Settlement").

Tennessee states that the PCB Settlement resolves outstanding issues relating to Tennessee's recovery from its customers of the costs of remediating PCB and HSL contamination at specified locations on its pipeline system. Tennessee further states that the PCB Settlement requires that Tennessee file the identified tariff sheets to implement the terms and conditions of the PCB Settlement. Tennessee requests that the tariff sheets become effective consistent with the effective date prescribed in the PCB Settlement.

Any person desiring to protest this filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed as provided in Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP96–117–000]

Texas Eastern Transmission Corporation; Notice of Technical Conference

March 21, 1996.

In the Commission's order issued on February 15, 1996, in the above-captioned proceeding, the Commission held that the filing raises issues for which a technical conference is to be convened.

The conference to address the issues has been scheduled for Wednesday, April 3, 1996, from 1:00 p.m. to 5:00 p.m., in a room to be designated at the offices of the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426.

All interested persons and Staff are permitted to attend.

Lois D. Cashell,

Secretary.

[FR Doc. 96–7347 Filed 3–26–96; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. ER94–1488–005, et al.]

Excell Energy Services, Inc., et al.; Electric Rate and Corporate Regulation Filings

March 20, 1996.

Take notice that the following filings have been made with the Commission:

1. Excell Energy Services, Inc., National Power Exchange, Corp., Energy Services, Inc.

[Docket Nos. ER94–1488–005, ER94–1593–005, and ER95–1021–002 (not consolidated)]

Take notice that the following informational filings have been made with the Commission and are on file and available for inspection and copying in the Commission's Public Reference Room:

On March 1, 1996, Excell Energy Services, Inc. filed certain information as required by the Commission's September 29, 1994, order in Docket No. ER94–1488–000.

On March 6, 1996, National Power Exchange Corporation filed certain information as required by the Commission's October 7, 1994, order in Docket No. ER94–1593–000.

On March 4, 1996, Energy Services, Inc. filed certain information as required by the Commission's June 13, 1995, order in Docket No. ER95–1021–000.

2. Cleveland Electric Illuminating Company

[Docket No. ER96–1073–000]

Take notice that on March 12, 1996, Cleveland Electric Illuminating Company tendered for filing an amendment to its February 15, 1996, filing in the above-referenced docket.

Comment date: April 3, 1996, in accordance with Standard Paragraph E at the end of this notice.

3. PacifiCorp

[Docket No. ER96–1288–000]

Take notice that on March 11, 1996, PacifiCorp, tendered for filing in accordance with 18 CFR Part 35 of the Commission's Rules and Regulations, a Restated and Amended Power Sales Agreement dated January 31, 1996 (Sales Agreement) between PacifiCorp and Public Utility District No. 1 of Clark County, Washington (Clark). The Sales Agreement replaces in its entirety the December 28, 1996, Power Sales Agreement, PacifiCorp Rate Schedule FERC No. 416.

Copies of this filing were supplied to Clark, the Public Utility Commission of Oregon and the Washington Utilities and Transportation Commission.

A copy of this filing may be obtained from PacifiCorp's Regulatory Administration Department's Bulletin Board System through a personal computer by calling (503) 464–6122 (9600 baud, 8 bits, no parity, 1 stop bit).

Comment date: April 3, 1996, in accordance with Standard Paragraph E at the end of this notice.

4. Madison Gas and Electric Company

[Docket No. ER96–1289–000]

Take notice that on March 11, 1996, Madison Gas and Electric Company (MGE), tendered for filing a service agreement with FEDERAL Energy Sales Inc. under MGE's Power Sales Tariff. MGE requests an effective date 60 days from the filing date.

Comment date: April 3, 1996, in accordance with Standard Paragraph E at the end of this notice.

5. Louisville Gas and Electric Company

[Docket No. ER96–1290–000]

Take notice that on March 11, 1996, Louisville Gas and Electric Company, tendered for filing copies of a service agreement between Louisville Gas and Electric Company and Entergy Services, Inc. under Rate GSS.

Comment date: April 3, 1996, in accordance with Standard Paragraph E at the end of this notice.

6. Commonwealth Edison Company

[Docket No. ER96–1291–000]

Take notice that on March 11, 1996, Commonwealth Edison Company (ComEd) submitted four Service Agreements, establishing Southern Company Services (Southern), dated September 15, 1995; CNG Power Services Corp. (CNG), dated January 15, 1996; Northern Indiana Public Service Company (NIPSCO), dated January 25, 1996; and Illinois Power Company (IP), dated January 29, 1996, as customers under the terms of ComEd's Power Sales Tariff PS–1 (PS–1 Tariff). ComEd also submitted two additional Service Agreements, establishing Illinois Power Company, (IP), dated January 29, 1996, and Sonat Power Marketing (Sonat), dated February 1, 1996, as customers under the terms of ComEd's Flexible Transmission Service Tariff (FTS–1 Tariff). The Commission has previously designated the PS–1 Tariff as FERC Electric Tariff, Original Volume No. 2, and the FTS–1 Tariff as FERC Electric Tariff, Second Revised Volume No. 3.

ComEd requests an effective date of February 11, 1996, for all six Service Agreements and accordingly seeks waiver of the Commission's requirements. Copies of this filing were served upon Southern, CNG, NIPSCO, IP, Sonat and the Illinois Commerce Commission.

Comment date: April 3, 1996, in accordance with Standard Paragraph E at the end of this notice.

7. Florida Power Corporation

[Docket No. ER96–1302–000]

Take notice that on March 13, 1996, Florida Power Corporation (FPC), tendered for filing a contract for the provision of interchange service between itself and Eastern Power Marketing, Inc. The contract provides for service under Schedule J, Negotiated Interchange Service and OS, Opportunity Sales. Cost support for both schedules has been previously filed and approved by the Commission. No specifically assignable facilities have been or will be installed or modified in order to supply service under the proposed rates.

FPC requests Commission waiver of the 60-day notice requirement in order to allow the contract to become effective as a rate schedule on March 14, 1996. Waiver is appropriate because this filing does not change the rate under these two Commission accepted, existing rate schedules.

Comment date: April 3, 1996, in accordance with Standard Paragraph E at the end of this notice.

8. Minnesota Power & Light Company

[Docket No. ER96–1303–000]

Take notice that on March 13, 1996, Minnesota Power & Light Company, tendered for filing a signed Service Agreement and reciprocal Letter Agreement with Sonat Power Marketing, Inc. under its Wholesale Coordination Sales Tariff to satisfy its filing requirements under this tariff.

Comment date: April 3, 1996, in accordance with Standard Paragraph E at the end of this notice.

9. Pennsylvania Power & Light Company

[Docket No. ER96–1304–000]

Take notice that on March 13, 1996, Pennsylvania Power & Light Company (PP&L), tendered for filing with the Federal Energy Regulatory Commission, Service Agreements (the Agreements) between PP&L and Aquila Power Corporation, dated February 14, 1996, and between PP&L and Morgan Stanley Capital Group, Inc., dated February 28, 1996.

The Agreements supplement a Short Term Capacity and Energy Sales umbrella tariff approved by the Commission in Docket No. ER95–782–000 on June 21, 1995.

In accordance with the policy announced in *Prior Notice and Filing Requirements Under Part II of the Federal Power Act*, 64 FERC ¶ 61,139, *clarified and reh'g granted in part and denied in part*, 65 FERC ¶ 61,081 (1993), PP&L requests the Commission to make the Agreements effective as of March 13, 1996, because service will be provided under an umbrella tariff and each service agreement is filed within 30 days after the commencement of service. In accordance with 18 CFR 35.11, PP&L has requested waiver of the sixty-day notice period in 18 CFR 35.2(e). PP&L has also requested waiver of certain filing requirements for information previously filed with the Commission in Docket No. ER95–782–000.

PP&L states that a copy of its filing was provided to the customers involved and to the Pennsylvania Public Utility Commission.

Comment date: April 3, 1996, in accordance with Standard Paragraph E at the end of this notice.

10. Montaup Electric Company

[Docket No. ER96–1305–000]

Take notice that on March 13, 1996, Montaup Electric Company (Montaup), filed a Notice of Cancellation of a service agreement between Montaup and New England Power Company, Montaup Rate Schedule No. 100 and Supplement No. 1 thereto. Montaup requests that the Notice be allowed to become effective February 23, 1996.

Comment date: April 3, 1996, in accordance with Standard Paragraph E at the end of this notice.

11. Montaup Electric Company

[Docket No. ER96–1306–000]

Take notice that on March 13, 1996, Montaup Electric Company (Montaup) filed 1) executed unit sales service agreements under Montaup's FERC Electric Tariff, Original Volume No. III, and 2) executed service agreements for the sale of system capacity and associated energy under Montaup's FERC Electric Tariff Original Volume No. IV. The service agreements under both tariffs are between Montaup and the following companies:

1. Massachusetts Municipal Wholesale Electric Company (MMWEC)
2. Bangor Hydro-Electric Company (BHE)
3. New York State Electric & Gas Corporation (NYSEG)
4. New England Power Company (NEP)

The service agreements under Original Volume No. IV allow them, through certificates of concurrence, to provide capacity from one of their units, in order to enable Montaup to make a system sale while maintaining its minimum monthly system capability required under the present NEPOOL agreement.

The transactions under the service agreements are purely voluntary and will be entered into only if mutually beneficial and agreeable. Montaup requests a waiver of the sixty-day notice requirement so that the service agreement may become effective January 3, 1996 for the MMWEC agreements, January 19, 1996 for the BHE agreements, and February 23, 1996 for the NYSEG and the NEP agreements.

Comment date: April 3, 1996, in accordance with Standard Paragraph E at the end of this notice.

12. Atlantic City Electric Company

[Docket No. ER96–1307–000]

Take notice that on March 13, 1996, Atlantic City Electric Company (ACE), tendered for filing an Agreement for Short-Term Energy Transactions between ACE and USGenPS Power Services, L.P. (USGenPS). ACE requests that the Agreement be accepted to become effective December 19, 1995.

Copies of the filing were served on USGenPS and the New Jersey Board of Regulatory Commissioners.

Comment date: April 3, 1996, in accordance with Standard Paragraph E at the end of this notice.

13. Kentucky Utilities Company

[Docket No. ER96–1308–000]

Take notice that on March 13, 1996, Kentucky Utilities Company (KU), tendered for filing a service agreement between KU and KN Marketing, Inc. under its TS Tariff. KU requests an effective date of February 23, 1996.

Comment date: April 3, 1996, in accordance with Standard Paragraph E at the end of this notice.

14. PECO Energy Company

[Docket No. ER96–1311–000]

Take notice that on March 14, 1996, PECO Energy Company (PECO) filed a Service Agreement dated February 14, 1996, with Entergy Power Marketing Corporation (EPMC) under PECO's FERC Electric Tariff Original Volume No. 1 (Tariff). The Service Agreement adds EPMC as a customer under the Tariff.

PECO requests an effective date of February 14, 1996, for the Service Agreement.

PECO states that copies of this filing have been supplied to EPCM and to the Pennsylvania Public Utility Commission.

Comment date: April 3, 1996, in accordance with Standard Paragraph E at the end of this notice.

15. PECO Energy Company

[Docket No. ER96–1312–000]

Take notice that on March 14, 1996, PECO Energy Company (PECO) filed a Service Agreement dated February 14, 1996, with Entergy Power, Inc. (Entergy Power) under PECO's FERC Electric Tariff Original Volume No. 1 (Tariff). The Service Agreement adds Entergy Power as a customer under the Tariff.

PECO requests an effective date of February 14, 1996, for the Service Agreement.

PECO states that copies of this filing have been supplied to Entergy Power and to the Pennsylvania Public Utility Commission.

Comment date: April 3, 1996, in accordance with Standard Paragraph E at the end of this notice.

16. American Electric Power Service Corporation

[Docket No. ER96–1313–000]

Take notice that on March 14, 1996, the American Electric Power Service Corporation (AEPSC), tendered for filing a number of umbrella-type agreements for service under the AEP Companies' Power Sales and Point-to-Point Transmission Service Tariffs. The agreements were executed by AEPSC, on behalf of the AEP Companies and the following parties: Alpena Power Company, Aquila Power Corporation, Electric Clearinghouse, Inc., Entergy Power Corporation, InterCoast Power Marketing Co., Ohio Edison Company, and Tennessee Power.

The Point-to-Point Transmission Tariff has been accepted to replace AEPSC FERC Electric Tariff, Original Volume No. 1, effective August 15, 1995. The Power Sales Tariff has been designated as FERC Electric Tariff, Original Volume No. 2, effective October 1, 1995. AEPSC requests waiver of notice to permit the Service Agreements to be made effective for service billed on and after February 13, 1996.

A copy of the filing was served upon the parties listed above and the State Utility Regulatory Commissions of Indiana, Kentucky, Michigan, Ohio, Tennessee, Virginia and West Virginia.

Comment date: April 3, 1996, in accordance with Standard Paragraph E at the end of this notice.

17. LSP-Cottage Grove, L.P.

[Docket No. QF94–142–002]

On March 4, 1996, LSP-Cottage Grove, L.P., of 402 East Main Street, Bozeman, Montana 59715 submitted for filing an application for recertification of a facility as a qualifying cogeneration facility pursuant to Section 292.207(b) of the Commission's Regulations. No determination has been made that the submittal constitutes a complete filing.

The cogeneration facility, to be located in Washington County, Minnesota, was previously certified as a qualifying cogeneration facility, *LSP-Cottage Grove, L.P.*, 69 FERC ¶ 62,130 (1994). The instant request for recertification is due to a change in the ownership structure and internal description of the facility.

Comment date: Within 30 days after the date of publication of this notice in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party

must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 96–7431 Filed 3–26–96; 8:45 am]

BILLING CODE 6717–01–P

[Docket No. EC96–14–000, et al.]

Metropolitan Edison Company, et al. Electric Rate and Corporate Regulation Filings

March 21, 1996.

Take notice that the following filings have been made with the Commission:

1. Metropolitan Edison Company

[Docket No. EC96–14–000]

Take notice that on March 11, 1996, Metropolitan Edison Company (MetEd) submitted for filing an application under Section 203 of the Federal Power Act seeking authorization from the Commission for the sale and lease of certain MetEd transmission facilities to Pennsylvania Power & Light Company (PP&L). MetEd has served copies of the filing on the Pennsylvania Public Utility Commission and PP&L.

Comment date: April 10, 1996, in accordance with Standard Paragraph E at the end of this notice.

2. PanEnergy Lake Charles Generation, Inc.

[Docket No. EG96–50–000]

On March 18, 1996, PanEnergy Lake Charles Generation, Inc. ("Applicant"), 5400 Westheimer Court, Houston, Texas 77056, filed with the Federal Energy Regulatory Commission an application for determination of exempt wholesale generator status pursuant to Part 365 of the Commission's Regulations.

Applicant, is an indirect, wholly-owned subsidiary of Panhandle Eastern Corporation, doing business as PanEnergy Corp. Applicant intends to purchase a portion of a generating facility (the "Facility") with a nominal capacity of 32 megawatts located in the vicinity of Lake Charles, Louisiana. Applicant's portion of the Facility is an eligible facility as defined under Section 32(a)(2) of the Public Utility Holding Company Act of 1935.

Comment date: April 11, 1996, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

3. Louisville Gas and Electric Company

[Docket No. ER94–1380–007]

Take notice that on February 28, 1996, Louisville Gas and Electric Company tendered for filing revisions to its rate schedules to comply with the Commission's order issued on July 25, 1995 in Docket No. ER94–1380–000.

Comment date: April 4, 1996, in accordance with Standard Paragraph E at the end of this notice.

4. Ruffin Energy Services, Inc., Premier Enterprises, Inc.

[Docket Nos. ER95–1047–002 and ER95–1123–001 (not consolidated)]

Take notice that the following informational filings have been made with the Commission and are on file and available for inspection and copying in the Commission's Public Reference Room:

On March 11, 1996 Ruffin Energy Services, Inc. filed certain information as required by the Commission's July 7, 1995, order in Docket No. ER95–1047–000.

On February 26, 1996 Premier Enterprises, Inc. filed certain information as required by the Commission's August 7, 1995, order in Docket No. ER95–1123–000.

5. Great Bay Power Corporation

[Docket No. ER96–726–000]

Take notice that on March 15, 1996, Great Bay Power Corporation (Great Bay) tendered for filing further revisions to its Tariff for Short-Term Sales, under which it sells capacity and/or energy from its ownership interest in Seabrook Unit No. 1 and/or purchased power. The currently effective Tariff was accepted for filing by the Commission on November 11, 1993, in Docket No. ER93–924–000. Great Bay requests an effective date for the revisions of February 28, 1996.

Great Bay states copies of the filing were served on existing customers and on the New Hampshire Public Utilities Commission.

Comment date: April 4, 1996, in accordance with Standard Paragraph E at the end of this notice.

6. South Carolina Electric & Gas Company

[Docket No. ER96–870–000]

Take notice that on March 15, 1996, South Carolina Electric & Gas Company (SCE&G), tendered for filing an amendment to a transmission service agreement dated January 1, 1996 between SCE&G and the South Carolina Public Service Authority under which SCE&G will provide specified transmission service to the Woodland Hills Substation effective January 1, 1996. SCE&G requests waiver of the Commission's notice requirements to implement the agreement as amended.

Comment date: April 4, 1996, in accordance with Standard Paragraph E at the end of this notice.

7. Duke/Louis Dreyfus Energy Services (New England) L.L.C.

[Docket No. ER96–1121–000]

Take notice that on March 18, 1996, Duke/Louis Dreyfus Energy Services (New England) L.L.C. (the Applicant) filed (1) additional exhibits to the prepared direct testimony of Mr. Boisvert enclosed with the original filing and (2) a revision to the Code of Conduct as originally filed. These enclosures are tendered as a supplement to the filing in response to a request by Staff.

The additional exhibits to Mr. Boisvert's testimony present the data already contained in his exhibits in the format which Staff has requested. The exhibits continue to show that Montaup Electric Company has only a small share of relevant generation markets.

The Applicant requests waiver of the 60-day notice requirement in order to allow the filing, as supplemented, to become effective on April 21, 1996, when the original filing was requested to become effective.

Comment date: April 4, 1996, in accordance with Standard Paragraph E at the end of this notice.

8. New England Power Company

[Docket No. ER96–1162–000]

Take notice that on March 4, 1996, New England Power Company tendered for filing an amendment in the above-referenced docket.

Comment date: April 4, 1996, in accordance with Standard Paragraph E at the end of this notice.

9. Nevada Power Company

[Docket No. ER96–1214–000]

Take notice that on March 1, 1996, Nevada Power Company tendered for filing supplemental information to its February 29, 1996, filing in the above-referenced docket.

Comment date: April 4, 1996, in accordance with Standard Paragraph E at the end of this notice.

10. UtiliCorp United Inc.

[Docket No. ER96–1227–000]

Take notice that Missouri Public Service, a Division of UtiliCorp United Inc. (MPS) on March 1, 1996, tendered for filing an Amendment dated February 20, 1996 to the Transmission and Interconnection Agreement between MPS and Associated Electric Cooperative, Inc. (AEC) dated August 24, 1988 (the Agreement).

The filing states that the Amendment was entered into in order to add a new delivery point to the Agreement. No change in rates will occur as a result of the Amendment.

Copies of the filing were served upon AEC and the Missouri Public Service Commission.

Comment date: April 4, 1996, in accordance with Standard Paragraph E at the end of this notice.

11. Midwest Power Systems, Inc.

[Docket No. ER96–1252–000]

Take notice that on March 5, 1996, Midwest Power Systems, Inc. tendered for filing a Notice of Cancellation of FERC Rate Schedule No. 52.

Comment date: April 4, 1996, in accordance with Standard Paragraph E at the end of this notice.

12. NEES Transmission Services, Inc., New England Power Company, Massachusetts Electric Company, The Narragansett Electric Company, and Granite State Electric Company

[Docket No. ER96–1309–000]

Take notice that on March 13, 1996, NEES Transmission Services, Inc. (NEES Trans) filed open access transmission tariffs and service agreements for point-to-point and network service. Concurrent with this filing the New England Electric System is seeking Securities and Exchange Commission approval to establish a transmission-only company and an affiliate of the New England Electric System. According to NEES Trans, it will assume control of the transmission facilities and transmission entitlements held by New England Power Company (NEP) and the distribution facilities of Massachusetts Electric Company (Mass Electric), The Narragansett Electric Company (Narragansett) and Granite State Electric Company (Granite State) for wholesale purposes. NEES Trans will henceforth be the sole provider of wholesale transmission and wholesale distribution services across the integrated network of the NEES Companies.

As part of the filing, NEP also filed relevant amendments to its FERC Electric Tariff, Original Volume No. 1, which provides all-requirements service, to begin the unbundling of that tariff.

NEES Trans and NEP also tendered for filing a series of contracts which support the unbundling of generation and transmission services. NEP, Mass Electric, Narragansett and Granite State tendered a Transmission and Distribution Support Agreement which authorizes this arrangement and provides for the rates to be charged to NEES Trans.

Comment date: April 4, 1996, in accordance with Standard Paragraph E at the end of this notice.

13. TransAlta Enterprises Corporation

[Docket No. ER96–1316–000]

Take notice that on March 15, 1996, TransAlta Enterprises Corporation (TEN), tendered for filing pursuant to Rule 205, 18 CFR 385.205, a petition for waivers and blanket approvals under various regulations of the Commission and for an order accepting its FERC Electric Rate Schedule No. 1 to be effective at the earliest possible date but no later than 60 days from the date of its filing.

TEN intends to engage in electric power and energy transactions as a marketer and a broker. In transactions where TEN sells electric energy, it proposes to make such sales on rates, terms, and conditions to be mutually agreed to with the purchasing party. As outlined in the petition, TEN is an affiliate of TransAlta Utilities Corporation, an integrated electric utility serving customers in Alberta, Canada.

Comment date: April 4, 1996, in accordance with Standard Paragraph E at the end of this notice.

14. The Dayton Power and Light Co.

[Docket No. ER96–1317–000]

Take notice that on March 15, 1996, The Dayton Power and Light Company (Dayton), tendered for filing on an executed Master Electric Interchange Agreement between Dayton and Noram Energy Services (NES).

Pursuant to the rate schedules attached as Exhibit B to the Agreement Dayton will provide to NES power and/or energy for resale.

Comment date: April 4, 1996, in accordance with Standard Paragraph E at the end of this notice.

15. Louisville Gas and Electric Company

[Docket No. ER96–1318–000]

Take notice that on March 15, 1996, Louisville Gas and Electric Company, tendered for filing copies of service agreements between Louisville Gas and Electric Company and Enron Power Marketing, Inc. under Rate GSS.

Comment date: April 4, 1996, in accordance with Standard Paragraph E at the end of this notice.

16. Louisville Gas and Electric Company

[Docket No. ER96–1319–000]

Take notice that on March 15, 1996, Louisville Gas and Electric Company, tendered for filing copies of service agreements between Louisville Gas and Electric Company and NorAm Energy Services under Rate GSS.

Comment date: April 4, 1996, in accordance with Standard Paragraph E at the end of this notice.

17. Public Service Electric and Gas Company

[Docket No. ER96–1320–000]

Take notice that on March 15, 1996, Public Service Electric and Gas Company (PSE&G), tendered for filing, two transmission tariffs: a Point-to-Point Transmission Service Tariff and a Network Integration Service Transmission Tariff. PSE&G states that the tariffs are substantively identical to the Pro-Forma tariffs attached to the Commission's NOPR in Docket No. RM95–8–000. Copies of this filing have been served to the New Jersey Board of Public Utilities.

Comment date: April 4, 1996, in accordance with Standard Paragraph E at the end of this notice.

18. Tampa Electric Company

[Docket No. ER96–1321–000]

Take notice that on March 15, 1996, Tampa Electric Company (Tampa Electric), tendered for filing umbrella service agreements with InterCoast Power Marketing Company, Sonat Power Marketing, Inc., and the Utilities Commission, City of New Smyrna Beach under Tampa Electric's point-to-point transmission service tariff.

Tampa Electric proposes an effective date of March 12, 1996, for the service agreements, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing have been served on each customer under the service agreements and the Florida Public Service Commission.

Comment date: April 4, 1996, in accordance with Standard Paragraph E at the end of this notice.

19. Wisconsin Electric Power Company

[Docket No. ER96–1322–000]

Take notice that on March 15, 1996, Wisconsin Electric Power Company (Wisconsin Electric), tendered for filing an Electric Service Agreement between itself and Utilicorp United. The Electric Service Agreement provides for service under Wisconsin Electric's Coordination Sales Tariff.

Wisconsin Electric requests an effective date of sixty days from the date of this filing. Copies of the filing have been served on Utilicorp United, the Public Service Commission of Wisconsin and the Michigan Public Service Commission.

Comment date: April 4, 1996, in accordance with Standard Paragraph E at the end of this notice.

20. Interstate Power Company

[Docket No. ES96–20–000]

Take notice that on March 18, 1996, Interstate Power Company filed an application under § 204 of the Federal Power Act seeking authorization to issue up to $75 million of short-term debt on or before December 31, 1997, with final maturities not later than December 31, 1998.

Comment date: April 17, 1996, in accordance with Standard Paragraph E at the end of this notice.

21. AES Puerto Rico, L.P.

[Docket No. QF96–28–000]

On March 19, 1996, AES Puerto, L.P. tendered for filing an amendment to its filing in this docket.

The amendment pertains to information relating to the ownership and technical aspects of the facility. No determination has been made that this submittal constitutes a complete filing.

Comment date: April 12, 1996, in accordance with Standard Paragraph E at the end of this notice.

22. Trigen St. Louis, Inc.

[Docket No. TX96–8–000]

On March 19, 1996, Trigen St. Louis, Inc. (Trigen), One Ashley Place, St. Louis, Missouri, filed with the Federal Energy Regulatory Commission an application requesting that the Commission order Union Electric (UE) to provide transmission services pursuant to Section 211 of the Federal Power Act.

Trigen requests the Commission to issue a proposed order directing that UE provide Trigen with firm point-to-point service to move 57 MW from the facility site to UE's interconnection with CIPSCO, with nonfirm service to other interconnections. Moreover, the service should be provided under rates, terms and conditions comparable and equivalent to those being provided to other users of UE's transmission system, including UE. Service should begin fifteen (15) months after a transmission agreement is reached and continue for a fifteen (15) year period.

Comment date: April 19, 1996, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[OPP–181005; FRL 5358–1]

Carbofuran; Receipt of Application for Emergency Exemption, Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received a specific exemption request from the Arkansas State Plant Board (hereafter referred to as the "Applicant") to use the pesticide flowable Carbofuran (Furadan 4F Insecticide/Nematicide) (EPA Reg. No. 279–2876) to treat up to 1 million acres of cotton to control cotton aphids. The Applicant proposes the use of a chemical which has been the subject of a Special Review within EPA's Office of Pesticide Programs, and the proposed use could pose a risk similar the risk assessed by EPA under the Special Review of granular carbofuran. Therefore, in accordance with 40 CFR 166.24, EPA is soliciting public comment before making the decision whether or not to grant the exemption.

DATES: Comments must be received on or before April 11, 1996.

ADDRESSES: Three copies of written comments, bearing the identification notation "OPP–181005," should be submitted by mail to: Public Response and Program Resource Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1132, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number [OPP–181005]. No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments on this notice may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found below in this document.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be provided by the submitter for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments filed pursuant to this notice will be available for public inspection in Rm. 1132, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, VA, from 8 a.m. to 4:30 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: David Deegan, Registration Division (7505W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Floor 6, Crystal Station #1, 2800 Jefferson Davis Highway, Arlington, VA, (703)308–8327; e-mail: deegan.dave@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: Pursuant to Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at her discretion, exempt a state agency from any registration provision of FIFRA if she determines that emergency conditions exist which require such exemption. The Applicant has requested the Administrator to issue a specific exemption for the use of carbofuran on cotton to control aphids. Information in accordance with 40 CFR part 166 was submitted as part of this request.

As part of this request, the Applicant asserts that the state of Arkansas is likely to experience a non-routine infestation of aphids during the 1996 cotton growing season. The applicant further claims that, without a specific exemption of FIFRA for the use of flowable carbofuran on cotton to control cotton aphids, cotton growers in much of the state will suffer significant economic losses. The applicant also details a use program designed to minimize risks to pesticide handlers and applicators, non-target organisms (both Federally-listed endangered species, and non-listed species), and to reduce the possibility of drift and runoff.

The applicant proposes to make no more than two applications at the rate of 0.25 lb. active ingredient [(a.i.,)] (8 fluid oz.) in a minimum of 2 gallons of finished spray per acre by air, or 10 gallons of finished spray per acre by ground application. The total maximum proposed use during the 1996 growing season (June 1, 1996 until September 30, 1996) would be 0.5 lb. a.i. (16 fluid oz.) per acre. The applicant proposes that the maximum acreage which could be treated under the requested exemption would be 1 million acres. If all acres were treated at the maximum proposed rates, then 500,000 lbs. a.i. would be used.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require publication of a notice of receipt of an application for a specific exemption proposing use of a chemical (i.e., an active ingredient) which has been the subject of a Special Review within EPA's Office of Pesticide Programs, and the proposed use could pose a risk similar the risk assessed by EPA under the previous Special Review. Such notice provides for opportunity for public comment on the application.

A record has been established for this notice under docket number [OPP–181005] (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI is available for inspection from 8 a.m to 4:30 p.m., Monday through Friday, excluding legal holidays. The public record is located in Room 1132 of the Public Response and Program Resource Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Electronic comments can be sent directly to EPA at:

opp-docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this notice, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official record which will also include all comments submitted directly in writing. The official record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document. Accordingly, interested persons may submit written views on this subject to the Field Operations Division at the address above.

The Agency, accordingly, will review and consider all comments received during the comment period in determining whether to issue the emergency exemption requested by the Arkansas State Plant Board.

List of Subjects

Environmental protection, Pesticides and pests, Emergency exemptions.

Dated: March 18, 1996.

BILLING CODE 6560–50–F

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2323–012 and 2334–001]

New England Power Company, Western Massachusetts Electric Company; Notice of Intention To Hold a Public Meeting for Discussion of the Draft Environmental Impact Statement for the Deerfield River

March 21, 1996.

On February 29, 1996, the Commission staff mailed the Deerfield River Projects DEIS to the Environmental Protection Agency, resource and land management agencies, and interested organizations and individuals. This document evaluates the environmental consequences of the "Deerfield River Project, Offer of Settlement" and continuing the operation and maintenance of the existing Deerfield and Garners Falls Projects, in Massachusetts and Vermont.

The DEIS also evaluates the environmental effects of implementing the Deerfield River Project, Offer of Settlement; applicants' proposals supplemented with staff's recommended enhancement measures; and the no-action alternative.

A public meeting which will be recorded by an official stenographer, is scheduled on Tuesday April 9, 1996, from 7:00 p.m. to 9:00 p.m. at the Mohawk Trail Regional High School at 26 Ashfield Road, Shelburne Falls, Massachusetts, and Wednesday, April 10, 1996, from 7:00 p.m. to 9:00 p.m. at the Wilmington High School in Wilmington, Vermont.

At the meetings, all interested person will have an opportunity to provide oral and written comments regarding the Deerfield River Projects DEIS for the Commission's public record.

For further information, please contact Mr. R. Feller (Telephone 202–219–2796), or Mr. Bob Bell (Telephone 202 219–2806), Federal Energy Regulatory Commission, Office of Hydropower Licensing, 888 First Street, NE, Washington, DC, 20426.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

ENVIRONMENTAL PROTECTION AGENCY

[OPP–181004; FRL 5356–8]

Dimethomorph; Receipt of Applications for Emergency Exemptions, Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received specific exemption requests from the North Carolina and Kentucky Departments of Agriculture (hereafter referred to as the "Applicants") to use the pesticide dimethomorph (CAS 110488–70–5) to treat up to 85,500 (NC) and 167,500 (KY) acres of tobacco to control metalaxyl - resistant blue mold. The Applicants propose the use of a new (unregistered) chemical; therefore, in accordance with 40 CFR 166.24, EPA is soliciting public comment before making the decision whether or not to grant the exemptions.

DATES: Comments must be received on or before April 11, 1996.

ADDRESSES: Three copies of written comments, bearing the identification notation "OPP–181004," should be submitted by mail to: Public Response

and Program Resource Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1132, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number [OPP–181004]. No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments on this notice may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found below in this document. Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as (CBI).

Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be provided by the submitter for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments filed pursuant to this notice will be available for public inspection in Rm. 1132, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, VA, from 8 a.m. to 4:30 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Libby Pemberton, Registration Division (7505W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Floor 6, Crystal Station #1, 2800 Jefferson Davis Highway, Arlington, VA, (703) 308–8326; e-mail: pemberton.libby@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: Pursuant to Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C.136p), the Administrator may, at her discretion, exempt a state agency from any registration provision of FIFRA if she determines that emergency conditions exist which require such exemption. The Applicants have requested the Administrator to issue specific exemptions for the use of dimethomorph on tobacco to control blue mold. Information in accordance with 40 CFR part 166 was submitted as part of these requests.

In 1995, a national epidemic of tobacco blue mold, caused by metalaxyl - resistant strains of the pathogen, occurred. Resistant strains are becoming more widely disseminated, a situation which is exacerbated with a protracted wet weather pattern. Previously, blue mold was controlled primarily by treatment with metalaxyl, with significant assistance from ferbam and mancozeb. A very high level of control was possible with these materials until metalaxyl - resistant strains appeared. Labeled pesticides made under ideal spray conditions but high disease pressure do not provide acceptable economic levels of control.

The Applicants state that presently, there are no fungicides registered in the U.S. that will provide adequate control of the metalaxyl - resistant strains of blue mold. The Applicants state that dimethomorph has been shown to be effective against these strains of blue mold. Dimethomorph holds current registrations throughout many European countries. The Applicants state that losses in 1995 were greater than $70 million in Kentucky and $9 million in North Carolina. To have another year of losses on this scale could mean bankruptcy for many of these farmers. Under appropriate conditions, it is possible that this disease could develop to epidemic proportions, causing major changes and losses to the U.S. tobacco industry.

The Applicants propose to apply dimethomorph at a maximum rate of 1.725 lbs. active ingredient (a.i.), [(2.5 lb. of product)] per acre, by ground with a maximum of 4 applications per crop, to a maximum of 85,500 acres of tobacco in North Carolina and 167,500 acres of tobacco in Kentucky.

This notice does not constitute a decision by EPA on the applications. The regulations governing section 18 require publication of a notice of receipt of an application for a specific exemption proposing use of a new chemical (i.e., an active ingredient not contained in any currently registered pesticide). Such notice provides for opportunity for public comment on the application.

A record has been established for this notice under docket number "OPP–181004" (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The public record is located in Room 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Electronic comments can be sent directly to EPA at:

opp-docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this notice, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official record which will also include all comments submitted directly in writing. The official record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document. Accordingly, interested persons may submit written views on this subject to the Field OperationsDivision at the address above. The Agenoy, accordingly, will determine whether to issue the emergency exemptions requested by the North Carolina and Kentucky Departments of Agriculture.

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 800 North Capitol Street, NW., 9th Floor. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appeärs. The requirements for comments are found in section 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 203–01130–007.

Title: Information System Agreement.

Parties:

A.P. Moller-Maersk Line
Crowley Maritime Corporation
P&O Containers, Ltd.
American President Lines, Ltd.
Sea-Land Service, Inc.
Hapag-Lloyd AG
Orient Overseas Container, Inc.
Lykes Bros. Steamship Co., Inc.
Nedlloyd (USA) Corp.
Kawasaki Kisen Kaisha

Synopsis: The proposed amendment expands the member's authority to discuss and agree on ways to reduce their costs' of operation and cooperate in the acquisition of goods and services used in their operations.

Agreement No.: 232–011535.
Title: Central American Space Charter Agreement.
Parties:
Tropical Shipping and Construction Co., Ltd.
Southeastern Shipping Line, Ltd.

Synopsis: The proposed Agreement permits the parties to charter space to and from one another, consult and agree upon the deployment and utilization of vessels, and to rationalize sailings in the trade between U.S. Atlantic and Gulf Coast ports and points, and ports and points in El Salvador, Honduras, Guatemala, and Nicaragua.

Agreement No.: 203–011536.
Title: Grand Alliance Agreement.
Parties:
Hapag-Lloyd Aktiengesellchaft
Neptune Orient Lines, Ltd.
Nippon Yusen Kaisha
P&O Containers Limited

Synopsis: The proposed Agreement permits the parties to charter vessel and vessel space to and from one another, consult and agree upon the deployment and utilization of vessels. The parties are also authorized to enter into service contracts in the trade between U.S. Atlantic, Gulf (Portland, Maine to and including Brownsville, Texas range and Puerto Rico) and Pacific Coast (including Hawaii and Alaska) ports and points, on the one hand, and port and points in the Far East, South East Asia, South West Asia, the Arabian Gulf, Red Sea, Gulf of Oman, Europe, Canada, and Mexico, on the other hand.

By Order of the Federal Maritime Commission.

Dated: March 22, 1996.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than April 11, 1996.

A. Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. Anthony A. & Mary E. Anderson, Mobridge, South Dakota; to acquire a total of 6.66 percent; Kelly L. & Shelly D. Christianson, Hot Springs, South Dakota, to acquire a total of 8.67 percent; Danny B. & Rebecca J. Decker, Casper, Wyoming, to acquire a total of 4.33 percent; Kenny L. & Barbara B. DeGering, Lusk, Wyoming, to acquire a total of 8.67 percent; Kenny G. & Linda M. Decker, Lusk, Wyoming, to acquire a total of 4.33 percent; Thomas D. & Candace L. Dooper, Lusk, Wyoming, to acquire a total of 8.67; Jay E. & Leslie L. Hammond, Lusk, Wyoming, to acquire a total of 4.33 percent; Ralph K. Hammond Trust, Ralph K. Hammond, trustee, both of Loveland, Colorado, to acquire 4.33 percent; Henry Dale & Janice K. Hytrek, Lusk, Wyoming, to acquire a total of 6.66 percent; Eugene L. & Carol A. Kupke, Lusk, Wyoming, to acquire a total of 8.67 percent; Norbanc Group, Inc., Pine River, Minnesota, to acquire a total of 8.67 percent; Jacob E. & Lorrie K. Reed, Lusk, Wyoming, to acquire a total of 8.67 percent; Joel D. & Laurie J. Wasserburger, Lusk, Wyoming, to acquire a total of 8.67 percent; and Thomas L. & Valerie A. Wasserburger, Lusk, Wyoming, to acquire a total of 8.67 percent, of the voting shares of Banker's Capital Corporation, Lusk, Wyoming, and thereby indirectly acquire Lusk State Bank, Lusk, Wyoming.

Board of Governors of the Federal Reserve System, March 22, 1996.

Jennifer J. Johnson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–F

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act, including whether the acquisition of the nonbanking company can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices" (12 U.S.C. 1843). Any request for a hearing must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal. Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 19, 1996.

A. Federal Reserve Bank of Chicago (James A. Bluemle, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. Firstar Corporation, Milwaukee, Wisconsin, and *Firstar Corporation of Minnesota,* Milwaukee, Wisconsin; to merge with Jacob Schmidt Company, St. Paul, Minnesota, and American Bancorporation, Inc., St. Paul, Minnesota, and thereby indirectly acquire American Bank, N.A., St. Paul, Minnesota; American Commercial Bank, St. Paul, Minnesota; American Bank Lake City, Lake City, Minnesota; and American Bank Moorhead, Moorhead, Minnesota.

In connection with this application, Applicants also have allied to acquire American Credit Corporation, St. Paul, Minnesota, and Lake City Agency, Inc., Lake City, Minnesota, and thereby engage in making and servicing loans, pursuant to § 225.25(b)(1)(iv) of the Board's Regulation Y; and in insurance agency activities, pursuant to § 225.25(b)(8)(iv) of the Board's Regulation Y.

B. Federal Reserve Bank of San Francisco (Kenneth R. Binning, Director, Bank Holding Company) 101 Market Street, San Francisco, California 94105:

1. Security Bank Holding Company, and Security Bank Holding Company Employee Stock Ownership Plan, both of Coos Bay, Oregon; to acquire not less than 51 percent of the voting shares of Lincoln Security Bank, Newport, Oregon (in organization).

Board of Governors of the Federal Reserve System, March 21, 1996.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210–01–F

Notice of Proposals to Engage in Permissible Nonbanking Activities or to Acquire Companies that are Engaged in Permissible Nonbanking Activities

The companies listed in this notice have given notice under section 4 of the Bank Holding Company Act (12 U.S.C. 1843) (BHC Act) and Regulation Y, (12 CFR part 225) to engage *de novo,* or to acquire or control voting securities or assets of a company that engages either directly or through a subsidiary or other company, in a nonbanking activity that is listed in § 225.25 of Regulation Y (12 CFR 225.25) or that the Board has determined by Order to be closely related to banking and permissible for bank holding companies. Unless otherwise noted, these activities will be conducted throughout the United States.

Each notice is available for inspection at the Federal Reserve Bank indicated. Once the notice has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether the proposal complies with the standards of section 4 of the BHC Act, including whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices" (12 U.S.C. 1843). Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 9, 1996.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. Norwest Corporation, Minneapolis, Minnesota; to engage *de novo* through its subsidiary, Next Home Mortgage, Clive, Iowa, in residential mortgage lending business, pursuant to § 225.25(b)(1) of the Board's Regulation Y. The co-venturers will be Norwest Ventures, Inc. and Next Generation Realty, Inc., Clive, Iowa.

Board of Governors of the Federal Reserve System, March 21, 1996.

BILLING CODE 6215–01–F

FEDERAL TRADE COMMISSION

[File No. 932–3176]

The Diet Workshop, Inc.; The Diet Workshop of Boston, Inc.; Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would prohibit the respondents from misrepresenting the results of any weight loss program they offer, require them to have scientific data to back up any claims about weight loss and maintenanco, and

mandate that they make certain disclosures in connection with maintenance and other claims. The consent agreement settles allegations that the respondents engaged in deceptive advertising by making unsubstantiated weight loss and weight-loss maintenance claims and by implying, without substantiation, that the consumer testimonials they used represented the typical experience of dieters on the programs.

DATES: Comments must be received on or before May 28, 1996.

ADDRESSES: Comments should be directed to: FTC/Office of the Secretary, Room 159, 6th St. and Pa. Ave., N.W., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT:

Andrew D. Caverly, Boston Regional Office, Federal Trade Commission, Suite 810, 101 Merrimac Street, Boston, MA 02114–4719, 617–424–5960.

Gary Cooper, Boston Regional Office, Federal Trade Commission, Suite 810, 101 Merrimac Street, Boston, MA 02114–4719, 617–424–5960.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and Section 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with Section 4.9(b)(6)(ii) of the Commission's Rules of Practice (16 CFR 4.9(b)(6)(ii)).

In the Matter of The Diet Workshop, Inc., and The Diet Workshop of Boston, Inc., corporations.

[File No. 932–3176]

Agreement Containing Consent Order To Cease and Desist

The Federal Trade Commission having initiated an investigation of certain acts and practices of The Diet Workshop, Inc. and The Diet Workshop of Boston, Inc., corporations (collectively referred to as "proposed respondents"), and it now appearing that proposed respondents are willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated,

It Is Hereby Agreed by and between The Diet Workshop, Inc., and The Diet Workshop of Boston, Inc., by their duly authorized officers, and their attorneys, and counsel for the Federal Trade Commission that:

1. Proposed respondents are Massachusetts corporations, with their principal office or place of business located at 1 University Office Park, 29 Sawyer Road, Waltham, Massachusetts 02154.

2. Proposed respondents admit all the jurisdictional facts set forth in the attached draft complaint.

3. Proposed respondents waive:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the Order entered pursuant to this agreement; and

(b) Any claim under the Equal Access to Justice Act, 5 U.S.C. 504.

4. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the attached draft complaint, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondents, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposed only and does not constitute an admission by proposed respondents of facts, other than jurisdictional facts, or of violations of law as alleged in the draft of complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to purposed respondents: (a) issue its complaint corresponding in form and substance with the attached draft complaint and its decision containing the following order to cease and desist in disposition of the proceeding; and (b) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time frame provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to proposed respondents' addresses as stated in this agreement shall constitute service. Proposed respondents waive any right they may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondents have read the attached draft complaint and the following order. Proposed respondents understand that once the order has been issued, they will be required to file one or more compliance reports showing that they have fully complied with the order. Proposed respondents further understand that they may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

Definitions

For the purposes of this Order, the following definitions shall apply:

A. *Competent and reliable scientific evidence* shall mean those tests, analyses, research, studies, or other evidence based on the expertise of professionals in the relevant area that has been conducted and evaluated in an objective manner by persons qualified to do so, using procedures generally accepted in the relevant profession to yield accurate and reliable results;

B. *Weight loss program* shall mean any program designed to aid consumers in weight loss or weight maintenance;

C. A *broadcast medium* shall mean any radio or television broadcast, cablecast, home video or theatrical release;

D. For any Order-required disclosure in a print medium to be made *clearly and prominently* or in a *clear and prominent* manner, it must be given both in the same type style and in: (1) twelve (12) point type where the representation that triggers the disclosure is given in twelve (12) point or larger type; or (2) the same type size as the representation that triggers the disclosure where that representation is given in a type size that is smaller than twelve (12) point type. For any Order-required disclosure given orally in a broadcast medium to be made *clearly and prominently* or in a *clear and prominent* manner, the disclosure must be given at the same volume and in the same cadence as the representation that triggers the disclosure;

E. A *short broadcast advertisement* shall mean any advertisement of thirty seconds or less duration made in a broadcast medium.

I

It is ordered that respondents, The Diet Workshop, Inc. and The Diet Workshop of Boston, Inc., corporations, their successors and assigns, and their officers, and respondents' agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, including franchisees or licensees, in connection with the advertising, promotion, offering for sale, or sale of any weight loss program in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

A. Making any representation, directly or by implication, about the success of participants on any weight loss program in achieving or maintaining weight loss or weight control unless, at the time of making any such representation, respondents possess and rely upon competent and reliable scientific evidence substantiating the representation, *provided, further,* that for any representation that:

(1) Any weight loss achieved or maintained through the weight loss program is typical or representative of all or any subset of participants using the program, said evidence shall, at a minimum, be based on a representative sample of:

(a) All participants who have entered the program, where the representation relates to such persons; *provided, however,* that the required sample may exclude those participants who dropped out of the program within two weeks of their entrance, or who were unable to complete the program due to illness; pregnancy, or change of residence; or

(b) All participants who have completed a particular phase of the program or the entire program, where the representation *only* relates to such persons;

(2) Any weight loss is maintained long-term, said evidence shall, at a minimum, be based upon the experience of participants who were followed for a period of at least two years from their completion of the active maintenance phase of respondents' program or earlier termination, as applicable; and

(3) Any weight loss is maintained permanently, said evidence shall, at a minimum, be based upon the experience of participants who were followed for a period of time after completing the program that is either:

(a) Generally recognized by experts in the field of treating obesity as being of sufficient length for predicting that weight loss will be permanent, or

(b) Demonstrated by competent and reliable survey evidence as being of sufficient duration to permit such a prediction.

B. Representing, directly or by implication, except through endorsements or testimonials referred to in paragraph I.E. herein, that participants of any weight loss program have successfully maintained weight loss, unless respondents disclose, clearly and prominently, and in close proximity to such representation, the statement: "For many dieters, weight loss is temporary."; *provided, further,* that respondents shall not represent, directly or by implication, that the above-quoted statement does not apply to dieters in respondents' weight loss program; *provided, however,* that a mere statement about the existence, design, or content of a maintenance program shall not, without more, be considered a representation that participants of any weight loss program have successfully maintained weight loss.

C. Representing, directly or by implication, except through short broadcast advertisements referred to in paragraph I.D. herein, and except through endorsements or testimonials referred to in paragraph I.E. herein, that participants of any weight loss program have successfully maintained weight loss, unless respondents disclose, clearly and prominently, and in close proximity to such representation, the following information:

(1) The average percentage of weight loss maintained by those participants;

(2) The duration over which the weight loss was maintained, measured from the date that participants ended the active weight loss phase of the program, *provided, further,* that if any portion of the time period covered includes participation in a maintenance program(s) that follows active weight loss, such fact must also be disclosed; and

(3) If the participant population referred to is not representative of the general participant population for respondents' programs:

(a) The proportion of the total participant population in respondents' programs that those participants represent, expressed in terms of a percentage or actual numbers of participants, or

(b) The statement: "Diet Workshop makes no claim that this [these] result[s] is [are] representative of all participants in the Diet Workshop program.";

Provided, further, that compliance with the obligations of this paragraph I.C. in no way relieves respondents of the requirement under paragraph I.A. of this Order to substantiate any representation about the success of participants on any weight loss program in maintaining weight loss.

D. Representing, directly or by implication, or short broadcast advertisements, that participants of any weight loss program have successfully maintained weight loss, unless respondents:

(1) include, clearly and prominently, and in immediate conjunction with such representation, the statement: "Check at our clinics for details about our maintenance record.";

(2) for a period of time beginning with the date of the first broadcast of any such advertisement and ending no sooner than thirty days after the last broadcast of such advertisement, comply with the following procedures upon the first presentation of any form asking for information from a potential client, but in any event before such person has entered into any agreement with respondents:

(a) Give to each potential client a separate document entitled "Maintenance Information," which shall include all the information required by paragraph I.B. and subparagraphs I.C. (1)–(3) of this Order and shall be formatted in the exact type size and style as the example form below, and shall include the heading (Helvetica 14 pt. bold), lead-in (Times Roman 12 pt.), disclosures (Helvetica 14 pt. bold), acknowledgement language (Times Roman 12 pt.) and signature block therein; *provided, further,* that no information in addition to that required to be included in the document required by this subparagraph I.D. (2) shall be included therein:

MAINTENANCE INFORMATION

You may have seen our recent ad about maintenance success. Here's some additional information about our maintenance record.

[Disclosure of maintenance statistics goes here

For many dieters, weight loss is temporary.

I have read this notice.

(Client Signature) (Date)

(b) Require each potential client to sign such document; and

(c) Give each client a copy of such document; and

Provided, however, that if any potential participant who does not then participate in the program refuses to sign or accept a copy of such document, respondents shall so indicate on such document and shall not, for that reason alone, be found in breach of this subparagraph I.D.(2); and

(3) Retain in each client file a copy of the signed maintenance notice required by this paragraph;

Provided, further, that:

(i) Compliance with the obligations of this paragraph I.D. in no way relieves respondents of the requirement under paragraph I.A. of this Order to substantiate any representation about the success of participants on any weight loss program in maintaining weight loss; and

(ii) Respondents must comply with both paragraph I.D. and paragraph I.C. of this Order if respondents include in any such short broadcast advertisement a representation about maintenance success that states a number or percentage, or uses descriptive terms that convey a quantitive measure such as "most of our customers maintain their weight loss long-term"; and

provided, however, that the provisions of paragraph I.D. shall not apply to endorsements or testimonials referred to in paragraph I.E. herein.

E. Using any advertisement containing an endorsement or testimonial about weight loss success or weight loss maintenance success by a participant or participants of respondent's weight loss program if the weight loss success or weight loss maintenance success depicted in the advertisement is not representative of what participants in respondents' weight loss programs generally achieve, unless respondents disclose, clearly and prominently, and in close proximity to the endorser's statement of his or her weight loss success or weight loss maintenance success:

(1) What the generally expected success would be for Diet Workshop customers in losing weight or maintaining achieved weight loss; *provided, however,* that in determining the generally expected success for Diet Workshop customers respondents may exclude those customers who dropped out of the program within two weeks of their entrance or who were unable to complete the program due to illness, pregnancy, or change of residence; or

(2) One of the following statements:

(a) "You should not expect to experience these results."

(b) "This result is not typical. You may not do as well."

(c) "This result is not typical. You May be less successful."

(d) "_____'s success is not typical. You may do not as well."

(e) "_____'s experience is not typical. You may achieve less."

(f) "Results not typical."

(g) "Results not typical of program participants.";

Provided, further, that is the endorsements or testimonials covered by this paragraph are made in a broadcast medium, any disclosure required by this paragraph must be communicated in a clear and prominent manner and in immediate conjunction with the representation that triggers the disclosure; and *provided, however,* that:

(i) For endorsements or testimonials about weight loss success, respondents can satisfy the requirements of subparagraph I.E.(1) by accurately disclosing the generally expected success in the following phrase: "Diet Workshop clients lose an average of __ pounds over an average __ week treatment period"; and

(ii) If the weight loss success or weight loss maintenance success depicted in the advertisement is representative of what participants of a group or subset clearly defined in the advertisement generally achieve, then, in lieu of the disclosures required in either subparagraph I.E. (1) or (2) herein, respondents may substitute a clear and prominent disclosure of the percentage of all of respondents' customers that the group or subset defined in the advertisement represents.

F. Representing, directly or by implication, the rate or speed at which participants or prospective participants in any weight loss program have lost or will lose weight, unless at the time of making such representation, respondents possess and rely upon competent and reliable scientific evidence substantiating the representation.

G. Representing, directly or by implication, that participants or prospective participants in respondents' weight loss programs have reached or will reach a specified weight within a specified time period, unless at the time of making such representation, respondents possess and rely upon competent and reliable scientific evidence substantiating the representation.

H. Failing to disclose, clearly and prominently, either (1) to each participant who, after the first two weeks on the program, is experiencing average weekly weight loss that exceeds two percent (2%) of said participant's initial body weight, or three pounds, whichever is less, for at least two consecutive weeks, or (2) in writing to all participants, when they enter the program, that failure to follow the diet instructions and consume the total caloric intake recommended may involve the risk of developing serious health complications.

I. Misrepresenting, directly or by implication, the existence, contents, validity, results, conclusions, or interpretations of any test or study.

J. Misrepresenting, directly or by implication, the performance, efficacy, or benefits of any weight loss program or weight loss product.

II

It is further ordered that respondents shall notify the Commission at least thirty (30) days prior to the effective date of any proposed change in the corporate respondents such as dissolution, assignment, or sale resulting in the emergence of a successor corporation(s), the creation or dissolution of subsidiaries, or any other change in the corporations that may affect compliance obligations arising out of this Order.

III

It is further ordered that for three (3) years after the last date of dissemination of any representation covered by this Order, respondents, or their successors and assigns, shall maintain and upon request make available to the Federal Trade Commission for inspection and copying:

A. All materials that were relied upon in disseminating such representation; and

B. All test, reports, studies, surveys, demonstrations or other evidence in their possession or control that contradict, qualify, or call into question such representation, or the basis relied upon for such representation, including complaints from consumers.

IV

It is further ordered that respondents shall distribute a copy of this Order to each of their officers, agents, representatives, independent contractors and employees, who is involved in the preparation and placement of advertisements or promotional materials or in communication with customers or prospective customers or who have any responsibilities with respect to the subject matter of this Order, and, for a period of five (5) years from the date of entry of this Order, distribute same to all future such officers, agents, representatives, independent contractors and employees.

V

It is further ordered that:

A. Respondents shall distribute a copy of this Order to each of their franchisees and licensees and shall contractually bind them to comply with the prohibitions and affirmative requirements of this Order; respondents may satisfy this contractual requirement by incorporating such Order requirements into their current Operations Manuals or, if they do not have a current Operations Manual, by notifying their franchisees and licensees that failure to comply with the provisions of this Order is at variance with respondents' methods, standards, and specifications for proper conduct of the franchisee's business under the franchise agreement; and

B. Respondents shall further make reasonable efforts to monitor their franchisees' and licensees' compliance with the Order provisions; respondents may satisfy this requirement by: (1) Taking reasonable steps to notify promptly any franchisee or licensee that respondents determine is failing materially or repeatedly to comply with any order provision; (2) providing the Federal Trade Commission with the name and address of the franchisee or licensee and the nature of the noncompliance if the franchisee or licensee fails to comply promptly with the relevant Order provision after being so notified; and (3) in cases where that franchisee's or licensee's conduct constitutes a material or repeated violation of the order, diligently pursuing reasonable and appropriate remedies available under their franchise or license agreements and applicable state law to bring about a cessation of that conduct by the franchisee or licensee; provided, however, that respondents' compliance with this Part shall constitute an affirmative defense to any civil penalty action arising from an act or practice of one of respondents' franchisees or licensees that violates this Order where respondents: (a) have not authorized, approved or ratified that conduct; (b) have reported that conduct promptly to the Federal Trade Commission under this Part; and (c) in cases where that franchisee's or licensee's conduct constitutes a material or repeated violation of the Order, have diligently pursued reasonable and appropriate remedies available under the franchise or license agreement and applicable state law to bring about a cessation of that conduct by the franchisee or licensee.

VI

This order will terminate twenty years from the date of its issuance, or twenty years from the most recent date that the United States or the Federal Trade Commission files a complaint (with or without an accompanying consent decree) in federal court alleging any violation of the order, whichever comes later; provided, however, that the filing of such a complaint will not affect the duration of:

A. Any paragraph in this order that terminates in less than twenty years;

B. This order's application to any respondent that is not named as a defendant in such complaint; and

C. This order if such complaint is filed after the order has terminated pursuant to this paragraph.

Provided further, that if such complaint is dismissed or a federal court rules that the respondents did not violate any provision of the order, and the dismissal or ruling is either not appealed or upheld on appeal, then the order will terminate according to this paragraph as though the complaint was never filed, except that the order will not terminate between the date such complaint is filed and the later of the deadline for appealing such dismissal or ruling and the date such dismissal or ruling is upheld on appeal.

VII

It is further ordered that respondents shall, within sixty (60) days after the date of service of this Order, file with the Commission a report, in writing, setting forth in detail the manner and form in which they have complied with this Order.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from The Diet Workshop, Inc. and The Diet Workshop of Boston, Inc. (hereinafter "Diet Workshop" or "respondents"), marketers of the Diet Workshop low-calorie diet (hereinafter "LCD") program. The Diet Workshop diet program is offered to the public throughout much of the United States through company-owned and franchised centers.

The proposed consent order has been placed on the public record for sixty (60) days for the reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The Commission's complaint in this matter charges that the proposed respondents have made deceptive claims regarding the success consumers have had losing weight on the respondents' LCD programs, and maintaining their weight loss. Respondents also are charged with having made deceptive claims regarding the rate at which consumers lose weight while on the respondent's "Quick Loss" LCD program. Finally, the complaint alleges that the respondents have engaged in the deceptive practice of failing to warn consumers whose weight loss progress the respondents monitored of the importance to their health of consuming all of the food called for in the diet instructions.

Success

The complaint alleges that the proposed respondents have represented, directly or by implication, that most consumers using the Diet Workshop LCD programs (1) reach their weight loss goals and (2) maintain their weight loss either long-term or permanently. The complaint charges that, at the time they were made, the respondents did not possess or rely upon a reasonable basis for these representations.

The complaint alleges further that the respondents have represented, directly or by implication, that testimonials from consumers appearing in advertisements and promotional materials for the Diet Workshop LCD programs reflect the typical or ordinary experience of members of the public who have used the programs. The complaint charges that the respondents failed to possess or rely upon a reasonable basis for these representations.

The proposed consent order seeks to address the alleged success misrepresentations cited in the proposed complaint in several ways. First, the order (Part I.A.) requires Diet Workshop to possess a reasonable basis consisting of competent and reliable scientific evidence substantiating any claim about the success of participants in any diet program in achieving or maintaining weight loss. To ensure compliance, the order further specifies what this level of evidence shall consist of when certain types of success claims are made:

(1) In the case of claims that weight loss is typical or representative of all participants using the program or any subset of those participants, that evidence shall be based on a representative sample of: (a) All participants who have entered the program, where the representation relates to such persons; or (b) all participants who have completed a

particular phase of the program or the entire program, where the representation *only* relates to such persons.

(2) In the case of claims that any weight loss is maintained long-term, that evidence shall be based upon the experience of participants who were followed for a period of at least two years after their completion of the respondents' program, including any periods of participation in respondents' maintenance program.

(3) In the case of claims that weight loss is maintained permanently, that evidence shall be based upon the experience of participants who were followed for a period of time after completing the program that is either: (a) Generally recognized by experts in the field of treating obesity as being of sufficient length to constitute a reasonable basis for predicting that weight loss will be permanent; or (b) demonstrated by competent and reliable survey evidence as being of sufficient duration to permit such a prediction.

Second, as measures to ensure future compliance, the proposed order requires the proposed respondents for any claim that participants of any diet program have successfully maintained weight loss to disclose the fact that "For many dieters, weight loss is temporary" (Part I.B.), as well as the following information relating to that claim (Part I.C.):

(1) The average percentage of weight loss maintained by those participants (e.g., "60% of achieved weight loss was maintained"),

(2) The duration over which the weight loss was maintained, measured from the date that participants entered the active weight loss phase of the program, and the fact that all or a portion of the time period covered includes participation in proposed respondents' maintenance program(s) that follows active weight loss, if that is the case—e.g., "participants maintain an average of 60% of weight loss 22 months after active weight loss (includes 18 months on maintenance program)", and

(3) Where the participant population referred to is not representative of the general participant population for that program, the proportion of the total participant population that those participants represent, expressed in terms of a percentage or actual numbers of participants—e.g. "Participants on maintenance—30% of our clients—kept off an average of 66% of the weight for one year (includes time on maintenance program)" or, in lieu of that factual disclosure, the statement: "Diet Workshop makes no claim that this result is representative of all participants in the Diet Workshop program."

Third, for maintenance success claims made in broadcast advertisements of thirty seconds or less duration, the proposed order (Part I.D.) requires that Diet Workshop, in lieu of making the factual disclosures required for such claims by Part I.C.: (1) Include in such advertisements the statement "Check at our centers for details about our maintenance record."; and (2) provide consumers at point-of-sale with a required form that includes the factual disclosures required by Part I.C., which form must be signed by the client and retained in the respondents' client file.

The proposed order makes clear that this alternative disclosure requirement does not relieve Diet Workshop of the obligation to substantiate any maintenance success claim, in accordance with Part I.A. of the order, and it "takes back" the exception from full quantiative disclosures in short broadcast advertising if Diet Workshop makes a maintenance success claim that uses numbers or descriptive terms that convey a quantitative measure, such as "most of our customers maintain their weight loss long term." Diet Workshop in that case would have to make all the required disclosures in the ad and provide the disclosures at point-of-sale.

Fourth, for weight loss and weight loss maintenance success claims made through endorsements or testimonials that are not representative of what Diet Workshop diet program participants generally achieve, the order (Part I.E.) requires that Diet Workshop disclose either what the generally expected success would be for Diet Workshop customers, or one of several alternative statements, such as "This result is not typical. You may be less successful", which explains the limited applicability of atypical testimonials in accordance with the Commission's "Guides Concerning Use of Endorsements and Testimonals in Advertising" 16 C.F.R. 255.2 (a). Under the proposed order, Diet Workshop may satisfy the requirements of the first disclosure concerning generally expected success by accurately disclosing those facts in the following format: "Diet Workshop clients lose an average of _____ pounds over an average _____—week treatment period."

Finally, the proposed order (Parts I.I. and I.J.) generally prohibits the respondents from misrepresenting (1) the existence, contents, validity, results, conclusions, or interpretations of any test or study; and (2) the performance, efficacy, or benefits of any weight loss program or product.

Rate of Weight Loss

The complaint alleges that the proposed respondents have represented, directly or by implication, that an appreciable number of consumers using the Diet Workshop's "Quick Loss" LCD program lose up to 20 pounds in a six-week period. The complaint charges that, at the time this representation was made, the respondents did not possess or rely upon a reasonable basis for the representation.

The proposed consent order (Part I.F.) prohibits Diet Workshop from representing the rate or speed at which participants in its LCD programs will lose weight, unless at the time of making such representation, Diet Workshop possesses and relies upon competent and reliable scientific evidence substantiating the representation. In addition, the proposed order (Part I.G.) prohibits Diet Workshop from representing that participants or prospective participants in Diet Workshop LCD programs will reach a specified weight within a specified period of time, unless at the time of making such representation, respondents possess and rely upon competent and reliable scientific evidence substantiating the representation.

Monitoring Practices

According to the complaint, Diet Workshop provides its customers with diet instructions that require the customers to come in to one of the proposed respondents' centers once a week for monitoring of their progress, including weighing in. It is further alleged that in the course of regularly ascertaining weight loss progress, respondents, in some instances, are presented with weight loss results indicating that customers are losing weight significantly in excess of their projected goals, which is an indication that they may not be consuming all of the food prescribed by their diet instructions. According to the complaint, such conduct, if not corrected promptly, could result in health complications. In light of this monitoring practice, the Commission's complaint alleges that Diet Workshop has failed to disclose to customers who are losing weight significantly in excess of their projected goals that failing to follow the diet instructions and consume all of the food prescribed could result in health complications.

The proposed consent order seeks to address this alleged deceptive practice in two ways. First, the order (Part I.H.) requires respondents to disclose in writing either (1) to each participant who, after the first two weeks on the program, is experiencing average weekly weight loss that exceeds two percent (2%) of said participants' initial body weight, or three pounds, whichever is less, for at least two consecutive weeks, or (2) to all participants when they enter the program, that failure to follow the diet instructions and consume the total caloric intake recommended may involve the risk of developing serious health complications. Second, the proposed order (Part I.J.) generally prohibits any misrepresentation concerning the safety of any weight loss program.

Compliance

Parts II, III, IV, V and VII of the proposed order are compliance reporting provisions that require the respondents to: notify the Commission of any changes in the structure of the respondents that may affect their compliance obligations under the order; retain all records that would bear on the respondents' compliance with the order; distribute copies of the order to the respondents' operating divisions and to those persons responsible for the preparation and review of advertising material covered by the order; distribute a copy of the order to each of the respondents' franchisees and licenses, take steps to contractually bind the franchisees and licensees to the order, and take certain additional steps designed to encourage or require the franchisees and licensees to comply with the order; and report to the Commission their compliance with the terms of the order.

Part VI of the proposed order provides generally that the proposed order will sunset twenty years from the date of issuance, unless a complaint to enforce the order (with or without an accompanying consent decree) was/is filed while the order was/is in force. In such a case, the order sunsets twenty years after the filing of the complaint.

The purpose of this analysis is to facilitate public comment on the proposed interpretation of the agreement and proposed order or to modify in any way their terms.

Donald S. Clark,

Secretary.

BILLING CODE 6750–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Statement of Organization, Functions and Delegations of Authority

Part H, Chapter HB (Health Resources and Services Administration) of the Statement of Organization, Functions and Delegations of Authority of the Department of Health and Human Services (47 FR 39409–24, August 31, 1982, as amended most recently at 61 FR 1595 dated January 22, 1996) is amended to reflect the name change for the Division of Personnel within the Office of Operations and Management, Office of the Administrator, Health Resources and Services Administration (HRSA).

Under HB–10, Organization and Functions, amend the functional statements for the *Office of Operations and Management (HBA4)* as follows:

(1) Delete the functional statements for the *Division of Personnel (HBA44);* and

(2) Add the following functional statement immediately after the functional statement for the *Division of Financial Management (HBA43):*

Office of Human Resources and Development (HBA44). Provides Agency wide personnel management assistance to all Health Resources and Services Administration employees, both headquarters and field. Specifically: (1) Plans, conducts and evaluates the Agency's human resource studies, programs, policies and reports; (2) provides advice and assistance to management officials on individual actions arising from headquarters and field components; (3) administers the Agency's training functions; (4) acts as the focal point for the agency's labor relations activities; (5) develops and provides guidelines and regulations for the Agency's personnel programs; (6) administers the Agency's Ethics Program; (7) administers the Agency's merit and performance awards programs; (8) plans, directs and administers the appointing and processing of civil service employees; (9) plans and conducts position management surveys; (10) operates and oversees the Agency's merit promotion program; (11) manages and coordinates the Agency's personnel security program; (12) ensures that management practices and policies related to the Commissioned Corps are coordinated throughout the Agency; (13) and ensures compliance with established personnel rules and regulations governing HRSA.

Delegation of Authority. All delegations and redelegations of authorities to officers and employees of the Health Resources and Services Administration which were in effect immediately prior to the effective date of this consolidation will be continued in effect in them or their successors, pending further redelegation, provided they are consistent with this consolidation.

This consolidation is effective upon date of signature.

Dated: March 14, 1996.

Ciro V. Sumaya,

Administrator.

Centers for Disease Control and Prevention

Advisory Council for the Elimination of Tuberculosis: Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control and Prevention (CDC) announces the following council meeting.

Name: Advisory Council for the Elimination of Tuberculosis (ACET).

Times and Dates: 8:30 a.m.–5p.m., April 25, 1996; 8:30 a.m.–1 p.m., April 26, 1996.

Place: Corporate Square Office Park, Corporate Square Boulevard, Building 11, Room 1413, Atlanta, Georgia 30329.

Status: Open to the public, limited only by the space available. The meeting room accommodates approximately 100 people.

Purpose: This council advises and makes recommendations to the Secretary of Health and Human Services, the Assistant Secretary for Health, and the Director, CDC, regarding the elimination of tuberculosis. Specifically, the Council makes recommendations regarding policies, strategies, objectives, and priorities; addresses the development and application of new technologies; and reviews the extent to which progress has been made toward eliminating tuberculosis.

Matters to be Discussed: Agenda items include: an update on research and TB among the foreign-born; considerations for managed care; newly approved rapid diagnostic tests for TB; recommendations for public health advocacy in TB during continuing decreases in morbidity trends; organizational approaches to community-based TB control in a managed care environment; challenges for local health departments in TB control at a community level managed care environment; and a pilot study of the effects of Medicaid managed care on structures, processes, and outcomes relevant to community-wide TB prevention and control.

Agenda items are subject to change as priorities dictate.

Contact Person for More Information: Tracy Whitnell, Program Analyst, National

Center for HIV/STD/TB Prevention, 1600 Clifton Road, NE, M/S E–07, Atlanta, Georgia 30333, telephone 404/639–8006.

Dated: March 21, 1996.

National Committee on Vital and Health Statistics (NCVHS) Subcommittee on Mental Health Statistics: Meeting

Pursuant to Pub. L. 92–463, the National Center for Health Statistics (NCHS), Centers for Disease Control and Prevention (CDC), announces the following subcommittee meeting.

Name: NCVHS Subcommittee on Mental Health Statistics.

Time and Date: 9 a.m.–5 p.m., May 2, 1996.

Place: Room 503A–529A, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201.

Status: Open.

Purpose: The Subcommittee will continue working on enrollment and encounter data, and receive updates on Federal developments.

Notice: In the interest of security, the Department has instituted stringent procedures for entrance to the Hubert H. Humphrey Building by non-government employees.

Thus, persons without a government identification card should plan to arrive at the building either between 8:30 and 9 a.m. or 12:30 and 1 p.m. so they can be escorted to the meeting. Entrance to the meeting at other times during the day cannot be assured.

Contact Person for More Information: Substantive program information as well as summaries of the meeting and a roster of committee members may be obtained from Gail F. Fisher, Ph.D., Executive Secretary, NCVHS, NCHS, CDC, Room 1100, Presidential Building, 6525 Belcrest Road, Hyattsville, Maryland 20782, telephone number 301/436–7050.

Dated: March 19, 1996.

Administration for Children and Families

Federal Allotments to State Developmental Disabilities Councils and Protection and Advocacy Formula Grant Programs for Fiscal Year 1997

AGENCY: Administration on Developmental Disabilities, Administration for Children and Families, Department of Health and Human Services.

ACTION: Notification of Fiscal Year 1997 Federal Allotments to State Developmental Disabilities Councils and Protection and Advocacy Formula Grant Programs.

SUMMARY: This notice sets forth Fiscal Year 1997 individual allotments and percentages to States administering the State Developmental Disabilities Councils and Protection and Advocacy programs, pursuant to Section 125 and Section 142 of the Developmental Disabilities Assistance and Bill of Rights Act (Act). The allotment amounts are based on the 1997 Budget Request and are contingent upon Congressional appropriations for Fiscal Year 1997. If Congress enacts and the President approves a different appropriation amount, the allotments will be adjusted accordingly.

EFFECTIVE DATE: October 1, 1996.

FOR FURTHER INFORMATION CONTACT: Joseph Lonergan, Director, Division of Formula, Entitlement, and Block Grants, Office of Program Support, Administration for Children and Families, Department of Health and Human Services, 370 L'Enfant Promenade S.W., Washington, D.C. 20447, Telephone (202) 401–6603.

SUPPLEMENTARY INFORMATION: Section 125(a)(2) of the Act requires that adjustments in the amounts of State allotments may be made not more often than annually and that States are to be notified not less than six (6) months before the beginning of any fiscal year of any adjustments to take effect in that fiscal year. It should be noted that, as required, Palau's allotment has been adjusted to fifty percent of its Fiscal Year 1995 allotment.

The Administration on Developmental Disabilities has updated the data elements for issuance of Fiscal Year 1997 allotments for the Developmental Disabilities formula grant programs. The data elements used in the update are:

A. The number of beneficiaries in each State and Territory under the Childhood Disabilities Beneficiary Program, December 1994, are from Table 5.J10 of the "Social Security Bulletin: Annual Statistical Supplement 1995" issued by the Social Security Administration. The numbers for the Northern Mariana Islands and the Republic of Palau, were obtained from the Social Security Administration;

B. State data on Average Per Capita Income, 1990–94, are from Table 2 of the "Survey of Current Business," September 1995, issued by the Bureau of Economic Analysis, U.S. Department of Commerce; comparable data for the Territories also were obtained from that Bureau; and

C. State data on Total Population and Working Population (ages 18–64) as of July 1, 1994, are from Table 1 Estimates of Resident Population of States by Age of the "Census Advisory: Updated National and State Population Estimates, CB95–39," issued by the Bureau of the Census, U.S. Department of Commerce. Estimates for the Territories are no longer available, therefore, the Territories population data are from the 1990 Census Population Counts. The Territories' working populations were issued in the Bureau of Census report, "General Characteristics Report: 1980," which is the most recent data available from the Bureau.

[1] In accordance with Public Law 103–230, Section 142(c)(5), $806,682 has been withheld for funding technical assistance and American Indian Consortiums in Fiscal Year 1997. The statute provides for spending up to two percent (2%) of the amount appropriated under Section 143 to fund technical assistance. American Indian Consortiums are eligible to receive an allotment under Section 142(c)(1)(A)(i). Unused funds will be reallotted in accordance with Section 142(c)(1) of the Act.

Dated: March 21, 1996.

Bob Williams,

Commissioner, Administration on Developmental Disabilities.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 96N–0005]

Review of Infant Formula Nutrient Requirements; Announcement of Study; Request for Scientific Data and Information; Announcement of Open Meeting; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a notice that appeared in the **Federal Register** of March 5, 1996 (61 FR 8628). The document announced the Federation of American Societies for Experimental Biology (FASEB) study "Review of Infant Formula Nutrient Requirements," requested scientific data and information, and announced an open meeting to be held on May 31, 1996. The location of the open meeting was inadvertently omitted. This document corrects that error.

FOR FURTHER INFORMATION CONTACT: Elizabeth A. Yetley, Center for Food Safety and Applied Nutrition, Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–205–4168.

In FR Doc. 95–5117, appearing on page 8628 in the **Federal Register** of Tuesday, March 5, 1996, the following correction is made:

1. On page 8628, in the first column, under the ADDRESSES caption, the sentence "The public meeting will be held in the Chen Auditorium, Lee Bldg., FASEB, 9650 Rockville Pike, Bethesda, MD." is inserted as the first sentence immediately after the ADDRESSES caption.

Dated: March 20, 1996.

William K. Hubbard,

Associate Commissioner for Policy Coordination.

[FR Doc. 96–7311 Filed 3–26–96; 8:45 am]

BILLING CODE 4160–01–F

[Docket No. 96G–0096]

The Flax Council of Canada; Filing of Petition for Affirmation of GRAS Status

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that The Flax Council of Canada has filed a petition (GRASP 5G0416) proposing to affirm that low linolenic acid flaxseed oil is generally recognized as safe (GRAS) for use as a food oil.

DATES: Written comments by June 10, 1996.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1–23, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Lawrence J. Lin, Center for Food Safety and Applied Nutrition (HFS–206), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–418–3103.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (secs. 201(s) and 409(b)(5) (21 U.S.C. 321(s) and 348(b)(5)) and the regulations for affirmation of GRAS status in § 170.35 (21 CFR 170.35), notice is given that The Flax Council of Canada, 465–167 Lombard Ave., Winnipeg, MB R3B 0T6, Canada, has filed a petition (GRASP 5G0416) proposing to affirm that low linolenic acid flaxseed oil is GRAS for use as a food oil. The petitioner proposes that solin oil be the common or usual name for low linolenic acid flaxseed oil.

The petition has been placed on display at the Dockets Management Branch (address above).

Any petition that meets the requirements outlined in §§ 170.30 (21 CFR 170.30) and 170.35 is filed by the agency. There is no prefiling review of the adequacy of data to support a GRAS conclusion. Thus, the filing of a petition for GRAS affirmation should not be interpreted as a preliminary indication of suitability for GRAS affirmation.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Interested persons may, on or before June 10, 1996, review the petition and file comments with the Dockets Management Branch (address above). Two copies of any comments should be filed and should be identified with the docket number found in brackets in the heading of this document. Comments should include any available information that would be helpful in determining whether the substance is, or is not, GRAS for the proposed use. In addition, consistent with the regulations promulgated under the National Environmental Policy Act (40 CFR 1501.4(b)), the agency encourages public participation by review of and comment on the environmental assessment submitted with the petition that is the subject of this notice. A copy of the petition (including the environmental assessment) and received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: March 13, 1996.

Eugene C. Coleman,

Acting Director, Office of Premarket Approval, Center for Food Safety and Applied Nutrition.

[Docket No. 92G–0085]

Michael Foods, Inc.; Withdrawal of GRAS Affirmation Petition

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the withdrawal, without prejudice to a future filing, of a petition (GRASP 2G0387) proposing that the use of β-cyclodextrin as a processing aid in reducing the cholesterol content of liquid eggs be affirmed as generally recognized as safe (GRAS).

FOR FURTHER INFORMATION CONTACT: Andrew D. Laumbach, Center for Food Safety and Applied Nutrition (HFS–217), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–418–3071.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of March 30, 1992 (57 FR 10767), FDA announced that a petition (GRASP 2G0387) had been filed by Michael Foods, Inc., 324 Park National Bank Bldg., 5353 Wayzata Blvd., Minneapolis, MN 55416. This petition proposed that the use of β-cyclodextrin as a processing aid in reducing the cholesterol content of liquid eggs be affirmed as GRAS.

Michael Foods, Inc. has now withdrawn the petition without prejudice to a future filing (21 CFR 171.7).

Dated: March 7, 1996.

Alan M. Rulis,

Director, Office of Premarket Approval, Center for Food Safety and Applied Nutrition.

[Docket No. 96N–0085]

Hoffmann-La Roche, Inc., et al.; Withdrawal of Approval of 49 New Drug Applications, 9 Abbreviated Antibiotic Applications, and 36 Abbreviated New Drug Applications

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing approval of 49 new drug applications (NDA's), 9 abbreviated antibiotic applications (AADA's), and 36 abbreviated new drug applications (ANDA's). The holders of the applications notified the agency in writing that the drug products were no longer marketed and requested that the approval of the applications be withdrawn.

EFFECTIVE DATE: April 26, 1996.

FOR FURTHER INFORMATION CONTACT: Lola E. Batson, Center for Drug Evaluation and Research (HFD–7), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–594–1038.

SUPPLEMENTARY INFORMATION: The holders of the applications listed in the table in this document have informed FDA that these drug products are no longer marketed and have requested that FDA withdraw approval of the applications. The applicants have also, by their request, waived their opportunity for a hearing.

Health Care Financing Administration

Proposed Collection of Public Comment; Submission for OMB Review

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Health Care Financing Administration (HCFA), Department of Health and Human Services, has submitted to the Office of Management and Budget (OMB) the following proposals for the collection of information. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

1. *Type of Request:* Revision of a currently approved collection; *Title of Information Collection:* Reconciliation of State Invoice (Formerly: Remittance Advice Report) and Prior Quarter Adjustment Statement; *Form No.:* HCFA–304, HCFA–304a; *Use:* Section 1927 of the Social Security Act requires drug labelers to enter into and have in effect a rebate agreement with HCFA for States to receive funding for drugs dispensed to Medicaid recipients. 42 CFR 447.534 and 447.536 require labelers to report specific drug rebate data to States when payment is made; *Frequency:* Quarterly; *Affected Public:* Business or other for-profit; *Number of Respondents:* 520; *Total Annual Responses:* 2,080; *Total Annual Hours Requested:* 170,560.

To request copies of the proposed paperwork collection referenced above, E-mail your request, including your address, to Paperwork@hcfa.gov, or call the Reports Clearance Office on (410) 786–1326. Written comments and recommendations for the proposed information collections should be sent within 30 days of this notice directly to the OMB Desk Officer designated at the following address: OMB Human Resources and Housing Branch, Attention: Allison Eydt, New Executive Office Building, Room 10235, Washington, DC 20503.

Dated: March 20, 1996.

Kathleen B. Larson,

Director, Management Planning and Analysis Staff, Office of Financial and Human Resources, Health Care Financing Administration.

BILLING CODE 4120–03–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Public and Indian Housing

[Docket No. FR–3790–N–02]

Public Housing Drug Elimination Technical Assistance Program, Announcement of Funding Awards for FY 1995

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Announcement of funding awards.

SUMMARY: In accordance with section 102(a)(4)(C) of the Department of Housing and Urban Development Reform Act of 1989, this announcement notifies the public of funding decisions made by the Department in a competition for funding under the Notice of Funding Availability (NOFA) for Public Housing Drug Elimination Technical Assistance Program. This announcement contains the names and addresses of the awardees and the amount of the awards.

FOR FURTHER INFORMATION CONTACT: Elizabeth Cocke, Crime Prevention and Security Division, Office of Community Relations and Involvement, Department of Housing and Urban Development, room 4116, 451 Seventh Street, SW., Washington, DC 20410, telephone (202) 708–1197 (this is not a toll-free number). Hearing- or speech-impaired individuals may access this number by calling the Federal Information Relay Service TTY at 1–800–877–8339.

SUPPLEMENTARY INFORMATION: The Public Housing Drug Elimination Technical Assistance Program is authorized by the Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 1995 (Pub. L. 103–327, approved September 28, 1994).

The Fiscal Year 1995 competition was announced in a NOFA published in the **Federal Register** on January 13, 1995 (60 FR 3324). The NOFA announced the availability of $3 million to assist in providing short-term technical assistance to public housing agencies, Indian housing authorities, resident management corporations, and incorporated resident councils that are combating drug-related crime and abuse of controlled substances in public and Indian housing communities. These funds reimburse consultants who provide expert advice and work with housing authorities or resident councils to assist them in gaining skills and training to eliminate drug abuse and related problems from public housing communities. Applications were scored and selected for funding based on criteria contained in the Notice.

In accordance with section 102 (a)(4)(C) of the Department of Housing and Urban Development Reform Act of 1989 (Pub. L. 101–235, approved December 15, 1989), the Department is hereby publishing the names and addresses of the awardees that received funding under the NOFA, and the amount of funds awarded to each. This information is provided in Appendix A to this document.

Dated: March 21, 1996.

Michael B. Janis,

General Deputy Assistant Secretary for Public and Indian Housing.

Appendix A

Fiscal Year 1995 Public Housing Drug Elimination Technical Assistance Program Funding Decisions

Herbert Carter, P.O. Box 215, Raleigh, NC 277020215. Provided Technical Assistance Services to: Paducah Housing Authority, Paducah, KY. Amount: 10000

Vincent Lewis, 717 D. St. NW, Suite 309, Washington, DC 20004. Provided Technical Assistance Services to: Hartford Housing Authority, Hartford, CT. Amount: 13816.2

Paul Tanner, 5618 Shorewood Rd., Jacksonville, FL 32210. Provided Technical Assistance Services to: Housing Authority of the City of Homestead, Homestead, FL. Amount: 9200

William McClure, 2740 Greenbriar, Atlanta, GA 30331. Provided Technical Assistance Services to: Indianapolis Public Housing Agency, Indianapolis, IN. Amount: 8522

Jesse Jaramillo, 2131 34th Street, Los Alamos, NM 87544. Provided Technical Assistance Services to: Housing Authority of the City of East St. Louis, East St. Louis, IL. Amount: 9409

Dan Carmon, 11270 S. Idlewood Ct. New Orleans, LA 70128. Provided Technical Assistance Services to: Bogalusa Housing Authority, Bogalusa, LA. Amount: 7497

Severin Sorensen, P.O. Box 34469, Bethesda, MD 20827. Provided Technical Assistance Services to: Albany Housing Authority, Albany, NY. Amount: 12246

Severin Sorensen, P.O. Box 34469, Bethesda, MD 208131072. Provided Technical Assistance Services to: Cuyahoga Metropolitan Housing Authority Police Department, Cleveland, OH. Amount: 12451

Paul Turner, 410 Castello Road, Lafayette, CA 94549. Provided Technical Assistance Services to: Housing Authority of the City of Ogden, Ogden, UT. Amount: 9511

Rose Shaw, 518 Leahy, Pawhuska, OK 74056. Provided Technical Assistance Services to: Meadow Glenn Additon-Osage Housing Authority, Hominy, OK. Amount: 4286

Philip Fairweather, 6924 La Cienega Blvd, Ste 2, Inglewood, CA 90302. Provided

Technical Assistance Services to: Chicago Housing Authority, Chicago, IL. Amount: 13800

Graylyn Swilley, 5350 Warren Avenue, Cincinnati, OH 45212. Provided Technical Assistance Services to: Gary Housing Authority, Gary, IN. Amount: 11238

Randy Atlas, 770 Palm Bay Ln., Miami, FL 33138. Provided Technical Assistance Services to: Housing Authority of Paris, Paris, KY. Amount: 13280

Robert Fisk, 906 W. Elk St., Manistique, MI 49854. Provided Technical Assistance Services to: Flint Housing Commission, Flint, MI. Amount: 5916

Randy Atlas, 770 Palm Bay Ln., Miami, FL 33138. Provided Technical Assistance Services to: Albuquerque Housing Services, Albuquerque, NM. Amount: 12281

David Staton, 11490 Comerce Park Dr., Reston, VA 22091. Provided Technical Assistance Services to: Housing Authority of the City of Prichard, Alabama, Prichard, AL. Amount: 7811

Pamela Petersen, 4000 Harpers Ferry Drive, Tallahassee, FL 32308. Provided Technical Assistance Services to: The Housing Authority of the City of Key West, Key West, FL. Amount: 17302

Carolyn Williams, 2810 Shipley Terrace SE #202, Washington, DC 20020. Provided Technical Assistance Services to: Branch Heights Resident Council, Butlaw, AL. Amount: 12575

Ernest Crane, 1202 St Marks Ave, New York, NY 11213, Provided Technical Assistance Services to: Sumner Houses Association, Inc., Brooklyn, NY. Amount: 7650

Jim Munro, 7335 No. Shores Dr., Navarre, FL 32566. Provided Technical Assistance Services to: Fort Walton Beach Housing Authority, Fort Walton Beach, FL. Amount: 10305

BILLING CODE 4210–33–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Availability of a Technical/Agency Draft Recovery Plan for the Mitchell's Satyr Butterfly (Neonympha mitchellii mitchellii) for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: The U.S. Fish and Wildlife Service announces the availability for public review of a technical/agency draft recovery plan for the Mitchell's satyr butterfly (*Neonympha mitchellii mitchellii*). It occurs on private and public lands in southeastern Michigan and northern Indiana. The Service solicits review and comment from the public on this draft plan.

DATES: Comments on the technical/agency draft recovery plan must be receive on or before May 28, 1996, to receive consideration by the Service.

ADDRESSES: Persons wishing to review the draft recovery plan may obtain a copy by contacting Charles M. Wooley, Field Supervisor, East Lansing Field Office, 2651 Coolidge Road, East Lansing, Michigan 48823–6316, telephone (517) 351–2555. Comments and materials received are available for public inspection by appointment during normal business hours at the above address. Comments on the plan should be addressed to Mark Hodgkins (see **ADDRESSES**).

FOR FURTHER INFORMATION CONTACT: Mark Hodgkins at the above address, or telephone (517) 351–6289.

SUPPLEMENTARY INFORMATION:

Background

Restoring an endangered or threatened animal or plant to the point

where it is again a secure, self-sustaining member of its ecosystem is a primary goal of the U.S. Fish and Wildlife Service's (Service) endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for conservation of the species, establish criteria for the recovery levels to reclassify to threatened or delist them, and estimate time and cost to implement the recovery measures needed. The Service revises existing recovery plans, as needed, to reflect important new biological information, significant changes in a species' status, or the accomplishment of tasks identified in the original plan.

The Endangered Species Act of 1973 (Act), as amended (16 U.S.C. 1531 *et seq.*) requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised recovery plan. The Service and other Federal agencies will also take these comments into account in the course of implementing approved recovery plans.

The document submitted for review is the draft Mitchell's Satyr Butterfly (*Neonympha mitchellii mitchellii*) Recovery Plan. Of the 30+ historic populations known, only 11 extant, isolated populations remain in southwestern Michigan and one in northern Indiana. The species is considered extirpated from Ohio, New Jersey, and Maryland (if it actually occurred in that state).

The Mitchell's satyr butterfly was emergency listed as endangered on June 25, 1991, due to a perceived threat posed by overcollection. On May 20, 1992, the Mitchell's satyr butterfly received long-term protection through the normal listing process. The literature reflects some variability in the description of Mitchell's satyr habitat. Known habitats are all peatlands but range along a continuum from prairie/bog fen to meadow/swamp. However, a constant attribute in all historical and active habitats is a herbaceous community which is dominated by sedges, usually *Carex stricta*, with scattered deciduous and/or coniferous shrubs, most often tamaracks, or red cedar. Mitchell's satyr habitat is most easily characterized as a sedge-dominated fen community. The greatest threat to *N. m. mitchellii* is continued loss of habitat due to development and fen alteration leading to disruption of ecological processes which create and maintain habitat.

The primary objective of this draft recovery plan is to protect an adequate number of Mitchell's satyr butterfly sites to ensure long-term viability of the species in the wild. Conditions that must be met to reclassify the Mitchell's satyr butterfly from endangered to threatened status include protection of a minimum of 16 geographically distinct, self-sustaining populations established or discovered range wide. Delisting will be considered when 25 geographically distinct, self-sustaining populations are established or discovered range wide for five consecutive years following reclassification. Also, a minimum of 15 of these sites would need the establishment of permanent protection with long-term management programs requiring some intervention.

Site protection will be accomplished through negotiating cooperative agreements and conservation easements with land owners and managers, acquiring lands from willing sellers, and using existing legislation to protect the Mitchell's satyr and their habitat. Other recovery activities will include searching for additional populations, monitoring population levels and habitat conditions, managing habitat as needed, conducting necessary studies, and conducting a general information program for the public.

The draft recovery plan is available for technical/agency review. After consideration of comments received during the review period, the recovery plan will be submitted to the Regional Director, Region 3, for final approval.

Public Comments Solicited

The Service solicits written comments on the recovery plan described. All comments received by the date specified above will be considered prior to approval of the recovery plan.

Authority

The authority for this action is Section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: March 20, 1996.

Mamie A. Parker,

Acting Assistant Regional Director, Ecological Services.

BILLING CODE 4310–55–M

Geological Survey

Federal Geographic Data Committee (FGDC); Public Meeting of the FGDC Facilities Working Group

AGENCY: Geological Survey, Interior.

ACTION: Notice of two meetings.

SUMMARY: This notice is to invite public participation in two meetings of the FGDC Facilities Working Group. The major topics for these meetings are: the standardization of definitions for Facility and Installation; development of a Facility/Installation ID standard; and development of standards for utility, building, and environmental hazard geospatial data.

TIME AND PLACE: 8 April 1996, from 1:00 p.m. until 4:00 p.m., and 13 May 1996, from 1:00 p.m. until 4:00 p.m. The meetings will be held at Headquarters U.S. Army Corps of Engineers, in room 8222D of the Pulaski Building, 20 Massachusetts Avenue, NW., Washington, DC. The Pulaski Building is located just a few blocks west of Union Station.

FOR FURTHER INFORMATION CONTACT: Jennifer Fox, FGDC Secretariat, U.S. Geological Survey, 590 National Center, 12201 Sunrise Valley Drive, Reston, Virginia 22092; telephone (703) 648–5514; facsimile (703) 648–5755; Internet "gdc@usgs.gov".

SUPPLEMENTARY INFORMATION: The FGDC is a committee of Federal Agencies engaged in geospatial activities. The FGDC Facilities Working Group specifically focuses on geospatial data issues related to facilities and facility management. A facility is an entity with location, deliberately established as a site for designated activities. A facility database might describe a factory, a military base, a college, a hospital, a power plant, a fishery, a national park, an office building, a space command center, or a prison. The database for a complex facility may describe multiple functions or missions, multiple buildings, or even a county, town, or city. The objectives of the Working Group are to: promote standards of accuracy and currentness in facilities data that are financed in whole or in part by Federal funds; exchange information on technological improvements for collecting facilities data; encourage the Federal and non-Federal communities to identify and adopt standards and specifications for facilities data; and promote the sharing of facilities data among Federal and non-Federal organizations.

Dated: March 15, 1996.

Richard E. Witmer,

Acting Chief, National Mapping Division.

BILLING CODE 4310–31–M

Bureau of Land Management

[WO–350–1430–00]

Extension of Currently Approved Information Collection; OMB Approval Number 1004–0011

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Bureau of Land Management (BLM) is announcing its intention to request extension of approval for the collection of information from those persons seeking to acquire title to public land under the color-of-title authority as a Class 2 claim. The BLM collects information to assure that statutory requirements for conveyance of title under the Color-of-Title Act have been met.

DATES: Comments on the proposed information collection must be received by May 28, 1996, to be considered.

ADDRESSES: Comments may be mailed to: Regulatory Management Team (420), Bureau of Land Management, 1849 C Street NW, Room 401 LS, Washington, D.C. 20240.

Comments may be sent via Internet to: lWO140@attmail.com. Please include "Attn:1004–0011" and your name and return address in your Internet address.

Comments may be hand delivered to the Bureau of Land Management Administrative Record, Room 401, L Street NW, Washington, D.C. 20036.

Comments will be available for public review at the L Street address during regular business hours (7:45 a.m. to 4:15 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Vanessa R. Engle, Realty Use Group, 202–452–7776.

SUPPLEMENTARY INFORMATION: In accordance with 5 CFR 1320.12(a), the BLM is required to provide 60-day notice in the **Federal Register** concerning a collection of information contained in published current rules to solicit comments on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

The Color-of-Title Act of December 22, 1928, as amended (43 U.S.C. 1068, 1068a, 1068b), provides for the issuance of a land patent (deed) to eligible individuals, groups, or corporations who believe they have a valid claim to public lands under color-of-title. The information collected on Color-of-Title Tax Levy and Payment Record Form 2540–3, is required by Departmental regulations 43 CFR 2541.2 for all applicants who initiate a Class 2 claim. These regulations were adopted on June 13, 1970 (35 FR 9592).

A claim of Class 2 is one which has been held in good faith and in peaceful, adverse possession by a claimant, his ancestors, or grantors, under claim or color of title for the period commencing not later than January 1, 1901, to the date of application, during which time they have paid taxes levied on the land by State and local governmental units.

Any individual seeking to acquire a title to public land under the color-of-title authority must make application and provide information essential to compliance with law, regulations, and procedures. The evidence needed to determine property rights through color-of-title regulations for a Class 2 claim is proof of payment of taxes levied on the property claimed by the applicant. Without this proof of payment, the BLM cannot finalize the claim.

Form 2540–3 may be submitted in person or by mail to the proper BLM office. The following is an explanation of specific items of information requested on Color-of-Title Tax Levy and Payment Record Form 2540–3, pursuant to 43 CFR 2541.2(4)(c)(2): (1) the name of applicant is needed to identify the person/entity filing a claim; (2) the legal description of the claimed land must be listed as recorded in public records of the county concerned; (3) tax payment information including the certification of the data on tax year, payor of the tax, and the amount of tax is necessary information to legally qualify the applicant to receive a property right from the Federal government; and (4) certification from the public official administering the county tax records or a certified abstracter must be provided to determine the validity of the application.

Response is mandatory if the color-of-title claimant wishes to obtain the benefits of the statute and gain clear title to his claimed property. Failure to provide the necessary information results in the rejection of the color-of-title application. If the information on Color-of-Title Tax Levy and Payment Record Form 2540–3 was not collected, BLM would be unable to carry out the mandate of the Color-of-Title Act and the responsibilities for implementing 43 CFR 2540 and 2541. Form 2540–3 requires only the minimal information necessary to determine claim validity.

Based on its experience processing Color-of-Title applications, BLM estimates the public reporting burden for completing Color-of-Title Tax Levy and Payment Record Form 2540–3 is one hour. BLM estimates that approximately 37 Color-of-Title applications will be filed annually for a total annual burden of 37 hours.

Any interested member of the public may request and obtain, without charge, a copy of Color-of-Title Tax Levy and Payment Form 2540–3 by contacting any BLM Office or the person identified under **FOR FURTHER INFORMATION CONTACT.**

BLM will summarize all responses to this notice and include them in the request for Office of Management and Budget approval. All comments will also become part of the public record.

Dated: March 21, 1996.

Annetta L. Cheek,

Chief, Regulatory Management Team.

BILLING CODE 4310–84–P

[WY–921–41–5700; WYW121598]

Notice of Proposed Reinstatement of Terminated Oil and Gas Lease

March 14, 1996

Pursuant to the provisions of 30 U.S.C. 188 (d) and (e), and 43 CFR 3108.2–3 (a) and (b)(1), a petition for reinstatement of oil and gas lease WYW121598 for lands in Natrona County, Wyoming, was timely filed and was accompanied by all the required rentals accruing from the date of termination.

The lessee has agreed to the amended lease terms for rentals and royalties at rates of $5.00 per acre, or fraction thereof, per year and 16⅔ percent, respectively.

The lessee has paid the required $500 administrative fee and $125 to reimburse the Department for the cost of

this **Federal Register** notice. The lessee has met all the requirements for reinstatement of the lease as set out in Section 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), and the Bureau of Land Management is proposing to reinstate lease WYW121598 effective September 1, 1995, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Pamela J. Lewis,

Chief, Leasable Minerals Section.

BILLING CODE 4310–22–P

[WY–920–06–1330–01; WYW128036, WYW128037, WYW128038]

Notice of Sodium Lease Offerings by Sealed Bid; Cheyenne, WY

SUMMARY: Notice is hereby given that certain sodium resources in the lands hereinafter described, located in Sweetwater County, Wyoming, will be offered for competitive lease by sealed bid in accordance with the provisions of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 181 *et seq.*), as amended.

DATES: The lease sale will be held at 2:00 p.m., on Wednesday, May 1, 1996. Sealed bids must be submitted before 1:00 p.m., on Wednesday, May 1, 1996.

ADDRESSES: The lease sale will be held in the first floor conference room (Room 107) of the Wyoming State Office, 5353 Yellowstone Road, P.O. Box 1828, Cheyenne, Wyoming 82003. Sealed bids must be submitted to the Cashier, Wyoming State Office, at the address given above.

FOR FURTHER INFORMATION CONTACT: Mavis Love, Land Law Examiner, at (307) 775–6258.

SUPPLEMENTARY INFORMATION: These offerings are being made as a result of expressions of interest filed in the Wyoming State Office. The parcels will be leased to the qualified bidder of the highest cash amount provided that the high bid meets the fair market value determination of the parcels. The minimum bid is $200.00 per acre. No bid less than $200.00 per acre will be considered. The minimum bid is not intended to represent fair market value. The fair market value will be determined by the Authorized Officer after the sale.

The resource to be offered consists of all the sodium in the following described lands located in Sweetwater County, Wyoming. Minable reserves are defined as beds that are a maximum of 2000 feet deep, are a minimum of 8 feet thick, and have a minimum quality greater than 85 percent trona and less than 2 percent halite.

Parcel 1 (WYW128036)

T. 18 N., R. 109 W., 6th P.M., WY,
Sec. 20: All.
Containing 640 acres.

Parcel 1 contains an estimated 18.1 million tons of minable trona in Bed 17.

Parcel 2 (WYW128037)

T. 18 N., R. 109 W., 6th P.M., WY,
Sec. 28: All.
Containing 640 acres.

Parcel 2 contains an estimated 15.0 million tons of minable trona in Bed 17 and 4.6 million tons of minable trona in Bed 15 for a total of 19.6 million tons.

Parcel 3 (WYW128038)

T. 17 N., R. 110 W., 6th P.M., WY,
Sec. 10: All;
Sec. 12: All.
Containing 1280 acres.

Parcel 3 contains minable trona in all five beds with a total of 60.2 million tons of minable trona. Bed 17 contains 2.0 million tons, Bed 15 contains 6.9 million tons, Bed 14 contains 13.3 million tons, Bed 12 contains 23.8 million tons, and Bed 11 contains 14.2 million tons.

The leases issued as a result of this offering will provide for payment of annual rentals for each acre, or fraction thereof, as follows: 25 cents for the first calendar year or fraction thereof; 50 cents for the second, third, fourth and fifth calendar years, respectively; and, one dollar for the sixth and each and every calendar year thereafter during the continuance of the leases. The rental paid for any year shall be credited against the first royalties as they accrue under the lease during the year for which the rental was paid. The royalty rate shall be 8 percent of the quantity or gross value of the output of sodium compounds and related products at the point of shipment to market. Bidding instructions for the offered tracts are included in the Detailed Statement of Lease Sale. Copies of the statement and of the proposed sodium leases are available at the Wyoming State Office. Case file documents are also available at the office for public inspection.

Dennis R. Stenger,

Acting Deputy State Director, Minerals and Lands.

BILLING CODE 4310–22–M

National Park Service

Solicitation of Nominations for National Maritime Heritage Grants Advisory Committee

AGENCY: National Park Service, Interior.

ACTION: Solicitation of nominations.

SUMMARY: Pursuant to 16 U.S.C. 5401, the Secretary of the Interior is soliciting nominations for members to serve on the National Maritime Heritage Grants Advisory Committee. The purpose of the Committee is to advise the Secretary on matters pertaining to the National Maritime Heritage Grants Program and the National Maritime Heritage Policy.

DATES: All nominations should be submitted on or before April 26, 1996.

ADDRESSES: All nominations should be sent to: Secretary of the Interior, U.S. Department of the Interior, 1849 C Street NW., Washington, D.C. 20240. All nominations should be accompanied by complete biographical and professional information, and include home and business address and telephone numbers.

FOR FURTHER INFORMATION CONTACT: Kevin Foster, National Maritime Initiative, National Park Service, U.S. Department of the Interior, (202) 343–5969 or (202) 343–1244 (fax).

SUPPLEMENTARY INFORMATION: Pub. L. 103–451 (16 U.S.C. 5401) established within the Department of Interior the National Maritime Heritage Grants Program for maritime heritage preservation and education projects. It also sets forth the National Maritime Heritage Policy, calling for preservation of historic maritime resources through a partnership with Federal, State, and local governments, and private entities.

In addition, the Act established the National Maritime Heritage Grants Advisory Committee. The Committee is responsible for reviewing proposals to the National Maritime Heritage Grants Program and making funding recommendations to the Secretary. The Committee identifies and advises the Secretary regarding priorities for achieving the objectives set forth in the National Maritime Heritage Policy. The Committee also reviews the Secretary's annual report to Congress on the Grants Program, and performs any other duties the Secretary considers appropriate.

Pub. L. 103–451 stipulates that the Committee will consist of 13 members appointed by the Secretary who are representative of various sectors of the maritime community who are knowledgeable and experienced in maritime heritage and preservation. To the extent practicable, membership should reflect regional geographic balance and include a representative from each of the fields of:

1. small craft preservation
2. large vessel preservation
3. sail training
4. preservation architecture
5. underwater archaeology
6. lighthouse preservation
7. maritime education
8. military naval history
9. maritime museums or historical societies
10. maritime arts and crafts
11. maritime heritage tourism
12. maritime recreational resources management

The Committee will also include a member of the general public.

Through this notice, the Secretary is soliciting nominations for any of the appointments from interested organizations or individuals.

Bruce Babbitt,

Secretary of the Interior.

DEPARTMENT OF JUSTICE

Antitrust Division

Notice Pursuant to the National Cooperative Reserach and Production Act of 1993—Research, Development and Production of Adsorbent for Air Separation (Air Products and Chemicals, Inc.)

Notice is hereby given that, on February 5, 1996, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), Air Products and Chemicals, Inc. filed notifications of a cooperative joint venture simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties and (2) the nature and objectives of the joint venture. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to Section 6(b) of the Act, the identifies of the parties are Air Products and Chemicals, Inc., Allentown, PA and L'Air Liquide, Societe Anonyme Pour L'Etude et L'Exploitation Des Procedes Georges Claude, Paris, FRANCE. The objective of the joint venture is to research, develop and arrange for and share in the production of new adsorbents for the separation of air to recover oxygen and/or nitrogen.

Constance K. Robinson,

Director of Operations, Antitrust Division.

[FR Doc. 96–7365 Filed 3–26–96; 8:45 am]

BILLING CODE 4410–01–M

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Corporation for Open Systems International (COS)

Notice is hereby given that, on February 23, 1996, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), the Cooperation for Open Systems International ("COS") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission reflecting changes in the membership of COS. The notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Effective December 31, 1995, the following companies ceased membership in COS: Ameritech, Chicago, IL; AT&T, Holmdel, NJ; Bell Atlantic, Arlington, NJ; Computer Sciences Corporation, Herndon, VA; Digital Equipment Corporation, Littleton, MA; Defense Information Systems Agency, Reston, VA; Motorola, Arlington Heights, IL; National Institute of Standards and Technology, Gaithersburg, IL; Northern Telecom, Inc., Morristown, NJ; NYNEX Science & Technology, Inc., White Plains, NY; Southwestern Bell Technology Resources, Austin, TX; Unisys Corporation, St. Paul, MN; and 3COM Corporation, Santa Clara, CA.

No other changes have been made in either the membership or planned activity of COS. Membership in this group research project remains open, and COS intends to file additional written notification disclosing all changes in membership.

On May 14, 1986, COS filed its original notification pursuant to Section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to Section 6(b) of the Act on June 11, 1986 (51 FR 21260).

The last notification was filed with the Department on October 17, 1995. A notice was published in the **Federal Register** pursuant to Section 6(b) of the Act on February 20, 1996 (61 Fed. Reg. 6388).

Constance K. Robinson,

Director of Operations, Antitrust Division.

[FR Doc. 96–7366 Filed 3–26–96; 8:45 am]

BILLING CODE 4410–01–M

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Petroleum Environmental Research Forum ("PERF")

Notice is hereby given that, on February 15, 1996, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), the Petroleum Environmental Research Forum ("PERF") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing a change in its membership. The notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, the notifications stated that the Aramco Services Company, Houston, TX, has become a member of PERF.

No other changes have been made in either the membership or planned activity of PERF. Membership in PERF remains open, and PERF intends to file additional written notification disclosing all changes in membership.

On February 10, 1986, PERF filed its original notification pursuant to Section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to Section 6(b) of the Act on March 14, 1986, (51 FR 8903).

The last notification was filed with the Department on March 1, 1995. A notice was published in the **Federal Register** pursuant to Section 6(b) of the Act on April 27, 1995, (60 FR 20751). A supplemental filing of a change in the

wording of the Charter of PERF filed with the Department on October 25, 1995, has not been published.

Constance K. Robinson,

Director of Operations, Antitrust Division.

BILLING CODE 4410–01–M

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Petroleum Environmental Research Forum Project No. 93–24

Notice is hereby given that, on February 26, 1996, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), the participants in the Petroleum Environmental Research Forum ("PERF") Project No. 93–24, titled "Biodegradation and Metabolism of Methyl Tertiary Butyl Ether and Other Tertiary Ethers," have filed written notifications simultaneously with the Attorney General and with the Federal Trade Commission disclosing (1) the identities of the parties to PERF Project No. 93–24 and (2) the nature and objectives of the research program to be performed in accordance with the Project. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to Section 6(b) of the Act, the identities of the current parties participating in PERF Project No. 93–24 are: Amoco Corporation, Chicago, IL; ELF Aquitaine Inc., Washington, D.C.; Union Oil Company of California (Unocal), Brea, CA.

The nature and objective of the research program performed in accordance with PERF Project No 93–24 is to assess biodegradation and metabolism of methyl tertiary butyl ether (MTBE) and other tertiary ethers.

Participation in this project will remain open to interested persons and organizations until issuance of the final Project Report, which is presently anticipated to occur approximately in September, 1996. The participants intend to file additional written notifications disclosing all changes in its membership.

Information about participating in PERF Project No. 93–24 may be obtained by contacting Ms. Minoo Javanmardian, Amoco Corporation, Naperville, IL.

Constance K. Robinson,

Director of Operations, Antitrust Division.

[FR Doc. 96–7369 Filed 3–26–96; 8:45 am]

BILLING CODE 4410–01–M

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Petroleum Environmental Research Forum

Notice is hereby given that, on October 25, 1995, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), the Petroleum Environmental Research Forum ("PERF") filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing a change in the statement of the nature and objectives of the joint venture. The notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, the notifications stated that the wording of the Charter of PERF Article II, paragraphs A and B shall read as follows:

A. To provide a stimulus to and mechanism for cooperative research and development of technology related to any aspect of health, environment, safety, waste reduction, and system integrity for the petroleum industry.

B. To provide a forum for the presentation and consideration of proposals for industry projects related to any aspect of health, environment, safety, waste reduction, and system integrity for funding by Members of the organization and non-Members alike.

No other changes have been made in either the membership or planned activities of PERF. Membership in PERF remains open, and PERF intends to file additional written notifications disclosing all changes in membership.

On February 10, 1986, PERF filed its original notification pursuant to Section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to Section 6(b) of the Act on March 14, 1986, (51 FR 8903).

The last notification of change in membership was filed with the Department on March 1, 1995. A notice was published in the **Federal Register** pursuant to Section 6(b) of the Act on April 27, 1995, (60 FR 20751).

Constance K. Robinson,

Director of Operations, Antitrust Division.

BILLING CODE 4410–01–M

Drug Enforcement Administration

Manufacturer of Controlled Substance; Notice of Application

Pursuant to Section 1301.43(a) of Title 21 of the Code of Federal Regulations (CFR), this is notice that on October 9, 1995, High Standard Products, 1100 W. Florence Avenue, #8, Inglewood, California 90301, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
Methaqualone (2565)	I
Lysergic acid diethylamide (7315)	I
Tetrahydrocannabinols (7370)	I
3,4-Methylenedioxyamphetamine (7400).	I
3,4-Methylenedioxy-N-ethylamphetamine (7404).	I
3,4-Methylenedioxy-methamphetamine (7405).	I
4-Methoxyamphetamine (7411)	I
Heroin	I
Normorphine	I
3-Methylfentanyl (9813)	I
Amphetamine (1100)	II
Methamphetamine (1105)	II
Phencyclidine (7471)	II
Cocaine (9041)	II
Codeine (9050)	II
Diphenoxylate (9170)	II
Benzoylecgonine (9180)	II
Hydrocodone (9193)	II
Methadone (9250)	II
Morphine (9300)	II
Fentanyl (9801)	II

The firm plans to manufacture analytical reference standards.

Any other such applicant and any person who is presently registered with DEA to manufacture such substances may file comments or objections to the issuance of the above application.

Any such comments or objections may be addressed, in quintuplicate, to the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, United States Department of Justice, Washington, DC 20537, Attention: DEA Federal Register Representative (CCR), and must be filed no later than May 28, 1996.

Dated: March 15, 1996.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

BILLING CODE 4410–09–M

DEPARTMENT OF LABOR

Labor Advisory Committee for Trade Negotiations and Trade Policy; Sunshine Act Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (P.L. 92–463 as amended), notice is hereby given of a meeting of the Steering Subcommittee of the Labor Advisory Committee for Trade Negotiations and Trade Policy.

Date, time and place: April 10, 1996, 10:00 am–12:00 noon, U.S. Department of Labor, Room S–3215 A/B, 200 Constitution Avenue NW., Washington, D.C. 20210.

Purpose: The meeting will include a review and discussion of current issues which influence U.S. trade policy. Potential U.S. negotiating objectives and bargaining positions in current and anticipated trade negotiations will be discussed. Pursuant to section 9(B) of the Government in the Sunshine Act, 5 U.S.C. 552b(c)(9)(B) it has been determined that the meeting will be concerned with matters the disclosure of which would seriously compromise the Government's negotiating objectives or bargaining positions. Accordingly, the meeting will be closed to the public.

For further information, contact: Fernand Lavalee, Director, Trade Advisory Group, Phone: (202) 219–4752.

Signed at Washington, D.C. this 21st day of March, 1996.

Joaquin Otero,

Deputy Under Secretary, International Affairs.

BILLING CODE 4510–28–M

Mine Safety and Health Administration

Advisory Committee on the Elimination of Pneumoconiosis Among Coal Mine Workers; Meeting

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice of advisory committee meeting.

SUMMARY: This notice announces the date, time, place, and agenda summary for the second meeting of the Mine Safety and Health Administration's Advisory Committee on the Elimination of Pneumoconiosis Among Coal Mine Workers.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvey, Director, Office of Standards, Regulations, and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, room 631, Arlington, Virginia 22203; phone 703–235–1910.

SUPPLEMENTARY INFORMATION: A public meeting of the advisory committee will be held as follows:

(1) April 11, 1996, from 8:00 a.m. to 6:30 p.m.

(2) April 12, 1996, from 8:00 a.m. to 5:00 p.m. The meeting will be held on both days at the DoubleTree Hotel—Pittsburgh (Somerset Room) located at 1000 Penn Avenue, Pittsburgh, Pennsylvania 15222; phone 412–281–3700.

The Secretary of Labor established this advisory committee (60 FR 5947) to develop recommendations for improved standards or other appropriate actions addressing: permissible exposure limits to eliminate black lung disease and silicosis; the means to control respirable coal mine dust levels; improved monitoring of respirable coal dust levels and the role of the miner in that monitoring; and the adequacy of operator sampling programs to determine the actual levels of dust concentrations to which miners are exposed. The Advisory Committee is chartered through September 30, 1996 (60 FR 55284), but must complete its deliberations by August 19, 1996.

The agenda for the second meeting will include discussions on the control of the workplace environment (worker exposure). Specific topics for discussion will include: (1) The current state of dust control technology for underground and surface coal mines and its effectiveness; (2) new developments in control technology and mining systems; (3) the hierarchy of controls and its application in underground and surface coal mines; (4) the design of mine ventilation plans for effective dust control and the means for verifying plan effectiveness; (5) the monitoring of compliance with plan requirements; (6) means of upgrading ventilation plan provisions; (7) the role of the miner, operator, and MSHA; and (8) education and training needs relative to the control of the workplace environment.

The public is invited to attend. The chairperson will provide an hour near the end of each day's meeting to allow interested persons to make comments. Official records of the meeting will be available for public inspection at the above address.

Dated: March 22, 1996.

J. Davitt McAteer,

Assistant Secretary for Mine Safety and Health.

[FR Doc. 96–7384 Filed 3–22–96; 12:17 pm]

BILLING CODE 4510–43–M

NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of pending NRC action to submit an information collection request to OMB and solicitation of public comment.

SUMMARY: The NRC is preparing a submittal to OMB for review of continued approval of information collections under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. The title of the information collection: 10 CFR Part 35, "Medical Use of Byproduct Material."

2. Current OMB Approval Number 3150–0010.

3. How often the collection is required: Required reports are collected and evaluated on a continuing basis as needed due to a change in programs or as events occur.

4. Who is required or asked to report: Physicians and medical institutions who are applicants for, or holders of, an NRC license authorizing the administration of byproduct material or its radiation to humans for medical use.

5. The number of annual respondents: 1,982 NRC licensees and 4,955 Agreement State licensees.

6. The number of hours needed annually to complete the requirement or request: 376,407 hours for NRC licensees and 942,820 hours for Agreement State licensees.

7. Abstract: 10 CFR Part 35, "Medical Use of Byproduct Material," contains requirements that apply to NRC licensees who are authorized to administer byproduct material or its radiation to humans for medical use. The information in the required reports and records is used by the NRC to ensure that the health and safety of the public is protected, and that the licensee possession and use of byproduct material is in compliance with license and regulatory requirements. The revision is a net increase adjustment in burden resulting from an increase in the number of affected licensees, a reevaluation of the time required to perform individual activities and the number of times those activities are performed, and an addition of burden associated with three sections, two of which are a result of rulemaking, and one which was inadvertently omitted during the last evaluation of burden.

Submit, by (insert date 60 days after publication in the **Federal Register**), comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

A copy of the draft supporting statement may be viewed free of charge at the NRC Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC. Members of the public who are in the Washington, DC, area can access this document via modem on the Public Document Room Bulletin Board (NRC's Advance Copy Document Library), NRC subsystem at FedWorld, 703–321–3339. Members of the public who are located outside of the Washington, DC, area can dial FedWorld, 1–800–303–9672, or use the FedWorld Internet address: fedworld.gov (Telnet). The document will be available on the bulletin board for 30 days after the signature date of this notice. If assistance is needed in accessing the document, please contact the FedWorld help desk at 703–487–4608. Additional assistance in locating the document is available from the NRC Public Document Room, nationally at 1–800–397–4209 or, within the Washington, DC area, at 202–634–3273.

Comments and questions may be directed to the NRC Clearance Officer, Brenda Jo. Shelton, U.S. Nuclear Regulatory Commission, T–6 F33, Washington, DC, 20555–0001, or by telephone at (301) 415–7233, or by Internet electronic mail at BJS1@NRC.GOV.

Dated at Rockville, Maryland, this 21st day of March, 1996.

For the Nuclear Regulatory Commission.

Gerald F. Cranford,

Designated Senior Official for Information Resources Management.

[FR Doc. 96–7407 Filed 3–26–96; 8:45 am]

BILLING CODE 7590–01–P

[Docket No. 72–9 (50–267)]

Notice of Issuance of Amendment to Materials License SNM–2504; Public Service Company of Colorado; Fort St. Vrain Independent Spent Fuel Storage Installation

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment 2 to Materials License No. SNM–2504 held by the Public Service Company of Colorado (PSCo) for the receipt, possession, storage, and transfer of spent fuel at the Fort St. Vrain (FSV) independent spent fuel storage installation (ISFSI), located in Weld County, Colorado. The amendment is effective as of the date of issuance.

By applications dated July 21 and December 12, 1995, PSC requested amendments to its ISFSI license to (1) incorporate organizational changes, (2) delete reference to the FSV 10 CFR Part 50 "possession only" license, and (3) revise the radioactive materials and possession limits to accurately reflect the materials stored at the ISFSI.

This amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

In accordance with 10 CFR 72.46(b)(2), a determination has been made that the amendment does not present a genuine issue as to whether the health and safety of the public will be significantly affected. Therefore, the publication of a notice of proposed action and an opportunity for hearing or a notice of hearing is not warranted. Notice is hereby given of the right of interested persons to request a hearing on whether the action should be rescinded or modified.

The Commission has determined that the issuance of the amendment will not result in any significant environmental impact and that, pursuant to 10 CFR 51.22(c)(11), an environmental assessment need not be prepared in connection with issuance of the amendment.

Documents related to this action are available for public inspection at the Commission's Public Document Room located at the Gelman Building, 2120 L Street NW., Washington, DC 20555, and at the Local Public Document Room at the Weld Library District, Lincoln Park Branch, 919 7th Street, Greeley, Colorado 80631.

Dated at Rockville, Maryland, this 21st day of March 1996.

For the Nuclear Regulatory Commission.

William D. Travers,

Director, Spent Fuel Project Office, Office of Nuclear Material Safety and Safeguards.

[FR Doc. 96–7414 Filed 3–26–96; 8:45 am]

BILLING CODE 7590–01–P

[Docket Nos. 50–266 and 50–301]

Wisconsin Electric Power Company; Point Beach Nuclear Plant; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to the licenses and Technical Specifications for the Point Beach Nuclear Plant, Unit Nos. 1 and 2, located in Manitowoc County, Wisconsin (Facility Operating License Nos. DPR–24 and DPR–27, respectively, issued to Wisconsin Electric Power Company, the licensee).

Environmental Assessment

Identification of the Proposed Action

The proposed action would reflect the change in the name of the licensee from Wisconsin Electric Power Company to Wisconsin Energy Company.

The proposed action is in accordance with the licensee's application for amendment of the facility operating license dated October 23, 1995.

The Need for the Proposed Action

The proposed action is needed to properly reflect corporate administrative changes in the license and Technical Specifications.

Environmental Impacts of the Proposed Action

The proposed action is administrative in nature only and will have no effect on the operation or maintenance of the facility whatsoever. The change will not increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action does not affect nonradiological plant effluents and has no other environmental impact. Accordingly, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed action.

Alternatives to the Proposed Action

Since the Commission has concluded there is no measurable environmental impact associated with the proposed action, any alternatives with equal or greater environmental impact need not be evaluated. As an alternative to the proposed action, the staff considered denial of the proposed action. Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the Final Environmental Statement for Point Beach.

Agencies and Persons Consulted

In accordance with its stated policy, on March 11, 1996, the staff consulted with the Wisconsin State official, Ms. Sarah Jenkins, of the Public Service Commission of Wisconsin, regarding the environmental impact of the proposed action. The State official had no comments.

Finding of No Significant Impact

Based upon the environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated October 23, 1995, which is available for public inspection at the Commission's Public Document Room, The Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Joseph P. Mann Library, 1516 Sixteenth Street, Two Rivers, Wisconsin 54241.

Dated at Rockville, Maryland, this 20th day of March 1996.

For the Nuclear Regulatory Commission.

Gail H. Marcus,

Director Project Directorate III–3, Division of Reactor Projects—III/IV, Office of Nuclear Reactor Regulation.

[FR Doc. 96–7408 Filed 3–26–96; 8:45 am]

BILLING CODE 7590–01–P

Biweekly Notice

Applications and Amendments to Facility Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law 97–415, the U.S. Nuclear Regulatory Commission (the Commission or NRC staff) is publishing this regular biweekly notice. Public Law 97–415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from March 4, 1996, through March 15, 1996. The last biweekly notice was published on March 13, 1996.

Notice Of Consideration Of Issuance Of Amendments To Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, And Opportunity For A Hearing

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

Written comments may be submitted by mail to the Rules Review and Directives Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room 6D22, Two White Flint North, 11545 Rockville Pike, Rockville, Maryland from 7:30 a.m. to 4:15 p.m. Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC. The filing of requests for a hearing and petitions for leave to intervene is discussed below.

By April 26, 1996, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC and at the local public document room for the particular facility involved. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing

Board will issue a notice of a hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington DC, by the above date. Where petitions are filed during the last 10 days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 248-5100 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number N1023 and the following message addressed to **(Project Director)**: petitioner's name and telephone number, date petition was mailed, plant name, and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for a hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room for the particular facility involved.

Arizona Public Service Company, et al., Docket Nos. STN 50-528, STN 50-529, and STN 50-530, Palo Verde Nuclear Generating Station, Units Nos. 1, 2, and 3, Maricopa County, Arizona

Date of amendments request: February 1, 1996

Description of amendments request: The proposed amendment would (1) revise Technical Specifications (TS) Sections 3/4.1.1.1, 6.9.1.9, and 6.9.1.10 to relocate the shutdown margin (reactor trip breakers open) to the Core Operating Limits Report (COLR); (2) revise TS 3/4.3.2 (Tables 3.3-3 and 3.3-4), to specify an additional restriction for the allowed low pressurizer pressure trip setpoint when reducing reactor coolant system (RCS) pressure in Mode 3; (3) revise TS Section 2.2.1 (Table 2.2-1) to make it consistent with the footnote in TS Tables 3.3-3 and 3.3-4; and (4) revise TS Sections 3/4.5.2 and 3/4.5.3 to specify an additional restriction to require that two emergency core cooling system (ECCS) subsystems be operable in Mode 3 whenever the RCS cold leg temperature is equal to or above 485 degrees F. In addition, the Table of Contents and the Bases would be revised to be consistent with these changes.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes do not significantly increase the probability or consequences of an accident previously evaluated in the Updated Final Safety Analysis Report (UFSAR). The proposed changes to TS Tables 2.2-1, 3.3-3, and 3.3-4 to add additional restrictions to the pressurizer pressure - low trip setpoint requirements are more conservative than the current Technical Specifications and will reflect the updated Mode 3 steam line break safety analyses assumptions. The proposed changes to TS sections 3/4.5.2 and 3/4.5.3 to add additional restrictions to the requirement to have two ECCS Subsystems operable are also more conservative than the current Technical Specifications and will reflect the updated Mode 3 steam line break safety analyses assumptions. Since these changes are more restrictive, they would not contribute to the initiation of any accident, nor would they increase the consequences of an accident, but they would enhance the plant response to a steam line break in Mode 3 to reduce consequences. The proposed changes to relocate the shutdown margin - reactor trip breakers open to the COLR will have no effect on the initiation or consequences of an accident. The shutdown margin-reactor trip breakers open, which would be determined using NRC approved analytical methods, as required by the proposed changes, would ensure that the probability and consequences of an accident would not increase. The changes to the titles of TS 3/4.5.2 and 3/4.5.3, and to the Table of Contents, are editorial and have no effect on the operation of the plant or on any structures, systems or components.

2. The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed TS changes do not create the possibility of an accident of a new or different kind. The proposed changes to TS Tables 2.2-1, 3.3-3, and 3.3-4, and TS section 3/4.5.2 and 3/4.5.3, to add additional restrictions to the pressurizer pressure - low trip setpoint requirement and add additional restrictions to the requirement to have two ECCS Subsystems operable are more conservative than the current Technical Specifications and will reflect the updated Mode 3 steam line break safety analyses assumptions. Since these changes are more restrictive, and therefore bounded by the current TS, they would not contribute to the initiation of any kind of new or different accident. The proposed changes to relocate the shutdown margin -reactor trip breakers open to the COLR will have no effect on the possibility of a new or different kind of accident. The shutdown margin-reactor trip breakers open, which would be determined using NRC approved analytical methods as required by the proposed changes, would ensure that there would be no possibility of a new or different kind of accident from any accident previously evaluated. The changes to the titles of TS 3/4.5.2 and 3/4.5.3, and to the Table of Contents, are editorial and have no effect on the operation of the plant or on any structures, systems or components.

3. The proposed change does not involve a significant reduction in a margin of safety.

The proposed TS changes do not involve a reduction in any margin of safety. The proposed changes to TS Tables 2.2-1, 3.3-3, and 3.3-4, and TS section 3/4.5.2 and 3/4.5.3, to add additional restrictions to the pressurizer pressure - low trip setpoint requirement and add additional restrictions to the requirement to have two ECCS Subsystems operable are more conservative than the current Technical Specifications and will reflect the updated Mode 3 steam line break safety analyses assumptions. Since these changes are more restrictive, they do not involve a reduction in any margin of safety as currently established by the existing TS. The proposed changes to relocate the shutdown margin - reactor trip breakers open to the COLR will have no effect on any margin of safety. The shutdown margin - reactor trip breakers open would be determined using NRC approved analytical methods as required by the proposed changes, thus ensuring that there would be no reduction in any margin of safety. The changes to the titles of TS 3/4.5.2 and 3/4.5.3, and to the Table of Contents, are editorial and have no effect on the operation of the plant or on any structures, systems or components.

The NRC staff has reviewed the licensee's analysis and, based on that review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendments request involve no significant hazards consideration.

Local Public Document Room location: Phoenix Public Library, 1221 N. Central Avenue, Phoenix, Arizona 85004

Attorney for licensee: Nancy C. Loftin, Esq., Corporate Secretary and Counsel, Arizona Public Service Company, P.O. Box 53999, Mail Station 9068, Phoenix, Arizona 85072-3999

NRC Project Director: William H. Bateman

Duke Power Company, Docket Nos. 50-269, 50-270 and 50-287, Oconee Nuclear Station, Units 1, 2 and 3, Oconee County, South Carolina

Date of amendment request: February 15, 1996

Description of amendment request: The proposed amendments would revise Technical Specification (TS) 3.7 to add operability requirements for the Keowee Hydro units during periods of commercial power generation. These requirements are based on lake level and power level of the Keowee Hydro units. Also, two surveillance requirements would be added to TS 4.6 to (1) address periodic testing of the circuitry that was added by the modification approved in NRC's SER dated August 15, 1995, and (2) add a load rejection surveillance to ensure that the response of the Keowee Hydro units is bounded by the design criteria used to develop the Keowee operating restrictions.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) [Does not] involve a significant increase in the probability or consequences of an accident previously evaluated:

Each accident analysis addressed within the Oconee Final Safety Analysis Report (FSAR) has been examined with respect to the change proposed within this amendment request. The probability of any Design Basis Accident (DBA) is not significantly increased by this change. In addition, the consequences of the accidents are within the bounds of the FSAR analyses.

The design basis of the auxiliary electrical systems is to supply the required engineered safeguards (ES) loads of one unit and the safe shutdown loads of the other two units. The systems are arranged so that no single failure will jeopardize plant safety. The addition of the operability requirement and surveillances for the Keowee Hydro units will ensure that the electrical systems can meet their design basis.

(2) [Does not] create the possibility of a new or different kind of accident from any kind of accident previously evaluated:

Addition of the operability requirement and surveillances will not create a new or different kind of accident. The addition of the circuitry which is covered by the operability requirement and surveillances has been reviewed and approved by the NRC. Therefore, operation of ONS [Oconee Nuclear Station] in accordance with this Technical Specification amendment will not create any failure modes not bounded by previously evaluated accidents. Consequently, this change will not create the possibility of a new or different kind of accident from any kind of accident previously evaluated.

(3) [Does not] involve a significant reduction in a margin of safety:

The design basis of auxiliary electrical systems is to supply the required ES loads of one Unit and safe shutdown loads of the other two units. The ability of the Keowee Hydro units to provide emergency power following an accident during a period of Keowee Hydro commercial power generation was reviewed and approved by the NRC in [an] SER dated August 15, 1995. Therefore, there will be no significant reduction in any margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Oconee County Library, 501 West South Broad Street, Walhalla, South Carolina 29691

Attorney for licensee: J. Michael McGarry, III, Winston and Strawn, 1200 17th Street, NW., Washington, DC 20036

NRC Project Director: Herbert N. Berkow

Duke Power Company, Docket Nos. 50-269, 50-270 and 50-287, Oconee Nuclear Station, Units 1, 2 and 3, Oconee County, South Carolina

Date of amendment request: February 20, 1996

Description of amendment request: The proposed amendments would revise Technical Specifications (TS) 3.1.5, 3.1.10, and 4.1. The TS changes would: (1) reduce the frequency for the concentrated boric acid storage tank boron concentration surveillance, (2) delete the chemical and radiochemical surveillance requirements for the reactor

coolant for $Sr^{=189}$ and $Sr^{=190}$, gross beta activity, gross alpha activity, dissolved gas concentration in the reactor coolant, and gross beta activity in the steam generator feedwater, and (3) relocate the surveillance requirements for tritium, chloride, fluoride and oxygen to the Selected Licensee Commitments (SLC) Manual. The proposed changes would also delete some temperature and pressure requirements on control rod operation.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration. The licensee has determined that operation of the facility in accordance with the proposed amendments would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated:

Each accident analysis addressed within the Oconee Final Safety Analysis Report (FSAR) has been examined with respect to the proposed amendment request. The probability of any Design Basis Accident (DBA) is not significantly increased by the proposed amendment due to the fact that the identified cause in the FSAR accidents is not impacted. In addition, the consequences of the accidents are within the bounds of the FSAR analyses since the proposed amendment does not change the accident analysis methods or assumptions described in the FSAR.

(2) Create the possibility of a new or different kind of accident from any kind of accident previously evaluated:

The proposed amendment revises and eliminates several of the RCS [Reactor Coolant System] chemistry Technical Specification surveillance requirements. The changes in the surveillance requirements do not alter the plant safety features or the method of operation at ONS [Oconee Nuclear Station]. Therefore, operation of ONS in accordance with the proposed Technical Specification will not create any failure modes not bounded by previously evaluated accidents.

(3) Involve a significant reduction in a margin of safety.

The proposed amendment does not impact the mitigation of any of the accidents analyzed in the FSAR. Therefore, there is not a significant reduction in the margin of safety associated with the proposed amendment.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Oconee County Library, 501 West South Broad Street, Walhalla, South Carolina 29691

Attorney for licensee: J. Michael McGarry, III, Winston and Strawn, 1200 17th Street, NW., Washington, DC 20036

NRC Project Director: Herbert N. Berkow

Entergy Operations, Inc., et al., Docket No. 50-416, Grand Gulf Nuclear Station, Unit 1, Claiborne County, Mississippi

Date of amendment request: February 22, 1996

Description of amendment request: The licensee has proposed to increase the safety function lift setpoint tolerances for the safety and relief valves that are listed in Surveillance Requirement 3.4.4.1 (Page 3.4-10) of the Technical Specifications TSs) for the Grand Gulf Nuclear Station, Unit 1. The tolerances would be increased from the current plus/minus 1 percent of the safety function (i.e., safety relief valve) lift setpoint to plus/minus 3 percent.

The frequency of verifying these setpoints would not be changed by this amendment request. Also, the other surveillance requirements in the TSs on these valves and the number of these valves required to be operable are not being changed by this amendment request.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration (NSHC) in Attachment 2 to its application of February 22, 1996.

In its application, the licensee stated that it has used the NRC staff's safety evaluation report (SER), NEDC 31753-P-A, issued in the NRC letter of March 8, 1993, which evaluated General Electric (GE) topical report NEDC-31753P, "BWROG [BWR Owners' Group] In-Service Pressure Relief Technical Specification Revision Licensing Topical Report," dated February 1990.

The licensee's NSHC analysis is presented below:

Entergy Operations, Inc. is proposing that the Operating License for Grand Gulf Nuclear Station (GGNS) be amended to increase the tolerance of the safety function lift setpoints [from plus/minus 1%] to plus/minus 3%. The GGNS Inservice Testing (IST) program controls the frequency of safety relief valve (S/RV) testing as required by the GGNS Operating License; therefore, this proposal will also incorporate changes [concerning the setpoint tolerances] to applicable IST procedures. GGNS will incorporate the recommendations of the NEDC-31753-P-A [NRC staff's] SER, by resetting the safety function [S/RV] lift setpoints for all tested valves to within plus/minus 1% of the design lift setpoint and increasing the test sample size by two valves for each valve found outside the plus/minus 3% safety function lift setpoint. S/RV test sample population will be determined based upon the currently licensed ASME [American Society of Mechanical Engineers] Boiler and Pressure Vessel Code.

The commission has provided standards for determining whether a no significant hazards consideration exists as stated in 10CFR50.92(c). A proposed amendment to an operating license involves no significant hazards if the operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

Entergy Operations, Inc. has evaluated the no significant hazards considerations in its request for a license amendment. In accordance with 10CFR50.91(a), Entergy Operations, Inc. is providing the following analysis of the proposed amendment against the three standards in 10CFR50.92(c):

a. No significant increase in the probability or consequences of an accident previously evaluated results from this change.

The GGNS safety design bases for the S/RVs are:

) Prevent overpressurization of the nuclear system that could lead to failure of the reactor coolant pressure boundary,

) Provide automatic depressurization for small breaks in the nuclear system,

) Permit verification of operability,

) Withstand adverse combinations of loadings and forces during abnormal, accident, or special event conditions.

The most limiting vessel overpressurization event is a closure of all main steam isolation valves with a high flux scram. This event was analyzed for GGNS using the minimum number of S/RVs required by the GGNS Operating License. The safety function lift setpoint tolerance used in the analysis bounds the proposed plus/minus 3% setpoint tolerance. The analysis indicates that the S/RVs are capable of maintaining adequate margin below the Operating License Reactor Coolant System Pressure of 1325 psig.

Anticipated operational transients can also challenge the operation of the S/RVs, for instance, Generator Load Reject without Bypass. Analyses have been performed on the limiting events that bound other pressure transient events using safety function limit setpoint tolerances that bound the proposed plus/minus 3% tolerance request. Fuel operating limits are based on the results of these analyses; therefore, adequate fuel thermal margin is maintained.

Plant transients and events that require the use of automatic depressurization and the low-low set feature utilize the relief mode of S/RV operation. This proposed change does not affect the relief mode of S/RV operation.

The verification of valve operability will still be performed in accordance with the GGNS Inservice Testing Program, and S/RV safety mode operability will be verified prior to reinstallation. Analysis of the loads placed on each S/RV sub-system (discharge piping, spargers and associated components) verifies that adequate margin exists to ensure that the overpressurization system can perform its designed function.

The negative tolerance of the safety function lift setpoint remains above the highest setpoint of the S/RV relief mode, and therefore normal vessel pressure. This margin provides reasonable assurance that inadvertent opening of an S/RV will not occur during power operations.

GGNS will replace each S/RV removed for IST program testing with an S/RV that has been reset to within plus/minus 1% of the designed safety function lift setpoint. During each refueling outage, at least six of the installed S/RVs will be tested for safety lift setpoint in accordance with the current IST program plant procedures. This sample population is in agreement with the current ASME Boiler and Pressure Vessel Code requirements for the GGNS IST program, and is more restrictive than the ANSI/ASME OM-1-1981 requirement upon which the setpoint tolerance was based. For S/RV setpoint testing ([the] as-found [setpoint]), additional valves will be tested if the as-found setpoint is outside plus/minus 3% of its designed safety function lift setpoint. Sample expansion will be consistent with the NEDC 31753-P-A SER requirement of two additional valves per valve failure.

The GGNS UFSAR currently requires at least fifty percent of the installed valves to be removed and tested during each refueling outage. GGNS FSAR Questions & Responses ı 211.49 discusses the bases for this requirement. The concern regarded the performance of S/RVs installed in operating plants at the time of GGNS construction and licensing, and that new plants should have significantly better performing S/RVs. The fifty percent requirement provides a very conservative margin of testing to demonstrate that no common cause of S/RV failure occurs within any one operating cycle. The minimum testing of six valves proposed for each outage, with additional testing for each failure from the initial test population, provides reasonable assurance that no common cause failure is occurring without early detection. [The minimum testing of six valves is in agreement with the current ASME Code requirements and is consistent with the current industry practices that was accepted in the NRC staff's safety evaluation report, NEDC 31753-P-A.]

One of the major factors in the requirement of additional testing population beyond ASME Boiler and Pressure Vessel Code is many of the older plants were experiencing failures with multiple stage pilot operated S/RVs. The safety function of this type of S/RV requires operation of a pilot valve that is susceptible to excessive leakage and corrosive bonding to cylinder walls; thereby preventing proper safety function operation. The GGNS Dikkers S/RVs are direct acting, and do not require the operation of a pilot valve for the safety function. The Dikkers S/RV Instruction Manual recommends "to replace part of the installed valves each maintenance stop (refueling outage)", and does not prescribe any particular [number of valves to be tested].

Therefore, no significant increase in the probability or consequences of an accident previously evaluated results from this proposed change.

b. This change would not create the possibility of a new or different kind of accident from any previously analyzed.

The plant specific analyses verify that each S/RV will still perform the intended function of preventing overpressurization of the nuclear system. The vessel will have adequate margin below the Operating License Reactor Coolant System Pressure of 1325 psig, and plant system response will not deviate from the expected sequence of events. Each system, structure, and component that communicates with the reactor vessel has been verified to be within its design and operational margin, and no unanticipated plant transients will occur as a result of the safety lift function setpoint tolerance change.

The negative tolerance of the safety function lift setpoint remains above the highest setpoint of the S/RV relief mode, and therefore normal vessel pressure. This margin provides reasonable assurance that inadvertent opening of an S/RV will not occur during power operations.

This proposed change does not add any new systems, structures or supports, nor does it introduce new S/RV operating modes.

Therefore, this change would not create the possibility of a new or different kind of accident from any previously analyzed.

c. This change would not involve a significant reduction in the margin of safety.

The increase in the S/RV safety function lift tolerance has been analyzed for bounding limiting events and accident conditions. [The safety function lift setpoint tolerance used in the analysis bounds the proposed plus/minus 3% setpoint tolerance.] No condition exists that reduces the margin of safety on the reactor coolant pressure boundary or any system, structure or component that is required to operate during vessel overpressurization events. Fuel operating limits are based on the results of these analyses; therefore, adequate fuel thermal margin is maintained.

[The negative tolerance of the safety function lift setpoint remains above the highest setpoint of the S/RV relief mode, and therefore normal vessel pressure. This margin provides reasonable assurance that inadvertent opening of an S/RV will not occur during power operations.]

Therefore, this change would not involve a significant reduction in the margin of safety.

Based on the above evaluation, Entergy Operations, Inc. has concluded that operation in accordance with the proposed amendment involves no significant hazards considerations.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Judge George W. Armstrong Library, 220 S. Commerce Street, Natchez, MS 39120

Attorney for licensee: Nicholas S. Reynolds, Esquire, Winston and Strawn, 1400 L Street, N.W., 12th Floor, Washington, DC 20005-3502

NRC Project Director: William D. Beckner

GPU Nuclear Corporation, et al., Docket No. 50-219, Oyster Creek Nuclear Generating Station, Ocean County, New Jersey

Date of amendment request: February 22, 1996

Description of amendment request: The amendment proposes to delete a specification which requires a thorough inspection of the Emergency Diesel Generator (EDG) every 24 months during shutdown. In addition this Technical Specification proposes to delete the phrase "in any thirty day period" from a specification concerning Allowed Outage time (AOT).

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

GPU Nuclear has determined that this [technical specification change request] TSCR poses no significant hazard as defined by the NRC in 10 CFR 50.92.

1. State the basis for the determination that the proposed activity will or will not increase the probability of occurrence of the consequences of an accident.

The proposed activity deletes the requirement to inspect EDGs during shut down from the Technical Specifications. It further modifies the operability of a single EDG for a limited and defined period of time. These changes do not affect the design or performance of the EDGs or their ability to perform their design function. Analysis using PRA techniques indicates the changes do not significantly increase the probability or consequences of an accident.

2. State the basis for the determination that the activity does or does not create a possibility of an accident or malfunction of a different type than any previously identified in the SAR.

The EDGs are not the source of any accident described in the SAR. These changes do not modify the design or performance of the EDGs and do not affect plant functions or actions. Therefore, the proposed change does not create the possibility of an accident or malfunction of a different type than those previously identified.

3. State the basis for the determination that the margin of safety is not reduced. The proposed changes are designed to improve EDG reliability and availability during shutdown periods by providing flexibility in the scheduling and performance of maintenance. The surveillance intervals are unchanged and operability requirements are only modified to an acceptable degree. The proposed activity does not alter the basis of

any technical specification that is related to the establishment or maintenance of a nuclear safety margin. Therefore, the margin of safety is not significantly reduced by this action.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

NRC Project Director: John F. Stolz

GPU Nuclear Corporation, et al., Docket No. 50-219, Oyster Creek Nuclear Generating Station, Ocean County, New Jersey

Date of amendment request: February 23, 1996

Description of amendment request: The proposed change to the Technical Specifications would allow the implementation of 10 CFR 50, Appendix J, Option B.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

GPU Nuclear has determined that this TSCR [technical specification change request] involves no significant hazards considerations as defined by NRC in 10 CFR 50.92.

The major changes from the existing Oyster Creek Technical Specifications requested in accordance with the Option B requirements:

1. Operation of the facility in accordance with the proposed amendment would not involve a significant increase in the probability of occurrence or the consequences of an accident or malfunction of equipment important to safety as previously evaluated in the Safety Analysis Report.

The proposed change implements Option B of 10 CFR 50, Appendix J on performance based containment leakage testing. The proposed change does not involve a change to the plant design or operation. Therefore, the proposed change does not affect any of the parameters or conditions that contribute to initiation of any of the analyzed accidents or malfunctions. The proposed change does request an allowable extension of containment testing. Therefore, a hypothetical leak could remain undetected for a greater period of time. This slight increase in risk has been determined to be insignificant as:

Type A Testing

NUREG 1493 determined that the effect of containment leakage on overall accident risk is small as risk is dominated by accident sequences that result in the failure or bypass of the containment. Industry wide PCILRTs have demonstrated that only a small fraction of the leaks discovered during testing exceeded acceptance criteria, and that the leak rate has been only marginally above the acceptable limit. Only 3% of all leaks can be detected only by PCILRT, therefore, only 3% of the theoretical leaks are affected by the extension to the Type A test interval. Experience at Oyster Creek agrees with the industry wide data in that the majority of the detected leakage from the primary containment is found through Type B and C testing.

NUREG 1493 found that these observations, together with the insensitivity of reactor accident risk to the containment leakage rate, demonstrates that increasing the Type A leakage test intervals would have a minimal impact on public risk.

Type B and C Testing

Penetrations are designed to ensure reliability of the containment isolation function. Type B penetrations use a double passive seal (e.g. o-ring, gasket) and Type C penetrations use a double isolation valve design to ensure reliability of the isolation function. Because valves perform the isolation function actively, they are more likely to fail on demand (e.g. failure to completely close on demand). To address this failure mode, Type C valves are subjected to increased design constraints and testing to ensure both acceptable leak rates and stroke times. The proposed change does not alter the installation, operation, operating environment, or testing method of these valves. Therefore, the proposed change does not introduce any new component failure modes, nor does it affect the probability of occurrence of any existing evaluated failure mode.

The failure of any single penetration barrier (isolation valve or passive seal) does not cause penetration failure. Therefore, a double failure would have to occur to cause a failure of the penetration and affect containment. Additionally, the proposed change does not change the acceptance criteria for acceptable leakage testing.

The proposed change does not alter plant design or operation, nor does it alter the allowable maximum leakage rate limit. Thus, the proposed change does not affect the probability of occurrence nor the consequences of any evaluated accident or malfunction of equipment important to safety.

2. Operation of the facility in accordance with the proposed amendment would not create the possibility of an accident or malfunction different from any accident or malfunction previously evaluated.

The proposed change does not involve a change to the plant design or operation. As a result, the proposed change does not affect any of the parameters or conditions that could contribute to initiation of any accidents. This change only involves the reduction in Type A, B and C test frequencies, and the Type A test pressure.

Type A Testing

The only changes proposed to the Type A testing are to frequency and test pressure. As the proposed test pressure is grater than the existing test pressure, no new type of accident or malfunction is created, and the increase in pressure provides an additional margin of safety. The increase in pressure provides an additional margin of safety. The increase in surveillance interval cannot introduce any new type of accident or malfunction.

The PCILRT is presently performed at 20 psig. Performance of the PCILRT at P_a (35 PSIG) will provide a more direct leak rate for analysis. P_a is the design pressure of the torus (the drywell design pressure is 44 psig, but the torus is non isolable form the drywell. Therefore, P_a will not create the possibility of the failure of the torus due to overpressurization. No new accident modes can be created by extending the test intervals. No safety related functions or components are altered as a result of this change. Therefore, no new accident or malfunction different form those evaluated in the Safety Analysis Report can result due to the increase in test pressure or increase in surveillance interval.

Type B and C Testing

The proposed change only deals with the frequency of performing Type B and C testing. It does not change what components are tested or the method of testing. There is no proposed change to the design or operation of the plant. Therefore, no new accident or malfunction different form those evaluated in the Safety Analysis Report can result due to the increase in test pressure or increase in surveillance interval.

3. Operation of the facility in accordance with the proposed amendment would not decrease the margin of safety as defined in the bases of the Technical Specifications.

Type A Testing

Except for the method of defining the test frequency and pressure at which the PCILRT is performed, the methods for performing the actual test are not changed. However, the proposed change can increase the probability that an increase in leakage could go undetected for an extended period of time. NUREG 1493 has determined that under several different accident scenarios, the increased risk of radioactivity release from containment is negligible with the implementation of these proposed changes.

Type B and C Testing

The proposed change only affects the frequency of Type B and C testing. The methods for performing the actual test are not changed. The design or operation of Type B and C components are not changed. The proposed change will result in a longer interval between tests of good performing Type B and C components.

The margin of safety that has the potential of being impacted by the proposed change involves the offsite dose consequences of postulated accidents which are directly related to containment leakage rate. The containment isolation system is designed to limit leakage to L_a, which is defined by the Oyster Creek Technical Specifications to be 1.0 percent by weight of the containment air at 35 psig per 24 hours. The limitation on containment leakage rate is designed to ensure the total leakage volume will not exceed the value assumed in the accident analyses at the peak accident pressure (P_a). The margin of safety for the offsite dose consequences of postulated accidents directly related to the containment leakage rate is maintained by meeting the 1.0 L_a acceptance criteria. The L_a value is not being modified by this proposed Technical Specification change request.

Therefore, the margin of safety as defined in the bases for the Technical Specification will not be reduced.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Ocean County Library, Reference Department, 101 Washington Street, Toms River, NJ 08753

Attorney for licensee: Ernest L. Blake, Jr., Esquire. Shaw, Pittman, Potts & Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: John F. Stolz

Indiana Michigan Power Company, Docket Nos. 50-315 and 50-316, Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2, Berrien County, Michigan

Date of amendment requests: February 22, 1996 (AEP:NRC:0659AA)

Description of amendment requests: The proposed amendments would revise the technical specifications to remove the requirement that the Operations Superintendent must hold or have held a Senior Operator License at Cook Nuclear Plant, or a similar reactor. In addition, a mid-level operations manager will only be required to hold a Senior Operator License if the Operations Superintendent does not hold one.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

Per 10 CFR 50.92, this proposed change does not involve a significant hazards consideration because the change does not:

1. involve a significant increase in the probability or consequences of an accident previously evaluated,

2. create the possibility of a new or different kind of accident from any accident previously evaluated, or

3. involve a significant reduction in a margin of safety.

Criterion 1

The amendment request does not involve a significant increase in the probability or consequences of [an] accident previously evaluated because the proposed change to the Technical Specification does not affect the assumptions, parameters, or results of any UFSAR [updated final safety analysis report] accident analysis. The proposed amendment does not modify any existing equipment. It is concluded that the changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

Criterion 2

The proposed change does not involve physical changes to the plant or changes in plant operating configuration. The proposed change updates the requirements for the Operations Superintendent. Thus, it is concluded that the proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

Criterion 3

The proposed change updates the requirements for Operations Superintendent. There is no reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment requests involve no significant hazards consideration.

NRC Project Director: John N. Hannon

Indiana Michigan Power Company, Docket No. 50-316, Donald C. Cook Nuclear Plant, Unit No. 2, Berrien County, Michigan

Date of amendment request: March 12, 1996 (AEP:NRC:1248)

Description of amendment request: The proposed amendment would remove the technical specifications related to shutdown and control rod position indication while in modes 3, 4, and 5. The change would make the Unit 2 technical specifications consistent with the Unit 1 technical specifications and the Standard Technical Specifications.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

Per 10 CFR 50.92, this proposed change does not involve a significant hazards consideration because the change does not:

1. involve a significant increase in the probability or consequences of an accident previously evaluated,

2. create the possibility of a new or different kind of accident from any accident previously evaluated, or

3. involve a significant reduction in a margin of safety.

Criterion 1

The boron concentration in the reactor coolant system will be high enough to assure adequate SDM in modes 3, 4, and 5. The calculation to obtain the required boron concentration takes into account the position of the rods. Shutdown margin is assumed as an initial condition in the safety analysis. The safety analysis establishes a SDM that ensures specified acceptable fuel design limits are not exceeded. As long as the SDM is satisfied, no change in the probability or consequences of an accident previously evaluated will result from the proposed deletion of the "position indicator - shutdown" specification. It is noted that this change is consistent with the new ISTS approved by the NRC as NUREG-1431, Rev. 1.

Criterion 2

The ability to insert the control and shutdown rods provided by the rod control system is not affected by the OPERABILITY status of the ARPI system. As mentioned previously, the reactor coolant system boron concentration will be high enough to assure adequate SDM is maintained. Therefore, it is concluded that the proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

Criterion 3

The margin of safety requirements are not affected by the removal of this T/S. The required SDM which is an initial condition in the safety analysis, is unaffected since the reactor coolant system boron concentration is increased to address the potential "all rods out" configuration. Based on these considerations, it is concluded that the proposed changes do not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Maud Preston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085

NRC Project Director: John N. Hannon

Maine Yankee Atomic Power Company, Docket No. 50-309, Maine Yankee Atomic Power Station, Lincoln County, Maine

Date of amendment request: November 29, 1995

Description of amendment request: The proposed amendment would

modify the Technical Specifications to remove the requirement for additional pressure relief by a residual heat removal (RHR) spring relief valve during low temperature overpressure protection (LTOP) conditions.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The proposed change to delete Technical Specification 3.4.D.3b has been evaluated against the standards of 10 CFR 50.92 and has been determined not to involve a significant hazards consideration. This proposed change does not:

1. Involve a significant increase in the probability or consequence of an accident previously analyzed. The Power Operative Relief Valves (PORVs) remain operable to mitigate any LTOP event. Thus, this change does not result in an increase in the probability or consequences of an accident previously analyzed.

2. Create the possibility of a new or different kind of accident from any previously evaluated. Removing the RHR spring relief valve as an additional relief requirement does not create the possibility of a new or different kind of accident since the proposal involves neither a hardware modification nor the creation of a unique operating condition.

3. Involve a significant reduction in a margin of safety. Removing the RHR spring relief valve as an additional requirement does not change the results of any of the FSAR Chapter 14 events. The PORVs remain operable to maintain the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Wiscasset Public Library, High Street, P.O. Box 367, Wiscasset, ME 04578

Attorney for licensee: Mary Ann Lynch, Esquire, Maine Yankee Atomic Power Company, 329 Bath Road, Brunswick, ME 04011NRC Deputy Director: John Zwolinski

Maine Yankee Atomic Power Company, Dockst No. 50-309, Maine Yankee Atomic Power Station, Lincoln County, Maine

Date of amendment request: November 29, 1995

Description of amendment request: The proposed amendment would modify Technical Specification (TS) 3.14 to decrease the maximum steam generator (SG) primary-to-secondary leakage rate from 0.15 gpm to 0.10 gpm and would modify TS 4.10 by revising the requirements for unscheduled SG tube inspections that are performed on each SG following a primary-to-secondary tube leak.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated. A steam generator leakage assumption greater than the proposed 0.10 gpm/SG limit has been used in the FSAR [Final Safety Analysis Report] Chapter 14 safety analyses. Thus, the FSAR Chapter 14 safety analyses remain bounding. Assuring that an adequate leakage limit exists that initiates corrective actions in a timely manner is important to ensuring a steam generator tube rupture event does not take place. This change modifies the steam generator post-leakage testing requirements to focus inspections on leaking tubes and areas likely to produce similar leakage, in lieu of an expanded test campaign of all three steam generators. Without this change, Technical Specifications require inspection of 3% of the tubes in each steam generator. By inspecting the critical areas of the affected steam generator and possibly expanding inspections to the critical areas of the remaining steam generators, the probability and/or consequences of previously evaluated accidents (e.g., steam generator tube rupture) are not increased.

2. The proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated. The proposed changes will not involve a modification to existing hardware at the plant. The decrease in the maximum allowable steam generator primary leakage rate tends to provide additional time for operator action to take place which, if timely enough, would avoid the consequences of a tube rupture event. The proposed inspection campaign requires inspection of the critical area and may be expanded to the other steam generators to ensure that additional tubes will not fail due to similar causes. This modified inspection campaign does not introduce the possibility of a new or different kind of accident from any accident previously evaluated.

3. The proposed changes do not involve a significant reduction in a margin of safety. The FSAR Chapter 14 safety analyses assume a higher steam generator leakage rate and therefore remain conservative. The proposed reduction in the allowable leakage provides a greater margin of safety since it is more conservative than the present value. This change modifies inspection requirements of Technical Specifications and does not impact the plant design or equipment. The modified inspection requirements following a plant shutdown due to tube leakage concentrate steam generator tube inspections in those areas believed to be most susceptible to flaws. For these reasons, we believe the proposed changes increase the margin of safety by inspecting the critical areas of the steam generator(s) in lieu of additional random inspections.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Wiscasset Public Library, High Street, P.O. Box 367, Wiscasset, ME 04578

Northeast Nuclear Energy Company, Docket No. 50-245, Millstone Nuclear Power Station, Unit 1, New London County, Connecticut

Date of amendment request: November 8, 1995

Description of amendment request: The amendment request would revise the Technical Specifications (TS) for the jet pumps to be consistent with the limiting conditions for operation and surveillance requirements in the Standard Technical Specifications for General Electric Plants (NUREG-1433).

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

...The proposed change does not involve an [significant hazards consideration] SHC because the change would not:

1. Involve a significant increase in the probability or consequences of an accident previously analyzed.

The new LCO [Limiting Condition for Operation] does not diminish the existing requirement that all jet pumps must be operable, nor does it effect the time available to achieve cold shutdown should a pump become inoperable. The new LCO does eliminate the ability to continue to operate with the indication (but not the function) of a single jet pump inoperable. This does not increase the possibility of an unnecessary plant shutdown due to inoperable instrumentation since sufficient flexibility exists in the surveillance requirement so that operability of the jet pumps can be verified. This change eliminates the LCO that allowed continued operation with conditions that could potentially mask an inoperable pump. The new LCO is more limiting in ensuring that the plant is operated in a condition for which accidents were analyzed.

The new surveillance requirement provides a more accurate method of ensuring the jet pumps remain operable. The new surveillance criteria are more sensitive to jet pump failures and the degradation of the jet pumps prior to failure.

Based on the above, the proposed change does not involve a significant increase in the probability or consequences of an accident previously analyzed.

2. Create the possibility of a new or different kind of accident from any previously analyzed.

The new LCO and surveillance does not change the manner in which the plant is operated, nor does it reduce the operability requirements of any jet pump, Therefore, no new or different kind of accident can be created by the new specificadon. The surveillances that will be performed do not require any new hardware or plant evolutions. Therefore, the proposed change to the LCO and surveillance cannot create the possibility of a new or different kind of accident.

3. Involve a significant reduction in the margin of safety.

The margin of safety that currently exists is not diminished by this change. The requirement to place the reactor in cold shutdown within 24 hours should a jet pump become inoperable is maintained. The LCO which allowed continued operation with indication for one pump inoperable has been eliminated.

The new surveillance requirement continues to demonstrate the operability of the jet pumps and during operation, continues to be performed at the same interval as in the current technical specifications. The note (which allows the surveillance to be deferred until four hours after the associated recirculation loop is in operation and 24 hours after exceeding 25% of rated thermal power) does not significantly affect the margin of safety. The time that the unit would be operating in these conditions would be small, and the stress placed on the pump at less than 25% power is lower.

Based on the above, this change does not involve a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Learning Resources Center, Three Rivers Community-Technical College, 574 New London Turnpike, Norwich, CT 06360.

NRC Project Director: Phillip F. McKee

Northeast Nuclear Energy Company, et al., Docket No. 50-336, Millstone Nuclear Power Station, Unit No. 2, New London, Connecticut

Date of amendment request: November 3, 1995

Description of amendment request: The proposed amendment will extend the allowed outage time from 48 hours to 7 days for an emergency core cooling system train that is declared inoperable as a result of an inoperable low pressure safety injection subsystem.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

Pursuant to 10CFR50.92, Northeast Nuclear Energy Company (NNECO) has reviewed the proposed change to extend the allowed outage time (AOT) for an inoperable low pressure safety injection (LPSI) subsystem from the existing limit of 48 hours to 7 days. In addition, the change to modify the completion time for the Action Statement and the criteria for the Surveillance Requirements were also reviewed. NNECO concludes that these changes do not involve a significant hazards consideration (SHC) since the proposed change satisfies the criteria in 10CFR50.92(c). That is, the proposed change does not:

1. Involve a significant increase in the probability or consequences of an accident previously analyzed.

The proposed amendments for Millstone Unit No. 2 will extend the action completion AOT for a single inoperable LPSI train from 48 hours to 7 days. A LPSI subsystem is designed as a part of each emergency core cooling system (ECCS) train to supplement safety injection tank inventory during the early stages of mitigating a design basis accident (DBA). As such, components of the LPSI subsystem are not accident initiators, and an extended AOT to restore operability of an inoperable LPSI subsystem would not increase the probability of occurrence of accidents previously analyzed.

The safety analyses for Millstone Unit No. 2 demonstrates that ECCS performance acceptance criteria are satisfied with only one of the two redundant ECCS trains operating during the postulated DBA. The proposed technical specification revisions involve the AOT for a single inoperable LPSI subsystem, and do not change the conditions assumed for the minimum amount of operating equipment needed for accident mitigation. Therefore, the consequences of an accident previously evaluated will not be significantly increased.

In addition, CE NPSD-995 recognizes that when an ECCS train is inoperable due to a LPSI subsystem being unavailable, due either to being declared inoperable (by failing a surveillance requirement) or is intentionally taken out-of-service (for corrective or preventive maintenance), the core damage frequency (CDF) during power operation increases. The results of the PRA presented in CE NPSD-995 show that the proposed increase in the ECCS AOT (due to LPSI unavailability) from 48 hours to 7 days does not cause a significant increase in the overall CDF of Millstone Unit No. 2.

The analyses indicate that continued plant operation with a single LPSI subsystem out-of-service may result in a small increase in "at power risk;" however, that risk increase will be negligibly small and controlled effectively via the Maintenance Rule and the risk monitor program that minimizes the outage time and prevents entering into an unacceptable risk configuration. In addition, the proposed AOT extension for the LPSI subsystem is evaluated as having negligible impact on the large early radiological release probability for Combustion Engineering pressurized water reactors in the event of a design basis accident.

Therefore, operation in accordance with the proposed amendment would not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Create the possibility of a new or different kind of accident from any previously analyzed.

The proposed amendment will not change the physical plant or the modes of plant operation defined in the technical specifications. The changes do not involve the addition or modification of equipment nor do they alter the design of plant systems. Therefore, operation of Millstone Unit No. 2 in accordance with its proposed amendment would not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Involve a significant reduction in the margin of safety.

The margin of safety associated with the ECCS train is established by acceptance criteria for system performance defined in 10CFR50.46, The proposed amendment will not change this acceptance criteria nor the operability requirements for equipment that is used to achieve such performance as demonstrated in the Millstone Unit No. 2 safety analyses. Moreover, an integrated assessment of the risk impact of extending the AOT for a single inoperable LPSI train has concluded that the risk contribution is small. Therefore, operation of Millstone Unit No. 2 in accordance with its proposed amendment would not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Learning Resources Center, Three Rivers Community-Technical College, 574 New London Turnpike, Norwich, CT 06360.

Attorney for licensee: Lillian M. Cuoco, Esq., Senior Nuclear Counsel, Northeast Utilities Service Company, P.O. Box 270, Hartford, CT 06141-0270.

NRC Project Director: Phillip F. McKee

Northeast Nuclear Energy Company, et al., Docket No. 50-423, Millstone Nuclear Power Station, Unit No. 3, New London County, Connecticut

Date of amendment request: September 12, 1995

Description of amendment request: The amendment would revise and reformat Technical Specification (TS) 6.3.1 to add the requirement that the Assistant Operations Manager shall hold a senior reactor operator (SRO) license if the Operations Manager does not hold an SRO license for Millstone Unit 3. Also the footnote would be deleted from TS 6.3.1 that previously granted a one-time three year exception to the qualification requirements for the Operations Manager and an exception for the Assistant Operations Manager to hold a license instead of the Operations Manager.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

...The proposed change does not involve an [significant hazards consideration] SHC because the change would not:

1. Involve a significant increase in the probability or consequences of an accident previously analyzed.

The proposed change affects an administrative control, which was based on the guidance of ANSI N18.1-1971. ANSI N18.1-1971 recommended that the Operations Manager hold an SRO license. The current guidance in Section 4.2.2 of ANSI/ANS 3.1-1987 recommends, as one option, that the Operations Manager have held a license for a similar unit and the Operations Middle Manager hold an SRO license. While the Operations Middle Manager position does not exist at Millstone Unit No. 3, [Northeast Nuclear Energy Company] NNECO has created the position of Assistant Operations Manager. The individual in this position would meet the requirements for, and would have responsibilities as recommended in, ANSI/ANS 3.1-1987 for the Operations Middle Manager position.

Therefore, the proposed change requests an exception to ANSI N18.1-1971 to allow use of ANSI/ANS 3.1-1987 in a limited circumstance. Specifically, the proposed revision to Technical Specification 6.3.1 would require the Operations Manager to either hold an SRO license at Millstone Unit No. 3 or have held an SRO at a [pressurized water reactor] PWR.

If the Operations Manager does not hold an SRO license at Millstone Unit No. 3, the specification will require the Assistant Operations Manager to hold, and continue to hold, an SRO license. The proposed change includes the requirement for the Operations Manager to have held a license for a similar unit (a PWR) in accordance with Section 4.2.2 of ANSI/ANS 3.1-1987. For those areas of knowledge that require an SRO license, the Assistant Operations Manager will provide the technical guidance normally provided by the Operations Manager.

The proposed change does not alter the design of any system, structure, or component, nor does it change the way plant systems are operated. It does not reduce the knowledge, qualifications, or skills of licensed operators, and does not affect the way the Operations Department is managed by the Operations Manager. The Operations Manager will continue to maintain the effective performance of his personnel and ensure the plant is operated safely and in accordance with the requirements of the operating license. Additionally, the Control Room Operators will continue to be supervised by the licensed Shift Supervisors.

The proposed change does not detract from the Operations Manager's ability to perform his primary responsibilities. In this case, by having previously held an SRO license, the Operations Manager has achieved the necessary training, skills, and experience to fully understand the operation of plant equipment and the watch requirements for operators. In summary, the proposed change does not affect the ability of the Operations Manager to provide the plant oversight required of his position. Thus, it does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Create the possibility of a new or different kind of accident from any previously analyzed.

The proposed change to Technical Specification 6.3.1 does not affect the design or function of any plant system, structure, or component, nor does it change the way plant systems are operated. It does not affect the performance of NRC licensed operators. Operation of the plant in conformance with technical specifications and other license requirements will continue to be supervised by personnel who hold an NRC SRO license. The proposed change to Technical Specification 6.3.1 ensures that the Operations Manager will be a knowledgeable and qualified individual to have held an SRO license at a PWR. Based on the above, the proposed change does not create the possibility of a new or different kind of accident from any previously evaluated.

3. Involve a significant reduction in the margin of safety.

The proposed change involves an administrative control that is not related to the margin of safety. The proposed change does not reduce the level of knowledge or experience required of an individual who fills the Operations Manager position, nor does it affect the conservative manner in which the plant is operated. The Control Room Operators will continue to be supervised by personnel who hold an SRO license. Thus, the proposed change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Learning Resources Center, Three Rivers Community-Technical College, 574 New London Turnpike, Norwich, CT 06360.

Attorney for licensee: Lillian M. Cuoco, Esq., Senior Nuclear Counsel, Northeast Utilities Service Company, P.O. Box 270, Hartford, CT 06141-0270.

NRC Project Director: Phillip F. McKee

Northeast Nuclear Energy Company, et al., Docket No. 50-423, Millstone Nuclear Power Station, Unit No. 3, New London County, Connecticut

Date of amendment request: November 21, 1995

Description of amendment request: The licensee proposes to change Technical Specification Section 1.33 and Bases Sections 3/4.3.3.9 and 3/4.3.3.10, and 3/4.11.2.1. The changes clarify the definition of source check to include a source check from a light emitting diode (LED), as well as from ionizing radiation.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

... NNECO concludes that these changes do not involve a significant hazards consideration since the proposed changes satisfy the criteria in 10CFR50.92(c). That is, the proposed changes do not:

1. Involve a significant increase in the probability or consequences of an accident previously analyzed.

The proposed changes to the definition of source check clarifies the source check for the liquid and gaseous effluent radiation monitors. These monitors do not provide a safety function and only serve to provide radiological information to plant operators, therefore, the changes will not increase the probability or consequences of an accident previously evaluated.

2. Create the possibility of a new or different kind of accident from any previously analyzed.

The proposed changes to the definition of source check have no effect on the ability of the monitors to perform their designed function. The clarification to the surveillance do not involve any physical modifications to any equipment, structures, or components. The monitors already have the internal LEDs which were originally used to perform the source check. The proposed changes have no impact on design basis accidents, and the changes will not modify plant response or create a new or unanalyzed event.

3. Involve a significant reduction in the margin of safety.

The proposed changes to the definition of source check do not have any impact on the protective boundaries and, therefore, have no impact on the safety limits for these boundaries. The instrumentation associated with these changes do not provide a safety function and only serve to provide radiological information to plant operators. The instrumentation has no affect on the operation of any safety-related equipment. As such, these changes have no impact on the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Learning Resources Center, Three Rivers Community-Technical College, 574 New London Turnpike, Norwich, CT 06360.

Attorney for licensee: Lillian M. Cuoco, Esq., Senior Nuclear Counsel, Northeast Utilities Service Company, P.O. Box 270, Hartford, CT 06141-0270.

NRC Project Director: Phillip F. McKee

PECO Energy Company, Public Service Electric and Gas Company, Delmarva Power and Light Company, and Atlantic City Electric Company, Dockets Nos. 50-277 and 50-278, Peach Bottom Atomic Power Station, Units Nos. 2 and 3, York County, Pennsylvania

Date of application for amendments: February 15, 1996

Description of amendment request: The amendment changes the Technical Specifications to implement 10 CFR Part 50, Appendix J, Option B, by creating Technical Specification Section 5.5.12, "Primary Containment Leakage Rate Testing Program," which refers to Regulatory Guide 1.163, "Performance-Based Containment Leakage-Test Program."

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1) The proposed changes do not involve a significant increase in the probability or consequences of any accident previously evaluated.

The adoption of 10 CFR 50, Appendix J Option B will not involve a significant increase in the probability or consequences of any accident previously evaluated. The proposed changes to the TS [Technical Specifications] reflect the use of the performance-based containment leakage-testing program. The USNRC has approved the use of a performance-based option for containment leakage testing programs when it amended 10 CFR 50, Appendix J (60 FR 49495). For adoption of the revised regulation, licensees are required to incorporate into their TS, by general reference, the USNRC regulatory guide or other plant-specific implementing document used to develop their performance-based leakage testing program. A new Administrative Control subsection (5.5.12, "Primary Containment Leakage Rate Testing Program") has been added that requires the establishment and maintenance of a Primary Containment Leakage Rate Testing Program. The TS will still require the performance of a periodic general visual inspection of the containment to ensure early detection of any structural deterioration of the containment that may occur.

As concluded in NUREG-1493, given the insensitivity of risk to containment leakage rate and the small fraction of leakage paths detected solely by ILRT [Integrated Leak Rate Test] testing, increasing the interval between ILRTs is possible with minimal impact on public risk. Additionally, performance-based alternatives to current LLRT [Local Leak Rate Test] requirements are feasible without significant risk impacts. Additionally, these changes will not alter any safety limits which ensure the integrity of fuel barriers, and will not result in a significant increase to onsite or offsite dose.

No physical changes are being made to the plant, nor are there any changes being made in the operation of the plant as a result of these changes which could involve a significant increase in the probability or consequences of any accident previously evaluated. Additionally, these changes will not alter the operation of equipment assumed to be available for the mitigation of accidents or transients.

2) The proposed changes do not create the possibility of a new or different kind of accident from any previously evaluated.

The adoption of 10 CFR 50, Appendix J Option B will not create the possibility of a new or different type of accident from any previously evaluated. These changes to the PBAPS, Units 2 and 3 TS will not involve any changes to plant systems, structures or components (SCCs) which could act as new accident initiators. These changes will not impact the manner in which SSCs are tested such that a new or different type of accident from any previously evaluated could be created.

3) The proposed changes do not result in a significant reduction in the margin of safety.

No margins of safety are reduced as a result of the proposed adoption of 10 CFR 50, Appendix J Option B. As stated previously, the USNRC has approved the use of this performance-based option for containment leakage testing programs when it amended 10 CFR 50, Appendix J (60 FR 49495). These changes will not impact core limits or any other parameters that are used in the mitigation of a UFSAR [Updated Final Safety Analysis Report] design-basis accident or transient. Additionally, these changes do not introduce any hardware changes, and will not alter the intended operation of plant structures, systems or components utilized in the mitigation of UFSAR design-basis accidents or transients. These changes will not introduce any new failure modes of plant equipment not previously evaluated.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Government Publications Section, State Library of Pennsylvania, (REGIONAL DEPOSITORY) Education Building, Walnut Street and Commonwealth Avenue, Box 1601, Harrisburg, Pennsylvania 17105.

NRC Project Director: John F. Stolz

Pennsylvania Power and Light Company, Docket No. 50-387, Susquehanna Steam Electric Station, Unit 1, Luzerne County, Pennsylvania

Date of amendment request: January 26, 1996

Description of amendment request: The proposed amendment removes three pressure relief valves from Technical Specification Table 3.6.3-1, "Primary Containment Isolation Valves," since these valves are no longer needed to support the steam condensing mode of the residual heat removal (RHR) system and are being removed from the plant.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated.

With the prior deletion of the steam condensing mode of RHR and the isolation of the high and low pressure interfaces, the three pressure relief valves that are being removed from the plant have no active function. Their passive function of maintaining system or containment integrity will be fulfilled by blind flanges. Also, the RHR and RCIC [reactor core isolation cooling] piping are provided with overpressure protection from other pressure relief valves. Therefore, the removal of these pressure relief valves does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated.

The pressure relief valves that are being removed had two primary functions. First,

they provided overpressure protection for the RHR and RCIC piping during the steam condensing mode of RHR. Since the steam condensing mode has been deleted from the plant, these valves no longer have that function. Also, overpressure protection of the RHR and RCIC piping is provided by other existing pressure relief valves. Second, these valves maintained system or containment integrity. When the pressure relief valves are removed from the plant, they will be replaced with blind flanges or equivalent that will maintain system or containment integrity. Therefore, the removal of the three pressure relief valves does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Involve a significant reduction in a margin of safety.

Since the steam condensing mode of RHR has been eliminated, the three pressure relief valves have no active function. Their passive function of maintaining system or containment integrity will be fulfilled by blind flanges or equivalent. Also, overpressure protection of RHR and RCIC piping is provided by other existing pressure relief valves. Therefore, the removal of the three pressure relief valves does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

NRC Project Director: John F. Stolz

Power Authority of the State of New York, Docket No. 50-333, James A. FitzPatrick Nuclear Power Plant, Oswego County, New York

Date of amendment request: January 25, 1996

Description of amendment request: The amendment proposes to revise the allowed out-of-service times for single inoperable Emergency Diesel Generators (EDGs) to accommodate on-line maintenance of the EDGs. In addition, two line item changes are proposed: (1) to improve safety by reducing EDG testing at power; and (2) to revise the ac power requirements during cold shutdown or refueling modes to make the James A. FitzPatrick (JAF) Technical Specifications consistent with the Standard Technical Specifications.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

Operation of the FitzPatrick plant in accordance with the proposed Amendment would not involve a significant hazards consideration as defined in 10 CFR 50.92, since it would not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated.

a. EMERGENCY DIESEL GENERATOR LCO [Limiting Conditions for Operation] AT POWER

The proposed changes to the Technical Specifications will allow longer Allowed Out of Service Times [AOTs] to perform necessary repair and maintenance on individual Emergency Diesel Generators while at power. This extended AOT will enhance scheduling of preventive maintenance of individual EDGs without significantly increasing the probability or consequences of an accident previously evaluated. The risk evaluations contained in the JAF quantitative analyses of the EDGs determined that the probability of an accident by increasing the AOT for an individual EDG from 7 days to 14 days is non-risk-significant. The primary reason for this low relative risk is due to the designed redundancy and capability to respond to an accident when a single diesel generator is out of service. LOCA [loss-of-coolant accident] Analyses that assume the worst case line break while an EDG is out of service indicate the plant can be safely shut down with the remaining EDGs. Even if another EDG should fail during the AOT, at least one Core Spray and one Residual Heat Removal (RHR) Low Pressure Coolant Injection pump can provide the required flow to bring the plant to safe shut down. Furthermore, long term suppression pool and reactor shutdown cooling is provided by any one of the three remaining RHR pumps for a single EDG out of service or by two remaining RHR pumps assuming an additional EDG failure during the AOT.

Increasing the EDG AOT does not involve physical alteration of any plant equipment and does not affect analysis assumptions regarding functioning of required equipment designed to mitigate the consequences of accidents. Further, the severity of postulated accidents and resulting radiological effluent releases will not be affected by the increased AOT for a single EDG.

Therefore, the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

b. EMERGENCY DIESEL GENERATOR LCO DURING PLANT SHUTDOWN

Changing the number of EDGs required during plant shutdown does not involve physical alteration of any plant equipment and does not affect analysis assumptions regarding functioning of required equipment designed to mitigate the consequences of accidents. Further, the severity of postulated accidents and resulting radiological effluent releases will not be affected by the change in the LCO during shutdown.

c. EMERGENCY DIESEL GENERATOR SURVEILLANCE AT POWER OPERATION

The proposed change to the Technical Specification will reduce the required number of tests to be performed when an EDG or EDG System is inoperable. This proposed change to TS requirements addresses the concern of excessive testing that could result in EDG wear which is counter-productive to safety in terms of equipment degradation and availability. This change is consistent with Generic Letter 93-05 guidance for implementing such recommendations. The proposed Technical Specifications will not result in a change to the design or operation of the facility, therefore, this change will not result in a significant increase in the probability or consequences of an accident previously evaluated.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated.

a. EMERGENCY DIESEL GENERATOR LCO AT POWER

Extending the AOT for an individual EDG does not necessitate physical alteration of the plant or changes in parameters governing normal plant operation. Thus, this change does not create the possibility of a new or different kind of accident from any accident previously evaluated for JAF plant.

b. EMERGENCY DIESEL GENERATOR LCO DURING PLANT SHUTDOWN

Changing the number of EDGs required during shutdown does not necessitate physical alteration of the plant or changes in parameters governing normal plant operation. Thus, this change does not create the possibility of a new or different kind of accident from any accident previously evaluated for JAF plant.

c. EMERGENCY DIESEL GENERATOR SURVEILLANCE AT POWER OPERATION

The proposed change does not change design, operation or the testing process. The nature of this change precludes the possibility of a new or different kind of accident. The proposed change to complete the required action does not involve any hardware changes, nor changes to the operation of the equipment nor does it change the ability of the equipment to perform its intended function. Performing the testing on an extended time cannot initiate any type of accident.

3. Involve a significant reduction in the margin of safety.

a. EMERGENCY DIESEL GENERATOR LCO AT POWER

As discussed above, the JAF quantitative evaluation determined that the change in risk associated with extending the AOT for a single EDG is non-risk-significant. In addition, the design provides adequate redundancy for safe shut down during the AOT for a single EDG out of service. This is supported by the LOCA analyses including analyses for long term suppression pool and reactor shutdown cooling.

b. EMERGENCY DIESEL GENERATOR LCO DURING PLANT SHUTDOWN

The margin of safety is not affected by changing the number of EDGs required during shutdown. One offsite power source or one EDG ensure the availability of the required power to recover from postulated accident events during shutdown. When the required number of operable systems is not met, all work that could potentially initiate a postulated accident event during shutdown is suspended.

c. EMERGENCY DIESEL GENERATOR SURVEILLANCE AT POWER OPERATION

The proposed change to Technical Specifications reduces testing at reactor power. The overall effect is a net gain in plant safety by avoiding the potential for unnecessary wear that could degrade the EDGs at power. Implementation of these changes is consistent with the guidance provided by the NRC in Generic Letter 93-05. The proposed change to the EDG testing requirements does not reduce the ability of the equipment to perform its intended safety function.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126.

NRC Project Director: Ledyard B. Marsh

Virginia Electric and Power Company, Docket Nos. 50-280 and 50-281, Surry Power Station, Unit Nos. 1 and 2, Surry County, Virginia

Date of amendment request: January 30, 1996

Description of amendment request: The proposed Technical Specifications change will delete the requirement that oxygen concentrations for both normal and transient conditions not exceed saturation when the reactor coolant is below 250 degrees F. The Technical Specifications change will also eliminate the surveillance requirement for reactor coolant chemistry sampling of chloride, fluoride, and oxygen concentration during maintenance activities when fuel is removed from the reactor vessel and the Reactor Coolant System (RCS) is drained below the reactor vessel flange regardless of whether the upper internal and/or vessel heat are in place or not. Administrative result of the changes being made, capitalize Technical Specifications defined terms to maintain consistency within the Technical Specifications, and the word "degrees" is spelled-out when referring to the Fahrenheit temperature, rather than using the symbol.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

Specifically, operation of Surry Power Station in accordance with the proposed changes will not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated.

Since the RCS and the RHR [Residual Heat Removal] System are drained when the RCS inventory is reduced below the reactor vessel flange for maintenance or refueling activities, the concentrations of chlorides and fluorides will not change. During these maintenance or refueling activities, only controlled makeup to the RCS is planned, and any planned or unplanned makeup to the RCS would be detected by available level indication. Sampling for chloride and fluoride concentrations in the RCS will be performed prior to draining the system. Sampling of the reactor coolant for chloride and fluoride concentrations will resume when the RCS is filled. The chloride and fluoride concentrations will be known and will be maintained consistent with the Technical Specification Limiting Condition for Operation and Action Statements. Also, when the RCS inventory is drained below the reactor vessel flange, the RCS is vented and open to the containment building atmosphere with the reactor coolant liquid considered oxygen saturated. Technical Specification 3.1.F.4 allows normal and off-normal "saturated" oxygen concentrations when reactor coolant temperature is below 250 degrees F. Consequently, sampling the reactor coolant for oxygen concentration under these conditions is not required and the Technical Specification Table 4.1-2B specified sampling frequency of five (5) times per week is not necessary since the oxygen concentration continues to remain in compliance with the Technical Specification limit, measures are available and action can be taken to correct the condition prior to any deleterious effect.

Surry Technical Specifications 3.1.F.1 prohibits reactor coolant temperature from exceeding 250 degrees F unless chloride, fluoride, and oxygen concentrations are within specified limits. Therefore a significant increase in the probability or consequences of an accident previously evaluated does not exist.

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated.

The materials that are exposed to reactor coolant are corrosion resistant. They were chosen for specific applications within the system and for their compatibility with the reactor coolant. The chemical composition of the reactor coolant will be maintained within the specifications given within Technical Specification 3.1.F, Updated Final Safety Analysis Report Table 4.2-2, and Technical Specification Table 4.1-2B. Because of the time dependent nature of any adverse affects from chloride, fluoride, and oxygen concentrations in excess of the Technical Specifications limits, measures are available and can be taken to correct the condition while the reactor is in a safe shutdown condition, prior to any deleterious effect. No hardware modifications are involved. System configuration and plant operations are not being changed. Therefore, the possibility of a new or different kind of accident from any accident previously evaluated has not been created.

(3) Involve a significant reduction in the margin of safety.

This change does not involve a significant reduction in the margin of safety since the chloride and fluoride concentrations are maintained within their specified values prior to RCS drain down and following refill. The time period during which the RCS inventory is reduced below the reactor vessel flange and fuel is removed from the vessel, is short and insignificant in terms of the parameters necessary to initiate a corrosion concern. Existing Technical Specifications Action Statements and Allowed Technical Specification values for normal and off-normal concentrations of chlorides and fluorides are not being changed. No hardware modifications are involved. System configuration and plant operations are not being changed. Surry Technical Specification 3.1.F.1 remains unaffected by this change and continues to prohibit reactor coolant temperature from exceeding 250 degrees F unless chloride, fluoride, and oxygen concentrations are within specified limits.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Previously Published Notices Of Consideration Of Issuance Of Amendments To Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, And Opportunity For A Hearing

The following notices were previously published as separate individual notices. The notice content was the same as above. They were published as individual notices either because time did not allow the Commission to wait for this biweekly notice or because the action involved exigent circumstances. They are repeated here because the biweekly notice lists all amendments issued or proposed to be issued

involving no significant hazards consideration.

For details, see the individual notice in the **Federal Register** on the day and page cited. This notice does not extend the notice period of the original notice.

Houston Lighting & Power Company, City Public Service Board of San Antonio, Central Power and Light Company, City of Austin, Texas, Docket No. 50-498, South Texas Project, Unit 1, Matagorda County, Texas

Date of amendment request: February 29, 1996

Description of amendment request: The proposed amendment would include the addition of Technical Specification 3.10.8 which would allow a one-time only extension of the standby diesel generator (SDG) allowed outage time for a cumulative 21 days on "A" train SDG. In addition, it would also allow a one-time only extension of the allowed outage time on "A" train essential cooling water loop for a cumulative 7 days. This one-time only change would become effective on April 10, 1996, and expire on May 15, 1996.Date of individual notice in the **Federal Register:** March 8, 1996 (61 FR 9502)

Expiration date of individual notice: April 8, 1996

Local Public Document Room location: Wharton County Junior College, J. M. Hodges Learning Center, 911 Boling Highway, Wharton, TX 77488

Houston Lighting & Power Company, City Public Service Board of San Antonio, Central Power and Light Company, City of Austin, Texas, Docket Nos. 50-498 and 50-499, South Texas Project, Units 1 and 2, Matagorda County, Texas

Date of amendment request: May 1, 1995, as supplemented by letters dated June 22, August 28, November 22, and December 19, 1995, and January 4, January 8 (two letters), and January 23, 1996

Description of amendment request: The proposed amendment would provide a special test exception that would allow an extension of the standby diesel generator (SDG) allowed outage time for a cumulative 21 days on each SDG once per fuel cycle, and it would also allow an extension of the essential cooling water (ECW) loop allowed outage time for a cumulative 7 days on each ECW loop once per fuel cycle. These extended allowed outage times will be used to perform required inspections and maintenance on the SDGs and the ECW system during power operation.

Date of individual notice in the **Federal Register:** February 8, 1996 (61 FR 4805)

Expiration date of individual notice: March 11, 1996

Local Public Document Room location: Wharton County Junior College, J. M. Hodges Learning Center, 911 Boling Highway, Wharton, TX 77488

Northern States Power Company, Docket No. 50-263, Monticello Nuclear Generating Plant, Wright County, Minnesota

Date of amendment request: March 1, 1996 (supersedes December 11, 1995, application)

Description of amendment request: The proposed amendment would revise Technical Specification Section 4.7, "Surveillance Requirements for Primary Containment Automatic Isolation Valves." Specifically, the proposed amendment would revise the replacement frequency of the seat seals for the drywell and suppression chamber purge and vent valves from every 5 years to every six operating cycles.

Date of individual notice in the **Federal Register:** March 8, 1996 (61 FR 9504)

Expiration date of individual notice: April 8, 1996

Local Public Document Room location: Minneapolis Public Library, Technology and Science Department, 300 Nicollet Mall, Minneapolis, Minnesota 55401

Notice Of Issuance Of Amendments To Facility Operating Licenses

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for A Hearing in connection with these actions was published in the **Federal Register** as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the applications for amendment, (2) the amendment, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment as indicated. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document rooms for the particular facilities involved.

Arizona Public Service Company, et al., Docket Nos. STN 50-528, STN 50-529, and STN 50-530, Palo Verde Nuclear Generating Station, Units 1, 2, and 3, Maricopa County, Arizona

Date of application for amendments: November 7, 1995, as supplemented by letter dated January 17, 1996.

Brief description of amendments: These amendments adopt the improved Standard Technical Specifications (NUREG-1432) format and content of Section 5.0, "Design Features," as modified by approved changes to the improved Standard Technical Specifications.

Date of issuance: March 6, 1996

Effective date: March 6, 1996, to be implemented within 45 days of the date of issuance.

Amendment Nos.: Unit 1 - Amendment No. 104; Unit 2 - Amendment No. 93; Unit 3 - Amendment No. 76

Facility Operating License Nos. NPF-41, NPF-51, and NPF-74: The amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** December 20, 1995 (60 FR 65673) The January 17, 1996, supplemental letter provided clarifying information and did not change the initial no significant hazards consideration determination. The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 6, 1996.No significant hazards consideration comments received: No.

Local Public Document Room location: Phoenix Public Library, 1221 N. Central Avenue, Phoenix, Arizona 85004

Carolina Power & Light Company, et al., Docket No. 50-400, Shearon Harris Nuclear Power Plant, Unit 1, Wake and Chatham Counties, North Carolina

Date of application for amendment: February 16, 1996

Brief description of amendment: The amendment allows a one-time extension for the performance of the trip actuating device operational test for one of the safety injection manual initiation switches listed in Technical Specification Table 4.3-2, Item 1a.Date of issuance: March 11, 1996

Effective date: March 11, 1996

Amendment No. 63

Facility Operating License No. NPF-63. Amendment revises the Technical Specifications.Public comments requested as to proposed no significant hazards consideration: Yes (61 FR 7125). That notice provided an opportunity to submit comments on the Commission's proposed no significant hazards consideration determination. No comments have been received. The notice also provided for an opportunity to request a hearing by March 27, 1996, but indicated that if the Commission makes a final no significant hazards consideration determination any such hearing would take place after issuance of the amendment. The Commission's related evaluation of the amendment, finding of exigent circumstances, and final determination of no significant hazards consideration is contained in a Safety Evaluation dated March 11, 1996

Local Public Document Room location: Cameron Village Regional Library, 1930 Clark Avenue, Raleigh, North Carolina 27605.

Commonwealth Edison Company, Docket Nos. STN 50-454 and STN 50-455, Byron Station, Unit Nos. 1 and 2, Ogle County, Illinois, Docket Nos. STN 50-456 and STN 50-457, Braidwood Station, Unit Nos. 1 and 2, Will County, Illinois

Date of application for amendments: January 11, 1996

Brief description of amendments: The amendments revise the action statements and allowed outage time for inoperability of one channel and both channels of source range neutron flux instrumentation in Shutdown Modes 3, 4, and 5.

Date of issuance: March 15, 1996

Effective date: March 15, 1996

Amendment Nos.: 80, 80, 72, and 72

Facility Operating License Nos. NPF-37, NPF-66, NPF-72 and NPF-77: The amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 31, 1996 (61 FR 3509) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 15, 1996. No significant hazards consideration comments received: No

Local Public Document Room location: For Byron, the Byron Public Library District, 109 N. Franklin, P.O. Box 434, Byron, Illinois 61010; for Braidwood, the Wilmington Public Library, 201 S. Kankakee Street, Wilmington, Illinois 60481.

Commonwealth Edison Company, Docket Nos. 50-373 and 50-374, LaSalle County Station, Units 1 and 2, LaSalle County, Illinois

Date of application for amendments: November 14, 1995, as supplemented January 4, 1996 and February 29, 1996.

Brief description of amendments: The amendments revise the Technical Specifications to incorporate 10 CFR Part 50, Appendix J, "Primary Reactor Containment Leakage Testing for Water-Cooled Power Reactors," Option B.

Date of issuance: March 11, 1996

Effective date: Immediately, to be implemented no later than June 30, 1996.

Amendment Nos.: 110 and 95

Facility Operating License Nos. NPF-11 and NPF-18: The amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** December 7, 1995 (60 FR 62896) The January 4, 1996, submittal provided additional clarifying information that did not change the initial proposed no significant hazards consideration determination. The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 11, 1996. No significant hazards consideration comments received: No

Local Public Document Room location: Jacobs Memorial Library, Illinois Valley Community College, Oglesby, Illinois 61348.

Detroit Edison Company, Docket No. 50-341, Fermi-2, Monroe County, Michigan

Date of application for amendment: September 20, 1995, as supplemented December 18 and December 22, 1995.

Brief description of amendment: The amendment allows a one-time surveillance interval extension for certain 18-month surveillances listed in new Technical Specification Tables 4.0.2-1 and 4.0.2-2. Date of issuance: March 1, 1996

Effective date:

March 1, 1996, with full implementation within 90 days.

Amendment No.: 106

Facility Operating License No. NPF-43. Amendment revises the Technical Specifications.

Date of initial notice in **Federal Register:** November 27, 1995 (60 FR 58400). The December 18, 1995, letter corrected a typographical error on one of the proposed TS pages and provided a corrected Table of Contents page to reflect the addition of the new Tables. The December 22, 1995, letter provided additional information on the licensee's review of historical plant drift data. This information was within the scope of the original application and did not change the staff's initial no significant hazards consideration determination. The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 1, 1996.No significant hazards consideration comments received: No.

Local Public Document Room location: Monroe County Library System, 3700 South Custer Road, Monroe, Michigan 48161

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket Nos. 50-321 and 50-366, Edwin I. Hatch Nuclear Plant, Units 1 and 2, Appling County, Georgia

Date of application for amendments: November 10, 1995

Brief description of amendments: The amendments revise the Technical Specifications for containment systems to reflect the adoption of the requirements of 10 CFR Part 50, Appendix J, Option B, and the implementation of a performance-based containment leak-rate testing program at the Edwin I. Hatch Nuclear Plant, Units 1 and 2.

Date of issuance: March 6, 1996

Effective date: As of the date of issuance to be implemented within 90 days

Amendment Nos.: Unit 1 - 200 - Unit 2 - 141

Facility Operating License Nos. DPR-57 and NPF-5. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** December 20, 1995 (60 FR 65679) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 6, 1996.No significant hazards consideration comments received: No

Local Public Document Room location: Appling County Public Library, 301 City Hall Drive, Baxley, Georgia 31513

GPU Nuclear Corporation, et al., Docket No. 50-219, Oyster Creek Nuclear Generating Station, Ocean County, New Jersey

Date of application for amendment: December 5, 1995

Brief description of amendment: The amendment revises the submittal date for the Annual Exposure Data Report bringing Oyster Creek into conference with 10 CFR 20.2206 and relaxes an overly restrictive administrative requirement.

Date of Issuance: March 4, 1996

Effective date: As of the date of issuance, to be implemented within 30 days.

Amendment No.: 183

Facility Operating License No. DPR-16. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 22, 1996 (61 FR 1629). The Commission's related evaluation of this amendment is contained in a Safety Evaluation dated March 4, 1996. No significant hazards consideration comments received: No.

Local Public Document Room location: Ocean County Library, Reference Department, 101 Washington Street, Toms River, NJ 08753.

Illinois Power Company and Soyland Power Cooperative, Inc., Docket No. 50-461, Clinton Power Station, Unit No. 1, DeWitt County, Illinois

Date of application for amendment: December 14, 1995

Brief description of amendment: The amendment modifies Technical Specification 3.4.2, "Flow Control Valves (FCVs)," by deleting Surveillance Requirement (SR) 3.4.2.2, which required periodic verification that the average rate of movement of each reactor recirculation system FCV was limited to less than or equal to 11% per second in the opening and closing directions. Due to a plant modification, the requirement is not applicable.

Date of issuance: March 11, 1996

Effective date: March 11, 1996

Amendment No.: 103

Facility Operating License No. NPF-62: The amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 22, 1996 (61 FR 1630) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 11, 1996. No significant hazards consideration comments received: No

Local Public Document Room location: The Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727

Indiana Michigan Power Company, Docket Nos. 50-315 and 50-316, Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2, Berrien County, Michigan

Date of application for amendments: November 10, 1995 (AEP:NRC:0896X). This application superseded a request dated June 15, 1995 (AEP:NRC:0896V).

Brief description of amendments: The amendments change the 18-month emergency diesel generator surveillance test from a 24-hour run to an 8-hour run and add voltage and frequency measurement and power factor monitoring.

Date of issuance: March 11, 1996

Effective date: March 11, 1996, with full implementation within 45 days

Amendment Nos.: Unit 1 - 207, Unit 2 - 191

Facility Operating License Nos. DPR-58 and DPR-74. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** December 20, 1995 (60 FR 65682) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 11, 1996.No significant hazards consideration comments received: No.

Local Public Document Room location: Maud Preston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085.

Indiana Michigan Power Company, Docket Nos. 50-315 and 50-316, Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2, Berrien County, Michigan

Date of application for amendments: June 20, 1995, as supplemented December 19, 1995.

Brief description of amendments: The amendments relocate the fire protection program elements from the Technical Specifications and incorporate, by reference, the NRC-approved Fire Protection Program and major commitments, including the fire hazards analysis, into the Updated Final Safety Analysis Report. In addition, the amendments revise the operating licenses to include the NRC's standard fire protection license condition.

Date of issuance: March 11, 1996

Effective date: March 11, 1996, with full implementation within 180 days

Amendment Nos.: Unit 1 - 208, Unit 2 - 192

Facility Operating License Nos. DPR-58 and DPR-74. Amendments revised the Technical Specifications and the operating licenses.

Date of initial notice in **Federal Register:** September 13, 1995 (60 FR 47620). The December 19, 1995, supplement clarified the license conditions by providing specific approval dates for previous fire protection safety evaluations. This information was within the scope of the original application and did not change the staff's initial proposed no significant hazards consideration determination.The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 11, 1996.No significant hazards consideration comments received: No.

Local Public Document Room location: Maud Preston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085.

Northeast Nuclear Energy Company, et al., Docket No. 50-423, MillstoneNuclear Power Station, Unit No. 3, New London County, Connecticut

Date of application for amendment: June 29, 1995

Brief description of amendment: The amendment revises the Technical Specifications to extend the surveillance schedule from 18 months to each refueling interval (nominally 24 months) for specifications 4.6.4.2, 4.7.1.2.1.c, 4.7.3.b, 4.7.4.b,and 4.7.10.e. It also deletes specification 4.6.4.2.a and the phrase "during shutdown" from these specifications.Date of issuance: March 4, 1996

Effective date: As of the date of issuance, to be implemented within 90 days.

Amendment No.: 127

Facility Operating License No. NPF-49. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** November 27, 1995 (60 FR 58402) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 4, 1996. No significant hazards consideration comments received: No.

Local Public Document Room location: Learning Resources Center, Three Rivers Community-Technical College, 574 New London Turnpike, Norwich, CT 06360.

Pacific Gas and Electric Company, Docket No. 50-275, Diablo Canyon Nuclear Power Plant, Unit No. 1, San Luis Obispo County, California

Date of application for amendment: January 18, 1996

Brief description of amendment: The amendment revises the combined Technical Specifications (TS) for the Diablo Canyon Nuclear Power Plant, Unit No. 1. TS 3.8.1.1, "Electrical Power Systems - A.C. Sources - Operating," is revised to allow operation of Unit 1 in Mode 3 (Hot Standby) during installation of a replacement non-vital auxiliary transformer 11, for a one time extension of up to 48 hours beyond the 72 hours allowed by TS 3.8.1.1, Action Statement (a).

Date of issuance: March 8, 1996

Effective date: March 8, 1996

Amendment No.: Unit 1 - Amendment No. 111

Facility Operating License No. DPR-80: The amendment revises the Technical Specifications.

Date of initial notice in **Federal Register:** February 1, 1996 (61 FR 3737) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 8, 1996.No significant hazards consideration comments received: No.

Local Public Document Room location: California Polytechnic State University, Robert E. Kennedy Library, Government Documents and Maps Department, San Luis Obispo, California 93407

Pacific Gas and Electric Company, Docket Nos. 50-275 and 50-323, Diablo Canyon Nuclear Power Plant, Unit Nos. 1 and 2, San Luis Obispo County, California

Date of application for amendments: December 27, 1995

Brief description of amendments: The amendments revised the combined Technical Specifications (TS) 3/4.6.1.1, Containment Integrity; 3/4.6.1.2, Containment Leakage; 3/4.6.1.3, Containment Air Locks; 3/4.6.1.6, Containment Structural Integrity; 3/4.6.3, Containment Isolation Valves; their associated Bases; and adds Specification 6.8.4 j., Containment Leakage Rate Testing Program to implement the performance based leakage rate testing program as permitted by 10 CFR Part 50, Appendix J, rather than paraphrasing the requirements of the regulation. These changes will support the implementation of the performance based testing of Option B to Appendix J, for Type A, B, and C containment leakage rate testing and the appropriate rescheduling of testing.

Date of issuance: March 1, 1996

Effective date: March 1, 1996

Amendment Nos.: Unit 1 - Amendment No. 110; Unit 2 - Amendment No. 109

Facility Operating License Nos. DPR-80 and DPR-82: The amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 31, 1996 (61 FR 3502) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 1, 1996.No significant hazards consideration comments received: No.

Local Public Document Room location: California Polytechnic State University, Robert E. Kennedy Library, Government Documents and Maps Department, San Luis Obispo, California 93407

Public Service Electric & Gas Company, Docket No. 50-354, Hope Creek Generating Station, Salem County, New Jersey

Date of application for amendment: April 13, 1994, as supplemented December 6, 1995

Brief description of amendment: The proposed changes revise the Quality Assurance audit frequencies in the Hope Creek Technical Specifications. These revisions will permit an audit frequency based on performance and transfer subsequent control over the audit program to the Updated Final Safety Analysis Report.

Date of issuance: March 11, 1996

Effective date: As of the date of issuance to be implemented within 60 days from the date of issuance.

Amendment No.: 95

Facility Operating License No. NPF-57: This amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** June 8, 1994 (59 FR 29633) The December 6, 1995, letter provided clarifying information that did not change the initial proposed no significant hazards consideration determination nor the original **Federal Register** notice.The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 11, 1996.No significant hazards consideration comments received: No

Local Public Document Room location: Pennsville Public Library, 190 S. Broadway, Pennsville, New Jersey 08070

Public Service Electric & Gas Company, Docket Nos. 50-272 and 50-311, Salem Nuclear Generating Station, Unit Nos. 1 and 2, Salem County, New Jersey

Date of application for amendments: April 13, 1994, as supplemented December 6, 1995.

Brief description of amendments: The proposed changes revise the Quality Assurance audit frequencies in the Salem Unit Nos. 1 and 2 Technical Specifications. These revisions will permit an audit frequency based on performance and transfer subsequent control over the audit program to the Updated Final Safety Analysis Report.

Date of issuance: March 11, 1996

Effective date: As of the date of issuance to be implemented within 60 days from the date of issuance.

Amendment Nos. 181 and 162

Facility Operating License Nos. DPR-70 and DPR-75. The amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** June 8, 1994 (59 FR 29633) The December 6, 1995, letter provided clarifying information that did not change the initial proposed no significant hazards consideration determination nor the original **Federal Register** notice.The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 11, 1996No significant hazards consideration comments received: No

Local Public Document Room location: Salem Free Public Library, 112 West Broadway, Salem, New Jersey 08079

Tennessee Valley Authority, Docket Nos. 50-327 and 50-328, Sequoyah Nuclear Plant, Units 1 and 2, Hamilton County, Tennessee

Date of application for amendments: December 8, 1995 (TS 93-09)

Brief description of amendments: The amendments revise the setpoints and time delays for the auxiliary feedwater loss-of-power and the 6.9-kilovolt shutdown board loss-of-voltage and degraded voltage instruments.

Date of issuance: March 1, 1996

Effective date: March 1, 1996

Amendment Nos.: 219 and 209

Facility Operating License Nos. DPR-77 and DPR-79: Amendments revise the technical specifications.

Date of initial notice in **Federal Register:** January 3, 1996 (61 FR 161) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 1, 1996.No significant hazards consideration comments received: None

Local Public Document Room location: Chattanooga-Hamilton County Library, 1101 Broad Street, Chattanooga, Tennessee 37402

Tennessee Valley Authority, Docket Nos. 50-327 and 50-328, Sequoyah Nuclear Plant, Units 1 and 2, Hamilton County, Tennessee

Date of application for amendments: January 4, 1996 (TS 95-22)

Brief description of amendments: The amendments change the surveillance test frequency specified for the functional tests of the containment, fuel storage pool, and control room radiation monitors from monthly to quarterly.

Date of issuance: March 4, 1996

Effective date: March 4, 1996

Amendment Nos.: 220 and 210

Facility Operating License Nos. DPR-77 and DPR-79: Amendments revise the technical specifications.

Date of initial notice in **Federal Register:** January 31, 1996 (61 FR 3503)

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated Macrh 4, 1996.No significant hazards consideration comments received: None

The Cleveland Electric Illuminating Company, Centerior Service Company, Duquesne Light Company, Ohio Edison Company, Pennsylvania Power Company, Toledo Edison Company, Docket No. 50-440, Perry Nuclear Power Plant, Unit No. 1, Lake County, Ohio

Date of application for amendment: January 16, 1996, and supplement dated March 1, 1996

Brief description of amendment: This amendment approves that part of the request that defers the drywell bypass leakage test during the current refueling outage. The remainder of the licensee's request is still under NRC staff review.

Date of issuance: March 8, 1996

Effective date: March 8, 1996

Amendment No. 82

Facility Operating License No. NPF-58: This amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** February 2, 1996 (61 FR 3951) The March 1, 1996, supplemental letter was clarifying in nature and did not affect the inititial no significant hazards consideration determination. The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 8, 1996. No significant hazards consideration comments received: No

Local Public Document Room location: Perry Public Library, 3753 Main Street, Perry, Ohio 44081

Union Electric Company, Docket No. 50-483, Callaway Plant, Unit 1, Callaway County, Missouri

Date of application for amendment: December 9, 1994, as supplemented by letters dated September 13, 1995, and February 9, 1996.

Brief description of amendment: The amendment revises Technical Specifications (TS) 4.3.2.2, TS 4.7.1.2.1, and the Bases for TS 3/4 7.1.2 to decrease the frequency of auxiliary feedwater pump testing, remove inconsistencies in testing requirements for the turbine-driven auxiliary feedwater pump, and clarify performance parameters in the TS Bases.

Date of issuance: March 11, 1996

Effective date: March 11, 1996, to be implemented within 30 days from the date of issuance.

Amendment No.: 108

Facility Operating License No. NPF-30: The amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** February 1, 1995 (60 FR 6314). The September 13, 1995, and February 9, 1996, supplemental letters provided additional clarifying information and did not change the original no significant hazards consideration determination. The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 11, 1996.No significant hazards consideration comments received: No.

Local Public Document Room location: Callaway County Public Library, 710 Court Street, Fulton, Missouri 65251.

Virginia Electric and Power Company, et al., Docket Nos. 50-338 and 50-339, North Anna Power Station, Units No. 1 and No. 2, Louisa County, Virginia

Date of application for amendments: September 19, 1995

Brief description of amendments: The amendments revised the maximum allowable power range neutron flux high setpoints for operation with inoperable main steam safety valves.

Date of issuance: March 6, 1996

Effective date: March 6, 1996

Amendment Nos.: 199 and 180

Facility Operating License Nos. NPF-4 and NPF-7. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** October 25, 1995 (60 FR 54724) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 6, 1996No significant hazards consideration comments received: No.

Wolf Creek Nuclear Operating Corporation, Docket No. 50-482, Wolf Creek Generating Station, Coffey County, Kansas

Date of amendment request: November 22, 1995

Brief description of amendment: The amendment replaces the Technical Specification (TS) requirements associated with the boron dilution mitigation system (BDMS) with alarms, indicators, procedures and controls to allow proper resolution of potential boron dilution events.

Date of issuance: March 1, 1996

Effective date: March 1, 1996, to be implemented prior to the startup from the eighth refueling outage.

Amendment No.: 96

Facility Operating License No. NPF-42. The amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 31, 1996 (61 FR 3503) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 1, 1996.No significant hazards consideration comments received: No. Local Public Document Room locations: Emporia State University, William Allen White Library, 1200 Commercial Street, Emporia, Kansas 66801 and Washburn University School of Law Library, Topeka, Kansas 66621

Wolf Creek Nuclear Operating Corporation, Docket No. 50-482, Wolf Creek Generating Station, Coffey County, Kansas

Date of amendment request: December 20, 1995, as supplemented by letter dated February 8, 1996.

Brief description of amendment: The amendment revises the Technical Specifications to reflect the approval of the use of 10 CFR Part 50, Appendix J, Option B for the Wolf Creek Generating Station containment leakage rate test program.

Date of issuance: March 1, 1996

Effective date: March 1, 1996, to be implemented prior to startup from the eighth refueling outage.

Amendment No.: 97

Facility Operating License No. NPF-42. The amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 31, 1996 (61 FR 3504) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 1, 1996.No significant hazards consideration comments received: No.

Local Public Document Room locations: Emporia State University, William Allen White Library, 1200 Commercial Street, Emporia, Kansas 66801 and Washburn University School of Law Library, Topeka, Kansas 66621

Wolf Creek Nuclear Operating Corporation, Docket No. 50-482, Wolf Creek Generating Station, Coffey County, Kansas

Date of amendment request: December 13, 1995

Brief description of amendment: The amendment revises the minimum and maximum flow requirements for the centrifugal charging pumps (CCPs) and safety injection pumps (SIPs) specified in Technical Specification (TS) Surveillance Requirement 4.5.2.h. Specifically, the amendment (1) decreases the minimum limits on the sum of the injection line flow rates, excluding the highest flow rate, from 346 gallons per minute (gpm) to 330 gpm for the CCPs and from 459 gpm to 450 gpm for the SIPs, and (2) revises the maximum pump flow rate for the SIPs from 665 to 670 gpm, but retains the CCPs maximum pump flow rate at its current value of 556 gpm.Date of issuance: March 5, 1996

Effective date: March 5, 1996, to be implemented prior to startup from the eighth refueling outage.

Amendment No.: 98

Facility Operating License No. NPF-42. The amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 22, 1996 (61 FR 1639) The February 5, 1996, supplemental letter provided additional clarifying information and did not change the original no significant hazards consideration determination. The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 5, 1996.No significant hazards consideration comments received: No. Local Public Document Room locations: Emporia State University, William Allen White Library, 1200 Commercial Street, Emporia, Kansas 66801 and Washburn University School of Law Library, Topeka, Kansas 66621

Notice Of Issuance Of Amendments To Facility Operating Licenses And Final Determination Of No Significant Hazards Consideration And Opportunity For A Hearing (Exigent Public Announcement Or Emergency Circumstances)

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Because of exigent or emergency circumstances associated with the date the amendment was needed, there was not time for the Commission to publish, for public comment before issuance, its usual 30-day Notice of Consideration of Issuance of Amendment, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing.

For exigent circumstances, the Commission has either issued a **Federal Register** notice providing opportunity for public comment or has used local media to provide notice to the public in the area surrounding a licensee's facility of the licensee's application and of the Commission's proposed determination of no significant hazards consideration. The Commission has provided a reasonable opportunity for the public to comment, using its best efforts to make available to the public means of communication for the public to respond quickly, and in the case of telephone comments, the comments have been recorded or transcribed as appropriate and the licensee has been informed of the public comments.

In circumstances where failure to act in a timely way would have resulted, for example, in derating or shutdown of a nuclear power plant or in prevention of either resumption of operation or of increase in power output up to the plant's licensed power level, the Commission may not have had an opportunity to provide for public comment on its no significant hazards consideration determination. In such case, the license amendment has been issued without opportunity for comment. If there has been some time for public comment but less than 30 days, the Commission may provide an opportunity for public comment. If comments have been requested, it is so stated. In either event, the State has been consulted by telephone whenever possible.

Under its regulations, the Commission may issue and make an amendment immediately effective, notwithstanding the pendency before it of a request for a hearing from any person, in advance of the holding and completion of any required hearing, where it has determined that no significant hazards consideration is involved.

The Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration. The basis for this determination is contained in the documents related to this action. Accordingly, the amendments have been issued and made effective as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the application for amendment, (2) the amendment to Facility Operating License, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment, as indicated. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room for the particular facility involved.

The Commission is also offering an opportunity for a hearing with respect to the issuance of the amendment. By April 26, 1996, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC and at the local public document room for the particular facility involved. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of a hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be

entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses. Since the Commission has made a final determination that the amendment involves no significant hazards consideration, if a hearing is requested, it will not stay the effectiveness of the amendment. Any hearing held would take place while the amendment is in effect.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. Where petitions are filed during the last 10 days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 248-5100 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number N1023 and the following message addressed to **(Project Director)**: petitioner's name and telephone number, date petition was mailed, plant name, and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for a hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

Toledo Edison Company, Centerior Service Company, and The Cleveland Electric Illuminating Company, Docket No. 50-346, Davis-Besse Nuclear Power Station, Unit No. 1, Ottawa County, Ohio

Date of application for amendment: March 6, 1996

Brief description of amendment: This amendment revises TS 3/4 5.2, ECCS SUBSYSTEMS - T_{avg} greater than or equal to 280°F by modifying Surveillance Requirement 4.5.2.b to defer venting of the Emergency Core Cooling System flow path which does not have manual venting capability until the tenth refueling outage.

Date of issuance: March 7, 1996

Effective date: March 7, 1996

Amendment No: 208

Facility Operating License No. NPF-3: Amendment revised the Technical Specifications. Public comments requested as to proposed no significant hazards consideration: No. The Commission's related evaluation of the amendments, finding of emergency circumstances, and final determination of no significant hazards consideration are contained in a Safety Evaluation dated March 7, 1996.

Local Public Document Room location: University of Toledo, William Carlson Library, Government Documents Collection, 2801 West Bancroft Avenue, Toledo, Ohio 43606

BILLING CODE 7590-01-F

SECURITIES AND EXCHANGE COMMISSION

Proposed Collection; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of Filings and Information Services, Washington, DC 20549

Extension:

Rule 11Ab2-1 and Form SIP

SEC File No. 270-23

OMB Control No. 3235-0043

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.), the Securities and Exchange Commission ("Commission") is publishing the following summary of collection for public comment.

Rule 11Ab2-1 and Form SIP establish the procedures by which a Securities Information Processor ("SIP") files and amends its SIP registration form. The information filed with the Commission pursuant to Rule 11Ab2-1 and Form SIP is designed to provide the Commission with the information necessary to make the required findings under the Act before granting the SIP's application for registration. In addition, the requirement that a SIP file an amendment to correct any inaccurate information is designed to assure that the Commission has current, accurate information with respect to the SIP. This information is also made available to members of the public.

Only exclusive SIPs are required to register with the Commission. An exclusive SIP is a SIP which engages on an exclusive basis on behalf of any national securities exchange or registered securities association, or any national securities exchange or registered securities association which engages on an exclusive basis on its own behalf, in collecting, processing, or preparing for distribution or publication, any information with respect to (i) transactions or quotations on or effective or made by means of any facility of such exchange or (ii) quotations distributed or published by means of any electronic quotation system operated by such association. The Federal securities laws require that before the Commission may approve the registration of an exclusive SIP, it must make certain mandatory findings. It takes a SIP applicant approximately 400 hours to prepare documents which include sufficient information to enable the Commission to make those findings. Currently, there are only two exclusive SIPs registered with the Commission; The Securities Information Automation Corporation ("SIAC") and the National Association of Securities Dealers, Inc. (NASD). SIAC and NASD are required to keep the information on file with the Commission current, which entails filing a form SIP annually to update information.

Written comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Direct your written comments to Michael E. Bartell, Associate Executive Director, Office of Information Technology, Securities and Exchange Commission, 450 5th Street, N.W., Washington, DC 205489.

Dated: March 19, 1996.

Jonathan G. Katz,

Secretary.

Submission for OMB Review; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of Filings and Information Services, Washington, DC 20549

New:

Tell Us How We're Doing! an Investor Questionnaire

SEC File No. 270-406

OMB Control No. 3235-new

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.), the Securities and Exchange Commission ("Commission") has submitted to the Office of Management and Budget a request for approval on the following questionnaire:

The Commission has proposed use of a questionnaire, titled "Tell Us How We're Doing! an Investor Questionnaire," to be sent to persons who have utilized the services of the Commission's Office of Investor Education and Assistance ("OIEA").

The questionnaire will be sent to each of the approximately 20,000 persons who request assistance or information from OIEA. The questionnaire consists of eight questions concerning the quality of service provided by OIEA. Most questions can be answered by checking a box on the questionnaire.

It is estimated that eight percent (8%) of the questionnaires, approximately 1,600, will be returned to OIEA, based on OIEA experience with similar types of questionnaires. It is also estimated that fifteen (15) minutes will be required to fill out a questionnaire, resulting in an aggregate burden of 400 hours.

The retention period of the questionnaires will be three years. Provision of the information requested is voluntary and responses will be kept confidential.

Members of the public should be aware that unless a currently valid Office of Management and Budget control number is displayed, an agency may not sponsor or conduct or require responses to an information collection.

General comments regarding the estimated burden hours should be directed to the Desk Officer for the Securities and Exchange Commission at the address below. Any comments concerning the accuracy of the estimated average burden hours should be directed to Michael E. Bartell, Associate Executive Director, Office of Information Technology, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549 and Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, D.C. 20503.

Dated: March 18, 1996.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Investment Company Act Rel. No. 21836; 812-9785]

Access Capital Strategies Community Investment Fund, Inc., et al.; Notice of Application

March 20, 1996.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 ("Act").

APPLICANTS: Access Capital Strategies Community Investment Fund, Inc. ("Strategies") and Access Capital Strategies Corp. ("Access"), on behalf of themselves and any future business development companies that are advised by Access or entities controlling, controlled by, or under common control (as defined in section 2(a)(9) of the Act) with Access ("Future Funds").

RELEVANT ACT SECTIONS: Order requested under section 6(c) and rule 17d-1 authorizing certain transactions otherwise prohibited under section 57(a)(4).

SUMMARY OF APPLICATION: Applicants seek an order that would permit two existing portfolios of Strategies and any Future Fund to enter into certain co-investment transactions.

FILING DATES: The application was filed on September 28, 1995, and amended on December 27, 1995 and March 15, 1996.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on April 15, 1996, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request such notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, N.W., Washington, D.C 20549. Applicants, c/o Access Capital Strategies Corp., 124 Mt. Auburn Street, Suite 200N, Cambridge, Massachusetts 02138.

FOR FURTHER INFORMATION CONTACT: Courtney S. Thornton, Senior Counsel, at (202) 942-0583, or Alison E. Baur, Branch Chief, at (202) 942-0564 (Division of Investment Management,

Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee from the SEC's Public Reference Branch.

Applicants' Representations

1. Applicants seek an order under section 6(c) and rule 17d–1 authorizing two portfolios of Strategies, the Bank Portfolio and the Institutional Investor Portfolio (the "Portfolios"), and the Future Funds (collectively with the Portfolios, the "Funds") to purchase securities or otherwise effect transactions jointly with another Fund in transactions that are otherwise prohibited by section 57(a)(4). Each Portfolio is a Maryland corporation that has elected to be regulated as a business development company ("BDC") under the Act.[1] The investment objective of each Portfolio is to invest in geographically specific private placement debt securities and to earn a total return over the life of the Portfolio greater than that of the Access Benchmark, a blend of selected fixed-income indices designed by Mellon Bond Associates, a wholly-owned subsidiary of Mellon Bank Corporation.

2. Access, a newly formed corporation that has registered as an investment adviser under the Investment Advisers Act of 1940, is an indirect, wholly-owned subsidiary of Mellon Bank, N.A. Access serves as investment adviser to each Portfolio. As compensation for its services, Access will receive an annual management fee based upon a percentage of the assets of each Portfolio.

3. Each Portfolio has an eight-member board of directors ("Board of Directors"), five of whom are not affiliated persons of Access or interested persons of any Fund (the "Independent Directors"). The Board of Directors of each Portfolio will provide overall guidance and supervision with respect to the operations of the Portfolio, and will perform all duties the Act imposes on the boards of directors of BDCs organized in corporate form. The Independent Directors will assume the responsibilities and obligations imposed by the Act and the regulations thereunder on the disinterested directors of a BDC organized in corporate form. None of the Independent Directors of the Bank Portfolio will serve as an Independent Director of the Institutional Investor Portfolio, although one or more of the Independent Directors of the Portfolios may serve as Independent Directors of one or more Future Funds.

4. Applicants propose to allow each Fund to purchase securities jointly with one or more other Funds in transactions that are otherwise prohibited by section 57(a)(4) or rule 17d–1 under the Act ("Co-Investment Transactions"). Before undertaking a Co-Investment Transaction, Access will make a written investment presentation respecting the proposed transaction to the Board of Directors of each Fund based on such considerations and circumstances as Access deems appropriate, including the consistency of the proposed transaction with the investment objectives and policies of each Fund. The presentation will include the name of each Fund that has funds available for investment and the amount of the proposed investment. There will be no consideration paid to Access (or its controlling persons) directly or indirectly, including any type of brokerage commission, in connection with a Co-Investment Transaction, although Access will continue to receive its normal advisory compensation with respect to each Fund.

5. Each Fund will make its own decision on whether or not to participate in a Co-Investment Transaction, and no Fund will be able to impose an investment decision on the other Funds. Prior to engaging in a Co-Investment Transaction, a required majority (as defined in section 57(o) of the Act) ("Required Majority") of the directors of each Fund shall conclude that the terms of the proposed transaction, as presented to them by Access, are reasonable and fair to the shareholders of their respective Fund and do not involve overreaching of the Fund or its shareholders on the part of any person concerned.

6. Where the aggregate amount recommended for a Fund and that sought by other Funds is greater than the amount available for investment, the amount available for purchase by a Fund shall be determined on a *pro rata* basis determined by dividing the net assets of the fund by the sum of the net assets of the fund and each other Fund seeking to make the investment. Each Fund may determine not to take its full allocation or decline to participate when a Required Majority of the directors of the Fund determines that to do so would not be in the best interests of the Fund. Any such excess investment opportunity will be made available to other Funds that have determined to participate in the Co-Investment transaction in the same proportions as their participation in the transaction. All follow-on investments (additional investments in the same entity) will be treated in the same manner as the initial Co-Investment Transaction, except that the denominator in the fraction will consist solely of the net assets for those Funds that chose to participate in the initial transaction.

7. A Co-Investment Transaction will be effected for each participating Fund on the same terms and conditions. For such co-investment assets, each Fund will be offered the opportunity to sell, exchange, or otherwise dispose of such investments in the same manner and at the same time. A Required Majority of the directors of a Fund may either accept all or part or none of such offer, depending on their determination of the best interests of each Fund. A decision by a Fund not to participate in a Co-Investment Transaction, to take less or more than its full allocation, or not to sell, exchange of otherwise dispose of a co-investment asset in the same manner and at the same time as the other Funds electing to participate, shall include a finding by a Required Majority of its directors that such decision is fair and reasonable to the fund and its shareholder's and not the result of overreaching on the part of any party concerned.

8. Applicants believe that the ability to participate in Co-Investment Transactions would be advantageous for each Fund because it would enlarge the scope of each Fund's co-investment opportunities and permit such transactions to be effected at better prices and on more favorable terms than if only one Fund has Been able to participate in any given transaction. If the requested order were not granted, the Funds would have to seek the participation of other community investing entities or forego the opportunity. Applicants also anticipate that the availability of one or more of the Funds as an investing partner in a Co-Investment Transaction would significantly alleviate the cost of searching for such an alternative investing partner, as well as the risk that the alternative community investing entity would appropriate for itself the entire investment opportunity.

Applicants' Legal Analysis

1. Section 57(a)(4) prohibits certain affiliated persons of a BDC specified in section 57(b) from participating in joint transactions with the BDC or a company controlled by the BDC. Section 57(b)(2) extends the prohibitions of section 57(a) to persons under common control with a BDC. Applicants believe that the Funds may be prohibited from engaging in joint transactions because they share a common investment adviser.

2. Section 57(i) provides that the rules and regulations of the SEC under sections 17(a) and (d) applicable to registered closed-end investment companies shall apply to transactions subject to sections 57(a) and (d) in the absence of rules under these sections. No rules with respect to joint transactions have been adopted under sections 57(a) and (d). Rule 17d-1 prohibits affiliated persons of a registered investment company from entering into joint transactions with the investment company unless the SEC has granted an order permitting the transaction after considering whether the participation of the investment company is consistent with the provision, policies, and purposes of the Act and the extent to which such participation is on a basis different from or less advantageous than that of other participants.

3. Applicants state that all Funds will participate in the proposed Co-Investment Transactions on the same terms. In addition, applicants state that the procedure for allocating investment opportunities will ensure that the Funds will be treated fairly. Moreover, applicants assert that the approval of these transactions by a Required majority of the directors will ensure that no overreaching will occur. Applicants therefore believe that the requested exemption for Co-Investment Transactions meets the standards for granting exemptive relief under rule 17d–1.

4. Section 6(c) of the Act permits the SEC to exempt any person or transaction from any provision of the Act if the exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy of the Act. Applicants submit that it would be impractical to attempt to obtain separate exemptive relief under section 57(a)(4) and rule 17d–1 for each Co-Investment Transaction as it arises. Applicants therefore represent that failure to obtain prospective, generic exemptive relief would severely hamper the Funds' ability to participate meaningfully in community investing and, thus, to achieve their investment objectives. Accordingly, applicants believe that the terms of the relief requested with respect to the proposed Co-Investment Transactions are consistent with the standards of section 6(c).

Applicants' Conditions

Applicants agree that the following conditions will govern transactions under the requested order:

1. (a) To the extent that a Fund is considering new investments, Access will review investment opportunities on behalf of the Fund, including investments being considered on behalf of other Funds. Access will determine whether a particular investment is eligible for investment by any Fund.

(b) If access deems an investment eligible for investment by any Fund, Access will determine what it considers to be an appropriate amount that the Fund should invest in the particular investment. Where the aggregate amount recommended for the Fund and that sought by other Funds is greater than the amount available for investment, the amount available for purchase by the Fund shall be determined on a *pro rata* basis calculated by dividing the net assets of the Fund by the sum of the net assets of each Fund seeking to make the investment.

(c) Following the making of the determinations referred to in (a) and (b), Access will distribute information concerning the proposed Co-Investment Transaction to the Board of Directors of each participating Fund. Such information will include the name of each Fund that proposes to make the investment and the amount of each proposed investment.

(d) The Board of Directors of each participating Fund will review the information regarding Access's preliminary determination. A fund will only engage in a Co-Investment Transaction if a Required Majority of the directors of the Fund conclude, prior to the acquisition of the investment, that:

(i) the terms of the transaction, including the consideration to be paid, are reasonable and fair to the shareholders of the Fund and do not involve overreaching of the Fund or such shareholders on the part of any person concerned;

(ii) the transaction is consistent with the interests of the shareholders of the Fund and is consistent with the Fund's investment objectives and policies as recited in its registration statement and reports filed under the Securities Exchange Act of 1934, and its report to shareholders;

(iii) the investments by one or more of the other Funds would not disadvantage the Fund, and that participation by the Fund would not be on a basis different from or less advantageous than that of the other Funds; and

(iv) the proposed Co-Investment Transaction will not benefit Access or any affiliated person thereof (other than the Funds) except to the extent permitted pursuant to sections 17(e) and 57(k) of the Act.

(e) A Fund has the right to decline to participate in a particular Co-Investment Transaction or may purchase less than its full allocation.

2. No Fund will make an investment for its portfolio if a Fund, Access, or a person controlling, controlled by, or under common control with Access is an existing investor in such issuer.

3. All Co-Investment Transactions will consist of the same class of securities, including the same registration rights (if any) and other rights related thereto, at the same unit consideration, and on the same terms and conditions, and the settlement date will be the same.

4. If one or more Funds elect to sell, exchange, or otherwise dispose of an interest in a particular security that is also held by another Fund, notice of the proposed disposition will be given to the other Funds at the earliest practical time, and such Funds will be given the opportunity to participate in such disposition on a proportionate basis, at the same price and on the same terms and conditions. Access will formulate a recommendation as to participation by such Fund in such a disposition, and provide a written recommendation to the Board of Directors of such Fund. A Fund will participate in any such disposition if a Required Majority of its directors determines that it is in the best interest of the investing Fund. Each Fund will bear its own expenses associated with any such disposition of a portfolio security.

5. If a Fund desires to make a follow-on investment in a particular issuer whose securities are held by any other Fund, or to exercise rights to purchase securities of such an issuer, Access will notify the other Fund of the proposed transaction at the earliest practical time. Access will formulate a recommendation as to the proposed participation by the other Fund in a follow-on investment, and provide the recommendation to the other Fund's Board of Directors along with notice of the total amount of the follow-on investment. The other Fund's directors will make their own determination with respect to follow-on investments. To the extent that the amount of a follow-on investment available to a Fund is not based on the amount of its initial investment, the relative amount of investment by each Fund participating in a follow-on investment will be based on a ratio derived by comparing the remaining funds available for investment by each such Fund with the

[1] Each Future Fund will elect to be regulated as a BDC under the Act.

total amount of the follow-on investment. A Fund will participate in such investment to the extent that a Required Majority of its directors determine that it is in the Fund's best interest. The acquisition of follow-on investments as permitted by this condition will be subject to the other conditions set forth herein.

6. The Board of Directors of the Funds will be provided quarterly for review all information concerning Co-Investment Transactions made by the Funds, including Co-Investment Transactions in which one or more Funds declined to participate, so that they may determine whether all Co-Investment Transactions made during the preceding quarter, including those Co-Investment Transactions they declined, compiled with the conditions set forth above.

7. Each Fund will maintain the records required by section 57(f)(3) of the Act as if each of the Co-Investment Transactions permitted under these conditions had been approved by Required Majority of its directors under section 57(f).

8. No Fund will engage in a Co-Investment Transactions with another Fund that has a common Independent Director.

9. No person other than a Fund shall participate in a Co-Investment Transaction unless a separate exemptive order with respect to such transaction has been obtained.

For the SEC, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Release No. 34–36997]

EDGAR Phase-In Complete on May 6, 1996

March 21, 1996.

The Division of Corporation Finance today is publishing a notice to all domestic registrants whose filings are subject to its review to remind them that the phase-in to mandated electronic filing on the Commission's Electronic Data Gathering, Analysis, and Retrieval ("EDGAR") system will be complete on May 6, 1996. Beginning on that date, all domestic registrants not previously phased in, and third parties filing with respect to such registrants, will become subject to mandated electronic filing requirements, as outlined in Regulation S–T (17 CFR Part 232). This applies to companies assigned to Group CF–10, as well as to those that previously have not been assigned a phase-in group. Beginning May 6, registration statements for initial public offerings also must be filed electronically, unless the filing is made at one of the Commission's regional offices.

Domestic registrants that will be phased in May 6 may begin filing electronically before that date if they wish, once they have filed a Form ID with the Commission and received EDGAR access and identification codes. It is no longer necessary for them to contact the staff to request a change in their phase-in group. Registrants may begin testing on the system once access codes have been issued. Early compliance with electronic filing requirements is encouraged once registrants become comfortable with the system.

Once a company becomes a mandated electronic filer, all filings made with respect to it by third parties (for example, Schedules 13D and 13G) must be made electronically. Third parties will not be required to file electronically with respect to companies whose phase-in date is May 6 until that date. If third parties wish to file electronically, however, they may do so at any time, whether or not the subject company has begun to make its own filings via EDGAR. Persons filing Forms 3, 4 and 5 pursuant to Section 16 of the Securities Exchange Act of 1934, and those filing Forms 144 pursuant to Rule 144 of the Securities Act of 1933, may file these documents in paper or electronic format, since electronic filing of these forms will continue to be optional after May 6.

Foreign private issuers and foreign governments will not be required to file electronically (unless acting as a third party filer with respect to an electronic domestic company or engaging in a business transaction with a phased-in domestic company), but they may choose to do so. Such entities can gain access to the EDGAR system by filing a Form ID to receive EDGAR access and identification codes. EDGAR currently recognizes many of the types of forms that may be filed by foreign registrants, but some form types, such as those associated with the multijurisdictional disclosure system, are not yet available; as a consequence, filings not supported by EDGAR must be made in paper. The EDGAR system will be enhanced in the future to allow electronic filing of these documents.

As is true with all rules promulgated by the Commission, persons making filings with the Commission are responsible for apprising themselves of their new obligations associated with filing on the EDGAR system. While the Commission has attempted to contact registrants in this last phase-in group by furnishing a copy of the current version of the EDGAR Filer Manual and EDGARLink software (with mailing having taken place the week of March 11), registrants will not be relieved of their electronic filing obligations in the absence of such notification.

FOR FURTHER INFORMATION CONTACT: Sylvia J. Reis, Assistant Director, CF EDGAR Policy, Division of Corporation Finance, at (202) 942–2940.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

Sunshine Act Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meeting during the week of March 25, 1996.

Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matter may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10), permit consideration of the scheduled matter at the closed meeting.

Commissioner Wallman, as duty officer, voted to consider the item listed for the closed meeting in a closed session.

The subject matter of the closed meeting scheduled for Tuesday, March 26, 1996, at 12:00 noon, will be: Institution of injunctive action.

Commissioner Wallman, as duty officer, determined that no earlier notice thereof was possible.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: The Office of the Secretary at (202) 942–7070.

March 25, 1996.

Jonathan G. Katz,

Secretary.

Self-Regulatory Organizations; Order Approving a Proposed Rule Change and Notice of Filing and Order Granting Accelerated Approval of Amendment No. 1 to the Proposed Rule Change by the American Stock Exchange, Inc., Relating to the Listing and Trading of Equity Linked Term Notes on Non-U.S. Securities

March 20, 1996.

I. Introduction

On November 9, 1995, the American Stock Exchange, Inc. ("Amex" or "Exchange") filed a proposed rule change with the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] to amend Section 107B of the Amex Company Guide to provide alternate criteria for the listing and trading of hybrid debt securities whose value is linked to the performance of a non-U.S. company which is traded in the U.S. market as sponsored American Depositary Shares ordinary shares or otherwise.

Notice of the proposal was published for comment and appeared in the **Federal Register** on December 7, 1995.[3] The Exchange filed with the Commission Amendment No. 1 to the proposed rule change on January 5, 1996.[4] No comment letters were received on the proposed rule change. This order approves the Exchange's proposal, as amended.

II. Background

On May 20, 1993 and December 13, 1993, the Commission approved amendments to Section 107 of the Amex Company Guide to provide for the listing and trading of Equity Linked Term Notes ("ELNs").[5] ELNs are intermediate term (two to seven years), non-convertible, hybrid debt instruments, the value of which is linked to the performance of a highly capitalized, actively traded U.S. and non-U.S. companies.

In August 1994, the Exchange amended Section 107B of the Amex Company Guide to permit the listing and trading of ELNs linked to actively traded non-U.S. companies which are traded in the U.S. market as sponsored American Depositary Shares, ordinary shares or otherwise ("non-U.S. securities"), provided that (1) the Exchange has in place a comprehensive surveillance sharing agreement with the primary exchange on which the non-U.S. security trades; the trading volume of the non-U.S. security in the U.S. market represents at least 50% of the world-wide trading volume in the non-U.S. security ("50% Test"); and (2) the ELNs issuance does not exceed (i) 2% of the total shares of the underlying security outstanding provided at least 30% of the worldwide trading volume for the security for the six-months prior to the listing occurred in the U.S. market, (ii) 3% of the total shares of the underlying outstanding provided at least 50% of the worldwide trading volume for the security for the six-months prior to listing occurred in the U.S. market, or (iii) 5% of the total shares of the underlying security outstanding provided at least 70% of the worldwide trading volume for the security for the six-months prior to listing occurred in the U.S. market. No ELN may be listed if the U.S. market for the underlying security accounted for less than 30% of the worldwide trading volume for the security and related securities during the prior six months.[6]

III. Description of the Proposal

The Exchange proposes to amend its ELNs on non-U.S. security listing criteria by (1) revising the manner in which the applicable percentage of world-wide trading volume is calculated under the 50% Test; (2) adding new criteria for the listing of ELNs on non-U.S. securities, based on the daily trading volume in the U.S.; and (3) revising the current restrictions on the size of ELN issuances linked to non-U.S. securities to reflect the amendments to the listing criteria noted above.[7] Specifically, the Exchange proposes to revise the 50% Test so that trading in non-U.S. securities and other related non-U.S. securities in any market with which the Exchange has in place a comprehensive/effective surveillance sharing agreement will be added to U.S. market volume for the purpose of determining whether the 50% Test has been met. Currently, only trading in the U.S. market counts toward satisfying the 50% Test.

Additionally, the Exchange proposes to add an alternate set of criteria under which the Exchange may list ELNs on non-U.S. securities ("20% Test + Daily Trading Volume Standards"). The new standard will permit the Exchange to list ELNs on non-U.S. securities if all of the following conditions are satisfied: (1) The combined world-wide trading volume for the non-U.S. security in the U.S. market represents (on a share equivalent basis) at least 20% of the combined world-wide trading volume in the non-U.S. security and other related non-U.S. securities over the six month period preceding the date of selection of the non-U.S. security for an ELN listing;[8] (2) the average daily trading volume for the non-U.S. security in the U.S. market over the six months preceding the date of selection of the non-U.S. security for an ELN listing is at least 100,000 shares; and (3) the trading volume for the non-U.S. security in the U.S. market is at least 60,000 shares per day for a majority of the trading days for the six months preceding the date of selection of the non-U.S. security for an ELN listing.

Moreover, the Exchange proposes to amend the size limitations of ELN issuances linked to non-U.S. securities. Specifically, the Exchange proposes to require that the size of ELN issuances linked to non-U.S. securities will be limited to 2% of the total shares of the underlying security for the underlying security outstanding provided at least 20% of the worldwide trading volume for the security for the six-months prior to the listing occurred in the U.S. market. Additionally, under the proposed rule change, the 30% floor would be lowered to 20%[9] so that an ELN would be permitted on a non-U.S. security if U.S. trading volume accounted for at least 20% of the world-wide trading volume during the six months prior to listing.[10] As noted

[6] *See* Securities Exchange Act Release No. 34540 (August 16, 1994), 59 FR 43673 (August 25, 1994).

[7] *See* Amendment No. 1, *supra* note 4.

[8] The calculation for the 20% Test + Daily Trading Volume Standard does not include foreign markets with which the Exchange has in place a comprehensive surveillance sharing agreement. *See* Amendment No. 1, *supra* note 4.

[9] As with the 20% Test + Daily Trading Volume Standard, foreign markets with which the Exchange has in place a comprehensive surveillance sharing agreement are not included in the calculation for purposes of determining the size of eligible ELN issuances. *See* Amendment No. 1, *supra* note 4.

[10] The other size limitations in Amex's rule remains unchanged. Accordingly, the size of ELN issuances linked to non-U.S. securities will be limited to 3% of the total shares of the underlying security outstanding provided at least 50% of the worldwide trading volume for the security for the

Continued

above, the current rule requires at least 30% of the trading volume to occur in the U.S. to issue an ELN linked to up to 2% of the outstanding shares of a non-U.S. security.[11]

The Exchange believes that the proposed rule change is appropriate in that it limits the listing of ELNs linked to non-U.S. securities to those that have both a significant amount of U.S. market trading volume and a substantial volume of trading covered by a comprehensive/effective surveillance sharing agreement, which provides reasonable assurances that the underlying non-U.S. securities are deliverable upon exercise of the ELNs, and gives the Exchange the ability to inquire into potential trading problems or irregularities in a market place that serves as a significant price discovery market for the non-U.S. security.

The Exchange also believes that the proposed amendment will benefit investors by expanding the number of non-U.S. securities that may be linked to ELNs, thereby providing investors with enhanced investment flexibility. The Exchange believes that it is appropriate to now include additional non-U.S. securities within the existing ELNs regulatory framework because of the significant level of U.S. investor interest in both U.S. and non-U.S. highly capitalized and actively traded reporting companies.

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act in general and furthers the objectives of Section 6(b)(5) in particular in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of change, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and percent the mechanism of a free and open market and a national market system.

IV. Commission Finding and Conclusions

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6(b)(5) of the Act.[12] Specifically, the Commission finds that the Exchange's proposal to provide alternate criteria for the listing and trading of ELNs on non-U.S. securities strikes a reasonable balance between the Commission's mandates under Section 6(b)(5) to remove impediments to and perfect the mechanism of a free and open market and a national market system, while protecting investors and the public interest.

The Commission believes that the proposed amendments to the listing standards for ELNs on non-U.S. securities will benefit investors by effectively increasing the number of available ELNs-eligible non-U.S. securities. At the same time, as described below, the proposal provides safeguards designed to reduce the potential for manipulation and other abusive trading strategies in connection with the trading of non-U.S. security ELNs and their underlying securities. Accordingly, the Commission believes that the proposal will extend the benefits associated with ELNs on non-U.S. securities to additional non-U.S. securities and provide market participants with opportunities to trade a greater number of ELNs on non-U.S. securities without compromising the effectiveness of the Exchange's listing standards for such securities.

Currently, the 50% Test allows the Exchange to list ELNs on a non-U.S. security in the absence of a comprehensive/effective surveillance sharing agreement with the primary exchange where the non-U.S. security trades if the combined trading volume of the non-U.S. security and other related non-U.S. securities occurring in the U.S. market during the six month period preceding the selection of the non-U.S. security for ELN listing represents (on a share equivalent basis) at least 50% of the combined world-wide trading volume in such securities.

The Commission has previously concluded that the 50% Test helps to ensure that the relevant pricing market for non-U.S. securities underlying ELNs occurs in the U.S. market.[13] In such cases, the Commission has previously found that the U.S. market is the instrumental market for purposes of deterring and detecting potential manipulations or other abusive trading strategies in conjunction with transactions in the overlying non-U.S. security ELN market. Because the U.S. self-regulatory organizations which comprise the U.S. market for non-U.S. securities are members of the Intermarket Surveillance Group,[14] the Commission has concluded that there exists an effective surveillance sharing agreement to permit the exchanges and the NASD to adequately investigate any potential manipulations of the non-U.S. security ELNs or their underlying securities.

The Exchange proposes to modify the 50% Test to include in the U.S. market volume calculation, the trading volume in non-U.S. securities and other related non-U.S. securities that occurs in any market with which the Exchange has in place a comprehensive/effective surveillance sharing agreement. The Commission believes that this proposed modification of the 50% Test is consistent with the Act and with the Commission's approach in the ELN Approval Orders because it will continue to ensure that the majority of world-wide trading volume in the non-U.S. security and other related non-U.S. securities occurs in trading markets with which the Exchange has in place a comprehensive/effective surveillance sharing agreement. The existence of such agreements should deter as well as detect manipulations or other abusive trading strategies and also provide an adequate mechanism for obtaining market and trading information from the non-U.S. markets that list the non-U.S. security underlying the Exchange's ELNs in order to adequately investigate any potential abuse or manipulation.

Additionally, the Commission finds that the proposed 20% Test + Daily Trading Volume Standard is consistent with the Act and with the ELN Approval Orders. As noted above, the 20% Test + Daily Trading Volume Standard will allow the Exchange to list ELNs on a non-U.S. security if, over the six month period preceding the date of selection of the non-U.S. security for ELNs trading (1) the combined world-wide trading volume for the non-U.S. security in the U.S. market represents (on a share equivalent basis) at least 20% of the combined world-wide trading volume in the non-U.S. security and other related non-U.S. securities; [15] (2) the average daily trading volume for the non-U.S. security in the U.S. market is at least 100,000 shares; and (3) the trading volume for the non-U.S. security in the U.S. market is at least 60,000 shares per day for a majority of the trading days.

The Commission believes that these requirements present a reasonable alternative to the 50% Test by limiting the actual listing of ELNs on non-U.S. securities to only those non-U.S. securities that have a significant amount of U.S. market trading volume. This will ensure that the U.S. market is sufficiently active to serve as a relevant pricing market for the non-U.S. security and that the underlying foreign security is readily available to meet the delivery requirements upon exercise of the ELN. Accordingly, the Commission believes that the 20% Test + Daily Trading Volume Standard should help to ensure that the U.S. markets serve a significant role in the price discovery of the applicable non-U.S. security and are generally deep, liquid markets.

Finally, the Exchange believes, for similar reasons, that it is appropriate to reduce the minimum U.S. trading volume requirements for ELNs issuances from 30% to 20%. As noted above, the Commission believes that the 20% Test + Daily Trading Volume Standard will ensure that an underlying non-U.S. security has deep and liquid markets to sustain an ELNs listing. The Commission believes that it is appropriate to adjust the limitations on the size of the ELNs issuance to correspond to this requirement. Accordingly, where the trading volume in the U.S. market for the underlying non-U.S. security is between 20% and 50% of the worldwide trading volume, the issuance will be limited to 2% of the total outstanding shares of the underlying security. The 20% minimum U.S. trading volume requirement should continue to ensure that the U.S. market is significant enough to accommodate ELNs trading. In this regard, the Commission believes that these restrictions will minimize the possibility that trading in such issuances will adversely impact the market for the security to which it is linked.

The Commission notes that other existing ELNs listing requirements relating to the protection of investors will continue to apply. Among other things, these rules set forth issuer standards as well as minimum market capitalization and trading volume requirements that must be met prior to listing an ELN.[16]

The Commission finds good cause for approving Amendment No. 1 to the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register**. Specifically, Amendment No. 1 to the proposal makes certain technical clarifications, and revises paragraph (f) of Section 107B of the Amex Company Guide to reflect the amendments to the listing criteria in paragraph (e) as set forth herein. Accordingly, the Commission believes it is consistent with Section 6(b)(5) of the Act to approve Amendment No. 1 to the proposal on an accelerated basis.

Interested persons are invited to submit written data, views and arguments concerning Amendment No. 1. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to SR–Amex–95–44 and should be submitted by April 17, 1996.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[17] that the proposed rule change (File No. SR–Amex–95–44), as amended, is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[18]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 96–7341 Filed 3–26–96; 8:45 am]

BILLING CODE 8010–01–M

---

six-months prior to listing occurred in the U.S. market, or 5% of the total shares of the underlying security outstanding provided at least 70% of the worldwide trading volume for the security for the six-months prior to listing occurred in the U.S. market.

[11] This 30% requirement is also currently the minimum volume that must have occurred in the U.S. market in order for the Exchange to list an ELN linked to any non-U.S. security.

[12] 15 U.S.C. 78f(b)(5).

[13] *See* Securities Exchange Act Release Nos. 34549 (August 18, 1994), 59 FR 43873 (August 25, 1994) (SR–Amex–93–46); 34759 (September 30, 1994), 59 FR 50939 (October 6, 1994) (SR–CBOE–94–04); 34758 (September 30, 1994), 59 FR 50943 (October 6, 1994) (SR–NASD–94–49); 34985 (November 18, 1994), 59 FR 60860 (November 28, 1994) (SR–NYSE–94–37); and 35479 (March 13, 1995), 60 FR 14993 (March 21, 1995) (SR–Phlx–95–09) ("ELN Approval Orders").

[14] The Intermarket Surveillance Group ("ISG") was formed on July 14, 1983 to, among other things, coordinate more effectively surveillance and investigative information sharing arrangements in the stock and options markets. *See* Intermarket Surveillance Group Agreement, July 14, 1983. The most recent amendment to the ISG Agreement, which incorporates the original agreement and all amendments made thereafter, was signed by ISG members on January 29, 1990. *See* Second Amendment to the Intermarket Surveillance Group Agreement, January 29, 1990. The members of the ISG are: the Amex; the Boston Stock Exchange, Inc.; the Chicago Board Options Exchange, Inc.; the Chicago Stock Exchange, Inc.; the National Association of Securities Dealers, Inc. ("NASD"); the New York Stock Exchange, Inc.; the Pacific Stock Exchange, Inc.; and the Philadelphia Stock Exchange, Inc. Because of potential opportunities for trading abuses involving stock index futures, stock options, and the underlying stock and the need for greater sharing of surveillance information for these potential intermarket trading abuses, the major stock index futures exchanges (*e.g.*, the Chicago Mercantile Exchange and the Chicago Board of Trade) joined the ISG as affiliate members in 1990.

[15] *See supra* note 8. The Commission notes that the 20% Test + Daily Trading Volume Standard does not include worldwide trading volume in the non-U.S. security that takes place in a foreign market regardless of the existence of a comprehensive surveillance sharing agreement with the listing exchange. The 20% Test is a minimum U.S. market share trading test intended to permit the listing of ELNs only on non-U.S. securities that have active and liquid markets in the U.S.

[16] The Commission recently approved the Exchange's proposed rule change amending some of the initial listing standards regarding such structured notes. The Exchange's amended initial listing standards require, among other things, that the linked stock underlying the Exchange-listed ELNs either: (i) has a minimum market capitalization of $3 billion and during the 12 months preceding listing is shown to have traded at least 2.5 million shares, (ii) has a minimum market capitalization of $1.5 billion and during the 12 months preceding listing is shown to have traded at least 10 million shares; or (iii) has a minimum market capitalization of $500 million and during the 12 months preceding listing is shown to have traded at least 15 million shares. *See* Securities Exchange Act Release No. 36909 (March 20, 1996).

[17] 15 U.S.C. 78s(b)(2).

[Release No. 34–36989; File No. AR–Amex–95–48]

Self-Regulatory Organizations; American Stock Exchange, Inc.; Order Approving Proposed Rule Change Relating to Revised Listing Standards for Equity Linked Notes

March 20, 1996.

On December 5, 1995, the American Stock Exchange, Inc. ("Amex" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] a proposed rule change to revise the trading volume requirement for securities underlying Equity Linked Notes ("ELNs").

Notice of the proposed rule change was published for comment and appeared in the **Federal Register** on December 20, 1995.[3] No comments were received on the proposal. This order approves the proposal.

I. Description of the Proposal

On May 20, 1993 and December 13, 1993, the SEC approved amendments to Section 107 of the Amex Company Guide ("Section 107") to provide for the

[1] 15 U.S.C. 78s(b)(1) (1988 & Supp. V 1993).

[2] 17 CFR § 240.19b–4 (1994).

[3] *See* Securities Exchange Act Release No. 36578 (Dec. 13, 1995).

listing and trading of ELNs.[4] ELNs are intermediate term, nonconvertible, hybrid debt instruments, the value of which is linked to the performance of a highly capitalized, actively traded U.S. common stock or non-convertible preferred stock ("linked security"). In order to list an ELNs product, Section 107B currently requires the linked security to meet one of the following criteria:

Market Capitalization and Annual Trading Volume
$3 billion and 2.5 million shares.
$1.5 billion and 20 million shares.
$500 million and 80 million shares.

Amex now proposes to amend Section 107(B) to provide for greater flexibility in the listing criteria for ELNs. The proposed rule change will lower the trading volume requirements criteria for underlying linked stocks meeting the capitalization requirements of $1.5 billion and $500 million. Under the revised criteria, a linked stock with market capitalization of $1.5 billion would now need an annual trading volume of 10 million shares, as opposed to the current trading volume requirement of 20 million shares. Securities with a market capitalization in excess of $500 million also would be eligible for ELNs listing if they have annual trading volume of 15 million shares, as opposed to the 80 million shares under the current rule.[5] The proposal will also delete the current provision of the rule that allows the Exchange to list ELNs that do not meet the market capitalization and trading volume criteria if the Division of Market Regulation of the SEC concurs.

The Exchange believes these revisions strike an appropriate balance between the Exchange's responsiveness to innovations in the securities markets and its need to ensure the protection of investors and the maintenance of fair and orderly markets. Moreover, the Exchange believes that these changes will not have an adverse impact on the markets for the underlying linked security since the requirements will continue to ensure that the linked security has a large minimum market capitalization and a significant amount of trading volume over the preceding twelve months. The Exchange will continue to require that the issuer have a minimum tangible net worth of $150 million and that the total issue price of the ELNs combined with all of the issuer's other listed ELNs shall not be greater than 25% of the issuer's tangible net worth at the time of issuance.

II. Discussion

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6(b)(5).[6] In particular, the Commission believes the proposal is consistent with the Section 6(b)(5) requirement that the rules of an exchange be designed to promote just and equitable principles of trade and not to permit unfair discrimination between customers, issuers, brokers, and dealers.

The Commission finds that the proposal to reduce the trading volume requirement for eligible linked securities will expand the number of securities that can be linked on ELNs while maintaining the requirement that the linked security be an actively traded, highly capitalized common stock or ADR. While the proposal reduces the trading volume criteria for securities with market capitalizations in the $1.5 billion and $500 million tiers to 10 million and 15 million shares, respectively (from 20 and 80 million shares, respectively), the Commission nevertheless believes that, together, the applicable capitalization and new trading volume requirements will continue to help ensure that ELNs are only issued on highly liquid securities of broadly capitalized companies. Accordingly, the Commission believes that these requirements will continue to help reduce the likelihood of any adverse market impact on the securities underlying ELNs.

Finally, the Commission notes that the Exchange has deleted the provision that allows it to list ELNs on securities not meeting the market capitalization and trading volume criteria if the Division of Market Regulation of the SEC concurs. The revised criteria will expand the number of securities eligible for ELNs trading. The increased flexibility in the ELNs listing criteria should effectively reduce or eliminate the need for additional discretion in this area, in addition to providing issuers and the Exchange with specific and clear guidance on the applicable listing criteria for a security to be eligible to underlie an ELN.

It therefore is ordered, pursuant to Section 19(b)(2) of the Act,[7] that the proposed rule change (SR–Amex–95–48) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

BILLING CODE 8010–01–M

[Release No. 34–36992; File No. SR–CBOE–96–11]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the Chicago Board Options Exchange, Inc. Relating to the Listing and Trading of Options on the CBOE PC Index

March 20, 1996.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on March 7, 1996, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The CBOE proposes to provide for the listing and trading on the Exchange of options on the CBOE PC Index ("CBOE PC Index" or "Index"), a narrow-based, equal weighted index comprised of eight of the largest personal computer manufacturing companies.

The text of the proposed rule change is available at the Office of the Secretary, CBOE and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the CBOE included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The CBOE has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to permit the Exchange to list and trade cash-settled, European-style stock index options on the CBOE PC Index, an equal-weighted index consisting of stocks of eight of the largest personal computer manufacturing companies. CBOE represents that each of these stocks are actively traded and believes that options on the Index will provide investors with a low-cost means to participate in the performance of the domestic PC industry or a means to hedge the risk of investments in that industry. The Exchange believes that the small number of Index components should facilitate replication of the Index for hedging purposes.

Index Design

As noted above, the CBOE PC Index consists of eight components, all of which trade on the New York Stock Exchange ("NYSE") or Nasdaq.[1] In addition, the Exchange represents that all eight underlying component securities currently meet the Exchange's listing criteria for equity options contained in Exchange Rule 5.3 and are the subject of options trading on U.S. options exchanges.

As of February 6, 1996, the capitalization of the components ranged from a low of $363 million (AST Research) to a high of $65.26 billion (IBM). The total capitalization as of that date was $135.5 billion; the mean capitalization was $16.9 billion; and the median capitalization was $3.34 billion. Because the Index is equal-weighted, each component accounts for 12.5% of the weight of the Index.

Calculation

The Index will be calculated by CBOE or its designee on a real-time basis using last-sale prices and will be disseminated every 15 seconds. The updated Index values will be displayed by the Consolidated Tap Association and over the facilities of the Options Price Reporting Authority ("OPRA"). If a component is not currently being traded on its primary market, the most recent price at which the share traded on such market will be used in the Index calculation. The value of the Index at the close on February 1, 1996 was 127.65.

The Index is equal-weighted and reflects changes in the prices of the component stocks relative to the Index base date, January 3, 1995 when the Index was set to 100.000. Specifically, each of the component securities is initially represented in equal-dollar amounts, with the level of the Index equal to the combined market value of the assigned number of shares for each of the Index components divided by the current Index divisor. The Index divisor is adjusted to maintain continuity in the Index at the time of certain types of changes. Changes which may result in divisor changes include, but are not limited to, quarterly re-balancing, special dividends, spin-offs, certain rights issuances, and mergers and acquisitions.

Maintenance

The Index will be maintained by CBOE and will be re-balanced after the close of business on Expiration Fridays on the March Quarterly Cycle. The Index will be reviewed regularly and CBOE may change the composition of the Index at any time to reflect changes affecting the components of the Index or the PC markets generally. If it becomes necessary to replace a component, every effort will be made to add a component that preserves the character of the Index. If no replacement is available, or if CBOE determines to decrease the number of component stocks, it will submit a proposed rule change pursuant to Section 19(b) of the Act prior to opening any new series of Index options for trading. Absent prior Commission approval, CBOE will not increase to more than ten the number of component stocks in the Index. Finally, if at any time any of the components are not options eligible, the Exchange will submit a rule change pursuant to Section 19(b) of the Act prior to opening any new series of Index options for trading.

Index Option Trading

The Exchange proposes to base trading in options on the CBOE PC Index on the full value of that Index. The Exchange may list full-value long-term index option series ("LEAPS ®"), as provided in Rule 24.9. The Exchange also may provide for the listing of reduced-value LEAPS, for which the underlying value would be computed at one-tenth of the value of the Index. The current and closing index value of any such reduced-value LEAP will, after such initial computation, be rounded to the nearest one-hundredth.

Exercise and Settlement

CBOE PC Index options will have European-style exercise and will be "A.M.-settled index options" within the meaning of the Rules in Chapter XXIV, including Rule 24.9, which is being amended to refer specifically to CBOE PC Index options. The proposed options will expire on the Saturday following the third Friday of the expiration month and the last day for trading in an expiring series will be the second business day (ordinarily a Thursday) preceding the expiration date.

Exchange Rules Applicable

Except as modified herein, the Rules in Chapter XXIV will be applicable to CBOE PC Index options. Index option contracts based on the CBOE PC Index will be subject to a position limit of 9,000 contracts on the same side of the market.[2] Ten reduced-value options will equal one full-value contract for such purposes.

CBOE represents that it has the necessary systems capacity to support new series that would result from the introduction of options on the Index and has also been informed that OPRA has the capacity to support such new series.[3]

Surveillance

The surveillance procedures currently used to monitor the trading of options on other Exchange-listed indexes will be used to monitor the trading of options on the CBOE PC Index. The Exchange has access to trading activity in the underlying securities, all of which trade on either the NYSE or Nasdaq, via the Intermarket Surveillance Group Agreement.

2. Statutory Basis

CBOE believes the proposed rule change is consistent with Section 6(b) of the Act in general and furthers the objectives of Section 6(b)(5) in particular in that it will permit trading in options based on the CBOE PC Index pursuant to rules designed to prevent fraudulent and manipulative acts and practices and to promote just and equitable principles of trade, and thereby will provide investors with the ability invest in options based on an additional index.

---

[4] See Securities Exchange Act Release Nos. 32345 (May 20, 1993) and 33328 (Dec. 13, 1993).

[5] Under the rule, as amended by this proposal, ELNs could be listed where the linked security met any of the following criteria:

Market capitalization and Annual Trading Volume
$3 billion and 2.5 million shares.
$1.5 billion and 10 million shares.
$500 million and 15 million shares.

[6] 15 U.S.C. 78f(b)(5) (1982).

[7] 15 U.S.C. 78s(b)(2) (1988).

[8] 17 CFR § 200.30–3(a)(12) (1994).

[1] The components of the Index are: Apple Computer, AST Research, Compaq Computer, Dell Computer, Gateway 2000, Hewlett Packard, International Business Machines, and Micron Electronics.

[2] CBOE recently increased its position limit tiers applicable to narrow-based index options from 5,000, 7,500, and 10,500 contracts on the same side of the market to 6,000, 9,000, and 12,000 contracts, respectively.

[3] See Letter from Joe Corrigan, OPRA, to Eileen Smith, CBOE, dated February 21, 1996.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes the proposed rule change will impose no burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons make written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the CBOE. All submissions should refer to File No. SR–CBOE–96–11 and should be submitted by April 17, 1996.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[4]

[4] 17 CFR 200.30–3(a)(12) (1994).

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 96–7342 Filed 3–26–96; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 34–36995; International Release No. 954; File No. SR–CBOE 95–71]

Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.; Notice of Filing and Order Granting Accelerated Approval of Proposed Rule Change and Amendment No. 1 Thereto Relating to Listing Criteria for Equity Linked Term Notes ("ELNs")

March 20, 1996.

Pursuant to Section 19(b)(1), of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on December 20, 1995, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in Items I and II below, which Items have been prepared by the CBOE. On January 18, 1996, CBOE filed Amendment No. 1 ("Amendment No. 1") to the proposed rule change to clarify issues relating to the issuance of ELNs on non-U.S. companies that trade in the U.S. market as sponsored American Depositary Receipts, ordinary shares, or otherwise.[1] This Order approves the proposed rule change, as amended, on an accelerated basis and also solicits comments on the proposed rule change, as amended, from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its rules relating to the listing criteria for equity linked term notes. The text of the proposed rule change is available at the Office of the Secretary of the CBOE and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the CBOE included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. CBOE has prepared summaries, set forth in Sections (A), (B), and (C) below, of the most significant aspects of such statements.

[1] Letter from Timothy Thompson, CBOE, to Michael Walinskas, SEC, dated January 17, 1996.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

ELNs are intermediate-term (*i.e.*, two to seven years), non-convertible hybrid securities, the value of which is based, at least in part, on the value of another issuer's common stock, non-convertible preferred stock, or certain sponsored American Depositary Receipts ("ADRs"). ELNs may pay periodic interest or may be issued as zero-coupon instruments with no payments to holders prior to maturity. ELNs also may be subject to a "cap" on the maximum principal amount to be repaid to holders upon maturity, or, conversely, they may feature a "floor" on the minimum principal amount paid to holders upon maturity. A specific issue of ELNs, for example, may provide holders with a fixed semi-annual interest payment, while capping the maximum amount to be repaid upon maturity at 135% of the issuance price, with no minimum floor guarantee on the principal to be repaid at maturity. Another issue of ELNs might offer lower semi-annual payments based upon a floating interest rate with a minimum floor for the repayment of principal of 75% of the issuance price. The flexibility available to an issuer of ELNs permits the creation of securities which offer issuers and investors the opportunity to more precisely focus on a specific investment strategy.

The CBOE's proposal would modify the listing standards applicable to the underlying linked security. Paragraph (e) of Rule 31.5.I specifies that a common stock or a non-convertible preferred stock may be considered for listing on the Exchange if the underlying stock meets one of three alternative criteria for market capitalization and trading volume. Lower levels of market capitalization require a higher trading volume for the Exchange to consider listing an ELN on that security. The Exchange believes that two of the three trading volume levels could be reduced without compromising investor protection.

Specifically, the Exchange is proposing that the Exchange be permitted to list an ELN on a security with a market capitalization of at least $1.5 billion if that security has trading volume in U.S. markets of at least 10 million shares during the 12 month period preceding the listing. Currently, paragraph (e) requires trading volume of 20 million shares for such securities. In addition, the Exchange is proposing that it be permitted to list an ELN on a security with a market capitalization of at least $500 million if that security has a trading volume in U.S. markets of at least 15 million shares during the 12 month period preceding the listing. Currently, paragraph (e) requires trading volume of 60 million shares for such securities. This reduction in the trading volume levels would enable the Exchange to list ELNs on a wider range of securities and provide investors a new opportunity to participate in the market performance of these securities.

Paragraph (e) would also be revised to specify that the Exchange will file a rule change with the Commission pursuant to Section 19(b) of the Act (rather than merely obtaining concurrence of SEC staff) if it desires to list an ELN on an underlying security that does not meet the market capitalization or trading volume criteria set forth in the rule.

Second, CBOE proposes to amend the ELNs listing standard governing which non-U.S. securities are eligible to be linked to ELNs. Presently, under paragraph (h) of Rule 31.5.I, the Exchange may list ELNs on actively traded non-U.S. securities which are traded in the U.S. market as sponsored ADRs or otherwise, provided that: (1) The Exchange has in place a comprehensive surveillance sharing agreement with the primary exchange on which the non-U.S. security is traded (in the case of an ADR, the primary exchange on which the security underlying the ADR is traded); or (2) the combined trading volume of the non-U.S. security and other related non-U.S. securities (as defined below) occurring in the U.S. market represents (on a share equivalent basis with respect to any ADRs) ("U.S. Trading Volume") at least 50% of the combined worldwide trading volume in the non-U.S. security during the six month period preceding the date of listing ("50% Test").

This paragraph (h) would be revised in three respects. First, the Exchange proposes to revise the manner in which the 50% test is calculated such that trading in the non-U.S. security and other related non-U.S. securities in any market with which the Exchange has in place a comprehensive, effective surveillance sharing agreement would be added to the U.S. market volume for the purpose of determining whether the 50% test has been met. Currently, only trading in the U.S. market counts toward satisfying the 50% test. This change is consistent with the change to the listing criteria for options on ADRs. This change would also be reflected in Interpretation .01 to Rule 31.5.I.

CBOE also proposes to add an alternative set of criteria to paragraph (h) of Rule 31.5.I in order to add a third alternative set of criteria under which the Exchange may list an ELN on a non-U.S. security. This new standard, referred to as the 20% Test + Daily Trading Volume Standard ("20% Test + Daily Trading Volume Standard") would permit the Exchange to list an ELN on a non-U.S. security if each of the following three conditions were satisfied: (1) The combined trading worldwide volume of the non-U.S. security in the U.S. market represents (on a share equivalent basis with respect to ADRs) at least 20% of the combined worldwide trading volume in the non-U.S. security and other related non-U.S. securities over the six month period preceding the date of selection of the non-U.S. security for ELN trading; [2] (2) the average trading volume for the non-U.S. security in the U.S. market over the six months preceding the date of selection of the non-U.S. security for ELN trading is at least 100,000 shares per day; [3] and (3) the trading volume for the non-U.S. security in the U.S. is at least 60,000 shares per day for a majority of the trading days for the six months preceding the date of selection of the non-U.S. security for ELN trading.[4]

As with the 50% Test, the Daily Trading Volume Standard will allow the listing of ELNs on non-U.S. securities in the absence of a comprehensive, effective surveillance sharing agreement between the Exchange and the primary exchange on which the non-U.S. security is traded (in the case of an ADR, the home country where the security underlying the ADR is traded). The Exchange believes the Daily Trading Volume Standard is justified because it will enable the Exchange to list ELNs on non-U.S. securities that are widely followed by U.S. investors but that do not meet the 50% Test. Although the Daily Trading Volume Standard reduces from 50% to 20% the percentage of worldwide trading that must occur in the U.S. market, it also requires the non-U.S. security to meet certain trading levels in the U.S. market. The Exchange believes the Daily Trading Volume Standard's requirement of observable, high trading volume should ameliorate regulatory concerns regarding investor protection. In addition, it should be noted that the Daily Trading Volume Standard is the same standard approved by the Commission in determining on which ADRs the Exchange may list options, except that CBOE believes the standard for ELNs is actually stricter because it requires the 20% test to be met over a longer period (six months instead of three).[5]

Finally, the Exchange proposes to amend paragraph (g) to Rule 31.5.I in order to clarify the limitation on the number of ELNs that may be linked to a particular security. Specifically, the issuance of ELNs relating to any underlying non-U.S. security may not exceed 2% of the total shares outstanding worldwide if at least 20% of the worldwide trading volume occurs in the U.S. market during the six-month period preceding the date of listing.[6] The Exchange notes that this change is consistent with the Daily Trading Volume Standard requirement contained in paragraph (h) that requires at least 20% of the combined worldwide trading volume in the non-U.S. security to occur in U.S. markets.[7] This change would also be reflected in Interpretation .04 to the Rule.

Because this new listing standard would enable the Exchange to list ELNs on widely followed non-U.S. securities without comprising investor protection concerns, the Exchange believes that the proposed rule change is consistent with Section 6 of the Act in general and with Section 6(b)(5) in particular in that it is designed to promote just and equitable principles of trade, to foster cooperation with persons engaged in facilitating and clearing transactions in securities, and to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposed rule change will not result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

[2] The calculation for the 20% Test + Daily Trading Volume Standard does not include foreign markets with which the Exchange has in place a comprehensive surveillance sharing agreement. *See* Amendment No. 1.

[3] *See* Amendment No. 1.

[4] *Id.*

[5] *See also* note 2, *supra.*

[6] The other size limitations in CBOE's rule remains unchanged. Accordingly, the size of ELN issuances linked to non-U.S. securities will be limited to 3% of the total shares of the underlying security outstanding provided, however, at least 50% of the worldwide trading volume for the security for the six-months prior to listing occurred in the U.S. market, or 5% of the total shares of the underlying security outstanding provided at least 70% of the worldwide trading volume for the security for the six-months prior to listing occurred in the U.S. market.

[7] As with the 20% Test + Daily Trading Volume Standard, foreign markets with which the Exchange has in place a comprehensive surveillance sharing agreement are not included in the calculation for purposes of determining the size of eligible ELN issuances.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Comments were neither solicited nor received.

III. Findings and Conclusions

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6(b)(5).[8] In particular, the Commission believes the proposal is consistent with the Section 6(b)(5) requirement that the rules of an exchange be designed to promote just and equitable principles of trade and not to permit unfair discrimination between customers, issuers, brokers, and dealers.

The Commission finds that the proposal to reduce the trading volume requirement for eligible linked securities will expand the number of securities that can be linked to ELNs while maintaining the requirement that the linked security be an actively traded, highly capitalized common stock or ADR. While the proposal reduces the trading volume criteria for securities with market capitalizations in the $1.5 billion and $500 million tiers to 10 million and 15 million shares, respectively (from 20 and 80 million shares, respectively), the Commission nevertheless believes that, together, the applicable capitalization and new trading volume requirements will continue to help ensure that ELNs are only issued on highly liquid securities of broadly capitalized companies. Accordingly, the Commission believes that these requirements will continue to help reduce the likelihood of any adverse market impact on the securities underlying ELNs.

The Commission notes that the Exchange has deleted the provision that allows it to list ELNs on securities not meeting the market capitalization and trading volume criteria if the Division of Market Regulation of the SEC concurs.[9] The revised criteria will expand the number of securities eligible for ELNs trading. The increased flexibility in the ELNs listing criteria should effectively reduce or eliminate the need for additional discretion in this area, in addition to providing issuers and the Exchange with specific and clear guidance on the applicable listing criteria for a security to be eligible to underlie an ELN.

The Commission also believes that the additional proposed amendments to the listing standards for ELNs on non-U.S. securities will benefit investors by effectively increasing the number of available ELNs-eligible non-U.S. securities. At the same time, as described below, the proposal provides safeguards designed to reduce the potential for manipulation and other abusive trading strategies in connection with the trading of non-U.S. security ELNs and their underlying securities. Accordingly, the Commission believes that the proposal will extend the benefits associated with ELNs on non-U.S. securities without compromising the effectiveness of the Exchange's listing standards for such securities.

Currently, the 50% Test allows the Exchange to list ELNs on a non-U.S. security in the absence of a comprehensive/effective surveillance sharing agreement with the primary exchange where the non-U.S. security trades if the combined trading volume of the non-U.S. security and other related non-U.S. securities occurring in the U.S. market during the six month period preceding the selection of the non-U.S. security for ELN listing represents (on a share equivalent basis) at least 50% of the combined world-wide trading volume in such securities.

The Commission has previously concluded that the 50% Test helps to ensure that the relevant pricing market for non-U.S. securities underlying ELNs occurs in the U.S. market.[10] In such cases, the Commission has previously found that the U.S. market is the instrumental market for purposes of deterring and detecting potential manipulations or other abusive trading strategies in conjunction with transactions in the overlying non-U.S. security ELN market. Because the U.S. self-regulatory organizations which comprise the U.S. market for non-U.S. securities are members of the Intermarket Surveillance Group,[11] the Commission has concluded that there exists an effective surveillance sharing agreement to permit the exchanges and the NASD to adequately investigate any potential manipulations of the non-U.S. security ELNs or their underlying securities.

The Exchange proposes to modify the 50% Test to include in the U.S. market volume calculation the trading volume in non-U.S. securities and other related non-U.S. securities that occur in any market with which the Exchange has in place a comprehensive/effective surveillance sharing agreement. The Commission believes that this proposed modification of the 50% Test is consistent with the Act and with the Commission's approach in the ELN Approval Orders because it will continue to ensure that the majority of world-wide trading volume in the non-U.S. security and other related non-U.S. securities occurs in trading markets with which the Exchange has in place a comprehensive/effective surveillance sharing agreement. The existence of such agreements should deter as well as detect manipulations or other abusive trading strategies and also provide an adequate mechanism for obtaining market and trading information from the non-U.S. markets that list the non-U.S. security underlying the Exchange's ELNs in order to adequately investigate any potential abuse or manipulation.

Additionally, the Commission finds that the proposed 20% Test + Daily Trading Volume Standard is consistent with the Act and with the ELN Approval Orders. As noted above, the 20% Test + Daily Trading Volume Standard will allow the Exchange to list ELNs on a non-U.S. security if, over the six month period preceding the date of selection of the non-U.S. security for ELNs trading (1) the combined world-wide trading volume for the non-U.S. security in the U.S. market represents (on a share equivalent basis) at least 20% of the combined world-wide trading volume in the non-U.S. security and other related non-U.S. securities; [12] (2) the average daily trading volume for the non-U.S. security in the U.S. market is at least 100,000 shares; and (3) the trading volume for the non-U.S. security in the U.S. market is at least 60,000 shares per day for a majority of the trading days.

The Commission believes that these requirements present a reasonable alternative to the 50% Test by limiting the actual listing of ELNs on non-U.S. securities to only those non-U.S. securities that have a significant amount of U.S. market trading volume. This will ensure that the U.S. market is sufficiently active to serve as a relevant pricing market for the non-U.S. security and that the underlying foreign security is readily available to meet the delivery requirements upon exercise of the ELN. Accordingly, the Commission believes that the 20% Test + Daily Trading Volume Standard should help to ensure that the U.S. markets serve a significant role in the price discovery of the applicable non-U.S. security and are generally deep, liquid markets.

Finally, the Exchange believes, for similar reasons, that it is appropriate to reduce the minimum U.S. trading volume requirements for ELNs issuances from 30% to 20%. As noted above, the Commission believes that the 20% Test + Daily Trading Volume Standard will ensure that an underlying non-U.S. security has deep and liquid markets to sustain an ELNs listing. The Commission believes that it is appropriate to adjust the limitations on the size of the ELNs issuance to correspond to this requirement. Accordingly, where the trading volume in the U.S. market for the underlying non-U.S. security is between 20% and 50% of the worldwide trading volume, the issuance will be limited to 2% of the total outstanding shares of the underlying security. The 20% minimum U.S. trading volume requirement should continue to ensure that the U.S. market is significant enough to accommodate ELNs trading. In this regard, the Commission believes that these restrictions will minimize the possibility that trading in such issuances will adversely impact the market for the security to which it is linked.

The Commission finds good cause for approving the proposed rule change and Amendment No. 1 to the proposed rule change prior to the thirtieth day after the date of publication of notice thereof in the **Federal Register** in order to allow CBOE to implement these changes to its ELNs Listing Standards without delay. The proposal will provide the Exchange with increased flexibility in the listing of ELNs products on both U.S. and non-U.S. securities without compromising investor protection concerns. In addition, the CBOE proposal is substantially similar to, and is being approved concurrently with, two American Stock Exchange proposals relating to ELNs listing standards, both of which were subject to the full notice and comment period.[13] The Commission notes that no comment letters were received on these Amex proposals. Accordingly, the Commission does not believe the CBOE proposal, as amended, raises any new or unique regulatory issues. For these reasons, the Commission believes there is good cause, consistent with Sections 6(b)(5) and 19(b)(2) of the Act, to approve the proposed rule change and Amendment No. 1 on an accelerated basis.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by April 17, 1996.

It therefore is ordered, pursuant to Section 19(b)(2) of the Act,[14] that the proposed rule change (SR–CBOE–95–71) is approved, as amended.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[15]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 96–7396 Filed 3–26–96; 8:45 am]

BILLING CODE 8010–01–M

---

[8] 15 U.S.C. 78f(b)(5) (1982).

[9] As noted above, CBOE has replaced this section with a provision stating it would have to file a Section 19(b) rule change if it desires to list an ELN on an underlying security that does not meet these standards.

[10] *See* Securities Exchange Act Release Nos. 34549 (August 18, 1994), 59 FR 43073 (August 25, 1994) (SR–Amex–93–46); 34759 (September 30, 1994), 59 FR 50939 (October 6, 1994) (SR–CBOE–94–04); 34758 (September 30, 1994), 59 FR 50943 (October 6, 1994) (SR–NASD–94–49); 34985 (November 18, 1994), 59 FR 60860 (November 28, 1994) (SR–NYSE–94–37); and 35479 (March 13, 1995), 60 FR 14993 (March 21, 1995) (SR–Phlx–95–09) ("ELN Approval Orders").

[11] The Intermarket Surveillance Group ("ISG") was formed on July 14, 1983 to, among other things, coordinate more effectively surveillance and investigative information sharing arrangements in the stock and options markets. *See* Intermarket Surveillance Group Agreement, July 14, 1983. The most recent amendment to the ISG Agreement, which incorporates the original agreement and all amendments made thereafter, was signed by ISG members on January 29, 1990. *See* Second Amendment to the Intermarket Surveillance Group Agreement, January 29, 1990. The members of the ISG are: The American Stock Exchange, Inc.; the Boston Stock Exchange, Inc.; the CBOE; the Chicago Stock Exchange, Inc.; the National Association of Securities Dealers, Inc.; the New York Stock Exchange, Inc.; the Pacific Stock Exchange, Inc.; and the Philadelphia Stock Exchange, Inc. Because of potential opportunities for trading abuses involving stock index futures, stock options, and the underlying stock and the need for greater sharing of surveillance information for these potential intermarket trading abuses, the major stock index futures exchanges (*e.g.*, the Chicago Mercantile Exchange and the Chicago Board of Trade) joined the ISG as affiliate members in 1990.

[12] The Commission notes that the 20% Test + Daily Trading Volume Standard does not include worldwide trading volume in the non-U.S. security that takes place in a foreign market regardless of the existence of a comprehensive surveillance sharing agreement with the listing exchange. The 20% Test is a minimum U.S. market share trading test intended to permit the listing of ELNs only on non-U.S. securities that have active and liquid markets in the U.S.

[Release No. 34–36994; International Release No. 953; File No. SR–NASD–95–01]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.; Notice of Filing and Order Granting Accelerated Approval of Proposed Rule Change and Amendment No. 1 Thereto Relating to Listing Criteria for Selected Equity Linked Debt Securities ("SEEDS")

March 20, 1996.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on January 4, 1996, the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in Items I and II below, which Items have been prepared by the NASD. On February 1, 1996, the NASD filed Amendment No. 1 ("Amendment No. 1") to the proposed rule change to revise the trading volume requirement for securities underlying an issuance of SEEDS and to clarify issues relating to the issuance of SEEDS on non-U.S. companies that trade in the U.S. market as sponsored American Depositary Receipts ("ADRs"), ordinary shares, or otherwise.[1] This Order approves the proposed rule change, as amended, on an accelerated basis and also solicits comments on the proposed rule change, as amended, from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NASD is proposing to amend the listing standards for Selected Equity-Linked Debt Securities ("SEEDS")[2] found in Section 2(f) of Part III to Schedule D to the NASD By-Laws

[1] Letter from Joan C. Conley, Corporate Secretary, NASD, to Michael Walinskas, SEC, dated January 29, 1996.

[2] "SEEDS" and "Selected Equity-Linked Debt Securities" are service marks of The Nasdaq Stock Market, Inc.

("Schedule D"). Specifically, the NASD proposes to amend Section 2(f)(3)(A) of Part III to Schedule D to increase the number of securities eligible to underlie or be "linked" to SEEDS. The NASD also proposes to amend Schedule D to provide alternative criteria for the listing and trading of SEEDS linked to the performance of non-U.S. companies that trade in the U.S. market as ADRs, ordinary shares, or otherwise.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in Sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

SEEDS are intermediate-term (*i.e.*, two to seven years), non-convertible hybrid securities, the value of which is based at least in part, on the value of another issuer's common stock, non-convertible preferred stock, or certain sponsored ADRs.[3] SEEDS may pay periodic interest or may be issued as zero-coupon instruments with no payments to holders prior to maturity. SEEDS also may be subject to a "cap" on the maximum principal amount to be repaid to holders upon maturity, or, conversely, they may feature a "floor" on the minimum principal amount paid to holders upon maturity. A specific issue of SEEDS, for example, may provide holders with a fixed semi-annual interest payment, while capping the maximum amount to be repaid upon maturity at 135% of the issuance price, with no minimum floor guarantee on the principal to be repaid at maturity. Another issue of SEEDS might offer lower semi-annual payments based upon a floating interest rate with a minimum floor for the repayment of principal of 75% of the issuance price. The flexibility available to an issuer of SEEDS permits the creation of securities which offer issuers and investors the opportunity to more precisely focus on a specific investment strategy.

There are four components to the NASD's listing standards for SEEDS: (1) Standards applicable to issuers of SEEDS; [4] (2) standards applicable to the SEEDS offerings themselves; [5] (3) standards applicable to the underlying linked security; [6] and (4) limitations on the size of a particular SEEDS offering.[7]

The NASD's instant rule proposal would modify the listing standards applicable to the underlying linked security. First, the NASD proposes to amend the trading volume criteria for securities eligible to be linked to SEEDS found in Section 2(f)(3)(A) of Part III to Schedule D. Currently, in order for a security to be eligible to be linked to a SEEDS, the linked security must, among other things, meet one of the following criteria: (a) Have a market capitalization of at least $3 billion and a trading volume in the United States of at least 2.5 million shares in the one-year period preceding the listing of the SEEDS; (b) have a market capitalization of at least $1.5 billion and a trading volume in the United States of at least 20 million shares in the one-year period preceding the listing of the SEEDS; or (c) have a market capitalization of at least $500 million and a trading volume in the United States of at least 80 million shares in the one-year period preceding the listing of the SEEDS.

Under the proposal, the trading volume criteria for SEEDS-linked securities would be lowered such that a security could underlie a SEEDS if it: (a) had a market capitalization of at least $3 billion and a trading volume in the United States of at least 2.5 million shares in the one-year period preceding the listing of the SEEDS; (b) had a market capitalization of at least $1.5 billion and a trading volume in the United States of at least 10 million shares in the one-year period preceding the listing of the SEEDS; or (c) had a market capitalization of at least $500 million and a trading volume in the United States of at least 15 million shares in the one-year period preceding the listing of the SEEDS.

The NASD believes this proposed trading volume criteria for SEEDS-linked securities will provide qualified issuers greater flexibility to list SEEDS on the Nasdaq National Market. The NASD also notes that its proposal would delete a provision in the SEEDS listing standards that permits the NASD, with the concurrence of the staff of the Division of Market Regulation of the Commission, to list a particular SEEDS issue notwithstanding the fact that the underlying linked security does not meet the market capitalization and trading volume requirements noted above. With the increased flexibility that the proposed trading volume criteria will provide issuers, the NASD believes it no longer will be necessary to retain this provision of the SEEDS listing standards.

Second, the NASD proposes to modify the SEEDS listing standard governing which non-U.S. companies are eligible to be linked to SEEDS. Presently, under Section 2(f)(3)(C) of Part III to Schedule D, SEEDS may be linked to actively traded non-U.S. companies which are traded in the U.S. market as sponsored ADRs, ordinary shares, or otherwise, provided that: (1) the NASD has a comprehensive surveillance sharing agreement in place with the primary foreign exchange on which the non-U.S. security trades; or (2) the trading volume of the non-U.S. security in the U.S. market represents at least 50% of the world-wide trading volume in the non-U.S. security ("50% Test"). Under the proposal, the manner in which the applicable percentage of world-wide trading volume is calculated under the 50% Test would be modified and a new criteria for the listing of SEEDS on non-U.S. securities would be added. Specifically, the NASD proposes to revise the 50% Test so that trading in non-U.S. securities and other related non-U.S. securities in any market with which the NASD has a comprehensive surveillance sharing agreement in place will be added to U.S. market volume for the purpose of determining whether the 50% Test has been met. Currently, only trading in the U.S. market counts toward satisfying the 50% Test.

The NASD also proposes to add an alternative set of criteria to Section 2(f)(3)(C) to expand the number of non-U.S. securities upon which Nasdaq may list SEEDS. This new standard will be referred to as the 20% Test + Daily Trading Volume Standard ("20% Test + Daily Trading Volume Standard") and will permit Nasdaq to list SEEDS on non-U.S. securities if all of the following conditions are satisfied: (1) The combined world-wide trading volume for the non-U.S. security in the U.S. market represents (on a share equivalent basis) at least 20% of the combined world-wide trading volume in the non-U.S. security and in other related non-U.S. securities over the six-month period preceding the date of selection of the non-U.S. security for a SEEDS listing; [8] (2) the average daily trading volume for the non-U.S. security in the U.S. market over the six-month period preceding the date of selection of the non-U.S. security for a SEEDS listing is 100,000 or more shares; and (3) the trading volume for the non-U.S. security in the U.S. market is at least 60,000 shares per day for a majority of the trading days for the six-month period preceding the date of selection of the non-U.S. security for a SEEDS listing.

The NASD also proposes to amend Section 2(f)(4) in order to clarify the limitation on the number of SEEDS that may be linked to a particular security. Specifically, the issuance of SEEDS relating to any underlying non-U.S. security or sponsored ADR may not exceed 2% of the total shares outstanding worldwide if at least 20% of the worldwide trading volume occurs in the U.S. market during the six-month period preceding the date of designation.[9] The NASD notes that this change is consistent with the 20% Test + Daily Trading Volume Standard requirement contained in Section 2(f)(3)(C) that requires at least 20% of the combined worldwide trading volume in the non-U.S. security to occur in U.S. markets.[10]

The NASD believes that the alternate criteria for non-U.S. securities is appropriate because it will ensure that non-U.S. securities linked to SEEDS will have a significant amount of U.S. market trading volume and a substantial volume of trading covered by a comprehensive surveillance sharing agreement, which gives the NASD the ability to inquire into potential trading problems or irregularities in a marketplace that serves as a significant price discovery market for the non-U.S. security. Thus, the proposed requirement of observable, high trading volume should ameliorate any regulatory concern regarding investor protection and, at the same time, allow investors to trade SEEDS linked to more non-U.S. securities.

The NASD also believes that the proposal will benefit investors by expanding the number of non-U.S. securities that may be linked to SEEDS, thereby providing investors with enhanced investment flexibility. The NASD believes that it is appropriate to now include additional non-U.S. securities within the existing regulatory framework for SEEDS because of the significant level of U.S. investor interest in non-U.S. companies that are highly capitalized and actively traded.

For the foregoing reasons, the NASD believes the proposed rule change is consistent with Section 15A(b)(6) of the Act. Section 15A(b)(6) requires that the rules of a national securities association be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and in general to protect investors and the public interest. In sum, the NASD believes the proposal strikes an appropriate balance between the NASD's need to adapt and respond to innovations in the securities markets and the NASD's concomitant need to ensure the protection of investors and the maintenance of fair and orderly markets.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD believes that the proposed rule change will not result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Comments were neither solicited nor received.

III. Findings and Conclusions

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities association, and, in particular, the requirements of Section 15A(b)(6).[11] In particular, the Commission believes the proposal is consistent with the Section 15A(b)(6) requirements that the rules of a registered securities association be designed to promote just and equitable principles of trade and not to permit unfair discrimination among issuers.

The Commission finds that the proposal to reduce the trading volume requirement for eligible linked securities will expand the number of securities that can be linked to SEEDS while maintaining the requirement that the linked security be an actively traded, highly capitalized common stock, non-convertible preferred stock or ADR. While the proposal reduces the trading volume criteria for securities with market capitalizations in the $1.5 billion and $500 million tiers to 10 million and 15 million shares, respectively (from 20 and 80 million shares, respectively), the Commission nevertheless believes that, together, the applicable capitalization and new trading volume requirements will continue to help ensure that SEEDS are only issued on highly liquid securities of broadly capitalized companies. Accordingly, the Commission believes that the market capitalization and trading volume requirements will continue to help reduce the likelihood of any adverse market impact on the securities underlying SEEDS.

The Commission notes that the NASD has deleted the provision that allows it to list SEEDS on securities not meeting these criteria if the Division of Market Regulation of the SEC concurs. The revised criteria will expand the number of securities eligible for SEEDS trading. The increased flexibility in the SEEDS listing criteria should effectively reduce

---

[3] *See* Securities Exchange Act Release No. 34758 (September 30, 1994), 59 FR 50943 (October 6, 1994).

[4] An issuer of a SEEDS must be an entity that is listed on the Nasdaq National Market or the NYSE, or an affiliate of a company listed on the Nasdaq National Market or the NYSE. Each issuer of a SEEDS must also have a net worth of $150 million. In addition, the market value of a SEEDS offering, when combined with the market value of all other SEEDS offerings previously completed by the issuer and traded on the Nasdaq National Market or a national securities exchange, may not be greater than 25 percent of the issuer's net worth at the time of issuance.

[5] Each issuance of a SEEDS must have: (1) a minimum public distribution of one million SEEDS; (2) a minimum of 400 holders of the SEEDS, provided, however, that if the SEEDS is traded in $1,000 denominations, there must be a minimum of 100 holders; (3) a minimum market value of $4 million; and (4) a term of two to seven years (although a SEEDS on an ADR cannot have a term longer than three years).

[6] The securities linked to SEEDS must: (1) meet certain market capitalization and trading volume requirements, as discussed below; (2) be a U.S. reporting company under the Securities Exchange Act of 1934 ("Act"); (3) be traded on Nasdaq or a national securities exchange; and (4) be subject to last sale reporting. In addition, as discussed below, SEEDS may also be linked to certain non-U.S. companies.

[7] SEEDS linked to a U.S. security may not exceed five percent of the total shares outstanding of such underlying security, absent approval by the SEC. Depending on the percentage of world-wide trading volume in the U.S. market, a SEEDS linked to a non-U.S. security or sponsored ADR may not exceed two, three, or five percent of the total shares outstanding of the non-U.S. security, as discussed below.

[8] *See* Amendment No. 1. The calculation for the 20% Test + Daily Trading Volume Standard does not include foreign markets with which the NASD has in place a comprehensive surveillance sharing agreement.

[9] The other size limitations in the NASD's rule remains unchanged. Accordingly, the size of SEEDS issuances linked to non-U.S. securities will be limited to 3% of the total shares of the underlying security outstanding provided, however, at least 50% of the worldwide trading volume for the security for the six-months prior to listing occurred in the U.S. market, or 5% of the total shares of the underlying security outstanding provided at least 70% of the worldwide trading volume for the security for the six-months prior to listing occurred in the U.S. market.

[10] As with the 20% Test + Daily Trading Volume Standard, foreign markets with which the NASD has in place a comprehensive surveillance sharing agreement are not included in the calculation for purposes of determining the size of eligible SEEDS issuances.

[11] 15 U.S.C. 78o–3(b)(6) (1988).

restrictions will minimize the possibility that trading in such issuances will adversely impact the market for the security to which it is linked.

The Commission finds good cause for approving the proposed rule change and Amendment No. 1 to the proposed rule change prior to the thirtieth day after the date of publication of notice thereof in the **Federal Register** in order to allow the NASD to implement these changes to its SEEDS Listing Standards without delay. The proposal will provide the NASD with increased flexibility in the listing of SEEDS products on both U.S. and non-U.S. securities without compromising investor protection concerns. In addition, the NASD proposal is substantially similar to, and is being approved concurrently with, two American Stock Exchange proposals relating to equity linked notes listing standards, both of which were subject to the full notice and comment period.[15] The Commission notes that no comment letters were received on these Amex proposals. Accordingly, the Commission does not believe the NASD proposal, as amended, raises any new or unique regulatory issues. For these reasons, the Commission believes there is good cause, consistent with Sections 15A(b)(6)[16] and 19(b)(2)[17] of the Act, to approve the proposed rule change and Amendment No. 1 to the proposal on an accelerated basis.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number of the caption above and should be submitted by April 17, 1996.

It therefore is ordered, pursuant to Section 19(b)(2) of the Act,[18] that the proposed rule change (SR–NASD–96–01) is approved, as amended.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[19]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Release No. 34–36993; File No. SR–NYSE–95–39]

Self-Regulatory Organizations; New York Stock Exchange, Inc.; Order Approving Proposed Rule Change Relating to Revised Listing Standards for Equity Linked Derivative Securities ("ELDs")

March 20, 1996.

On November 29, 1995, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] a proposed rule change to revise the trading volume requirements for linked securities underlying ELDs issuances.

Notice of the proposed rule change was published for comment and appeared in the **Federal Register** on December 20, 1995.[3] No comments were received on the proposal. This order approves the proposal.

I. Description of the Proposal

ELDs are non-convertible debt securities of an issuer where the value of the debt is based, at least in part, on the value of another issuer's common stock or non-convertible preferred stock.[4] The purpose of the proposed rule change is to amend the trading volume criteria for the linked security, that is, the security on which the value of the ELDs is based. Currently, under Section 703.21 of the Listed Company Manual, in order to list an ELDs product, the linked security must meet one of the following criteria:

Market Capitalization and Annual Trading Volume

$3 billion and 2.5 million shares.
$1.5 billion and 20 million shares.
$500 million and 80 million shares.

The NYSE now proposes to amend Section 703.21 to provide for greater flexibility in the listing criteria for ELDs. The proposed rule change will lower the trading volume requirements criteria for underlying linked stocks meeting the capitalization requirements of $1.5 billion and $500 million. Under the revised criteria, a linked stock with market capitalization of $1.5 billion would now need an annual trading volume of 10 million shares, as opposed to the current trading volume requirement of 20 million shares. Securities with a market capitalization in excess of $500 million also would be eligible for ELDs listing if they have annual trading volume of 15 million shares, as opposed to the 80 million shares under the current rule.[5]

The Exchange believes the new criteria will provide it with greater flexibility to list these types of securities. The rule change will also delete the current provision of the rule that allows the Exchange to list ELDs that do not meet these criteria if the Division of Market Regulation of the SEC concurs. With the increased flexibility that the new numerical listing criteria will supply, it will no longer be necessary to conduct such a case-by-case review of ELDs listing.

II. Discussion

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6(b)(5).[6] In particular, the Commission believes the proposal is consistent with the Section 6(b)(5) requirement that the rules of an exchange be designed to promote just and equitable principles of trade and not to permit unfair dicrimination between customers, issuers, brokers, and dealers.

[2] 17 CFR 240.19b–4 (1994).

[3] *See* Securities Exchange Act Release No. 36581 (Dec. 13, 1995).

[4] *See* Securities Exchange Act Release No. 33468 (Jan. 13, 1994). These listing standards were subsequently revised in Securities Exchange Act Release Nos. 33841 (March 31, 1994) and 34985 (Nov. 18, 1995).

[5] Under the rule, as amended by this proposal, ELDs could be listed where the linked security met any of the following criteria:

Market Capitalization and Annual Trading Volume

$3 billion and 2.5 million shares.
$1.5 billion and 10 million shares.
$500 million and 15 million shares.

[6] 15 U.S.C. 78f(b)(5) (1982).

or eliminate the need for additional discretion in this area, in addition to providing issuers and the NASD with specific and clear guidance on the applicable listing criteria for a security to underlie a SEEDS.

The Commission also believes that the additional proposed amendments to the listing standards for SEEDS on non-U.S. securities will benefit investors by effectively increasing the number of available SEEDS-eligible non-U.S. securities. At the same time, as described below, the proposal provides safeguards designed to reduce the potential for manipulation and other abusive trading strategies in connection with the trading of non-U.S. security SEEDS and their underlying securities. Accordingly, the Commission believes that the proposal will extend the benefits associated with SEEDS on non-U.S. securities without compromising the effectiveness of the NASD's listing standards for such securities.

Currently, the 50% Test allows the NASD to list SEEDS on a non-U.S. security in the absence of a comprehensive/effective surveillance sharing agreement with the primary exchange where the non-U.S. security trades if the combined trading volume of the non-U.S. security and other related non-U.S. securities occurring in the U.S. market during the six month period preceding the selection of the non-U.S. security for SEEDS listing represents (on a share equivalent basis) at least 50% of the combined world-wide trading volume in such securities.

The Commission has previously concluded that the 50% Test helps to ensure that the relevant pricing market for non-U.S. securities underlying SEEDS (or other similar equity linked debt securities) occurs in the U.S. market.[12] In such cases, the Commission has previously found that the U.S. market is the instrumental market for purposes of deterring and detecting potential manipulations or other abusive trading strategies in conjunction with transactions in the overlying non-U.S. security equity-linked market. Because the U.S. self-regulatory organizations which comprise the U.S. market for non-U.S. securities are members of the Intermarket Surveillance Group,[13] the Commission has concluded that there exists an effective surveillance sharing agreement to permit the NASD to adequately investigate any potential manipulations of the non-U.S. security SEEDS or their underlying securities.

The NASD proposes to modify the 50% Test to include in the U.S. market volume calculation the trading volume in non-U.S. securities and other related non-U.S. securities that occurs in any market with which the NASD has in place a comprehensive/effective surveillance sharing agreement. The Commission believes that this proposed modification of the 50% Test is consistent with the Act and with the Commission's approach in the ELN Approval Orders because it will continue to ensure that the majority of world-wide trading volume in the non-U.S. security and other related non-U.S. securities occurs in trading markets with which the NASD has in place a comprehensive/effective surveillance sharing agreement. The existence of such agreements should deter as well as detect manipulations or other abusive trading strategies and also provide an adequate mechanism for obtaining market and trading information from the non-U.S. markets that the list the non-U.S. security underlying the NASD's SEEDS in order to adequately investigate any potential abuse or manipulation.

Additionally, the Commission finds that the proposed 20% Test + Daily Trading Volume Standard is consistent with the Act and with the ELN Approval Orders. As noted above, the 20% Test + Daily Trading Volume Standard will allow the NASD to list SEEDS on a non-U.S. security if, over the six month period preceding the date of selection of the non-U.S. security for SEEDS trading (1) the combined world-wide trading volume for the non-U.S. security in the U.S. market represents (on a share equivalent basis) at least 20% of the combined world-wide trading volume in the non-U.S. security and other related non-U.S. securities;[14] (2) the average daily trading volume for the non-U.S. security in the U.S. market is at least 100,000 shares; and (3) the trading volume for the non-U.S. security in the U.S. market is at least 60,000 shares per day for a majority of the trading days.

The Commission believes that these requirements present a reasonable alternative to the 50% Test by limiting the actual listing of SEEDS on non-U.S. securities to only those non-U.S. securities that have a significant amount of U.S. market trading volume. This will ensure that the U.S. market is sufficiently active to serve as a relevant pricing market for the non-U.S. security and that the underlying foreign security is readily available to meet the delivery requirements upon exercise of the SEEDS. Accordingly, the Commission believes that the 20% Test + Daily Trading Volume Standard should help to ensure that the U.S. markets serve a significant role in the price discovery of the applicable non-U.S. security and are generally deep, liquid markets.

Finally, the NASD believes, for similar reasons, that it is appropriate to reduce the minimum U.S. trading volume requirements for SEEDS issuances from 30% to 20%. As noted above, the Commission believes that the 20% Test + Daily Trading Volume Standard will ensure that an underlying non-U.S. security has deep and liquid markets to sustain a SEEDS listing. The Commission believes that it is appropriate to adjust the limitations on the size of the SEEDS issuance to correspond to this requirement. Accordingly, where the trading volume in the U.S. market for the underlying non-U.S. security is between 20% and 50% of the worldwide trading volume, the issuance will be limited to 2% of the total outstanding shares of the underlying security. The 20% minimum U.S. trading volume requirement should continue to ensure that the U.S. market is significant enough to accommodate SEEDS trading. In this regard, the Commission believes that these

---

[12] *See* Securities Exchange Act Release Nos. 34549 (August 18, 1994), 59 FR 43873 (August 25, 1994) (SR–Amex–93–46); 34759 (September 30, 1994), 59 FR 50939 (October 6, 1994) (SR–CBOE–94–04); 34758 (September 30, 1994), 59 FR 50943 (October 6, 1994) (SR–NASD–94–49); 34985 (November 18, 1994), 59 FR 60860 (November 28, 1994) (SR–NYSE–94–37); and 35479 (March 13, 1995), 60 FR 14993 (March 21, 1995) (SR–Phlx–95–09) ("ELN Approval Orders").

[13] The Intermarket Surveillance Group ("ISG") was formed on July 14, 1983 to, among other things, coordinate more effectively surveillance and investigative information sharing arrangements in the stock and options markets. *See* Intermarket Surveillance Group Agreement, July 14, 1983. The most recent amendment to the ISG Agreement, which incorporates the original agreement and all amendments made thereafter, was signed by ISG members on January 29, 1990. *See* Second Amendment to the Intermarket Surveillance Group Agreement, January 29, 1990. The members of the ISG are: the American Stock Exchange, Inc.; the Boston Stock Exchange, Inc.; the Chicago Board Options Exchange, Inc.; the Chicago Stock Exchange, Inc.; the NASD; the New York Stock Exchange, Inc.; the Pacific Stock Exchange, Inc.; and the Philadelphia Stock Exchange, Inc. Because of potential opportunities for trading abuses involving stock index futures, stock options, and the underlying stock and the need for greater sharing of surveillance information and for these potential intermarket trading abuses, the major stock index futures exchanges (*e.g.*, the Chicago Mercantile Exchange and the Chicago Board of Trade) joined the ISG as affiliate members of 1960.

[14] The U.S. notes that the 20% Test + Daily Trading Volume standard does not include worldwide trading volume in the non-U.S. security that takes place in a foreign market regardless of the existence of a comprehensive surveillance sharing agreement with the listing exchange. The 20% Test is a minimum U.S. market share trading test intended to permit the listing of SEEDS only on non-U.S. securities that have active and liquid markets in the U.S.

The Commission finds that the proposal to reduce the trading volume requirement for eligible linked securities will expand the number of securities that ELDs can be linked to while maintaining the requirement that the linked security be an actively traded, highly capitalized common stock or ADR. While the proposal reduces the trading volume criteria for securities with market capitalizations in the $1.5 billion and $500 million tiers to 10 million and 15 million shares, respectively (from 20 and 80 million shares, respectively), the Commission nevertheless believes that, together, the applicable capitalization and new trading volume requirements will continue to help ensure that ELDs are only issued on highly liquid securities of broadly capitalized companies. Accordingly, the Commission believes that these requirements will continue to help reduce the likelihood of any adverse market impact on the securities underlying ELDs.

Finally, the Commission notes that the Exchange has deleted the provision that allows it to list ELDs on securities not meeting the market capitalization and trading volume criteria if the Division of Market Regulation of the SEC concurs. The revised criteria will expand the number of securities eligible for ELDs trading. The increased flexibility in the listing criteria should effectively reduce or eliminate the need for additional discretion in this area, in addition to providing issuers and the Exchange with specific and clear guidance on the applicable listing criteria for a security to be eligible to underlie an ELD.

It therefore is ordered, pursuant to Section 19(b)(2) of the Act,[7] that the proposed rule change (SR–NYSE–95–39) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

Margaret H. McFarland,

Deputy Secretary.

[Release No. 34–36966; File No. SR–OCC–95–18]

Self-Regulatory Organizations; The Options Clearing Corporation; Notice of Filing of a Proposed Rule Change Clarifying Rules Regarding the Unavailability of Current Index Values

March 20, 1996.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on November 24, 1995, The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change (File No. SR–OCC–95–18) as described in Items I, II, and III below, which items have been prepared primarily by OCC. On March 19, 1996, OCC amended the proposed rule change to make a technical correction and to incorporate changes made to its rules in a recently approved proposed rule change.[2] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The purpose of the proposed rule change is to clarify the respective rights and responsibilities of OCC and the options exchanges[3] ("exchanges") in the event that the primary market for securities representing a substantial part of the value of an underlying index is not trading at the time when the current index value would ordinarily be determined or in the event that the current index value is unreported or otherwise unavailable for purposes of calculating the exercise settlement amount. The proposed rule change also makes certain technical changes in OCC's by-laws and rules governing index options and Flexibly Structured Index Options Denominated in a Foreign Currency ("FX Index Options").[4]

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] Letter from James C. Yong, First Vice President and General Counsel, OCC, to Jerry W. Carpenter, Assistant Director, Division of Market Regulation, Commission (March 19, 1996).

[3] The exchanges include the American Stock Exchange, the Chicago Board Options Exchange, the New York Stock Exchange, the Pacific Stock Exchange, and the Philadelphia Stock Exchange.

[4] For a complete description of FX Index Options, refer to Securities Exchange Act Release No. 35149 (January 3, 1995), 60 FR 156 (File No. SR–OCC–94–08) (order approving proposed rule change).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, OCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments that it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. OCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.[5]

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

On July 15, 1994, technical difficulties delayed the opening of the National Association of Securities Dealers Automated Quote System ("NASDAQ") until 11:55 a.m., Eastern Time, which was nearly 2½ hours after the time trading normally begins. However, prior to the delayed opening, transactions in NASDAQ listed securities occurred through the telephone and the Instinet on-line trading system. Prices reported in connection with those transactions ("preopening prices") were transmitted to certain designated reporting authorities, and some or all of those reporting authorities used those prices in calculating values for certain stock index options settling at the opening.

An issue arose that day as to whether the exchanges would be able to provide OCC with settlement values for those index options settling on the opening of the market whose component securities included NASDAQ listed issues. The exchanges were concerned that they would be unable to provide OCC with settlement values prior to OCC's exercise processing cut-off time.[6]

While the NASDAQ incident was resolved without significant impact, the incident prompted OCC to take a closer look at its rules respecting the unavailability of current index values and to consider more fully what steps should be taken in such a situation. OCC determined that certain technical changes should be made to its rules to clarify the respective rights and responsibilities of OCC and the exchanges with respect to the reporting of current index values and the determination of settlement values.

OCC is proposing to amend Article XVII, Section 4 of its by-laws, which empowers OCC to fix an exercise settlement amount in the event that OCC determines that the current index value is unreported or otherwise unavailable, to make it clear that OCC has the authority to fix an exercise settlement amount whenever the primary market for securities representing a substantial part of the value of an underlying index is not open for trading at the time when the current index value (*i.e.*, the value used for exercise settlement purposes) ordinarily would be determined. OCC believes this authority is implicit in the language of the present by-law because in such circumstances the current index value would generally be "unreported or otherwise unavailable;" however, the proposed rule change will make OCC's authority explicit.[7]

In addition, the proposed change assigns the responsibility for fixing exercise settlement amounts to a panel consisting of OCC's Chairman and two designated representatives of each exchange on which the affected series is open for trading, one of whom shall be such exchange's representative on OCC's Securities Committee. This procedure to assign the decision-making responsibility to an exchange-controlled panel conforms with the procedures used in making determinations with respect to adjustments made pursuant to Article VI, Section 11.[8] The proposed change authorizes the panel to fix the exercise settlement amount based on its judgment as to what is appropriate for the protection of investors and the public interest including, without limitation, fixing the exercise settlement amount on the basis of the reported level of the underlying index at the close of trading on the last preceding trading day for which a closing index level was reported.

Identical changes also are being made to Article XXIII, Section 5, which governs the fixing of exercise settlement amounts for FX Index Options. Under these proposed changes, the situation contemplated by the last two sentences of the definition of "expiration date" in Article XXIII, Section 1.E.(3) (*i.e.*, where the primary market for underlying securities representing a substantial part of the value of an index is closed on an expiration date) will be explicitly covered by Article XXIII, Section 5; therefore, the last two sentences of Article XXIII, Section 1.E.(3) will be deleted.

The remainder of the proposed changes to the by-laws are technical changes that are being made primarily for the purpose of conforming those by-laws to changes approved in SR–OCC–94–08.[9]

OCC believes the proposed rule change is consistent with the requirements of Section 17A of the Act and the rules and regulations thereunder because it will facilitate the prompt and accurate clearance and settlement of transactions in index options and FX Index Options.

(B) Self-Regulatory Organization's Statement on Burden on Competition

OCC does not believe the proposed rule change will impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

Written comments were not and are not intended to be solicited with respect to the proposed rule change, and none have been received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to ninety days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which OCC consents, the Commission will:

(a) By order approve such proposed rule change or

(b) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of such filing will also be available for inspection and copying at the principal office of OCC. All submissions should refer to the file number SR–OCC–95–18 and should be submitted by April 17, 1996.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[10]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 96–7344 Filed 3–26–96; 8:45 am]

BILLING CODE 8010–01–M

[5] The Commission has modified the text of the summaries submitted by OCC.

[6] The designated reporting authorities were able to calculate and report the settlement values for the affected series to the exchanges, and the exchanges reported those settlement values to OCC in time for OCC to conduct its normal expiration processing. Although the exchanges reported the settlement values somewhat later than usual, OCC clearing member reports were not delayed, and there were no significant impact on OCC's processing.

[7] During the NASDAQ event, OCC stood ready to exercise this authority had it become necessary. However, questions arose as to how OCC would have determined the prices to fix exercise settlement amounts. OCC's proposed changes to Article XVII, Section 4 are intended to address those issues.

[8] Section 11 of Article VI sets forth the procedures by which adjustments are made to options.

[9] *Supra* note 2.

[Release No. 34–36998; File No. SR–Phlx–95–77]

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Order Granting Approval to Proposed Rule Change and Notice of Filing and Order Granting Accelerated Approval to Amendment Nos. 1 and 2 Relating to the Rules of the Allocation, Evaluation and Securities Committee

March 21, 1996.

I. Introduction

On December 22, 1995, the Philadelphia Stock Exchange, Inc. ("Phlx" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change to update its By-Laws and rules relating to the Allocation, Evaluation and Securities Committee.

The proposed rule change was published for comment in Securities Exchange Act Release No. 36752 (Jan. 22, 1996), 61 FR 2557 (Jan. 26, 1996). No comments were received on the proposal.

[10] 17 CFR 200.30–3(a)(12) (1995).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

On March 11, 1996, the Exchange submitted Amendment Nos. 1 [3] and 2 [4] to the proposed rule change. This order approves the proposed rule change, including Amendment Nos. 1 and 2 on an accelerated basis.

II. Description of Proposal

The Exchange proposes to update the Exchange's by-Laws and 500 Series of rules relating to the Allocation, Evaluation and Securities Committee ("Committee"). Specifically, Rules 500, 501, 505, 506, 508, 511 and 515 are being amended in addition to By-Law Article X, Section 10–7.

Composition of Allocation, Evaluation and Securities Committee

Currently, Phlx By-Laws require the committee to consist of not less than nine members, but do not specify a maximum member requirement. Moreover, Phlx By-Laws require that at least but not more than the minimum number of its members required to constitute a majority of all its members be composed of persons who conduct a public securities business. The balance of the Committee is to be composed of persons who are active on the equity trading floor as specialists or floor brokers and also persons who are active on the options trading floor as specialists, registered options traders or floor brokers.

The Exchange proposes to amend By-Law Article X, Section 10–7 and Phlx Rule 500 to revise the Committee size and structure. The By-Law section would continue to require a minimum of nine members on the Committee, but would be amended so that a quorum will always be five members. The Committee would be composed of members from the core committee and the allocation panel. The core committee members are to serve a three-year term and may not serve for more than two consecutive terms. Members of the allocation panel are to serve for a one-year term. Amended Phlx Rule 500 would specify the compositions of the Committee, core committee, and the allocation panel.

Under new Phlx Rule 500(b), the Committee is to consist of the five member core committee and four members of the allocation panel appointed for each meeting on a rotating alphabetical basis. In situations where none of such nine members have particular knowledge of an issue being discussed, the Chairman of the Committee is required to invite extra members of the allocation panel with the relevant knowledge or expertise. Moreover, any member of the core committee and the allocation panel may attend and vote at any meeting of the Committee. Finally, at every meeting in which specialist privileges are to be allocated, at least one core committee member who conducts a public securities business and one other core committee member must be in attendance and not be recused from voting.

Amended Phlx Rule 500(a) would require that the core committee be composed of three persons who conduct a public securities business, one person who is active on the equity trading floor as a specialist or floor broker and one person who is active on the options trading floor as a specialist, registered options trader, or floor broker. Rule 500(a) would also require that the allocation panel be composed of six persons who conduct a public securities business, five persons who are active on the equity trading floor as a specialist or floor broker, five persons who are active on the options trading floor as a specialist, registered options trader or floor broker, and four persons who are active on the foreign currency options trading floor as a specialist, registered options trader or floor broker. The six members of the allocation panel who conduct a public securities business would be divided equally between options and equity persons.

Specialist Appointment

Currently, under Phlx Rule 501, an application to become a specialist unit must include the unit's plan to respond to extraordinary circumstances such as the temporary or permanent loss of the head or key assistant specialist or the sudden influx of order flow in the assigned issue. The Exchange is proposing to amend this rule to require instead that an application specify the unit's back up arrangements endorsed by the parties providing such support. Moreover, amended Phlx Rule 501(b) would require an application for an individual to act as a specialist to include an account of the abilities and background of the applicant. Finally, amended Phlx Rule 501(d) would require that the specialist unit notify promptly the Exchange staff and the Committee in writing of any change in registration information and any material change in the application for any assigned issue once an applicant is approved by the Committee as a specialist unit.

Allocation, Reallocation and Transfer of Issues

Currently, the equity book or options class may be registered in either the name of the unit, the individual acting as specialist, or jointly in the name of the unit and the specialist ("Registrant"). There is no requirement in the rules that the Registrant be an Exchange member or approved specialist.

The Exchange is proposing to amend Phlx Rule 505 to require specifically that all Registrants be Exchange members and approved specialists. Moreover, the Exchange proposes to require equity books or options classes that are subject to a lease to be registered in the name of the Registrant and the name of the unit performing specialist duties be noted on the registration form.

Allocation Application

Currently, Phlx Rule 506 states that applicants for allocation of securities may make and the Committee may request personal appearances. The Exchange proposes to amend Rule 506 so that the Committee would request personal appearances when there are five or more applicants for an allocation. The amended rule, however, would provide that the failure to appear would not disqualify an applicant.

Currently, under Phlx Rule 508, a specialist does not have to seek Committee approval when it proposes to transfer all of its specialist privileges, but it must do so to transfer less than all of its privileges. The Exchange proposes to amend Rule 508 to require all proposed transfers and leases of specialist privileges be subject to prior Committee approval.

The Exchange also proposes to add Commentary .01 to Rule 508 to impose a 45-day moratorium on trading floor location moves when option specialist privileges are transferred except that the Options Committee may shorten this time period if necessary.

[3] See letter from Michele Weisbaum, Associate General Counsel, to Glen Barrentine, Senior Counsel, SEC, dated March 7, 1996. Amendment No. 1 amends Rule 500(a) to require that the six public members of the allocation panel be evenly divided between options and equity persons and adds new Commentary .01 to Rule 500 to require the Committee chairman to appoint extra panelists with relevant expertise if the alphabetically chosen allocation panel members and core committee members do not have such knowledge. Amendment No. 1 also withdraws portions of the filing to be reproposed in a related filing pending with the Commission (SR–Phlx–95–91) and adds a reference to the Foreign Currency Options Committee in paragraph (c) to By-Law Article X, Section 10–7.

[4] See letter from Michelle Weisbaum, Associated General Counsel, to Jennifer Choi, Attorney, Division of Market-Regulation, SEC, dated March 8, 1996. Amendment No. 2 submits in this filing an amendment to Phlx Rule 515(b) that was originally submitted in File No. SR–Phlx–95–91. Amended Phlx Rule 515(b) would refer to the new allocation reviews to be conducted within 90 days.

Specialist Performance Evaluation [5]

Under Phlx Rule 511 as proposed to be amended, the Committee, in addition to allocating new equity books and options classes and reallocating existing equity books and options classes, would approve transfers of existing equity books and options classes to applicants based on the results of the evaluations conducted pursuant to Rule 515 and other such factors as the Committee deems appropriate. As a result, Phlx Rule 511 as proposed to be amended would apply the criteria currently set forth in the rule for making allocation and reallocation decisions to transfer decisions. The Exchange is also proposing to include among the factors that the Committee may consider in making such decisions the order flow commitments, any prior transfers of specialist privileges by the applicant and the reasons therefore.

Currently, Rule 511(b) provides that all allocations are to be made initially on a temporary basis for a period up to 60 days within which time the Committee may conduct a special review. The Exchange proposes to increase the temporary allocation period to a period up to 90 days. At present, Phlx Rule 511 also provides for the Committee to conduct two kinds of reviews of specialist units; routine quarterly reviews and transfers and material changes reviews. Rule 511(c), as proposed to be amended, would continue to provide for routine quarterly reviews and proposed Rule 511(d)(2) would continue to provide for a special review in the event of a transfer or material change. In addition, proposed Rule 511(d)(1) would provide for a new special review after a new allocation.

New Phlx Rule 511(d)(2) would require the Committee to commence a specialist review pursuant to Rule 515 within 60 days after a transfer (including a lease) of one or more equity books or options classes has become effective or when there has been a material change in the specialist unit. Moreover, in cases where a transfer has been effected, the Exchange proposes that the Committee would evaluate the performance of the Registrant and if the new unit's performance is below minimum standards, the unit would be given 30 days in which to improve its performance prior to beginning reallocation proceedings.

For new allocations, new Phlx Rule 511(d)(1) would require the Committee to commence special reviews within 90 days after one or more equity books or options classes have been allocated. The new allocations reviews would take into account whether the Registrant is complying with the commitments that it made either orally at an appearance before the Committee or on its written application. If the Committee determines that the Registrant has not complied with any of the commitments that it made when applying for the equity book or options class including, but not limited to commitments regarding capital, personnel, order flow, and PACE, the Registrant would be afforded 30 days in which to comply with such commitments and if it does not do so, the Committee would institute proceedings to determine whether to remove and reallocate one or more securities.

Specialist Evaluations

The Exchange proposes to amend Phlx Rule 515(b) to refer to the new allocation reviews to be conducted within 90 days after the Committee has allocated a security. This amendment is intended to make Rule 515(b) consistent with amended Phlx Rule 511(d)(1).

Foreign Currency Options

Finally, the Exchange proposes various amendments to the rules to include references to foreign currency options and the Foreign Currency Options Committee where appropriate.

III. Discussion

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, with the requirements of Section 6(b).[6] The Commission believes the proposal is consistent with the Section 6(b)(5) requirements that the rules of an exchange be designed to promote just and equitable principles of trade, to prevent fraudulent and manipulative acts, and, in general, to protect investors and the public interest. Moreover, the Commission finds that the rule change is consistent with Section 11(b) of the Act [7] and Rule 11b–1 thereunder,[8] which allow exchanges to promulgate rules relating to the specialists' obligations to maintain fair and orderly markets.

The Commission fully supports Phlx's effort to evaluate its current allocation policies and address issues that have arisen since the initial adoption of the policies in 1987.[9] For the reasons set forth below, the Commission believes that the amended By-Law and rules relating to the Allocation, Evaluation and Securities Committee should enhance the Exchange's allocation process and protect investors and the public interest.

Specialists play a crucial role in providing stability, liquidity and continuity in the trading of securities. Among the obligations imposed upon specialists by the Exchange, and by the Act and the rules thereunder, is the maintenance of fair and orderly markets in their designated securities. To ensure that specialists fulfill these obligations, it is important that the Exchange develop and maintain securities allocation procedures and policies that ensure that securities are allocated in an equitable and fair manner and that all specialists have a fair opportunity for allocations based on established criteria and procedures. To this end, the Commission believes that meaningful and effective allocation policies would improve the allocation system.

The Commission believes that amending the composition of the Committee should provide an opportunity for expertise and objectivity [10] on the Committee, which in turn, should promote suitable matches between specialist units and the securities to be allocated. The Commission believes that the amended quorum requirement would enable the Committee to meet and make decisions

[5] Concurrently, with this proposed rule change, the Exchange has submitted File No. SR–Phlx–95–91, which proposes to revise the options specialist evaluation form and review procedure. See Securities Exchange Act Release No. 36776 (Jan. 26, 1996), 61 FR 3748 (Feb. 1, 1996).

[6] 15 U.S.C. 78f(b).

[7] 15 U.S.C. 78k(b).

[8] 17 CFR 240.11b–1.

[9] The rules initially were approved by the Commission as an eight month pilot program on May 21, 1987. See Securities Exchange Act Release No. 24496 (May 21, 1987), 52 FR 20183 (May 29, 1987). On February 23, 1988, the pilot program was extended indefinitely until further action was taken by the Commission. See Securities Exchange Act Release No. 25388 (Feb. 23, 1988), 53 FR 6725 (Mar. 2, 1988). The rules were permanently approved on June 26, 1991. See Securities Exchange Act Release No. 29389 (June 26, 1991), 56 FR 30604 (July 3, 1991).

[10] The Exchange has represented to the Commission that the Exchange applies Phlx By-Law Article IV, Section 4–6, which provides that "no person shall participate in the adjudication of any matter in which he is personally interested," to the conduct of all standing committee, subcommittee, hearing panel and panel members. In this regard, the Exchange assures the Commission that no member of the Allocation, Evaluation and Securities Committee or any subcommittee or panel thereof may participate in the deliberation and/or voting on any award or reallocation of a book or options class in which such member or his affiliated firm will have an interest in the outcome. See letter from William W. Uchimoto, First Vice President and General Counsel, Phlx, to Jennifer S. Choi, Attorney, Division of Market Regulation, SEC, dated March 20, 1996.

as necessary on short notice while still ensuring that various interests are represented at the meetings so that such decisions are made fairly.

With respect to the Committee, core committee and the allocation panel, the Commission believes that the proposed compositions would adequately represent the options and equity floors and the public business perspective of the Exchange as well as ensure that no one group dominates the committees. The Committee is to be composed of the five member core committee and four members of the allocation panel appointed for each meeting on a rotating basis. In situations where the Committee does not represent or adequately represent constituencies that are affected or interested in the issues being discussed at a particular meeting, the Chairman of the Committee would invite extra members of the allocation panel with the relevant knowledge and expertise. Moreover, any member would always have the option of attending and voting at any meeting. Conducting each meeting with a combination of persons with the relevant expertise and those with differing perspectives should contribute to an opportunity for a fair and equitable resolution of issues. Finally, the requirement that at least two core committee members (including one conducting a public securities business) be part of the quorum would ensure a minimum level of experience at every meeting.

The Commission believes that the Exchange's proposal to require the applications for specialist appointments to specify the unit's back up arrangement endorsed by the parties providing such support and the abilities and background of the applicant would help ensure that the Committee evaluates an application with the relevant information. Moreover, the proposal that the specialist unit notify promptly the Exchange staff and the Committee in writing of any change in registration information and any material change in the application for any assigned issue would assist the Exchange in determining whether a particular specialist unit continues to be capable of performing its specialist functions.

The Exchange also proposes to amend Rule 506 so that the Committee would request personal appearances before it when there are five or more applicants for an allocation. The Commission does not believe this requirement would be too onerous on the applicants, especially because the failure to appear would not disqualify an applicant.

The Exchange also proposes to require that all proposed transfers and leases of specialist privileges be subject to prior Committee approval. The Commission believes that this amendment would allow the Exchange to monitor the transfers and leases of specialist privileges more carefully and consider the qualifications of proposed transferees and lessees before the specialist privileges are transferred or leased. This prior review would enable the Exchange to reject those units or specialists that the Exchange believes are not qualified for such responsibilities.

The Exchange also proposes to amend Phlx Rule 511 to require the Committee to approve transfers of existing equity books and options classes to applicants based on the results of the evaluations conducted pursuant to Rule 515 and other factors that the Committee may deem appropriate. The Commission believes that evaluating transfers of securities based on criteria already being used for allocating new securities and reallocating existing securities is appropriate because the concerns in allocating new securities and reallocating existing securities are equally applicable to transfers of existing securities.

With respect to transfer of option specialist privileges, the Exchange proposed a 45-day moratorium on trading floor locations moves although the Options Committee may shorten this time period if necessary. The Commission believes that this alternative is reasonable to give staff and traders in the crowd time to prepare for the move.

The Exchange also proposes to extend the period for which allocations are temporarily made to 90 days. This extension of time would allow the Exchange more time to evaluate whether an allocation was appropriate made.

The Exchange also amends the Transfer and Material Changes Reviews and proposes a new type of "special review." For transfers and material changes, amended Rule 511(d)(2) would require the Committee to commence a specialist review pursuant to Rule 515 within 60 days after a lease as well as a transfer or when there has been a material change in the specialist unit. The Commission believes that this proposal would provide the Exchange with an opportunity to review leases as well as transfers of specialist privileges to promote an efficient allocation program. In situations where a transfer has been effected, the Exchange proposes that the Committee evaluate the performance of the unit, which must improve its performance within 30 days if it falls below minimum standards. The Commission believes that this allowance of time to improve performance is reasonable.

The Exchange also proposes to conduct reviews of new allocations within 90 days after the security has been allocated by the Committee. The Committee would evaluate the unit based on the representation it made either orally at an appearance before the Committee or on its written application. The unit would be given 30 days to comply with the representations it made before the Committee would institute proceedings to determine whether to reallocate the securities. The Commission believes that the proposal would provide the Exchange with a reasonable time period to evaluate the performance of the specialist unit and that it is appropriate to evaluate the unit based on the representations it made either orally or in writing to the Committee.

The Commission finds good cause for approving Amendment Nos. 1 and 2 to the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof. Amendment No. 1 assures the Commission that the Committee would have adequate representation and expertise to conduct each meeting efficiently and reach resolutions to issues fairly and withdraws certain amendments that are to be refiled in a related rule filing.[11] Amendment No. 2 also includes in this filing a proposed rule change (originally submitted in File No. SR–Phlx–95–91) that references another rule that is being amended in this filing. These amendments to the proposal strengthen the Phlx's allocation policies. In addition, the Exchange's original proposal was published in the **Federal Register** for the full statutory period and no comments were received.[12] Based on the above, the Commission finds that there is good cause, consistent with Section 6(b)(5) of the Act, to accelerate approval of Amendment Nos. 1 and 2.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning Amendment Nos. 1 and 2. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR–Phlx–95–77 and should be submitted by April 17, 1996.

V. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[13] that the proposed rule change (SR–Phlx–95–77) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[14]

Jonathan G. Katz,

Secretary.

BILLING CODE 8025–01–P

SOCIAL SECURITY ADMINISTRATION

Notice of Proposed Change in Magnetic Media Filing Requirements for Form W–2 Wage Reports; Request for Comments

SUMMARY: Notice is hereby given that SSA is currently considering a change to its Technical Instruction Bulletin for Magnetic Media Reporting (TIB–4) under which SSA would no longer accept annual Form W–2 wage reports filed on 8 inch diskettes. Instead, such wage reports would have to be filed by employers or third-party preparers on 5¼ inch or 3½ inch diskettes; on ½ inch magnetic tape; or on 3480 cartridges. Before further consideration is given to this proposal, SSA would like to receive any comments the public may offer on the proposed change.

DATES: Comments must be received on or before April 26, 1996.

ADDRESSES: Comments on this proposal should be mailed or delivered to Norman Goldstein, Senior Financial Executive, Social Security Administration, Room 451 Altmeyer Building, Baltimore, MD 21235; or sent by telefax to (410) 966–8753.

FOR FURTHER INFORMATION CONTACT: Richard Harron, Chief, Earnings Records and Reporting Branch, Office of Program Benefits Policy, Social Security Administration, 3–F–26 Operations Building, Baltimore, MD 21235, telefax (410) 966–9214.

SUPPLEMENTARY INFORMATION: Under section 6011(e) of the Internal Revenue Code and section 301.6011–2 of Internal Revenue Service (IRS) Regulations, employers who file 250 or more Form W–2 (Wage and Tax Statement) returns in a year after 1986 must file them on magnetic media. Employers with fewer returns may file on magnetic media on a voluntary basis.

Pursuant to an agreement with the IRS, SSA receives and processes employers' Form W–2 wage returns for use by both agencies. Each tax year, SSA sets out the requirements for filing magnetic media Form W–2 reports in its TIB–4 publication, which is sent to each employer who filed such reports in the preceding year. Magnetic media reports that do not meet these requirements are returned unprocessed to the submitter.

Most diskette reports filed by employers with SSA are filed on 3½ inch or 5¼ inch diskettes based upon an MS-DOS operating system. About 15% of the diskettes received by SSA are 8 inch diskettes produced by older computer equipment which is more expensive to repair and uses a different operating system. Equipment for the 8 inch diskettes is rapidly becoming obsolete and the number of returns filed in this manner is declining. SSA's continued processing of diskettes based on the two different operating systems requires the maintenance of equipment for both systems and special handling to "translate" 8 inch diskette data to a usable form. Moreover, the TIB–4 requirements for all filers are of necessity more complex. The consequence is slower and more costly wage reporting processes, with the additional costs having to be borne, in part, by other employers using more up-to-date equipment.

SSA is also exploring ways to simplify its disk reporting process as well as to receive more Form W–2 wage reports by electronic data transmission over telephone lines. SSA's objective is to achieve a more efficient process for both the Agency and employers. However, such efforts cannot be fully effective so long as SSA maintains requirements based on two operating systems. For these reasons and the readily available alternatives for diskette filers in the computer market, SSA is considering the possibility of eliminating 8 inch diskette from its list of acceptable magnetic media reporting formats.

Dated: March 20, 1996.

Norman Goldstein,

Senior Financial Executive.

BILLING CODE 4190–29–P

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 96–011]

National Environmental Policy Act: Agency Procedures for Categorical Exclusions

AGENCY: Coast Guard, DOT.

ACTION: Notice of agency policy.

SUMMARY: The Coast Guard is announcing a change to its procedures and policies concerning agency actions which do not individually or cumulatively have a significant effect on the human environment under the National Environmental Policy Act

(NEPA). The change concerns the issuance of regatta and marine parade event permits and the promulgation of regulations issued in conjunction with those permits. The change is needed to avoid unnecessary or duplicative environmental analyses.

FOR FURTHER INFORMATION CONTACT: Ms. Kebby Hardy, Environmental Management Division, (202) 267–6034.

SUPPLEMENTARY INFORMATION:

Background and Purpose

Under regulations implementing the National Environmental Policy Act (NEPA) (40 CFR parts 1500 through 1508), each Federal agency is required to adopt procedures to supplement those regulations (40 CFR 1507.3). The Coast Guard's procedures and policies are published as a Commandant Manual Instruction entitled "National Environmental Policy Act Implementing Procedures and Policy for Considering Environmental Impacts" (COMDTINST M16475.1 series). On July 29, 1994, the Coast Guard published a notice in the **Federal Register** (59 FR 38654) announcing the revision of section 2.B.2. of the instruction. Section 2.B.2.e. lists the proposed agency actions that are categorically excluded from the requirement that the actions undergo the analysis that accompanies preparation of an Environmental Assessment (EA) or an Environmental Impact Statement (EIS).

This notice announces further changes to 2.B.2.e. (35), the categorical exclusion that addresses the approval of regatta and marine parade event permits ("CE 35"), and section 2.B.2.e. (34)(h), the categorical exclusion that addresses the promulgation of regulations (special local regulations, regulated navigation areas, security zones, or safety zones, etc.) issued in conjunction with regatta or marine parade event permits ("CE 34(h)").

CE 35 and CE 34(h) are revised. These revisions are needed to avoid unnecessary environmental analyses under CE 34 and duplicative analyses under CE 34(h).

Discussion of Changes

(1) Changes to CE 35.

After conducting numerous environmental analyses (including programmatic environmental assessments) of regatta and marine parade events, the Coast Guard has concluded that these events do not normally have a significant impact on the environment if held away from environmentally sensitive areas. These areas may include, but are not limited to, wildlife refuges, wetlands, historic areas, and other, similar areas designated as environmentally sensitive by governmental environmental agencies. The Coast Guard also concluded that some events held in or near these areas, by their nature, do not have a significant impact. For example, it may be acceptable to hold an event in an area designated as environmentally sensitive if the event is rowing, sailing, or swimming event.

The previous CE 35 (i.e., as amended on July 29, 1994) was based on the type of event; the number, type and size of the vessels expected to participate in the event; and the number of spectator vessels expected. Based on additional environmental analyses and documentation prepared for permitting regatta and marine parade events since the previous CE 35 took effect, the Coast Guard concluded that the location of the event, in relation to environmentally sensitive areas, was a more accurate determining factor than the type of event or the size and number of vessels involved. As previously written, CE 35 tended to cause the preparation of unnecessary environmental assessments for larger events that should have been categorically exclude and, in turn, tended to exclude smaller events that, because of their location, might have justified closer environmental scrutiny.

New CE 35(a) establishes a qualitative, environmentally-based threshold to categorically exclude Coast Guard approval of all regatta and marine parade event permits for events held in areas that are not environmentally sensitive. New CE 35(b) establishes a qualitative, environmentally-based threshold to categorically exclude Coast Guard approval of regatta and marine parade event permits for events to be held in environmentally sensitive areas when the proposed marine event is determined to have no significant environmental effects. New CE 35 eliminates the need for additional time and resources to analyze the environmental effects of marine event permits that were found to be environmentally benign.

2. *CE 34(h).*

CE 34(h) is amended to provide that, if the environmental analysis conducted for a regatta or marine parade event permit includes an analysis of the impact of regulations, if any, issued in conjunction with the permit, the regulations themselves do not have to be analyzed again. The previous CE 34(h) was not clear on this point and could be construed to require duplicate analyses.

Relation of New Provisions to the Rest of Section 2.B.2

New CE 34(h) and CE (35) will continue to be applied in conjunction with the requirements of section 2.B.2., including section 2.B.2.b.,which sets forth the limitations on using categorical exclusions, and section 2.B.2.c., which sets forth the documentation requirements. The limitations in section 2.B.2.b. will continue to require either an environmental assessment or impact statement when the event will result in potentially significant impacts resulting from either the participants (e.g., noise or emissions) or the spectators (e.g., air impacts of potential traffic jams or solid waste generation).

For the reasons set out in the preamble, the Cost Guard announces the following amendments to sections 2.B.2.e.(34)(h) and 2.B.2.e.(35) of COMDTINST M16475.1B:

2.B.2.e. Categorical Exclusion List

* * * * *

(34) * * *

(h) Special local regulations issued in conjunction with a regatta or marine parade; provided that, if a permit is required, the environmental analysis conducted for the permit included an analysis of the impact of the regulations. (Checklist and CED not required.)

* * * * *

(35) Approvals of regatta and marine parade event permits for the following events:

(a) Events that are not located in, proximate to, or above an area designated as environmentally sensitive by an environmental agency of the Federal, State, or local government. For example, environmentally sensitive areas may include such areas as critical habitats or migration routes for endangered or threatened species or important fish or shellfish nursery areas.

(b) Events that are located in, proximate to, or above an area designated as environmentally sensitive by an environmental agency of the Federal, State, or local government and for which the Coast Guard determines, based on consultation with the Governmental agency, that the event will not significantly affect the environmentally sensitive area. (Checklist and CED required.)

Dated: March 22, 1996

E.J. Barrett,

RADM, Chief, Systems Directorate.

BILLING CODE 4910–14–M

Federal Aviation Administration

Aviation Rulemaking Advisory Committee Meeting on Aircraft Certification Procedures Issues

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of meeting.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting of the Federal Aviation Administration's Aviation Rulemaking Advisory Committee to discuss aircraft certification procedures issues.

DATES: The meeting will be held on April 11, 1996, at 9:00 a.m. Arrange for oral presentations by April 4, 1996.

ADDRESSES: The meeting will be held at the General Aviation Manufacturers Association, Suite 801, 1400 K Street, NW, Washington, DC 20005.

FOR FURTHER INFORMATION CONTACT: Ms. Jeanne Trapani, Office of Rulemaking, 800 Independence Avenue, SW, Washington, DC 20591, telephone (202) 267–7624.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. II), notice is hereby given of a meeting of the Aviation Rulemaking advisory committee to be held on April 11, 1996, at the General Aviation Manufacturers Association, Suite 801, 1400 K Street, NW, Washington, DC 20005. The agenda for the meeting will include:

- Opening remarks
- Training
- Working Group status reports
- Production Certification
- Parts
- Delegation
- ICPTF
- ELT
- New Business

Attendance is open to the interested public, but will be limited to the space available. The public must make arrangements by April 4, 1996, to present oral statements at the meeting. The public may present written statements to the committee at any time by providing 25 copies to the Assistant Executive Director for Aircraft Certification procedures or by bringing the copies to him at the meeting. Arrangements may be made by contacting the person listed under the heading **FOR FURTHER INFORMATION CONTACT.**

Issued in Washington, DC, on March 21, 1996.

Ava Robinson,

Assistant Executive Director for Aircraft Certification Procedures, Aviation Rulemaking Advisory Committee.

BILLING CODE 4910–13–M

Notice of Intent To Rule on Application To Use the Revenue From a Passenger Facility Charge (PFC) Collected at Los Angeles International Airport (LAX), Los Angeles, CA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to use the revenue from a PFC at Los Angeles International Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101–508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

DATES: Comments must be received on or before April 26, 1996.

ADDRESSES: Comments on this application may be mailed in triplicate to the following mailing address: Federal Aviation Administration, Airports Division, P.O. Box 92007, WWPC, Los Angeles, CA 90009, or delivered in triplicate to the following street address: Federal Aviation Administration, Airports Division, 15000 Aviation Blvd., Hawthorne, CA 90261.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Jerald K. Lee, Deputy Executive Director, Los Angeles Department of Airports, One World Way, Los Angeles, CA 90045.

Air carriers and foreign air carriers may submit copies of written comments previously provided to the Los Angeles Department of Airports under section 158.23 of Part 158.

FOR FURTHER INFORMATION CONTACT: Mr. John P. Milligan, Supervisor, Standards Section, AWP–621, Airports Division, Federal Aviation Administration, 15000 Aviation Blvd., Hawthorne, CA 90261, Tel. (310) 725–3621. The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to use the revenue from a PFC at LAX under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101–508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

On February 28, 1996 the FAA determined that the application to use the revenue from a PFC submitted by the Los Angeles Department of Airports was substantially complete within the requirements of section 158.25 of Part 158. The FAA will approve or disapprove the application, in whole or in part, no later than May 31, 1996.

The following is a brief overview of the application, PFC application number AWP–96–03–C–00–LAX:

Level of the PFC: $3.00.

Actual charge effective date: July 1, 1993.

Actual charge expiration date: December 31, 1995.

Total estimated net PFC revenue collected: $168,000,000.

Total estimated PFC revenue to be used: $52,000,000.

The balance of approximately $116,000,000 in PFC revenue is concurrently proposed for the Ontario Terminal Development Program at Ontario International Airport (ONT) under a separate PFC application.

Brief description of proposed projects:

ONT: Airport Drive-West End; Transmitter/Receiver Relocation; Access Control; Taxiway N Westerly Extension, and LAX: Taxiway K Easterly Extension-Phase II; Remote Aircraft Boarding; Facilities/Boarding Facilities Special Equipment; Interline Baggage Remodel-Tom Bradley International Terminal (TBIT); Approach Lighting System Runway 6R; Southside Taxiways 19, 24, 43 & Extensions 48 & 49; Runway 24R Paved Stopway; High Speed Taxiway 85V; TBIT Improvements including: Flight Information Displays System (FIDS), In-transit Lounge, Baggage System Realignment (Interline), Domestic Carousels, and 2nd Level Structure.

Class or classes of air carriers which the public agency has requested not be required to collect PFCs: Air Taxi/Commercial Operators (ATCO) filing Form 1800–31, including: American Trans Air Execujet; CFI, Inc.; Chrysler Aviation; Corporate Flight, Inc.; Elliott Aviation; Geneva International; Key Air; KMR Aviation; Louisiana Pacific Corporation; Mayo Aviation, Inc.; Mcathco Enterprises, Inc.; Modesto Executive Air Charter; Morgan Equipment; Raleigh Jet Charter; Samaritan Health Services; Valko, Inc.; Windstar Aviation Corp.; Yecny Enterprises, Inc.

Any person may inspect the application in person at the FAA office

listed above under **FOR FURTHER INFORMATION CONTACT.**

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the Los Angeles Department of Airports, Los Angeles International Airport.

Issued in Los Angeles, California on March 7, 1996.

Herman C. Bliss,

Manager, Airports Division, Western-Pacific Region.

BILLING CODE 4910–13–M

National Highway Traffic Safety Administration

[Docket No. 95–76; Notice 2]

Ford Motor Company; Grant of Application for Decision of Inconsequential Noncompliance

Ford Motor Company (Ford) of Dearborn, Michigan determined that some of its vehicles fail to comply with the display identification requirements of 49 CFR 571.101, Federal Motor Vehicle Safety Standard (FMVSS) No. 101, "Controls and Displays," and filed an appropriate report pursuant to 49 CFR Part 573, "Defect and Noncompliance Reports." Ford also applied to be exempted from the notification and remedy requirements of 49 U.S.C. Chapter 301—"Motor Vehicle Safety" on the basis that the noncompliance is inconsequential to motor vehicle safety.

Notice of receipt of the application was published on September 18, 1995, and an opportunity afforded for comment (60 FR 48195). This notice grants the application.

Footnote 3 in Table 2 of Standard No. 101 specifies that "[i]f the odometer indicates kilometers, then 'KILOMETERS' or "km" shall appear, otherwise, no identification is required." Ford manufactured approximately 300,000 vehicles (1995 model year Rangers, Explorers, Crown Victorias, and Grand Marquis, certain 1994 and 1995 Mustangs, and certain 1995 Ford-built Mazda B-Series pickup trucks) a relatively few of which do not comply with the display identification requirements of Standard No. 101. Of that total population of 300,000 vehicles, at least 24, but not more than 124 vehicles were manufactured with an odometer that measures distance in units of kilometers but is not labeled as such as Standard No. 101 requires. Ford has already found and corrected 24 of these noncompliant odometers in service; therefore, up to 100 of them could still exist.

Ford supported its application for inconsequential noncompliance with the following:

In Ford's judgment, this condition is inconsequential as it relates to motor vehicle safety. [Ford's] basis for this belief is that: 1) an owner of an affected vehicle will readily recognize the condition and return the vehicle to a Ford dealer for correction; 2) even if the condition were to go undetected, the role of the odometer in alerting drivers to potential safety-related problems is minimal; and 3) no reports of accidents or injuries related to this condition are known or expected.

Ford believes, as evidenced by those odometers already identified by owners, that this condition becomes obvious to an owner early in the "life" of a vehicle because of more rapid mileage accumulation, better than expected fuel economy, etc., and that an owner will seek repair for the condition through a Ford dealer. Ford will continue to remedy the condition of any of the vehicles brought to its attention at no cost to the owners, under normal warranty terms.

With respect to the relationship of the odometer to safety, in past rulemaking (FR Vol 47, No. 216 at 50497) the agency concluded that the role of the odometer in alerting drivers to potential safety-related problems is not crucial. This conclusion was among those leading to the rescission of Federal Motor Vehicle Safety Standard No. 127, Speedometers and Odometers. That standard contemplated that the purpose of the odometer requirement was twofold. First, it was to inform purchasers of used vehicles of the actual mileage of the vehicles they were purchasing to enable them to ascertain the probable condition of the vehicle. Second, it was to provide an owner with information so that he or she could maintain a periodic maintenance schedule. In rescinding Safety Standard No. 127, the agency acknowledged that its reliance on the Tri-Level Study of the Causes of Traffic Accidents by the Indiana University Institute for Research in Public Safety, which led to the odometer requirement, was misplaced. The agency concluded that although the study found that problems with vehicle systems were causal or contributing factors in up to 25 percent of the accidents studied—such as problems with the brake system, tires, lights and signals, for example—all of those causes involved components which must be periodically replaced or serviced regardless of mileage. The agency thereby concluded that deterioration in performance, such as brake pulling, or in appearance, such as tire wear, etc., are readily apparent to the driver and should do more to alert the driver to potential safety-related problems than the distance traveled indication on the odometer.

Ford agrees with the agency's conclusion that the odometer reading is not a crucial factor in alerting drivers to potential safety-related vehicle problems, and, therefore, it submits that the absence of the "km" designation is not crucial in this regard. We believe the vehicles that are the subject of this petition present no direct or indirect risk to motor vehicle safety. Furthermore, in the case of the vehicles in question, even if the odometer indication were a crucial indicator or required periodic maintenance, the odometer reading, if relied on for this purpose, would cause a driver to seek maintenance sooner than required because the indicated mileage would be approximately 1.6 times greater than the distance actually traveled.

Therefore, while the absence of the "km" designation is technically a noncompliance, and the odometer of the affected vehicles registers distance traveled in kilometers while the speedometer registers in miles per hour, we believe, for the reasons cited above, the condition presents no risk to motor vehicle safety.

No comments were received on the application.

An accurate recording of mileage on a vehicle is relevant to complying with the manufacturer's recommended maintenance schedule. When the schedule is expressed in miles and the odometer records in kilometers, a vehicle owner who is not cognizant of the noncompliance will be alerted to the apparent time for maintenance before it is, in fact, needed under the maintenance schedule. This cannot be termed a negative impact upon safety. NHTSA agrees with the applicant that "the condition presents no risk to motor vehicle safety".

Ford believes that an owner of a noncompliant vehicle will readily recognize the seemingly excessive accumulation of mileage and "seek service through their Ford dealers." This service most probably is replacement of the metric odometer with one that registers miles. NHTSA urges Ford to ask its dealers to provide the vehicle owner, at the time of odometer replacement, with a statement noting the distance accumulated prior to replacement so that the owner will be able to provide an accurate mileage statement at the time the vehicle is transferred to its next owner, as required by 49 CFR Part 580, *Odometer Disclosure Requirements.*

In consideration of the foregoing, it is hereby found that the applicant has met its burden of persuasion that the noncompliance herein described is inconsequential to safety. Accordingly, Ford Motor Company is hereby exempted from providing notification of the noncompliance pursuant to Sec. 30118, and from remedying the noncompliance pursuant to Sec. 30120.

(49 U.S.C. 30118, 30120; delegations of authority at 49 CFR 1.50 and 501.8).

Issued on: March 22, 1996.

Barry Felrice,

Associate Administrator, for Safety Performance Standards

Surface Transportation Board

Availability of Environmental Assessments

Pursuant to 42 U.S.C. 4332, the Surface Transportation Board has prepared and made available environmental assessments for the proceedings listed below. Dates environmental assessments are available are listed below for each individual proceeding.

To obtain copies of these environmental assessments contact Ms. Victoria Rutson or Ms. Judith Groves, Surface Transportation Board, Section of Environmental Analysis, Room 3219, Washington, DC 20423, (202) 927–6211 or (202) 927–6246. Comments on the following assessment are due 15 days after the date of availability:

AB No. 459 (Sub-No. 1X), Central Railroad Company of Indiana, Abandonment Exemption in Dearborn County, Indiana. EA available 3/15/96.

AB No. 406 (Sub-No. 5X), Central Kansas Railway, Limited Liability Company—Abandonment Exemption—in Clark and Comanche Counties, Kansas. EA available 3/15/96.

AB No. 406 (Sub-No. 6X), Central Kansas Railway, Limited Liability Company—Abandonment Exemption—in Marion and McPherson Counties, Kansas. EA available 3/15/96.

Vernon A. Williams,

Secretary.

Release of Waybill Data

The Commission has received a request from McKinsey & Company for permission to use certain data from the Board's 1994 Carload Waybill Sample. A copy of the request (WB495—3/15/96) may be obtained from the Office of Economic and Environmental Analysis.

The waybill sample contains confidential railroad and shipper data; therefore, if any parties object to this request, they should file their objections with the Director of the Board's Office of Economic and Environmental Analysis within 14 calendar days of the date of this notice. The rules for release of waybill data are codified at 49 CFR 1244.8.

Contact: James A. Nash, (202) 927–6196.

[Finance Docket No. 32825] [1]

Dakota, Missouri Valley and Western Railroad, Inc.—Lease and Operation Exemption—Soo Line Railroad Company

AGENCY: Surface Transportation Board.

ACTION: Notice of exemption.

SUMMARY: The Board exempts from the prior approval requirements of 49 U.S.C. 11343–45 the lease and operation by Dakota, Missouri Valley and Western Railroad, Inc., of approximately 48.68 miles of rail line owned by the Soo Line Railroad Company between milepost 516.02 at Washburn, ND, and milepost 467.61 and milepost 467.06 on the legs of the wye at Max, ND. The exemption is subject to standard employee protective conditions.

DATES: This exemption is effective on April 16, 1996. Petitions to stay must be filed April 8, 1996. Petitions to reopen must be filed by April 11, 1996.

ADDRESSES: Send pleadings referring to Finance Docket No. 32825 to: (1) Office of the Secretary, Case Control Branch, Surface Transportation Board, 1201 Constitution Avenue, N.W., Washington, DC 20423; and (2) Petitioner's representative: Thomas J. Litwiler, Oppenheimer, Wolff & Donnelly, 1020 Nineteenth Street, N.W. Suite 400, Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Beryl Gordon, (202) 927–5610. [TDD for the hearing impaired: (202) 927–5721.]

SUPPLEMENTARY INFORMATION: Additional information is contained in the Board's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: DC News and Data, Inc., Room 2229, 1201 Constitution Avenue, N.W., Washington, DC 20423. Telephone: (202) 289–4357/4359. [Assistance for the hearing impaired is available through TDD service (202) 927–5721].

Decided: March 20, 1996.

By the Board, Chairman Morgan, Vice Chairman Simmons, and Commissioner Owen.

Vernon A. Williams,

Secretary.

BILLING CODE 4915–00–P

[STB Finance Docket No. 32870] [1,2]

David L. Durbano—Continuance in Control Exemption—Cimarron Valley Railroad, L.C.

David L. Durbano (Applicant), a noncarrier, has filed a verified notice under 49 CFR 1180.2(d)(2) to continue in control of Cimarron Valley Railroad, L.C. (CVR), upon CVR's becoming a Class III rail carrier. Consummation was expected to occur on or shortly after February 23, 1996.

CVR, a noncarrier, has concurrently filed a verified notice of exemption under 49 CFR 1150.31 in *Cimarron Valley Railroad, L.C.—Exemption to Acquire and Operate—Cimarron Valley and Manter Branches of The Atchison, Topeka and Santa Fe Railway Company,* STB Finance Docket No. 32869, in which CVR seeks to acquire and operate 151.04 miles of the Cimarron Valley Branch rail line and 103.83 miles of the Manter Branch rail line both of which are owned by The Atchison, Topeka and Santa Fe Railroad Company. CVR's acquisition of the rail lines was expected to have been

[1] The ICC Termination Act of 1995, Pub. L. No. 104–88, 109 Stat. 803 (the Act), which was enacted on December 29, 1995, and took effect on January 1, 1996, abolished the Interstate Commerce Commission (ICC) and transferred certain functions and proceedings to the Surface Transportation Board (Board). Section 204(b)(1) of the Act provides, in general, that proceedings pending before the ICC on the effective date of the legislation shall be decided under the law in effect prior to January 1, 1996, insofar as they involve functions retained by the Act. This notice relates to a proceeding that was pending with the ICC prior to January 1, 1996, and to functions that are subject to Board jurisdiction. Therefore, this notice applies the law in effect prior to the Act, and citations are to the former sections of the statute.

[1] The ICC Termination Act of 1995, Pub. L. No. 104–88, 109 Stat. 803, which was enacted on December 29, 1995, and took effect on January 1, 1996, abolished the Interstate Commerce Commission (ICC) and transferred certain functions to the Surface Transportation Board (Board). This notice relates to functions that are subject to Board jurisdiction pursuant to 49 U.S.C. 11323.

[2] A notice in this proceeding was previously served by the Board and published in the **Federal Register** on March 4, 1996. A corrected notice is being issued because the earlier notice imposed labor protective conditions that the Board may no longer impose under the Act for transactions such as this one that are the subject of notices of exemption filed after the January 1, 1996 effective date of the Act.

consummated on or shortly after February 23, 1996.

Applicant controls four other Class III rail carriers: Wyoming and Colorado Railroad Company, Inc. (WYCO); Oregon Eastern Railroad Company, Inc. (OER); Arizona Central Railroad, Inc. (AZCR); and Southwestern Railroad Company, Inc. (SWR).

The transaction is exempt from the prior approval requirements of 49 U.S.C. 11323 [formerly section 11343] because Applicant states that: (1) CVR, WYCO, OER, AZCR, and SWR will not connect with each other; (2) the continuance in control is not part of a series of anticipated transactions that would connect the railroads with each other; and (3) the transaction does not involve a Class I carrier.

Under 49 U.S.C. 10502(g), the Board may not use its exemption authority to relieve a rail carrier of its statutory obligation to protect the interests of its employees. Section 11326(c), however, does not provide for labor protection for transactions under sections 11324 and 11325 that involve only Class III rail carriers. Because this transaction involves Class III rail carriers only, the Board, under the statute, may not impose labor protective conditions for this transaction.

If the verified notice contains false or misleading information, the exemption is void *ab initio*. Petitions to reopen the proceeding to revoke the exemption under 49 U.S.C. 10502(d) [formerly section 10505(d)] may be filed at any time. The filing of a petition to reopen will not automatically stay the transaction. An original and 10 copies of all pleadings, referring to STB Finance Docket No. 32870, must be filed with the Office of the Secretary, Surface Transportation Board, Case Control Branch, 1201 Constitution Avenue, N.W., Washington, DC 20423. In addition, a copy of each pleading must be served on Walter T. Merrill, Durbano & Associates, 3340 Harrison Boulevard, Suite 200, Ogden, UT 84403.

Decided: February 27, 1996.

By the Board, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

[FR Doc. 96–7422 Filed 3–26–96; 8:45 am]

BILLING CODE 4915–00–P

[STB Finance Docket No. 32863][1,2]

Genesee & Wyoming, Inc.—Continuance in Control Exemption—Illinois & Midland Railroad, Inc.

Genesee & Wyoming, Inc. (GWI), a noncarrier, has filed a verified notice under 49 CFR 1180.2(d)(2) to continue in control of Illinois & Midland Railroad, Inc. (IMR), upon IMR's becoming a Class III rail carrier. IMR, a noncarrier, has concurrently filed a notice of exemption in *Illinois & Midland Railroad, Inc.—Acquisition and Operation Exemption—Chicago & Illinois Midland Railway Company*, STB Finance Docket No. 32862, in which IMR seeks to acquire and operate 98 miles of rail lines of Chicago & Illinois Midland Railway Company (CIMR), in the State of Illinois. IMR also seeks to acquire the interest of CIMR in 25.4 miles of overhead trackage rights in the State of Illinois. The transaction was to have been consummated on or about February 8, 1996.

GWI also controls through stock ownership 9 other nonconnecting Class III rail carriers: Genesee & Wyoming Railroad Company; Dansville and Mount Morris Railroad Company; Rochester & Southern Railroad, Inc.; Louisiana & Delta Railroad, Inc.; Buffalo & Pittsburgh Railroad, Inc.; Bradford Industrial Rail, Inc.; Allegheny & Eastern Railroad, Inc.; Willamette & Pacific Railroad, Inc.; and GWI Switching Services.[3]

The transaction is exempt from the prior approval requirements of 49 U.S.C. 11323 [formerly section 11343] because: (1) the railroads will not connect with each other or with any railroad in their corporate family; (2) the continuance in control is not part of a series of anticipated transactions that would connect the railroads with each other or with any railroad in their corporate family; and (3) the transaction does not involve a Class I carrier.

Under 49 U.S.C. 10502(g), the Board may not use its exemption authority to relieve a rail carrier of its statutory obligation to protect the interests of its employees. Section 11326(c), however, does not provide for labor protection for transactions under sections 11324 and 11325 that involve only Class III rail carriers. Because this transaction involves Class III rail carriers only, the Board, under the statute, may not impose labor protective conditions for this transaction.

If the verified notice contains false or misleading information, the exemption is void *ab initio*. Petitions to reopen the proceeding to revoke the exemption under 49 U.S.C. 10502(d) [formerly section 10505(d)] may be filed at any time. The filing of a petition to reopen will not automatically stay the transaction. An original and 10 copies of all pleadings, referring to STB Finance Docket No. 32863, must be filed with the Office of the Secretary, Case Control Branch, Surface Transportation Board, 1201 Constitution Ave., N.W., Washington, DC 20423. In addition, a copy of each pleading must be served on Eric M. Hocky, Esq., Gollatz, Griffin & Ewing, P.O. Box 796, 213 West Miner St., West Chester, PA 19381–0796.

Decided: February 22, 1996.

By the Board, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

BILLING CODE 4915–00–P

[STB Finance Docket No. 32876 (Sub-No. 1)][1]

Notre Capital Ventures II, LLC, and Coach USA, Inc.—Control Exemption—Arrow Stage Lines, Inc.; Cape Transit Corp.; Community Coach, Inc.; Community Transit Lines, Inc.; Grosvenor Bus Lines, Inc.; H.A.M.L. Corp.; Leisure Time Tours; Suburban Management Corp.; Suburban Trails, Inc.; and Suburban Transit Corp.

AGENCY: Surface Transportation Board, DOT.

ACTION: Notice of Filing of Petition for Exemption.

[1] The ICC Termination Act of 1995, Pub. L. No. 104–88, 109 Stat. 803 (the Act), which was enacted on December 29, 1995, and took effect on January 1, 1996, abolished the Interstate Commerce Commission (ICC) and transferred certain functions to the Surface Transportation Board (Board). This notice relates to functions that are subject to Board jurisdiction pursuant to 49 U.S.C. 11323.

[2] A notice in this proceeding was previously served by the Board and published in the **Federal Register** on March 1, 1996. A corrected notice is being issued because the earlier notice imposed labor protective conditions that the Board may no longer impose under the Act for transactions such as this one that are the subject of notices of exemption filed after the January 1, 1996 effective date of the Act.

[3] Also, GWI has in *Genesee & Wyoming Industries, Inc.—Continuance in Control Exemption—Portland & Western Railroad*, Finance Docket No. 32759, a pending petition for exemption to continue in control of a connecting Class III railroad.

[1] The ICC Termination Act of 1995, Pub. L. No. 104–88, 109 Stat. 803, which was enacted on December 29, 1995, and took effect on January 1, 1996, abolished the Interstate Commerce Commission and transferred certain functions to the Surface Transportation Board (Board). This notice relates to an exemption of a motor passenger carrier acquisition of control transaction that is subject to Board jurisdiction under 49 U.S.C. 13541 and 14303.

SUMMARY: Notre Capital Ventures II, LLC, and Coach USA, Inc., both noncarriers, seek an exemption, under 49 U.S.C. 13541, from the prior approval requirements of 49 U.S.C. 14303(a)(4), to acquire control of 10 motor common carriers of passengers. Petitioners request expedition, asking that the exemption become effective no later than May 3, 1996.

DATES: Comments must be filed by April 11, 1996. Petitioners may file a reply by April 16, 1996.

ADDRESSES: Send an original and 10 copies of comments referring to STB Finance Docket No. 32876 (Sub-No. 1) to: Surface Transportation Board, Office of the Secretary, Case Control Branch, 1201 Constitution Avenue, NW., Washington, DC 20423. In addition, send one copy of comments to petitioners' representatives: Betty Jo Christian and David H. Coburn, Steptoe & Johnson LLP, 1330 Connecticut Ave., NW., Washington, D.C. 20036.

FOR FURTHER INFORMATION CONTACT: Beryl Gordon, (202) 927–5610. [TDD for the hearing impaired: (202) 927–5721.]

SUPPLEMENTARY INFORMATION: Petitioners, Notre Capital Ventures II, LLC, and Coach USA, Inc., seek an exemption to acquire, through stock purchase, control over 10 motor carriers of passengers: Arrow Stage Lines, Inc.; Cape Transit Corp.; Community Coach, Inc. (Coach); Community Transit Lines, Inc. (Community Transit); Grosvenor Bus Lines, Inc.; H.A.M.L. Corp.; Leisure Time Tours; Suburban Management Corp. (Management); Suburban Trails, Inc. (Trails); and Suburban Transit Corp (Suburban Transit).

Petitioners also request that the exemption extend to the possible common control of Orange, Newark, Elizabeth Bus, Inc. (ONE Bus). ONE Bus is not part of the proposed transaction but is owned in part by persons who now control Coach and Community Transit, and who will own a small percentage of the new, consolidated entity after the transaction is consummated.

Petitioners request that this exemption become effective no later than May 3, 1996, to allow them to synchronize the exemption with a Securities and Exchange Commission registration statement that is intended to authorize an initial public offering (IPO) of $45 million in stock to be issued in connection with the proposed transaction and future transactions of this nature. Petitioners state that a delay could increase their costs, make it impossible to complete the IPO as projected, and otherwise jeopardize their entire plan.

Petitioners state that the 10 carriers they seek to control are relatively small and operate in diverse markets across the country. The 10 carriers generally have no connection or control relationship with one another, except that Coach and Community Transit are under common control, and H.A.M.L., Management, Trails, and Suburban Transit are under common control. Petitioners state that the only significant competition among the 10 carriers is in the limited area of charter and special operations.

Aside from charter and special operations, petitioners state that the 10 carriers operate regionally with a relatively small market share. While acknowledging that there are some overlapping routes, petitioners note that the 10 carriers do not compete with each other to any significant degree. Although several of them operate commuter bus services between New York City and points in New Jersey, their routes (with the exception of those operated by carriers already under common control) extend in different directions and serve different termini.

Petitioners assert that, in each of their respective markets, the 10 carriers confront significant competitive pressure from other bus lines and other transportation modes, including commercial airlines, Amtrak, commuter rail services, and the private automobile. Further, petitioners state that the 10 bus companies, whether considered as individual entities or as consolidated into what would be the nation's second largest group of passenger carriers, cannot compare, much less compete on any substantial basis, with Greyhound Lines, Inc., the only bus company providing nationwide, regular-route bus service.

Following the acquisition of control, the 10 carriers allegedly will continue to operate in their respective markets, each in its own name and in the same basic manner as before. Petitioners claim that the 10 carriers will benefit from centralized management, coordination of functions, financial support, and economies of scale and that improved services at lower costs will result.

Petitioners assert that prior review and approval of the transaction under 49 U.S.C. 14303 are not necessary to carry out the transportation policy of 49 U.S.C. 13101, that regulation is not needed to protect shippers from the abuse of market power, that the transaction is of limited scope, and that exempting the transaction from regulation is in the public interest.

Additional information may be obtained from petitioners' representatives.

Decided: March 21, 1996.

By the Board, Chairman Morgan, Vice Chairman Simmons, and Commissioner Owen.

Vernon A. Williams,

Secretary.

Georgia & Florida Railroad Co., Inc.—Abandonment Exemption—in Mitchell and Colquitt Counties, GA

AGENCY: Surface Transportation Board.

ACTION: Notice of exemption.

SUMMARY: The Board, pursuant to 49 U.S.C. 10505, exempts Georgia & Florida Railroad Co., Inc. from the prior approval requirements of 49 U.S.C. 10903–04 to abandon service over 5.45 miles of rail line in Mitchell and Colquitt Counties, GA, subject to standard labor protective conditions. Specifically, the line runs 1.6 miles between mileposts 93.0 and 94.6 near Camilla, in Mitchell County, GA, and 3.85 miles between mileposts 23.25 and 27.1 near Moultrie, in Colquitt County, GA.

DATES: Provided no formal expression of intent to file a financial assistance offer has been received, this exemption will be effective on April 26, 1996. Formal expressions of intent to file financial assistance offers[2] under 49 CFR 1152.27(c)(2), requests for a notice of interim trail use/rail banking and petitions to stay must be filed by April 8, 1996. Requests for a public use condition and petitions to reopen must be filed by April 16, 1996.

ADDRESSES: Send pleadings referring to Docket No. AB–453 (Sub-No. 1X) to: (1) Office of the Secretary, Case Control Branch, Surface Transportation Board, 1201 Constitution Avenue, NW., Washington, DC 20423; and (2) Petitioner's representative: Jo A.

[1] The ICC Termination Act of 1995, Pub. L. No. 104–88, 109 Stat. 803 (the Act), which was enacted on December 29, 1995, and took effect on January 1, 1996, abolished the Interstate Commerce Commission (ICC) and transferred certain functions and proceedings to the Surface Transportation Board (Board). Section 204(b)(1) of the Act provides, in general, that proceedings pending before the ICC on the effective date of that legislation shall be decided under the law in effect prior to January 1, 1996, insofar as they involve functions retained by the Act. This notice relates to a proceeding that was pending with the ICC prior to January 1, 1996, and to functions that are subject to Board jurisdiction pursuant to section 10903. Therefore, this notice applies the law in effect prior to the Act, and citations are to the former sections of the statute, unless otherwise indicated.

[2] *See Exempt. of Rail Abandonment—Offers of Finan. Assist.*, 4 I.C.C. 2d 164 (1987).

Washington, DC 20423; and (2) Petitioner's representative: Jo A. DeRoche, Weiner, Brodsky, Sidman & Kider, 1350 New York Avenue, NW., Suite 800, Washington, DC 20005–4797.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 927–5660. [TDD for the hearing impaired: (202) 927–5721.]

SUPPLEMENTARY INFORMATION: Additional information is contained in the Board's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: DC News & Data, Inc., Room 2229, 1201 Constitution Avenue, NW., Washington, DC 20423. Telephone: (202) 289–4357/4359. [Assistance for the hearing impaired is available through TDD services (202) 927–5721.]

Decided: March 14, 1996.

By the Board, Chairman Morgan, Vice Chairman Simmons, and Commissioner Owen.

Vernon A. Williams,

Secretary.

[Docket No. AB–57 (Sub-No. 36X)][1]

Soo Line Railroad Company—Abandonment Exemption—in Stearns and Morrison Counties, MN

AGENCY: Surface Transportation Board.

ACTION: Notice of exemption.

SUMMARY: The Board, under 49 U.S.C. 10505, exempts from the prior approval requirements of 49 U.S.C. 10903–04 the abandonment by Soo Line Railroad Company (Soo) of the remaining 60.22 miles of its Brooten Line between milepost 104.00 near Brooten and milepost 164.22 near Genola (end of line), in Stearns and Morrison Counties, MN, subject to standard labor protective conditions, environmental conditions, and a public use condition.

DATES: Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on April 26, 1996. Formal expressions of intent to file an offer[2] of financial assistance under 49 CFR 1152.27(c)(2) must be filed by April 8, 1996; petitions to stay must be filed by April 11, 1996; requests for a public use condition must be filed by April 16, 1996; and petitions to reopen must be filed by April 22, 1996.

ADDRESSES: Send pleadings referring to Docket No. AB–57 (Sub-No. 36X) to: (1) Office of the Secretary, Case Control Branch, Surface Transportation Board, 1201 Constitution Avenue, N.W., Washington, DC 20423, and (2) Larry D. Starns, 1000 Soo Line Building, 105 South 5th Street, Minneapolis, MN 55402.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 927–5660. [TDD for the hearing impaired: (202) 927–5721.]

SUPPLEMENTARY INFORMATION: Additional information is contained in the Board's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: DC News & Data, Inc., Room 2229, 1201 Constitution Avenue, N.W., Washington, DC 20423. Telephone: (202) 289–4357/4359. [Assistance for the hearing impaired is available through TDD services (202) 927–5271.]

Decided: March 13, 1996.

By the Board, Chairman Morgan, Vice Chairman Simmons, and Commissioner Owen.

Vernon A. Williams,

Secretary.

DEPARTMENT OF VETERANS AFFAIRS

Agency Information Collection Activities; Proposed Collection; Comment Request

AGENCY: Office of Small and Disadvantaged Business Utilization, Veterans Affairs.

ACTION: Notice.

SUMMARY: As part of its continuing effort to reduce paperwork and respondent burden, the Office of Small and Disadvantaged Business Utilization invites the general public and other Federal agencies to comment on this information collection. This request for comment is being made pursuant to the Paperwork Reduction Act of 1995 (Public Law 104–13; 44 U.S.C. 3506(c)(2)(A)). Comments should address the accuracy of the burden estimates and ways to minimize the burden including the use of automated collection techniques or the use of other forms of information technology, as well as other relevant aspects of the information collection.

DATES: Written comments and recommendations on the proposal for the collection of information should be received on or before May 28, 1996.

ADDRESSES: Direct all written comments to Gladys Lane, Office of Small and Disadvantaged Business Utilization (00SB), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420. All comments will become a matter of public record and will be summarized in the request for Office of Management and Budget (OMB) approval. This document solicits comments concerning the following information collection:

OMB Control Number: 2900–0444.

Title and Form Number: VAAR Subpart 819.70, Veteran-Owned and Operated Small Business, (Exceptions to SF 18 and SF 129).

Type of Review: Reinstatement without change, of a previously approved collection for which approval has expired.

Need and Uses: The information will be used by VA to identify veteran-owned business to ensure eligible veteran-owned firms are given an opportunity to participate in VA solicitations for goods and services. Without this information there would be no way to properly monitor this program.

Current Actions: Public Law 93–237, amended the Small Business Act by directing the U.S. Small Business Administration (SBA) to give "special consideration" to veterans of the U.S. Armed Forces in all SBA programs. In September 1983, VA adopted the "special consideration" philosophy and directed all VA contracting activities to take affirmative action to solicit and assist Vietnam Era and disabled veteran-owned small businesses to participate in VA acquisition process. This established VA Vietnam Era and Disabled Veteran-Owned Small Business Outreach Program. In October 1983, VA received OMB approval to modify SF 18, Request for Quotations, and SF 129, Solicitation Mailing List Application, to include Vietnam Era and disabled veteran-owned information. On April 5, 1990, the Secretary approved an initiative to expand the Vietnam Era and disabled veteran-owned small business program to include all veteran-owned small businesses. Title 38 U.S.C. vests the Secretary with broad authority and responsibility to assist veterans. Therefore, we requested that approval be granted to include veteran-owned business in addition to Vietnam Era and disabled veteran-owned businesses information on SF 18 and SF 129. The information requested will be a self certification that a firm is veteran-owned. It allows VA to ensure that eligible veteran-owned firms are given an opportunity to participate in VA acquisitions and to monitor our success in implementing these regulatory provisions. The information requested on the SF 18 and SF 129 will be solicited from the respondents on a voluntary basis.

Affected Public: Business or other for-profit.

Estimated Annual Burden: 14,181 hours.

Estimated Average Burden Per Respondent: Additional burden imposed on SF 18 and SF 129 is 15 seconds.

Frequency of Response: On occasion.

Estimated Number of Respondents: 3,403,500.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the reports should be directed to Department of Veterans Affairs, Attn: Ron Taylor, VA Clearance Officer (045A4), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420, Telephone (202) 565–4412 or FAX (202) 565–8267.

Dated: March 14, 1996.

By direction of the Secretary.

William T. Morgan,

Management Analyst.

BILLING CODE 8320–01–P

Agency Information Collection Activities; Proposed Collection; Comment Request

AGENCY: Veterans Benefits Administration, Veterans Affairs.

ACTION: Notice.

SUMMARY: As part of its continuing effort to reduce paperwork and respondent burden, Veterans Benefits Administration (VBA) invites the general public and other Federal agencies to comment on this information collection. This request for comment is being made pursuant to the Paperwork Reduction Act of 1995 (Public Law 104–13; 44 U.S.C. 3506(c)(2)(A)). Comments should address the accuracy of the burden estimates and ways to minimize the burden including the use of automated collection techniques or the use of other forms of information technology, as well as other relevant aspects of the information collection.

DATES: Written comments and recommendations on the proposal for the collection of information should be received on or before May 28, 1996.

ADDRESSES: Direct all written comments to Nancy J. Kessinger, Veterans Benefits Administration (20M30), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420. All comments will become a matter of public record and will be summarized in the VBA request for Office of Management and Budget (OMB) approval. In this document VBA is soliciting comments concerning the following information collection:

OMB Control Number: 2900–0101.

Title and Form Number: Eligibility Verification Reports.

a. Old Law Eligibility Verification Report (Surviving Spouse), VA Form 21–0511S.

b. Old Law Eligibility Verification Report (Veteran), VA Form 21–0511V.

c. Section 306 Eligibility Verification Report (Surviving Spouse), VA Form 21–0512S.

d. Section 306 Eligibility Verification Report (Veteran), VA Form 21–0512V.

e. Old Law and Section 306 Eligibility Verification Report (Children Only), VA Form 21–0513.

f. DIC Parent's Eligibility Verification Report, VA Form 21–0514.

g. Improved Pension Eligibility Verification Report (Veteran With No Children), VA Form 21–0516.

h. Improved Pension Eligibility Verification Report (Veteran With Children), VA Form 21–0517.

i. Improved Pension Eligibility Verification Report (Surviving Spouse With No Children), VA Form 21–0518.

j. Improved Pension Eligibility Verification Report (Child or Children), VA Form 21–0519C.

k. Improved Pension Eligibility Verification Report (Surviving Spouse With Children), VA Form 21–0519S.

Type of Review: Extension of a currently approved collection.

Need and Uses: These reports are used by VA regional offices to verify continued eligibility for pension and parents' Dependency and Indemnity Compensation (DIC) and to determine whether adjustments in the rate of payment are necessary. These reports are also used for developing supplemental income and estate information from claimants who have previously filed a formal application for pension or parents' DIC. It would be impossible to administer the pension and parents' DIC programs without the collection of information.

Current Actions: Until recently, VA was required by 38 U.S.C. 1315(e) and 38 U.S.C. 1506(2) to secure a completed Eligibility Verification Report (EVR) at least once a year from every pension beneficiary and every parents' DIC beneficiary under the age of 72, showing the beneficiary's income and dependency status and verifying other entitlement factors. Public Law 103–271, the Board of Veterans' Appeals Administrative Procedures Improvement Act of 1994, amended 38 U.S.C. 1315 and 1506 to give the Secretary of veterans Affairs discretionary authority to require submission of income and resource reports by recipients of income-based benefits. VA amended 38 CFR 3.256 and 38 CFR 3.277 to require submission of an EVR in three instances. First, VA will require submission of an EVR by any beneficiary whose Social Security number, or whose spouse's Social Security number, has not been verified by the Social Security Administration. VA will also require beneficiaries who receive income other than Social Security to submit an EVR. Further, VA will require completion of an EVR if it determines that submission of an EVR is necessary to preserve program integrity.

Affected Public: Individuals or households.

Estimated Annual Burden: 406,250 hours.

Estimated Average Burden Per Respondent: 30 minutes per report.

Frequency of Response: Semi-annually.

Estimated Number of Respondents: 325,000.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the reports should be directed to Department of Veterans Affairs, Attn: Ron Taylor, VA Clearance Officer (045A4), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420, Telephone (202) 565–4412 or FAX (202) 565–8267.

Dated: March 13, 1996.

By direction of the Secretary.

William T. Morgan,

Management Analyst.

BILLING CODE 8320–01–P

Agency Information Collection; Submission for OMB Review; Comment Request

AGENCY: Veterans Health Administration, Veterans Affairs.

ACTION: Notice.

SUMMARY: The Veterans Health Administration (VHA), Department of Veterans Affairs, has submitted to the Office of Management and Budget (OMB) the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

OMB Control Number: None Assigned.

Title and Form Number: Study of Environmental Health and Persian Gulf War Syndrome, VA Form 10–20989(NR).

Type of Review: Existing collection in use without an OMB control number.

Need and Uses: This information collection will be a case controlled study to describe and elucidate the causes of Gulf War Syndrome. Participants will be 2,000 veterans of the Persian Gulf War who currently reside in Oregon and Washington.

Affected Public: Individuals and households.

Estimated Annual Burden: 2,833 hours.

Estimated Average Burden Per Respondent: 1 hour and 15 minutes.

Frequency of Response: Generally one-time.

Estimated Number of Respondents: 2,000.

ADDRESSES: A copy of the submission may be obtained from Ann Bickoff, Veterans Benefits Administration (161B4), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420, (202) 565–7407.

Comments and recommendations concerning the submission should be directed to VA's OMB Desk Officer, Allison Eydt, OMB Human Resources and Housing Branch, New Executive Office Building, Room 10235, Washington, DC 20503 (202) 395–4650. Do not send requests for benefits to this address.

DATES: Comments on the collection of information should be directed to the OMB Desk Officer on or before April 26, 1996.

FOR FURTHER INFORMATION CONTACT: Ron Taylor, VA Clearance Officer (045A4), (202) 565–4412.

Dated: March 14, 1996.

By direction of the Secretary.

William T. Morgan,

Management Analyst.

BILLING CODE 8320–01–P

VA Residency Realignment Review Committee; Notice of Meeting

As required by the Federal Advisory Committee Act, Public Law 92–463, the VA hereby gives notice that the Residency Realignment Review Committee has scheduled a meeting on April 8th and 9th, 1996. The meeting on the 8th will start at 10:00 a.m. and end at 5:00 p.m., and the meeting on the 9th will start at 8:30 and end at 12 noon. The meeting will be held in Room 830 at VA Central Office, 810 Vermont Ave., NW., Washington, DC. The purpose of the committee is to review the present scope and structure of Veterans Health Administration's Residency Program to ensure that the program is effective in the future health care setting.

The first day will be to discuss the principles identified in the March meeting which form the basis for the Committee's recommendations, proposals for restructuring the Residency Program to meet both VHA's and the nation's future graduate medical education needs, and how changes could be accomplished within the new headquarters and field structure of VHA. The second day will be to finalize the principles, recommendations, and to prepare the report to the Under Secretary for Health.

The meeting will be open to the public. Due to limited seating capacity of the room, those who plan to attend or who have questions concerning the meeting should contact Betty, Department of Veterans Affairs at 202–565–7954 or 7955.

The Designated Federal Official for the Committee is Jan Lamoreaux, Office of Policy, Planning, and Performance; phone number: 202–565–7961.

Dated: March 13, 1996.

By Direction of the Secretary.

Heyward Bannister,

Committee Management Officer.

Part II

Department of Housing and Urban Development

Office of the Assistant Secretary for Public and Indian Housing

Notice of Funding Availability (NOFA) for Indian Applicants under the HOME Program, Fiscal Year 1996; Notice.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Public and Indian Housing

[Docket No. FR–3999–N–01]

Notice of Funding Availability (NOFA) for Fiscal Year 1996 for Indian Applicants Under the HOME Program

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Notice of funding availability (NOFA) for fiscal year 1996 for Indian applicants for HOME Investment Partnerships Act (the HOME Act) programs, referred to as the HOME program.

SUMMARY: This NOFA announces the availability of up to $14,000,000 in funding for Fiscal Year (FY) 1996 for the HOME Program for Indian tribes; provides the selection criteria; provides information on how to apply; and explains how selections will be made. All eligible applicants are invited to submit applications for HOME funds in accordance with the requirements of this NOFA. NOTE: The Congress has not yet enacted a FY 1996 appropriation for HUD. However, HUD is publishing this notice in order to give potential applicants adequate time to prepare applications. The estimate of the amount of funds available for this program is based on the level of funding available for FY 1995. HUD is not bound by the estimate set forth in this notice.

DATES: Application Due Date: May 28, 1996. Applications must be RECEIVED by the Area Office of Native American Programs (Area ONAP) having jurisdiction over the applicant on or before 3:00 p.m. (Area ONAP local time) on May 28, 1996. This application deadline is firm as to date and hour. The Department shall treat as ineligible for consideration any application that is received after the deadline. Applicants should make early submission of their materials to avoid any risk of loss of eligibility brought about by unanticipated delays or other delivery-related problems. Facsimile ("FAX") copies shall not be accepted.

FOR FURTHER INFORMATION CONTACT: Prospective applicants may contact the appropriate Area ONAP. Refer to Appendix 1 of this NOFA for a complete list of Area ONAPs and telephone numbers.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act Statement

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), the information collection requirements contained in these application procedures for HOME funds were reviewed by the Office of Management and Budget and approved under OMB control number 2577–0191.

Changes from Last Year's NOFA

1. *COMPETITIVE AREA.* This year HOME funds will be allocated to each Area ONAP pursuant to the formula in the Program Regulation (24 CFR 92.601). Applicants in each Area ONAP jurisdiction will only compete with each other for the HOME funds allocated to the Area ONAP.

The applicant need submit only the original and 1 copy of the application to its Area ONAP.

2. *MULTIPLE PROJECTS.* An applicant may apply for grant assistance for more than one project. If so, each project is limited to no more than one category (i.e., acquisition, rehabilitation, new construction) and stands on its own. The total grant amount requested by the applicant may not exceed the maximum allowed. Each project will be rated independently and ranked independently. For each project grant request, where appropriate and to assure maximum point award, applicants must provide individual responses to application information requirements.

3. *LIMIT ON GRANTS THAT ARE NOT CLOSED OUT.* An applicant may not have more than two HOME grants at a time. An application from an applicant with more than two HOME grants that are not closed out will be set aside and not rated.

4. *LEVERAGE DEFINITION.* This year the NOFA clarifies some elements of scoring for different kinds of financial assistance in order to receive leverage points. To be considered for leverage points, the financial assistance proposed by the applicant must come in, i.e., be in the possession of or legally obligated to the applicant, within 90 calendar days after award notification.

HUD is, again this year, requesting that the data and explanation provided by the applicant to address the selection criteria be limited to 200 words per component.

I. Purpose and Substantive Description

(a) Authority

The HOME Investment Partnerships Act (the HOME Act) (title II of the Cranston-Gonzalez National Affordable Housing Act) was signed into law on November 28, 1990 (Pub. L. 101–625), and created the HOME Investment Partnerships (or HOME) Program that provides funds to Indian tribes to expand the supply of affordable housing for very low-income and low-income persons. Interim regulations for the HOME Investment Partnerships Program are codified at 24 CFR part 92. The requirements of 24 CFR part 92, subpart A and subpart M (§§ 92.600–92.652), apply specifically to the Indian HOME program.

The HOME Act was amended by the Housing and Community Development Act of 1992 (HCDA 1992) (Pub. L. 102–550, approved October 28, 1992) and the Multifamily Housing Property Disposition Reform Act of 1994 (MHPDRA) (Pub. L. 102–233, approved April 11, 1994).

Note: The Congress has not yet enacted a FY 1996 appropriation for HUD. However, HUD is publishing this notice in order to give potential applicants adequate time to prepare applications. The estimate of the amount of funds available for this program is based on the level of funding available for FY 1995. HUD is not bound by the estimate set forth in this notice.

(b) Allocation Amounts

(1) *Fiscal Year 1996 Funding.* In accordance with section 217(a)(2) of the HOME Act, each Fiscal Year (FY) HUD shall provide funds to Indian tribes, totaling one percent (or such other percentage or amount as authorized by Congress) of the amount appropriated for the HOME program to expand the supply of affordable housing. For the fiscal year ending September 30, 1995, the Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act of 1995 (approved September 28, 1994, Pub. L. 103–327), appropriated a total of $1.4 billion for the HOME program. Together with $42,000 available from the 1994 Appropriations Act, the amount of funding available for the HOME Indian program for Fiscal Year 1995 was up to $14,042,000.

HOME funds will be allocated to the Area ONAPs as follows:

1. Eastern/Woodlands ONAP	$1,086,250
2. Southern Plains ONAP	2,626,250
3. Northern Plains ONAP	2,208,750
4. Southwest ONAP	6,096,250
5. Northwest ONAP	818,750
6. Alaska ONAP	1,163,750
Total	$14,000,000

(2) *Project Grant Amount.* The maximum grant amount per applicant is $1.5 million. Grants may be funded at less than applied for levels. In determining appropriate grant amounts to be awarded, the Area ONAP may take into account the level of demand, the scale of the activity proposed relative to need, the number of persons to be served, and the amount of funds required to achieve project objectives.

(3) If the Department does not award the entire $14,000,000 in this funding round because there is not a sufficient number of eligible applications, the amount not awarded shall be awarded at another time.

(4) If an insufficient number of fundable applications is received in any one Area ONAP, any surplus funds may be assigned to other Area ONAPs which have unfunded fundable applications.

(c) Eligibility

(1) *Eligible Applicants.* (i) Eligible applicants for HOME funds for Indian tribes are any Indian Tribe, band, group, or nation, including Alaskan Indians, Aleuts, and Eskimos, and any Alaskan native village of the United States which is considered an eligible recipient under Title I of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450) or which had been an eligible recipient under the State and Local Fiscal Assistance Act of 1972 (31 U.S.C. 1221). Eligible recipients under the Indian Self-Determination and Education Assistance Act will be determined by the Bureau of Indian Affairs and eligible recipients under the State and Local Fiscal Assistance Act of 1972 are those that have been determined eligible by the Department of Treasury, Office of Revenue Sharing.

(ii) Tribal organizations which are eligible under Title I of the Indian Self-Determination and Education Assistance Act may apply for funds under this NOFA on behalf of any Indian Tribe, band, group, nation, or Alaskan native village eligible under that Act when one or more of these entities have authorized the Tribal organization to do so through concurring resolutions. Such resolutions must accompany the application for funding. Eligible Tribal organizations under Title I of the Indian Self-Determination and Education Assistance Act will be determined by the Bureau of Indian Affairs.

(iii) Only eligible applicants shall receive grants. However, eligible applicants may contract or otherwise agree with non-eligible entities such as States, cities, counties, or other organizations to assist in the preparation of applications and to help implement assisted activities.

(iv) To apply for funding in a given fiscal year, an applicant must be eligible as an Indian Tribe or Alaskan native village, as provided in paragraph (i) of this section, or as a Tribal organization, as provided in paragraph (ii) of this section, by the application submission date.

(v) Applicants must have the administrative capacity to undertake the project proposed, including systems of internal control necessary to administer these projects effectively.

(2) *Eligible Projects.*

(i) *Size and Location of a Project.* A "project" may be located on one or more sites. The applicant must identify the scale and location of a project and show that the project is within the operating area of the applicant. A project may be as small as one site or as large as the operating area of the tribe. (NOTE: For purposes of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended (URA), the term "project" means one or more activities paid for in whole or in part with HUD financial assistance. Two or more activities that are integrally related, each essential to the other, are considered one project.)

(ii) *Categories of Eligible Projects.* In accordance with 24 CFR 92.604, projects that may be funded under the HOME Indian program include: (A) housing rehabilitation (moderate and substantial), (B) acquisition of housing, and (C) new housing construction. These project types may also include site improvements and relocation. A project may be for rental or homeownership.

(A) A rehabilitation project consists of only rehabilitation, or includes acquisition of units with rehabilitation.

(B) An acquisition project consists of the acquisition of standard units not requiring rehabilitation.

(C) A new construction project consists of new construction of housing and may include acquisition and demolition.

(3) *Eligible Activities.* Eligible activities, in accordance with 24 CFR 92.611, are as follows:

(i) HOME funds may be used by an Indian tribe to provide incentives to develop and support affordable rental housing and homeownership affordability through the acquisition (including assistance to homebuyers), new construction, reconstruction, or moderate or substantial rehabilitation of nonluxury housing with suitable amenities, including real property acquisition, site improvements, conversion, demolition, and other expenses, including financing costs, relocation expenses of any displaced persons, families, businesses, or organizations; and to pay administrative costs. The specific eligible costs for these activities are set forth in § 92.612.

(ii) Acquisition of vacant land or demolition must be undertaken only with respect to a particular housing project intended to provide affordable housing, and for which funds for construction have been committed.

(iii) Housing that has received an initial certificate of occupancy or equivalent document within a one-year period before an Indian tribe commits HOME funds to the project is new construction for purposes of this part.

(iv) Conversion of an existing structure to affordable housing is rehabilitation, unless the conversion entails adding a unit beyond the existing walls, in which case, the project is new construction for purposes of this part.

(v) Site improvements must be in keeping with improvements of surrounding, standard projects. Site improvements include roads, streets, sidewalks, curbs, gutters, and connections to utilities, such as storm and sanitary sewers, water supply, gas, and electricity. The "site" of the improvements may include property adjacent or near the immediate site of the housing if this property and the housing are owned by the same entity (e.g., the housing is owned—at least until sold to homebuyers—by the tribe and the housing and the improvements are located on a reservation). If the site improvements will benefit housing (existing or future) in addition to housing assisted with FY 1995 HOME Indian Program grant funds, only a pro-rated share of the site improvements may be charged to the HOME grant.

(d) Selection Criteria and Rating Factors

Each project submitted for grant funding shall be evaluated using the three criteria provided in 24 CFR 92.604, as more fully explained in sections I.(e)(1), (2), and (3) of this NOFA, below. See Figure 1. For an application to be considered for rating, ranking, and funding, all eligibility requirements must be addressed. *After rating, the project must receive at least 50 points to be considered for funding.* The complete rating and ranking process is described in detail at section I.(e)(5).

All the potential points which can be earned are summarized as follows:

Need and Design	30
Need	(15)
Need/Quantity/Documentation	4
Need/Quantity/Demographics	3
Responsiveness	3
Benefits	5
Project Fesibility	(15)
Planning and Implementation	40
Financial	(15)
Property/Cost/Ability to Pay	6
Cashflow thru Completion	3
Feasibility thru Affordability Period	3
Cost Effectiveness Test	3
Legal and Administrative	(10)
Staffing Plan during Implementation	(15)

Leveraging	30

HUD urges each applicant to screen its application using the Checklist of Eligibility Requirements and Application Submission Requirements to ensure that the application meets each requirement.

In responding to each of the components which address the selection criteria, HUD requests that each applicant:

—Use separate tabs for each selection criterion and sub-criterion. In order to be rated, make sure the response is beneath the appropriate heading.
—Keep its responses in the same order as the NOFA.
—Provide the necessary data and the explanation, not exceeding 200 words, that supports the response. Include all relevant material to a response under the same tab. Do not assume the reviewer will search for the answer or information to support the answer elsewhere in the application.
—Do a preliminary rating for its own project, providing a score according to the scoring guide. This will help to show the applicant how its project might be scored by the reviewers. It will also help to show the applicant whether the application meets the eligibility requirements and the minimum point score requirement (50 points), and where the strengths and weaknesses of the application are located. Then, the applicant can strengthen the weaker parts of the application and retain the stronger parts.

The HOME program is for low-income and very low-income persons. In the application, applicants must provide information on the median income for the community in which the proposed project is located. The low-income and very low-income levels for each applicant community are available from the Area ONAPs.

FIGURE 1.—INDIAN HOME PROGRAM SCORING

Selection criteria	Maximum points
Need and Design	30
Planning and Implementation	40
Leveraging	30

(1) NEED AND DESIGN—30 points maximum.

The first of the three criteria provided in 24 CFR 92.604 addresses the degree to which the application: (1) identifies the housing needs of the tribe, (2) describes the demographic characteristics of needy very low and low-income families, (3) describes the characteristics of the homes to be provided, (4) is from an applicant with a high ratio of unmet need to total need, and (5) proposes homes which meet the requirements of the needy. This first criterion is divided into two parts that will be examined and evaluated separately. These parts are: (i) Need and (ii) Project Feasibility.

(i) Need—15 points maximum. The degree to which the proposed project addresses the housing need(s) of the tribe as identified in the documentation for the project. Tribal need must be documented. This documentation should include current IHA waiting lists, data on the degree of overcrowding, percentage of population in need of housing based upon census data, etc. Waiting lists from the IHA must identify whether the list is for rental housing or ownership housing, e.g., mutual help. An IHA waiting list for ownership housing is especially important if the proposed project contemplates the sale of units, e.g., new construction.

(A) Housing Need Expressed in Terms of Quantity (4 points maximum). The tribe shall express its housing needs within its reservation, service area, or area of operation by:

—The number of affordable units, as documented by the applicant;
—The size (number of bedrooms) of the needy households as documented by the applicant;
—The type of assistance needed, e.g., rehabilitation vs. new construction, as documented by the applicant; and
—The tenure type of the housing needed, i.e., homeownership or rental, as documented by the applicant.

Documentation that contains a recent formal survey prepared by a tribe, a State, the Federal Government or a commission authorized by a tribe, a State, or the Federal Government, or a recent formal survey authorized by a tribe, State, the Federal Government or a tribe authorized commission and actually performed by a third party, such as a consultant or university, shall receive four points. Documentation supporting housing need other than a formal survey shall receive 0 or 2 points depending upon the quality of the documentation presented. See Table 1.

TABLE 1.—SCORING GUIDE

Quantity of Housing Need—Quality of Documentation—		
Good	Fair	Unsatisfactory
4 points	2 points	0 points.

(B) Demographic Information Regarding Indian Households in Need of Affordable Housing (3 points maximum). The demographic characteristics of low-income and very low-income Indian households that are in need of the housing identified in (A), above, shall quantify the number of Indian households and number of family members in the household, their age, and gender, as well as the number of households for which an accessible unit is needed. An application which contains this data shall receive 3 points. A current IHA waiting list may be used to supply this data. Waiting lists must identify whether the list is for rental housing or ownership housing, i.e., mutual help. A waiting list for ownership housing is especially important if the proposed project contemplates the sale of units, e.g., new construction.

Partial supporting documentation shall receive 2 points. If the documentation is unclear or missing entirely, 0 points. See Table 2.

TABLE 2.—SCORING GUIDE

Quantity of housing need—Demographic characteristics—		
Complete or with correct IHA list	Partial documentation	Unclear or missing
3 points	2 points	0 points

(C) Proposed Supply by Quantity, Size, Tenure, and Type (3 points maximum). Documentation in the application must identify the housing to be supplied by the proposed project. Supply must be described by the following characteristics:

—The number of affordable units to be provided;
—The size (number of bedrooms) of the units to be provided;
—The type of assistance to be provided, e.g., rehabilitation vs. new construction; and
—The tenure type of the housing to be provided, i.e., homeownership or rental.

An application that provides this information shall receive 3 points. An application that does not respond to all these requirements shall receive 2 or 0 points depending upon its responsiveness to this factor. See Table 3.

TABLE 3.—SCORING GUIDE

Responsiveness to Housing Supply Factors		
Very responsive	Fairly responsive	Not responsive
3 points	2 points	0 points

(D) Benefits to Very Low-Income and Low-Income Families of the Tribe (5 points maximum). Under this factor, the applicant with the larger ratio of unmet low-income and very low-income need for affordable housing receives more points. The ratio consists of a numerator, which is the number of very low-income and low-income families of the tribe in need of affordable housing divided by a denominator, which is the total number of very low-income and low-income families of the tribe. The result is multiplied by 5 to determine the number of points received under this criterion. The number of points should be rounded to 2 decimal places.

In the response to this criterion, the applicant may use data for "members" or "families," whichever one is available. Whichever one is chosen, it must be used in both the numerator and the denominator of the ratio. If data is chosen for "families," "families" must be used in both the numerator and denominator. The applicant must provide the source for the data. Failure to identify the source of the data will result in the loss of one point. See Table 4.

The total of all the low-income and very low-income families with unmet housing needs is the number that is considered for the numerator in the formula used in this criterion, regardless of the particular activity for which funding is sought in the application. The denominator is the total number of low-income and very low-income families of the tribe. For example, say:

—the total number of low-income and very low-income families of the tribe is 1,000,
—the applicant is applying for funds to rehabilitate 10 units, and
—there are 100 low-income and very low-income families in need of rehabilitated units,
—but the total number of low-income and very low-income families with housing needs of all types (rental, new construction, and rehabilitation) is 500.

Then, the number that would be used in the formula as the numerator is 500; the denominator is 1,000. If the project is mixed, that fact is of no consequence in using the formula. A mixed project may be mixed as to tenure of the families to be assisted, i.e., rental or home ownership, but it may not be mixed as to type of project activity, i.e., a combination of acquisition, rehabilitation, new construction.

For example, a tribe has 20 low-income and very low-income families in need of affordable housing and a total of 100 low-income and very low-income families. No source for the data is identified. Substitute these values in the formula:

$5 \times (20/100) =$
$5 \times 0.20 =$
1.00 point.

The formula results in a preliminary score of 1.00 point. Then, deduct one point because the source for the data is not given and the final point score for this item becomes zero.

TABLE 4.—SCORING GUIDE

Benefits to very low-income and low-income families
5×(low-income and very low-income families in need of affordable housing/total of low-income and very low-income families). Round to 2 decimal places. Deduct 1 point if source of data is not provided.

(ii) Project feasibility. Match Between Demand and Supply by Characteristics.—15 points maximum. Project feasibility as measured here is the degree to which the characteristics of housing units in the proposed project are responsive to need of actual low-income and very low-income families for affordable housing that was identified in the previous evaluation factor. A project which provides a number of units with the appropriate characteristics less than or equal to the identified need will receive more points. A project which provides a number of units with the appropriate characteristics greater than the demand will receive less points. Thus, there is a penalty if supply is greater than demand. To evaluate the degree to which the proposed project addresses the housing needs of the tribe as identified in the application, points will be awarded based upon:

(A) The relationship between the number of affordable units to be provided as compared to the number needed, as documented by the applicant;

(B) The size (number of bedrooms) of the units to be provided relative to sizes of needy households as documented by the applicant;

(C) The type of assistance to be provided, e.g., rehabilitation vs. new construction, compared with the type of assistance necessary, as documented by the applicant; and

(D) The tenure type of the housing to be provided, i.e., homeownership or rental, compared with the type of assistance required, desired, or necessary as documented by the applicant, and;

(E) The project plan must indicate a schedule for the implementation of the expanded housing opportunities.

The documentation for a project shall receive 15 points if it: (1) shows that the quantity of housing units to be made available for very low-income and low-income families of the tribe is equal to or less than the demand, (2) shows that the sizes of the units to be made available meet but do not exceed the needs of the very low-income and low-income families, (3) shows that the type of assistance (rehabilitation, new construction) to be provided meets the type of assistance needed, (4) shows that the tenure type (ownership, rental) to be provided is the tenure type needed, and (5) describes the delivery schedule. The documentation for a project shall receive 8 points if it does not clearly respond to all five items. The documentation for a project shall receive 0 points if it does not clearly respond to four of the five items. See Table 5.

TABLE 5.—SCORING GUIDE

Match between proposed supply and documented demand		
Good	Fair	Unsatisfactory
15 points	8 points	0 points.

(2) PLANNING AND IMPLEMENTATION—40 points maximum.

The second of the three criteria provided in 24 CFR 92.604 is: The degree to which the financial, legal, and administrative actions necessary to undertake the proposed project have been considered and addressed in the documentation for the project, and the degree to which the applicant has the administrative staff to carry out the project successfully. Applicants must be concrete and specific in describing the financial, administrative, and legal actions involved in carrying out the project, and must describe their own administrative capability, existing or planned, to carry out this project. The applicant must demonstrate, using complete cost and revenue estimates for the project, including loans if necessary, that the proposed project is financially feasible and meets the regulatory

affordability requirements. This second criterion is divided into three parts that will be examined and evaluated separately. These three parts are: (i) Financial; (ii) Legal and Administrative Actions; and (iii) Staffing Plan during Implementation.

(i) Financial—15 points maximum.

(A) Property identification and comparison of project cost and ability of needy family to pay (6 points maximum). The applicant must demonstrate that the proposed very low- and low-income families who will be the owners or tenants shall be able to afford to buy or rent this housing in accordance with the affordability requirements under 24 CFR 92.614: "qualification as affordable housing and income targeting: rental housing," and 24 CFR 92.615: "qualification as affordable housing: home ownership." This evaluation is to include the results of market surveys for acquisition, rehabilitation, or new construction of housing and/or the identification of the actual properties to be acquired, rehabilitated, or constructed.

In addition to information concerning the supply of homes, the applicant must provide information to support the demand for homes. This market information must indicate that there is a demand for the type of tenure being proposed for the home at the price being proposed. If the project is for homeownership, what evidence is there that there is sufficient demand of interested and eligible applicants? Have applicants been identified? Selected? If the proposed applicants are renting, is there evidence they want to buy? Is there evidence they can afford to buy? As an indication of credit worthiness, have applicants been pre-qualified for a loan?

For all types of projects, but especially for an owner-occupied rehabilitation project, include a discussion of funding for routine maintenance and property taxes, which may increase due to an increase in the unit value, and energy conservation. Since the units to be rehabilitated with the HOME grant became substandard because they were not maintained, include a discussion of provisions to pay for training and education, and for major repair and replacement as a result of damage or loss through wear and tear. For example: After the unit is rehabilitated with this HOME grant, how will it be maintained? Are funds being set aside to maintain the unit? Whose funds are they—the owner's, tenant's, owner/occupant's? Is there a plan included in the application to address this? Will the applicant provide for energy efficient construction/rehabilitation which goes beyond regulatory requirements so as to minimize occupant expenditure for utilities? Will the applicant employ construction/rehabilitation techniques/materials which will help minimize the upkeep and maintenance costs to the occupant/owner? For scoring, see Table 6. Points will be awarded based upon the completeness and adequacy of responding to pertinent questions.

TABLE 6.—SCORING GUIDE

Property identification and cost vs. ability to pay		
Good	Fair	Unsatisfactory
6 points	3 points	0 points.

(B) Cash flow projection through project completion (3 points maximum). This requirement deals with the year by year cash flow for the proposed project. For example, for a new construction project by the applicant of a single family detached unit that is to be sold to a low income family that will occupy the unit, the cash flow projection would show the cost of construction, the construction payments, any equity or debt using HOME or non-HOME funds, any downpayment and any mortgage loan made in the sale of the unit to the family, and the monthly mortgage payment and the source of funds to make those payments.

The applicant must provide a year-by-year cash flow projection which includes an estimate of all project costs and revenues. The project must be financially feasible from the start. The costs and the revenues must be realistic. The housing opportunities must be achievable for the amounts shown. The costs must not be unrealistically low, showing more product for less money.

There must be a projection of costs and revenues for the time the work is being carried out as well as the time of maintenance and repair. The costs and revenues projection identifies what the maintenance and repair and major replacement costs for the long term (i.e., not less than the minimum period of affordability, 24 CFR 92.614) are going to be and how they will be paid. The projection must identify what the costs and revenues are. If the source of revenue is a grant, the grant must be identified. The costs and revenues and the cash flow must cover the construction period and the marketing period (if there will be a marketing period); the period of maintenance and repair must be projected separately. The applicant must identify whether there is a need for short-term borrowing for rehabilitation or whether rehabilitation is paid for entirely from HOME and leveraged funds; any years of negative cash flow; and the cumulative negative cash flow. If the project requires financing, i.e., borrowing, to get through periods of negative cash flow, the applicant must show the financing in the cash flow projection. For scoring, see Table 7. Points will be awarded based on completeness in adequately addressing the pertinent questions.

TABLE 7.—SCORING GUIDE

Cash flow projection through project completion		
Good	Fair	Unsatisfactory
3 points	2 points	0 points.

(C) Financial feasibility during the affordability period (3 points maximum). This requirement deals with the financial feasibility of the housing during the affordability period beginning after project completion, i.e., after completion of the acquisition, rehabilitation, or new construction. The affordability period can be from 5 years to 20 years (24 CFR 92.614). The housing has costs and revenues throughout the affordability period. Identify all of the costs and revenues, year by year, and display them to ensure that all of the costs shall be paid by revenues reasonably anticipated to occur.

The housing must be financially feasible for the affordability period, while at the same time remaining affordable as prescribed by the requirements at 24 CFR 92.614 and 92.615. Arrangements to be made for long-term costs must be shown. If during this period developer borrowing is required to get through periods of cumulative negative cash flow, the applicant must show the borrowing. The applicant must show buyer mortgage payments, if any.

As costs occur for the units that are occupied (e.g., owner-occupied rehabilitation, or new construction of rental housing), the application must discuss who will pay those costs and how they will be paid; whether any borrowing will be involved; whether the owner is expected to make the payments and when the payments will occur. The costs and revenues for maintenance, repair, and major replacements must be included in the affordability period cash flow projection. For a rental project, the projection must include how the project management staffing costs described in the staffing plan will be paid. For scoring, see Table 8. Points will be awarded for completeness in addressing the pertinent questions.

TABLE 8—SCORING GUIDE

Financial feasibility during the affordability period		
Good	Fair	Unsatisfactory
3 points	2 points	0 points.

(D) Cost effectiveness test (3 points maximum). The cost effectiveness test is related to leverage because the more non-HOME grant money brought to the project, the lower the amount of HOME grant money needed. The cost effectiveness test gives more points to projects that use less HOME funds. The cost effectiveness test also rewards projects which use HOME funds most efficiently. To score a project in the cost effectiveness test, a maximum allowable expenditure of HOME funds is identified for each project type with respect to the total development cost (TDC).

(*1*) Housing Rehabilitation. For rehabilitation projects, the maximum allowable expenditure of HOME funds shall be no more than 62.5% of the cost of new construction (i.e., no more than 62.5% of the TDC) for substantial rehabilitation ("substantial" means an expenditure of $25,000 or more per home) and no more than 50% of the TDC of new construction for moderate rehabilitation. If the HOME assistance is less than 20% of the maximum allowable expenditure of HOME funds, the project receives 3 points; for 20% to 60%, 2 points; for 61% to 99%, 1 point. If it is 100% of the maximum allowable, the project receives 0 points. See Table 9.

(*2*) Acquisition. For acquisition projects, the maximum allowable expenditure of HOME funds shall be no more than 62.5% of the cost of new construction (i.e., no more than 62.5% of the TDC) if the property has been substantially rehabilitated and no more than 50% of the cost of new construction if the property has been moderately rehabilitated. If the HOME assistance is less than 20% of the maximum allowable amount, the project receives 3 points; for 20% to 60%, 2 points; for 61% to 99%, 1 point. If the HOME assistance is 100% of the maximum allowable amount, the project receives 0 points. See Table 9.

(*3*) New Construction. For new construction projects, the maximum allowable expenditure of HOME funds shall be less than or equal to 100% of the TDC. If the HOME assistance amount is less than 20% of the maximum allowable amount, the project receives 3 points; for 20% to 60%, 2 points; for 61% to 99%, 1 point. If the HOME assistance amount is 100% of the maximum allowable expenditure of HOME funds, the project receives 0 points. See Table 9.

TABLE 9—SCORING GUIDE

Cost Effectiveness Test			
0% to 19%	20% to 60%	61% to 99%	100%
3 pts.	2 pts.	1 pts.	0 pts.

(ii) Legal and Administrative Actions—10 points maximum. All policies, procedures, standards, criteria, and planning documents necessary for the type of project proposed must be included in the documentation for the project. Where rental housing is envisioned, this includes the tenant selection requirements for rental housing at 24 CFR 92.622(e). Where assistance for homeowners is contemplated, this includes the requirements for rehabilitation at 24 CFR 92.615(b). If the applicant is assisting homebuyers, the applicant must establish guidelines determined by HUD to be appropriate for the subsequent resale of the housing units, required under 24 CFR 92.615(a)(4). Planning documents must include a discussion of steps that will be taken to ensure maintenance of housing quality throughout the affordability period. See Table 10. Points will be awarded based on the completeness of the application and sample documentation in addressing the pertinent factors:

(A) Housing Rehabilitation. Data submitted must include adopted rehabilitation policies, including adopted rehabilitation standards that meet applicable local codes and/or ordinances; maximum rehabilitation cost per unit; rehabilitation selection criteria; and project planning documents.

(B) Acquisition. Data submitted must include adopted standards for houses that shall be acquired, including maximum purchase price per unit; participant selection criteria, and project planning documents.

(C) New Construction. Data submitted must include adopted standards for construction that meet applicable or local codes and ordinances and that meet HUD prescribed energy-efficiency standards; maximum cost per unit; participant selection criteria; and project planning documents.

Table 10—Scoring Guide

Other Legal and Administrative		
Good	Fair	Unsatisfactory
10 points	5 points	0 points.

(iii) Staffing Plan—15 points maximum. The applicant must provide a staffing plan. The plan must relate the steps in the project execution timetable with the personnel skills required for this project.

(A) For a grantee administered project, the staffing plan must identify the key personnel skills and experience requirements for the particular steps in the execution of this project, and relate this information to the project timetable, i.e., during acquisition, rehabilitation, construction. In order to be properly rated, experience identified must demonstrate the ability of key personnel in relation to the tasks required. A staffing plan which relates tasks, time, and personnel skills will receive 15 points. If the personnel requirements are for individuals who are experienced in the administration/management of programs which are somewhat similar to, but not the same as, the proposed program, 7 points will be awarded. Failure to submit a staffing plan or the submission of a plan which identifies personnel requirements for individuals whose experience would not have prepared them for the administration/management of the proposed program will result in the award of 0 points. Points will be awarded in accordance with Table 11 below.

(B) If the tribe has an agreement for the tribal IHA (or any other entity) to implement the project, a copy of the agreement must be included, as well as a staffing plan of the IHA (or other entity), which includes the addition of this project, and a description of the impact on the entity due to administering this project. The staffing plan must identify the key personnel skills and experience requirements for the particular steps in the execution of this project, and relate this information to the project timetable, i.e., during acquisition, rehabilitation, construction. In order to be properly rated, experience identified must demonstrate the ability of key personnel in relation to the tasks required. A staffing plan which relates tasks, time, and personnel skills will receive 15 points. If the personnel requirements are for individuals who are experienced in the administration/management of programs which are somewhat similar to, but not the same as, the proposed program, 7 points will

be awarded. Failure to submit a staffing plan or the submission of a plan which identifies personnel requirements for individuals whose experience would not have prepared them for the administration/management of the proposed program will result in the award of 0 points. Points will be awarded in accordance with Table 11 below.

TABLE 11.—SCORING GUIDE

Staffing plan		
Good	Fair	Unsatisfactory
15 points	7 points	0 points.

(3) Leveraging—30 points maximum. The third of the three criteria provided in 24 CFR 92.604 is: Leveraging of HOME funds. Leveraging means using HOME funds to attract or bring in other dollars. Leveraging is the degree to which other sources of assistance (including—but not limited to—loans, advances, equity investments, interest subsidies, State funds, and private contributions) are used in conjunction with HOME funds to carry out the proposed project. The application must identify the leveraged funding for the HOME project and whether the leveraged funding will be used to pay for an eligible HOME project cost. For example, a Bureau of Indian Affairs-funded road is only counted for leveraging purposes if it's a site improvement and then only to the extent it benefits the HOME project units (and that amount becomes part of the development cost). If the proposed HOME project is being funded with resources other than the HOME grant, the application must identify those resources and explain how they will be used. The application may propose some or all of those resources for leverage points. Proportionate amounts of each resource and the HOME grant should be expended at the same time, but if not, the application must explain why and identify when the HOME funds and the non-HOME funds will be spent.

Resources will be counted for leverage points only if they are in the possession of, or legally obligated to, the applicant before or within 90 calendar days of notification of grant award. For example, the contribution of land, goods, and services which come in or become available, or the prequalification of buyers for mortgage loans with a mortgage lender, before or within 90 calendar days of notification of grant award, fulfills this criterion. Contributions to a low-income housing tax credit program (LIHTC) where the funds do not become available to be expended for eligible project costs until 90 calendar days after notification of grant award do not fulfill this criteria. The use by the grantee of HOME grant funds for acquisition, rehabilitation, or construction will be conditioned upon the fulfillment of this criterion. If fulfillment does not occur, the grant will be withdrawn.

For consideration as leverage points, applicants must not submit information about the category of costs called indirect costs in OMB circular A–87. Such amounts are not counted for leverage points.

The phrase "in-kind" has been removed for leveraging points. Submit information about financial assistance for leverage points and identify it as land, goods, or services.

Whether or not leverage points are awarded, the use of additional funding to the tribe or family, including mortgage loans and LIHTC funding, is encouraged.

Applicants must provide documentation of the amount and sources of additional funds, including mortgage insurance, tribal funds, private contributions, tribal contributions directly related to the activity (labor, material, and equipment, as well as for soft costs, e.g., architectural and engineering costs), which are to be used in conjunction with HOME funds to carry out the proposed project.

Land already owned by the tribe shall not be counted. In the case of land donated by individuals or entities, it will be counted if the donation was contingent upon the receipt of the HOME award. Land value will be counted as a contribution only to the extent of its appraised value. All appraisals shall be in conformance with established and generally recognized appraisal practices and procedures in common use by professional appraisers. Donated services will be accepted, provided that: first, the costs are demonstrated and determined necessary and directly attributable to the actual development of the project; and second, comparable costs and time estimates are submitted that justify the costs attributable to the donated services or labor. Donated labor shall be valued at a level necessary for the work provided and shall be assessed at the skill level of the individual(s) providing the labor.

The amounts recognized as leverage can include any other Federal grant or assistance program. However, do not propose to use Indian Health Service funding for leverage points; IHS funding is not being made available for HOME projects. Loans secured through mortgage loan insurance programs (e.g., section 184 loan guarantee) may be recognized as leverage.

Points will be awarded as presented in Table 12. Ratio as a percentage is calculated by dividing the number of dollars made available from other sources of assistance by the number of dollars of HOME funds requested in the application, and multiplying by 100. For example, when one hundred (or more) dollars are made available from other sources of assistance for each one hundred dollars of HOME funds requested in the application, the maximum number of points (30) is awarded. When sixty dollars are made available from other sources of assistance for each one hundred dollars of requested HOME funds, fifteen points are earned.

TABLE 12.—SCORING GUIDE

Leveraging	
Ratio	Points
100% or more	30
80% but less than 100%	20
60% but less than 80%	15
40% but less than 60%	10
Less than 40%	0

(e) Application Review

(1) Receipt, eligibility, correctable deficiencies, and non-correctable deficiencies.

(i) Receipt. Upon receipt of the application, the Area ONAP will note the date and time and provide written acknowledgement to the applicant indicating the date and time the application was received.

(ii) Eligibility. Each application will be screened at the Area ONAP for eligibility requirements. For the application to be rated and ranked, it must meet each eligibility requirement.

(iii) Correctable deficiencies. The opportunity to correct a technical, non-substantive deficiency is only given for those deficiencies which would *not* affect the evaluation of the application. Therefore, only minor administrative deficiencies are correctable. To assure uniform treatment, these are limited to a failure to submit a certification with the application or failure to submit a signed certification with the application. An applicant is not permitted to improve its application by filing statements that address substantive requirements after the due date for submissions has passed. If the application has correctable deficiencies, prior to a final determination on funding, the Area ONAP shall notify the applicant in writing of the correctable deficiencies and require their correction by the applicant within 14 calendar days of the issuance of notification.

(iv) Non-correctable deficiencies. If the application does not include all the items identified as non-correctable eligibility requirements, the Area ONAP shall not request any corrections for correctable deficiencies. The Area ONAP shall set the application aside. When HUD announces its decisions concerning the funding competition, the Area ONAP shall notify the applicant whose application did not meet the eligibility requirements.

(2) Eligibility requirements. Completeness will be determined by the Area ONAP as to whether the application includes all the non-correctable items, properly prepared and executed, identified in the Checklist of Eligibility Requirements and Application Submission Requirements under Appendix 2 of this NOFA. The Area ONAP screening does not include determining whether the application meets the minimum point score requirement. After screening, each application which meets the eligibility and application submission requirements set forth in this NOFA and those which are complete except for correctable deficiencies will be rated.

(3) Rating and ranking. Rating and ranking of applications will be carried out by a panel of HUD staff. The panel will review and rate each application which meets the eligibility requirements. The application ratings will be used to create an Initial Application Ranking List.

(i) Ranking. After the applications from all applicants have been rated by the Area ONAP, the scores will be assembled in a single, merged list of scores for all applications rated by the Area ONAP. There will be a single list for each Area ONAP. For multi-project applications, each project will be rated and ranked individually.

(ii) Computation. Scores for ranking will be carried out to two decimal places (e.g., 12.34).

(4) Selection. The ranking process will produce an ordered list of projects that may receive funding. The order is established by the number of points the project received in the rating process. The eligibility requirement for further consideration will be 50 out of 100 points. Project applications scoring lower than 50 points will be set aside as non-responsive and ineligible. After rating and ranking, applicants with the highest scores will be selected and offered awards *to the extent that funds are available.* NOTE: The grantee must carry out an environmental review before any HOME funds are committed to an activity requiring such a review (acquisition, rehabilitation, or new construction, generally; administrative costs are exempt) and obtain approval of its request for release of funds under 24 CFR part 58, in accordance with 24 CFR 92.633.

(5) Tie Breaker. When rating results in a tie among projects, projects will be approved in the following order:

(i) Those that can be fully funded over those that cannot be fully funded;

(ii) Projects that benefit the greatest number of very low-income and low-income persons; and

(iii) Projects that benefit the highest percentage of the total population of the tribe.

(6) Errors. Area ONAP Administrators may make a determination that an error has occurred in the rating or ranking of applications. Applicants may bring errors in the rating and ranking of applications to the attention of Area ONAP within 90 days of being informed of their score. If an Area ONAP review determines that there was an error that denied funding to the applicant, the Area ONAP will construct a hypothetical distribution that would have existed if the error had not been made, and the Area ONAP will determine what the funding would have been for the applicant subject to the funds that were available at the time. The applicant will be funded out of remaining funds in the challenged round of funding, or out of the next available round of funding.

II. Application Process

(a) Application Packages. Although this NOFA provides the public with notice of, and salient information about, the FY 1996 HOME program for Indian applicants, it is the application kit that provides applicants with further necessary information on how to participate in the program. Applicants should obtain a copy of the application kit, which includes copies of required forms, from any Area ONAP listed in Appendix 1.

(b) Submittal of Complete Application. Completed applications must be submitted to the Area ONAP having jurisdiction for the applicant at the address listed at Appendix 1. The application shall be submitted on Form 424 and shall be accompanied by all the legal and administrative attachments required by the form.

(c) Application Due Date. An applicant may submit an application for grant assistance to the Area ONAP having jurisdiction over the applicant after the publication of this NOFA in the **Federal Register** but before 3:00 P.M. Area ONAP local time, 60 calendar days after the publication date. This application deadline is firm as to date and hour. The Department shall treat as ineligible for consideration any application that is received after the deadline. Applicants should make early submission of their materials to avoid any risk of loss of eligibility brought about by unanticipated delays or other delivery-related problems. Facsimile ("FAX") copies of applications will not be accepted.

III. Other Matters

(a) Environment. A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations that implement section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332). The Finding of No Significant Impact is available for public inspection during business hours in the Office of the Rules Docket Clerk, Office of General Counsel, Room 10276, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410.

(b) Energy. Utility expenses place a heavy burden on Indian housing and often cause abandonment. Applicants are encouraged to address this problem in applications for funding. 24 CFR 92.621: "Newly constructed housing must meet the current edition of the Model Energy Code published by the Council of American Building Officials." See also 24 CFR 905.250(b) and 24 CFR 85.36(b)(7).

(c) Federalism Impact. The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, *Federalism*, has determined that the policies contained in this NOFA shall not have substantial direct effects on states or their political subdivisions, or the relationship between the federal government and the states, or on the distribution of power and responsibilities among the various levels of government. The NOFA is limited to providing funds to Indian tribes in accordance with a program to expand the supply of affordable housing. As a result, the rule is not subject to review under the order.

(d) Family Impact. The General Counsel, as the Designated Official for Executive Order 12606, *The Family*, has determined that the provisions of this NOFA have the potential for indirect, although positive, impact on family formation, maintenance and general well-being within the meaning of the Order. The NOFA provides funds to Indian tribes in accordance with a program to expand the supply of affordable housing. To the extent that housing for families is increased, the

impact on the family is indirect and beneficial. Accordingly, no further review is considered necessary.

(e) Section 102 of the HUD Reform Act. Documentation and Public Access Requirements; Applicant/Recipient disclosures:

Documentation and public access requirements. HUD shall ensure that documentation and other information regarding each application submitted pursuant to this NOFA are sufficient to indicate the basis upon which assistance was provided or denied. This material, including any letters of support, shall be made available for public inspection for a five-year period beginning not less than 30 days after the award of the assistance. Material shall be made available in accordance with the Freedom of Information Act (5 U.S.C. 552) and HUD's implementing regulations at 24 CFR part 15. In addition, HUD shall include the recipients of assistance pursuant to this NOFA in its **Federal Register** notice of all recipients of HUD assistance awarded on a competitive basis. (See 24 CFR 12.14(a) and 12.16(b), and the notice published in the **Federal Register** on January 16, 1992 (57 FR 1942), for further information on these documentation and public access requirements.)

Disclosures. HUD shall make available to the public for five years all applicant disclosure reports (HUD Form 2880) submitted in connection with this NOFA. Update reports (also Form 2880) shall be made available along with the applicant disclosure reports, but in no case for a period less than three years. All reports—both applicant disclosures and updates—shall be made available in accordance with the Freedom of Information Act (5 U.S.C. 552) and HUD's implementing regulations at 24 CFR part 15. (See 24 CFR subpart C, and the notice published in the **Federal Register** on January 16, 1992 (57 FR 1942), for further information on these disclosure requirements.)

(f) Section 103 of the HUD Reform Act. HUD's regulation implementing section 103 of the Department of Housing and Urban Development Reform Act of 1989 (42 U.S.C. 3537a) is codified at 24 CFR part 4. Part 4 applies to the funding competition announced today. The requirements of the rule continue to apply until the announcement of the selection of successful applicants.

HUD employees involved in the review of applications and in the making of funding decisions are restrained by part 4 from providing advance information to any person (other than an authorized employee of HUD) concerning funding decisions, or from otherwise giving any applicant an unfair competitive advantage. Persons who apply for assistance in this competition should confine their inquiries to the subject areas permitted under 24 CFR part 4.

Applicants or employees who have ethics related questions should contact the HUD Office of Ethics (202) 708–3815. (This is not a toll-free number.) For HUD employees who have specific program questions, such as whether particular subject matter can be discussed with persons outside HUD, the employee should contact the appropriate Field Office Counsel, or Headquarters counsel for the program to which the question pertains.

(g) Section 3. 24 CFR part 135. Economic Opportunities for Low and Very Low Income Persons. All applicants are herein notified that section 3 of the Housing and Urban Development Act of 1968 and the regulations in 24 CFR part 135 are applicable to funding awards made under this NOFA. One of the purposes of the assistance is to give to the greatest extent feasible, and consistent with existing Federal, State, and local laws and regulations, job training, employment, contracting and other economic opportunities to section 3 residents and section 3 business concerns. Applicants that receive Indian HOME Program assistance which exceeds $200,000 for housing rehabilitation or new construction shall comply with the procedures and requirements of this part to the maximum extent consistent with, but not in derogation of, compliance with section 7(b) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450e(b)).

Authority: 42 U.S.C. 3535(d) and 12701–12839.

Dated: March 15, 1996.

Michael B. Janis,

General Deputy Assistant Secretary for Public and Indian Housing.

APPENDIX 1.—LIST OF LOCAL OFFICES OF NATIVE AMERICAN PROGRAMS

Tribes located	Area ONAP address
East of the Mississippi River (including all of Minnesota and Iowa).	Eastern/Woodlands Office of Native American Programs, 5P, Metcalfe Federal Building, 77 West Jackson Boulevard, Chicago, Illinois 60604–3507, (312) 353–1282 or (800) 735–3239, TDD Numbers: 1–800–927–9275 or 312–886–3741.
Louisiana, Missouri, Kansas, Oklahoma, and eastern Texas.	Southern Plains Office of Native American Programs, 6.IPI, 500 West Main Street, Suite 400, Oklahoma City, Oklahoma 73102, (405) 553–7525, TDD Numbers: 405–231–4181 or 405–231–4891.
Colorado, Iowa, Montana, Nebraska, North Dakota, South Dakota, Utah, and Wyoming.	Northern Plains Office of Native American Programs, 8P, First Interstate Tower North, 633 17th Street, Denver, Colorado 80202–3607, (303) 672–5462, TDD Number: 303–844–6158.
Arizona, California, New Mexico, Nevada, and western Texas.	Southwest Office of Native American Programs, 9EPID, Two Arizona Center, 400 North Fifth Street, Suite 1650, Phoenix, Arizona 85004–2361, (602) 379–4156, TDD Number: 602–379–4461 or Office of Native American Programs, HUD, 450 Golden Gate Avenue, 8th Floor, Box 36003, San Francisco, CA 94102–3448, (415) 436–8121, TDD Number: (415) 436–6559.
Idaho, Oregon, and Washington	Northwest Office of Native American Programs, 10PI, 909 First Avenue, Suite 300, Seattle, Washington 98104–1000, (206) 220–5270, TDD Number: (206) 220–5185.
Alaska	Alaska Office of Native American Programs, 10.1PI, 949 East 36th Avenue, Suite 401, Anchorage, Alaska 99508–4399, (907) 271–4633, TDD Number: (907) 271–4328.

Appendix 2. Checklist of Eligibility Requirements and Application Submission Requirements

Applications must meet the requirements in (1) and (2), below. Except for the certifications in (2)(iii) and (2)(iv), these requirements are non-correctable after the closing of the application submission period.

(1) Each application must be:

(i) _____ From an eligible applicant.

(ii) _____ If the applicant proposes to involve its IHA, the IHA must not have been disqualified for funding of new projects, as determined in accordance with 24 CFR 905.135. (A resolution may be attached which authorizes another entity, e.g., a housing authority, to prepare the application on behalf of the tribe; however, the tribe must be the applicant and sign the application.)

(iii) _____ There is no information to indicate that the eligible applicants and involved IHA lack the administrative capacity to undertake the project proposed.

(iv) _____ For one or more Indian HOME Program eligible projects.

(v) _____ For not more than a $1.5 million grant.

(vi) _____ For a grant amount not in excess of 115% of the maximum per-unit subsidy amount (24 CFR 92.620). The maximum per-unit subsidy amount is the total development cost standard for the area. Maximum allowable Total Development Costs ("TDCs") are established by location and by unit size (size is expressed as number of bedrooms). Maximum allowable TDCs are available from the Area ONAP for each applicant community. To determine whether the HOME grant amount requested satisfies this limitation, multiply the maximum allowable TDC for each size by the proposed number of units, add the products, multiply by 115%, and compare the result to the HOME grant amount requested. The grant amount request may not be more than this amount.

(vii) _____ Submitted with an original and one copy.

(2) Each application must contain the following:

(i) _____ Transmittal Letter.

(ii) _____ Standard Form-424, Application for Federal Assistance. Complete side one only.

Name of the eligible applicant, e.g., a tribe or an authorized Tribal organization, must be in field 5, legal applicant. A resolution may be attached which authorizes another entity, e.g., a housing authority, to prepare the application on behalf of the eligible applicant; however, the eligible applicant must be the applicant and sign the application. The Catalog of Federal Domestic Assistance identifies this program as program number 14.239.

(iii) _____ Form HUD–4126, which contains the following certifications:

(A) A certification that the applicant shall comply with the acquisition and relocation requirements of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended, implementing regulations at 49 CFR part 24 and the requirements of 24 CFR 92.634.

(B) A certification that the applicant shall use HOME funds in compliance with all the requirements of 24 CFR part 92, the HOME investment partnerships program interim rule.

(C) Drug-free workplace. The certification with regard to the drug-free workplace required by 24 CFR part 24, subpart F and appendix C.

(D) Debarment. The certification that neither the applicant nor its principals are presently excluded from participation in any HUD programs, as required by 24 CFR part 24, appendix A.

(E) Audits. A certification that the applicant does not have an outstanding Indian HOME or ICDBG obligation to HUD that is in arrears, or it has agreed to a repayment schedule. A certification that the applicant does not have an overdue or unsatisfactory response to an audit finding(s).

(F) Fire Safety. A certification that the applicant shall comply with the requirements of the Fire Authorization Administration Act of 1992 (Pub. L. 102–522).

(G) Economic Opportunities for Low-Income and Very Low-Income Persons. A certification that the applicant shall comply with the requirements of Section 3 of the Housing and Urban Development Act of 1968 and the regulations in 24 CFR part 135 to the maximum extent consistent with, but not in derogation of, compliance with section 7(b) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450e(b)).

(iv) _____ Drug-free workplace. In order to fulfill OMB requirements, a separate, complete text certification with regard to the drug-free workplace required by 24 CFR part 24, subpart F and appendix C.

(v) _____ Form HUD–2880, Applicant/Recipient Disclosure/Update Report, as required under subpart C of 24 CFR part 12, Accountability in the Provision of HUD Assistance.

(vi) _____ Form HUD–4121–I, Indian HOME Program Grants. Comprehensive Approach; component that addresses the Comprehensive Approach For Expanding The Supply Of Affordable Housing. Indian tribes are not required to submit a Comprehensive Housing Affordability Strategy (CHAS), a Tribal Housing Plan, or a housing strategy to receive HOME funds. However, the application must demonstrate how the proposed project will contribute to a comprehensive approach for expanding the supply of affordable housing for members of the Indian tribe.

(vii) _____ Form HUD–4122–I, Indian HOME Program Grants. Project Summary; component that addresses the summary description of the proposed project.

(viii) _____ Operation Plan. All proposed projects that shall be operated as rental projects MUST include a management and maintenance plan and a staffing plan for these functions. An agreement with the tribal IHA to manage the units is not sufficient as a management and maintenance staffing plan; the IHA must include projected staffing to carry out these functions.

(ix) _____ Form HUD–4125–I, Indian HOME Program Grants. Implementation Schedule.

(x) _____ Form HUD–4123–I, Indian HOME Program Grants. Cost Summary.

(xi) _____ Project location map.

(xii) _____ Components that address the selection criteria. The applicant must provide a narrative and supporting documentation that are responsive to the selection criteria of sections I.(d) (1), (2), and (3) of this NOFA. This includes, but is not limited to, a description of how the HOME funds shall be used, and the various kinds of information that are necessary in order to apply the selection criteria and rating factors.

Part III

Department of Housing and Urban Development

24 CFR Part 880, et al.
Consolidation of Regulations for Project-Based Section 8 Programs; Final Rule

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner; Consolidation of Regulations for Project-Based Section 8 Programs

24 CFR Parts 880, 881, 883, and 884

[Docket No. FR–3984–F–01]

RIN 2502–AG65

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner (HUD).

ACTION: Final rule.

SUMMARY: This rule removes obsolete provisions concerning development of housing under regulations for the Section 8 project-based assistance programs for New Construction, Substantial Rehabilitation, and State Housing Agencies, and Rural Rental Housing now found in 24 CFR parts 880, 881, 883, and 884. It also consolidates into one part, the certain nearly identical provisions concerning the housing assistance payments contract and management for the New Construction, Substantial Rehabilitation, and State Housing Agencies programs that are now found in three parts.

EFFECTIVE DATE: April 26, 1996.

FOR FURTHER INFORMATION CONTACT: For development issues: Jane Luton, Director, New Products Division (telephone: (202) 708–2556, ext. 2537) or for management issues: Barbara D. Hunter, Director, Program Management Division (telephone: (202) 708–4162, ext. 2632), Office of Multifamily Housing, Department of Housing and Urban Development, 451 Seventh Street, SW, Washington, D.C. 20410. The above telephone numbers may be accessed through TDD by calling the Federal Relay Service at (202) 708–9300 or 1–800–877–TDDY (1–800–877–8389). (Other than the "1–800" number, these telephone numbers are not toll-free.)

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act Statement

This rule does not alter existing information collection requirements. An agency may not conduct or sponsor, and person is not required to respond to a collection of information unless the collection displays a valid control number.

Background

On March 4, 1995, President Clinton issued a memorandum to all Federal departments and agencies regarding regulatory reinvention. In response to this memorandum, the Department of Housing and Urban Development conducted a page-by-page review of its regulations to determine which can be eliminated, consolidated, or otherwise improved.

The authority for funding activity under the Section 8 project-based assistance programs affected by this rule was repealed in 1983, and there have been no projects in the development stage for a substantial period. This rule, accordingly, removes from 24 CFR parts 880, 881, 883, and 884 obsolete provisions relating to the development of projects under these parts. The removed provisions include but are not limited to: part 880, subparts C and D; part 881, subparts C, D, and G; and part 883, subparts B, D, and E. Section 883.106, added by this rule, replaces current § 883.201, which was in subpart B. In part 884, individual sections have been removed.

This rule also consolidates into part 880, subparts E and F, the closely-related housing assistance payments (HAP) contract and the management regulations currently contained in parts 880, 881, and 883. Because of the similarity of the two sets of HAP contract regulations, §§ 881.505 through 881.508 have been removed and replaced by a cross-reference to the same sections in part 880, subpart E. (See § 881.503) In part 883, which is not as closely related to part 880, §§ 883.605 and 883.608 have been replaced by cross-reference to the comparable §§ 880.504 and 880.508 provisions in part 880, subpart E.

In both parts 881 and 883, the respective Management subparts have been removed and replaced by cross-references to part 880, subpart F. Part 880, subpart F has been revised to include certain part 883-specific requirements, where the current part 883 requirements differ from those applicable to part 880 and part 881 projects.

The New Construction Set-Aside for Section 515 Rural Rental Housing Projects program, contained in part 884, is administered by the Rural Housing and Community Development Service, successor agency to the Farmers Home Administration, under a memorandum of understanding. The part 884 provisions have not been consolidated into part 880.

Justification for Final Rulemaking

HUD generally publishes a rule for public comment before issuing a rule for effect, in accordance with its own regulations on rulemaking in 24 CFR part 10. However, part 10 provides for exceptions to the general rule if the agency finds good cause to omit advance notice and public participation. The good cause requirement is satisfied when prior public procedure is "impracticable, unnecessary, or contrary to the public interest" (24 CFR 10.1). HUD finds that good cause exists to publish this rule for effect without first soliciting public comment. This rule merely consolidates existing CFR parts and removes obsolete regulatory provisions and does not establish or affect substantive policy. Therefore, prior public comment is unnecessary.

Findings and Certifications

Impact on the Environment

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969. The Finding of No Significant Impact is available for public inspection between 7:30 a.m. and 5:30 p.m. weekdays in the Office of the Rules Docket Clerk at the above address.

Federalism Impact

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, Federalism, has determined that the policies contained in this rule do not have significant impact on States or their political subdivisions since the rule merely consolidates existing provisions into one part.

Impact on the Family

The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this rule does not have potential for significant impact on family formation, maintenance, and general well-being, since it only consolidates and streamlines existing provisions. Therefore, the rule is not subject to review under the Order.

Impact on Small Entities

The Secretary, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this rule before publication and by approving it certifies that this rule will not have a significant impact on a substantial number of small entities, because it makes no substantive changes in the regulations affected.

Catalog

The Catalog of Federal Domestic Assistance number for the programs affected by this rule is 14.182.

List of Subjects

24 CFR Part 880

Grant programs—housing and community development, Rent subsidies, Reporting and recordkeeping requirements.

24 CFR Part 881

Grant programs—housing and community development, Rent subsidies, Reporting and recordkeeping requirements.

24 CFR Part 883

Grant programs—housing and community development, Rent subsidies, Reporting and recordkeeping requirements.

24 CFR Part 884

Grant programs—housing and community development, Rent subsidies, Reporting and recordkeeping requirements, Rural areas.

Accordingly, under the authority of 42 U.S.C. 3535(d), for the reasons stated in the preamble, parts 880, 881, 883, and 884 of title 24 of the Code of Federal Regulations are amended as follows:

PART 880—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM FOR NEW CONSTRUCTION

1. The authority citation for part 880 continues to read as follows:

Authority: 42 U.S.C. 1437a, 1437c, 1437f, 3535(d), 12701, and 13611–13619.

Subpart A—Summary and Applicability

2. Section 880.101 is revised to read as follows:

§ 880.101 General.

(a) The purpose of the Section 8 program is to provide low-income families with decent, safe and sanitary rental housing through the use of a system of housing assistance payments. This part contains the policies and procedures applicable to the Section 8 new construction program. The assistance may be provided to public housing agency owners or to private owners either directly from HUD or through public housing agencies.

(b) This part does not apply to projects developed under other Section 8 program regulations, including 24 CFR parts 881, 882, 883, 884, and 885, except to the extent specifically stated in those parts. Portions of subparts E and F of this part 880 have been cross-referenced in 24 CFR parts 881 and 883.

§§ 880.102 and 880.103 [Removed]

3. Sections 880.102 and 880.103 are removed.

4. Section 880.104 is revised to read as follows:

§ 880.104 Applicability of part 880 in effect as of November 5, 1979.

(a) Part 880, in effect as of November 5, 1979, applies to all proposals for which a notification of selection was not issued before the November 5, 1979 effective date of part 880. (See 24 CFR part 880, revised as of April 1, 1980.) Where a notification of selection was issued for a proposal before the November 5, 1979 effective date, part 880, in effect as of November 5, 1979, applies if the owner notified HUD within 60 calendar days that the owner wished the provisions of part 880, effective November 5, 1979, to apply and promptly brought the proposal into conformance.

(b) Subparts E (Housing Assistance Payments Contract) and F (Management) of this part apply to all projects for which an Agreement was not executed before the November 5, 1979, effective date of part 880. Where an Agreement was so executed:

(1) The owner and HUD may agree to make the revised subpart E of this part applicable and to execute appropriate amendments to the Agreement and/or Contract.

(2) The owner and HUD may agree to make the revised subpart F of this part applicable (with or without the limitation on distributions) and to execute appropriate amendments to the Agreement and/or Contract.

(c) Section 880.607, Termination of Tenancy and Modification of Leases, applies to new families who begin occupancy or execute a lease on or after 30 days after the November 5, 1979, effective date of part 880. This section also applies to families not covered by the preceding sentence, including existing families under lease, with respect to all leases in which a renewal becomes effective on or after the 60th day following the November 5, 1979 effective date of part 880. A lease is considered to be renewed where both the landlord and the family fail to terminate a tenancy under a lease permitting either party to terminate.

(d) Notwithstanding the provisions of paragraph (b) of this section, the provisions of 24 CFR part 5 (concerning preferences for selection of applicants) apply to all projects, regardless of when an Agreement was executed.

Subpart B—Definitions and Other Requirements

5. The heading for subpart B of part 880 is revised as set forth above.

6. Section 880.201 is amended by removing the definitions of *"Allocation area"*, *"New Communities"*, and *"Preliminary proposal"* and by adding in alphabetical order, the definition of *"Agency"*, to read as follows:

§ 880.201 Definitions.

* * * * *

Agency. As defined in 24 CFR part 883.

* * * * *

§§ 880.202, 880.203, 880.204, 880.206, 880.209, and 880.210 [Removed]

7. Sections 880.202, 880.203, 880.204, 880.206, 880.209, and 880.210 are removed.

Subparts C and D—[Removed and Reserved]

8. Subpart C (§§ 880.301 through 880.311) and subpart D (§§ 880.401 through 880.405) of part 880 are removed and reserved.

Subpart E—Housing Assistance Payments Contract

9. Section 880.501 is amended by revising paragraph (a), and by removing and reserving paragraph (b), to read as follows:

§ 880.501 The contract.

(a) *Contract.* The Housing Assistance Payments Contract sets forth rights and duties of the owner and the contract administrator with respect to the project and the housing assistance payments. The owner and contract administrator execute the Contract in the form prescribed by HUD upon satisfactory completion of the project.

(b) [Reserved]

* * * * *

10. In § 880.504, paragraphs (b), (c) introductory text, (c)(1), and (e) are revised, to read as follows:

§ 880.504 Leasing to eligible families.

* * * * *

(b) *Reduction of number of units covered by Contract.* (1) *Part 880 and 24 CFR part 881 projects.* HUD (or the PHA at the direction of HUD, as appropriate) may reduce the number of units covered by the Contract to the number of units available for occupancy by eligible families if:

(i) The owner fails to comply with the requirements of paragraph (a) of this section; or

(ii) Notwithstanding any prior approval by the contract administrator to lease such units to ineligible families, HUD (or the PHA at the direction of HUD, as appropriate) determines that the inability to lease units to eligible families is not a temporary problem.

(2) *For 24 CFR part 883 projects.* HUD and the Agency may reduce the number

of units covered by the Contract to the number of units available for occupancy by eligible families if:

(i) The owner fails to comply with the requirements of paragraph (a) of this section; or

(ii) Notwithstanding any prior approval by the Agency to lease such units to ineligible families, HUD and the Agency determine that the inability to lease units to eligible families is not a temporary problem.

(c) *Restoration.* For this part 880 and 24 CFR part 881 projects, HUD will agree to an amendment of the ACC or the Contract, as appropriate, to provide for subsequent restoration of any reduction made pursuant to paragraph (b) of this section, and for 24 CFR part 883 projects, HUD will agree to an amendment of the ACC and the Agency may agree to an amendment to the Contract to provide for subsequent restoration of any reduction made pursuant to paragraph (b) of this section, if:

(1) HUD determines (for 24 CFR part 883 projects, HUD and the Agency determine) that the restoration is justified by demand,

* * * * *

(e) *Termination of assistance for failure to submit evidence of citizenship or eligible immigration status.* If an owner who is subject to paragraphs (a) and (b) of this section is required to terminate housing assistance payments for the family in accordance with 24 CFR part 5 because the owner determines that the entire family does not have U.S. citizenship or eligible immigration status, the owner may allow continued occupancy of the unit by the family without Section 8 assistance following the termination of assistance, or if the family constitutes a mixed family, as defined in 24 CFR part 5, the owner shall comply with the provisions of 24 CFR part 5 concerning assistance to mixed families, and deferral of termination of assistance.

Subpart F—Management

11. Section 880.601 is amended by revising paragraphs (a)(4), (b), (c), and (e), to read as follows:

§ 880.601 Responsibilities of owner.

(a) * * *

(4) At the time of Contract execution, the owner must submit a list of leased and unleased units, with justification for the unleased units, in order to qualify for vacancy payments for the unleased units.

(b) *Management and maintenance.* The owner is responsible for all management functions, including determining eligibility of applicants in accordance with 24 CFR parts 5 and 24 CFR part 813, provision of Federal selection preferences in accordance with 24 CFR part 5, selection of tenants, obtaining and verifying Social Security Numbers submitted by families (as provided by 24 CFR part 5), obtaining signed consent forms from families for the obtaining of wage and claim information from State Wage Information Collection Agencies (as provided by 24 CFR part 5), reexamination of family income, evictions and other terminations of tenancy, and collection of rents, and all repair and maintenance functions (including ordinary and extraordinary maintenance and replacement of capital items). All these functions shall be performed in compliance with applicable Equal Opportunity requirements.

(c) *Contracting for services.* (1) For this part 880 and 24 CFR part 881 projects, with HUD approval, the owner may contract with a private or public entity (except the contract administrator) for performance of the services or duties required in paragraphs (a) and (b) of this section.

(2) For 24 CFR part 883 projects, with approval of the Agency, the owner may contract with a private or public entity (but not with the Agency unless temporarily necessary for the Agency to protect its financial interest and to uphold its program responsibilities where no alternative management agent is immediately available) for performance of the services or duties required in paragraphs (a) and (b) of this section.

(3) However, such an arrangement does not relieve the owner of responsibility for these services and duties.

* * * * *

(e) *Use of project funds.* (1) Project funds must be used for the benefit of the project, to make required deposits to the replacement reserve in accordance with § 880.602 and to provide distributions to the owner as provided in § 880.205, § 881.205 of this chapter, or § 883.306 of this chapter, as appropriate.

(2) For this part 880 and 24 CFR part 881 projects:

(i) Any remaining project funds must be deposited with the mortgagee or other HUD-approved depository in an interest-bearing residual receipts account. Withdrawals from this account will be made only for project purposes and with the approval of HUD.

(ii) Partially-assisted projects are exempt from the provisions of this section.

(iii) In the case of HUD-insured projects, the provisions of this paragraph (e) will apply instead of the otherwise applicable mortgage insurance provisions.

(3) For 24 CFR part 883 projects:

(i) Any remaining project funds must be deposited with the Agency, other mortgagee or other Agency-approved depository in an interest-bearing account. Withdrawals from this account may be made only for project purposes and with the approval of the Agency.

(ii) In the case of HUD-insured projects, the provisions of this paragraph will apply instead of the otherwise applicable mortgage insurance provisions, except in the case of partially-assisted projects which are subject to the applicable mortgage insurance provisions.

* * * * *

12. Section 880.602 is revised to read as follows:

§ 880.602 Replacement reserve.

(a) A replacement reserve must be established and maintained in an interest-bearing account to aid in funding extraordinary maintenance and repair and replacement of capital items.

(1) *Part 880 and 24 CFR part 881 projects.* (i) For this part 880 and 24 CFR part 811 projects, an amount equivalent to .006 of the cost of total structures, including main buildings, accessory buildings, garages and other buildings, or any higher rate as required by HUD from time to time, will be deposited in the replacement reserve annually. This amount will be adjusted each year by the amount of the automatic annual adjustment factor.

(ii) The reserve must be built up to and maintained at a level determined by HUD to be sufficient to meet projected requirements. Should the reserve achieve that level, the rate of deposit to the reserve may be reduced with the approval of HUD.

(iii) All earnings including interest on the reserve must be added to the reserve.

(iv) Funds will be held by the mortgagee or trustee for bondholders, and may be drawn from the reserve and used only in accordance with HUD guidelines and with the approval of, or as directed by, HUD.

(v) Partially-assisted part 880 and 24 CFR part 881 projects are exempt from the provisions of this section.

(2) *Part 883 of this chapter projects.* (i) For 24 CFR part 883 projects, an amount equivalent to at least .006 of the cost of total structures, including main buildings, accessory buildings, garages and other buildings, or any higher rate as required from time to time by:

(A) The Agency, in the case of projects approved under 24 CFR part 883, subpart D; or

(B) HUD, in the case of all other projects, will be deposited in the replacement reserve annually. For projects approved under 24 CFR part 883, subpart D, this amount may be adjusted each year by up to the amount of the automatic annual adjustment factor. For all projects not approved under 24 CFR part 883, subpart D, this amount must be adjusted each year by the amount of the automatic annual adjustment factor.

(ii) The reserve must be built up to and maintained at a level determined to be sufficient by the Agency to meet projected requirements. Should the reserve achieve that level, the rate of deposit to the reserve may be reduced with the approval of the Agency.

(iii) All earnings, including interest on the reserve, must be added to the reserve.

(iv) Funds will be held by the Agency, other mortgagee or trustee for bondholders, as determined by the Agency, and may be drawn from the reserve and used only in accordance with Agency guidelines and with the approval of, or as directed by, the Agency.

(v) The Agency may exempt partially-assisted projects approved under 24 CFR part 883, subpart D, from the provisions of this section. All partially-assisted projects not approved under the Fast Track Procedures formerly in 24 CFR part 883, subpart D, are exempt from the provisions of this section.

(b) In the case of HUD-insured projects, the provisions of this section will apply instead of the otherwise applicable mortgage insurance provisions, except in the case of partially-assisted insured projects which are subject to the applicable mortgage insurance provisions.

13. Section 880.603 is revised to read as follow:

§ 880.603 Selection and admission of assisted tenants.

(a) *Application.* The owner must accept applications for admission to the project in the form prescribed by HUD. Both the owner (or designee) and the applicant must complete and sign the application. For this part 880 and 24 CFR part 881 projects, on request, the owner must furnish copies of all applications to HUD and the PHA, if applicable. For 24 CFR part 883 projects, on request, the owner must furnish to the Agency or HUD copies of all applications received.

(b) *Determination of eligibility and selection of tenants.* The owner is responsible for obtaining and verifying information related to income in accordance with 24 CFR part 813, and evidence related to citizenship and eligible immigration status in accordance with 24 CFR part 5, to determine whether the applicant is eligible for assistance in accordance with the requirements of 24 CFR part 5, and 24 CFR part 813, and to select families for admission to the program, which includes giving selection preferences in accordance with 24 CFR part 5, subpart D.

(1) If the owner determines that the family is eligible and is otherwise acceptable and units are available, the owner will assign the family a unit of the appropriate size in accordance with HUD standards. If no suitable unit is available, the owner will place the family on a waiting list for the project and notify the family of when a suitable unit may become available. If the waiting list is so long that the applicant would not be likely to be admitted for the next 12 months, the owner may advise the applicant that no additional applications are being accepted for that reason, provided the owner complies with the procedures for informing applicants about admission preferences as provided in 24 CFR part 5, subpart D.

(2) If the owner determines that an applicant is ineligible on the basis of income or family composition, or because of failure to meet the disclosure and verification requirements for Social Security Numbers (as provided by 24 CFR part 5), or because of failure by an applicant to sign and submit consent forms for the obtaining of wage and claim information from State Wage Information Collection Agencies (as provided by 24 CFR parts 5 and 813), or that the owner is not selecting the applicant for other reasons, the owner will promptly notify the applicant in writing of the determination and its reasons, and that the applicant has the right to meet with the owner or managing agent in accordance with HUD requirements. Where the owner is a PHA, the applicant may request an informal hearing. If the PHA determines that the applicant is not eligible, the PHA will notify the applicant and inform the applicant that he or she has the right to request HUD review of the PHA's determination. The applicant may also exercise other rights if the applicant believes that he or she is being discriminated against on the basis of race, color, creed, religion, sex, or national origin. See 24 CFR part 5 for the informal review provisions for the denial of a Federal preference or the failure to establish citizenship or eligible immigration status and for notice requirements where assistance is terminated, denied, suspended, or reduced based on wage and claim information obtained by HUD from a State Wage Information Collection Agency.

(3) Records on applicants and approved eligible families, which provide racial, ethnic, gender and place of previous residency data required by HUD, must be maintained and retained for three years.

(c) *Reexamination of family income and composition*—(1) *Regular reexaminations.* The owner must reexamine the income and composition of all families at least every 12 months. After consultation with the family and upon verification of the information, the owner must make appropriate adjustments in the Total Tenant Payment in accordance with 24 CFR part 813 and determine whether the family's unit size is still appropriate. The owner must adjust Tenant Rent and the Housing Assistance Payment to reflect any change in Total Tenant Payment and must carry out any unit transfer required by HUD. At the time of the annual reexamination of family income and composition, the owner must require the family to disclose the verify Social Security Numbers, as provided by 24 CFR part 5. For requirements regarding the signing and submitting of consent forms by families for the obtaining of wage and claim information from State Wage Information Collection Agencies, see 24 CFR part 5. At the first regular reexamination after June 19, 1995, the owner shall follow the requirements of 24 CFR part 5 concerning obtaining and processing evidence of citizenship or eligible immigration status of all family members. Thereafter, at each regular reexamination, the owner shall follow the requirements of 24 CFR part 5 and verify the immigration status of any new family member.

(2) *Interim reexaminations.* The family must comply with provisions in its lease regarding interim reporting of changes in income. If the owner receives information concerning a change in the family's income or other circumstances between regularly scheduled reexaminations, the owner must consult with the family and make any adjustments determined to be appropriate. Any change in the family's income or other circumstances that results in an adjustment in the Total Tenant Payment, Tenant Rent and Housing Assistance Payment must be verified. See 24 CFR part 5 for the requirements for the disclosure and verification of Social Security Numbers

at interim reexaminations involving new family members. For requirements regarding the signing and submitting of consent forms for the obtaining of wage and claim information from State Wage Information Collection Agencies, see 24 CFR part 5. At any interim reexamination after June 19, 1995, when a new family member has been added, the owner shall follow the requirements of 24 CFR part 5 concerning obtaining and processing evidence of the citizenship or eligible immigration status of any new family member.

(3) *Continuation of housing assistance payments.* A family's eligibility for Housing Assistance Payments continues until the Total Tenant Payment equals the Gross Rent. The termination of eligibility at such point will not affect the family's other rights under its lease, nor will such termination preclude the resumption of payments as a result of later changes in income, rents, or other relevant circumstances during the term of the Contract. However, eligibility also may be terminated in accordance with HUD requirements, for such reasons as failure to submit requested verification information, including failure to meet the disclosure and verification requirements for Social Security Numbers, as provided by 24 CFR part 5, or failure to sign and submit consent forms for the obtaining wage and claim information from State Wage Information Collection Agencies, as provided by 24 CFR part 5. See 24 CFR part 5 for provisions requiring termination of assistance for failure to establish citizenship or eligible immigration status and also for provisions concerning certain assistance for mixed families (families whose members include those with eligible immigration status, and those without eligible immigration status) in lieu of termination of assistance, and for provisions concerning deferral of termination of assistance.

(Approved by the Office of Management and Budget under control number 2502–0204.)

14. In § 880.606, paragraph (b) is revised to read as follows:

§ 880.606 Lease requirements.

* * * * *

(b) *Form.* (1) *Part 880 and 24 CFR part 881 projects.* For this part 880 and 24 CFR part 881 projects, the form of lease must contain all required provisions, and none of the prohibited provisions specified in the developer's packet, and must conform to the form of lease included in the approved final proposal.

(2) *24 CFR part 883 projects.* For 24 CFR part 883 projects, the form of lease must contain all required provisions, and none of the prohibited provisions specified below.

(i) *Required provisions (Addendum to lease).*

Addendum to Lease

The following additional Lease provisions are incorporated in full in the Lease between ____ (Landlord) and ____ (Tenant) for the following dwelling unit: ____. In case of any conflict between these and any other provisions of the Lease, these provisions will prevail.

a. The total rent will be $____ per month.

b. Of the total rent, $____ will be payable by the State Agency (Agency) as housing assistance payments on behalf of the Tenant and $____ will be payable by the Tenant. These amounts will be subject to change by reason of changes in the Tenant's family income, family composition, or extent of exceptional medical or other unusual expenses, in accordance with HUD-established schedules and criteria; or by reason of adjustment by the Agency of any applicable Utility Allowance; or by reasons of changes in program rules. Any such change will be effective as of the date stated in a notification to the Tenant.

c. The Landlord will not discriminate against the Tenant in the provision of services, or in any other manner, on the grounds of race, color, creed, religion, sex, or national origin.

d. The Landlord will provide the following services and maintenance: _____

e. A violation of the Tenant's responsibilities under the Section 8 Program, as determined by the Agency, is also a violation of the lease.

Landlord _____

By _____

Date _____

Tenant _____

Date _____

[End of addendum]

(ii) *Prohibited provisions.* Lease clauses which fall within the classifications listed below must not be included in any Lease.

Lease Clauses

a. *Confession of Judgment.* Consent by the tenant to be sued, to admit guilt, or to accept without question any judgment favoring the landlord in a lawsuit brought in connection with the lease.

b. *Seize or Hold Property for Rent or Other Charges.* Authorization to the landlord to take property of the tenant and/or hold it until the tenant meets any obligation which the landlord has determined the tenant has failed to perform.

c. *Exculpatory Clause.* Prior agreement by the tenant not to hold the landlord or landlord's agents legally responsible for acts done improperly or for failure to act when the landlord or landlord's agent was required to do so.

d. *Waiver of Legal Notice.* Agreement by the tenant that the landlord need not give any notices in connection with (1) a lawsuit against the tenant for eviction, money damages, or other purposes, or (2) any other action affecting the tenant's rights under the lease.

e. *Waiver of Legal Proceeding.* Agreement by the tenant to allow eviction without a court determination.

f. *Waiver of Jury Trial.* Authorization to the landlord's lawyer to give up the tenant's right to trial by jury.

g. *Waiver of Right to Appeal Court Decision.* Authorization to the landlord's lawyer to give up the tenant's right to appeal a decision on the ground of judicial error or to give up the tenant's right to sue to prevent a judgment being put into effect.

h. *Tenant Chargeable with Cost of Legal Actions Regardless of Outcome of Lawsuit.* Agreement by the tenant to pay lawyer's fees or other legal costs whenever the landlord decides to sue the tenant whether or not the tenant wins. (Omission of such a clause does not mean that the tenant, as a party to a lawsuit, may not have to pay lawyer's fees or other costs if the court so orders.)

[End of clauses]

15. Section 880.607 is amended by:

a. Removing from paragraph (b)(3)(ii), the words "part 812", "part 750", "part 760", and by adding, in their respective places, the words "part 5"; and

b. Revising paragraphs (c)(4) and (d), to read as follows:

§ 880.607 Termination of tenancy and modification of lease.

* * * * *

(c) * * *

(4) See 24 CFR part 5 for provisions related to termination of assistance because of failure to establish citizenship or eligible immigration status, including informal hearing procedures and also for provisions concerning certain assistance for mixed families (families whose members include those with eligible immigration status, and those without eligible immigration status) in lieu of termination of assistance, and for provisions concerning deferral of termination of assistance.

(d) *Modification of Lease form.* The owner, with the prior approval of HUD or, for a 24 CFR part 883 project, the Agency, may modify the terms and conditions of the lease form effective at the end of the initial term or a successive term, by serving an appropriate notice on the family, together with the offer of a revised lease or an addendum revising the existing lease. This notice and offer must be received by the family at least 30 days prior to the last date on which the family has the right to terminate the tenancy without being bound by the modified terms and conditions. The family may accept the modified terms and conditions by executing the offered revised lease or addendum, or may reject the modified terms and conditions by giving the owner written notice in accordance with the lease that the family intends to terminate the tenancy. Any increase in rent must in all cases be governed by § 880.609 and other applicable HUD regulations.

* * * * *

§ 880.608 [Amended]

16. In § 880.608, paragraph (f) introductory text is amended by removing the words "HUD or the PHA, as appropriate," and by adding, in their place, the words "the contract administrator".

17. In § 880.609, paragraph (b) is revised to read as follows:

§ 880.609 Adjustment of contract rents.

* * * * *

(b) *Special additional adjustments.* For all projects, special additional adjustments will be granted, to the extent determined necessary by HUD (for 24 CFR part 883 projects, by the Agency and HUD), to reflect increases in the actual and necessary expenses of owning and maintaining the assisted units which have resulted from substantial general increases in real property taxes, assessments, utility rates, and utilities not covered by regulated rates, and which are not adequately compensated for by annual adjustments under paragraph (a) of this section. The owner must submit to the contract administrator required supporting data, financial statements and certifications.

* * * * *

18. In § 880.611, the introductory text to paragraph (d)(3) is revised to read as follows:

§ 880.611 Conditions for receipt of vacancy payments.

* * * * *

(d) * * *

(3) The owner has (for 24 CFR part 883 projects, the owner and the Agency have) demonstrated to the satisfaction of HUD that:

* * * * *

19. In § 880.612, paragraph (b) is revised to read as follows:

§ 880.612 Reviews during management period.

* * * * *

(b) In addition:

(1)(i) For this part 880 and 24 CFR part 881 private-owner/PHA projects, HUD will review the PHA's administration of the Contract at least annually to determine whether the PHA is in compliance with the ACC; and

(ii) For 24 CFR part 883 projects, HUD will periodically review the Agency's administration of the Contract to determine whether it is in compliance with the Contract.

(2) HUD may independently inspect project operations and units at any time.

* * * * *

PART 881—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM FOR SUBSTANTIAL REHABILITATION

20. The authority citation for part 881 continues to read as follows:

Authority: 42 U.S.C. 1437a, 1437c, 1437f, 3535(d), 12701, and 13611–13619.

Subpart A—Summary and Applicability

21. Section 881.101 is revised to read as follows:

§ 881.101 General.

(a) The purpose of the Section 8 program is to provide low-income families with decent, safe and sanitary rental housing through the use of a system of housing assistance payments. This part contains the policies and procedures applicable to the Section 8 substantial rehabilitation program. The assistance may be provided to public housing agency owners or to private owners either directly from HUD or through public housing agencies.

(b) This part does not apply to projects developed under other Section 8 program regulations, including 24 CFR parts 880, 882, 883, 884, and 885, except to the extent specifically stated in those parts.

§§ 881.102 and 881.103 [Removed]

22. Sections 881.102 and 881.103 are removed.

23. Section 881.104 is revised to read as follows:

§ 881.104 Applicability of part 881 in effect as of February 20, 1980.

(a) Part 881, in effect as of February 20, 1980, applies to all proposals for which a notification of selection was not issued before the February 20, 1980 effective date of part 881. (See 24 CFR part 881, revised as of April 1, 1980). Where a notification of selection was issued for a proposal before the February 20, 1980, effective date, part 881 in effect as of February 20, 1980 applies if the owner notified HUD within 60 calendar days that the owner wished the provisions of part 881, effective February 20, 1980, to apply and promptly brought the proposal into conformance.

(b) Subparts E (Housing Assistance Payments Contract) and F (Management) of this part apply to all projects for which an Agreement was not executed before the February 20, 1980, effective date of part 881. Where an Agreement was so executed:

(1) The owner and HUD may agree to make the revised subpart E of this part applicable and to execute appropriate amendments to the Agreement and/or Contract.

(2) The owner and HUD may agree to make the revised subpart F of this part applicable (with or without the limitation on distributions) and to execute appropriate amendments to the Agreement and/or Contract.

(c) Section 880.607 of this chapter, Termination of Tenancy and Modification of Leases, applies to new families who begin occupancy or execute a lease on or after 30 days after the February 20, 1980, effective date of part 881. This section also applies to families not covered by the preceding sentence, including existing families under lease, with respect to all leases in which a renewal becomes effective on or after the 60th day following the February 20, 1980 effective date of part 881. A lease is considered to be renewed where both the landlord and the family fail to terminate a tenancy under a lease permitting either party to terminate.

(d) Notwithstanding the provisions of paragraph (b) of this section, the provisions of 24 CFR part 5 (concerning preferences for selection of applicants) apply to all projects, regardless of when an Agreement was executed.

Subpart B—Definitions and Other Requirements

24. The heading for subpart B of part 881 is revised to read as set forth above.

§ 881.201 [Amended]

25. Section 881.201 is amended by removing the definitions of "*Allocation area*", "*New Communities*", and "*Preliminary proposal*".

§§ 881.202, 881.203, 881.204, 881.206, 881.209, and 881.210 [Removed]

26. Sections 881.202, 881.203, 881.204, 881.206, 881.209, and 881.210 are removed.

Subparts C and D—[Removed and Reserved]

27. Subpart C (§§ 881.301 through 881.312) and subpart D (§§ 881.401 through 881.405) of part 881 are removed and reserved.

Subpart E—Housing Assistance Payments Contract

28. In § 881.501, paragraph (a) is revised and paragraph (b) is removed and reserved, to read as follows:

§ 881.501 The contract.

(a) *Contract.* The Housing Assistance Payments Contract sets forth rights and duties of the owner and the contract administrator with respect to the project

and the housing assistance payments. The owner and contract administrator execute the Contract in the form prescribed by HUD upon satisfactory completion of the project.

(b) [Reserved]

* * * * *

29. Section 881.503 is revised to read as follows:

§ 881.503 Cross-reference.

All of the provisions of §§ 880.503, 880.504, 880.505, 880.506, 880.507, and 880.508 of this chapter apply to projects assisted under this part, subject to the requirements of § 881.104.

§§ 881.504, 881.505, 881.506, 881.507, and 881.508 [Removed]

29a. Sections 881.504, 881.505, 881.506, 881.507, and 881.508 are removed.

30. Subpart F of part 881 is revised to read as follows:

Subpart F—Management

§ 881.601 Cross-reference.

All of the provisions of part 880, subpart F, of this chapter apply to projects assisted under this part, subject to the requirements of § 881.104.

Subpart G—[Removed]

31. Subpart G (§§ 881.701 through 881.709) of part 881 is removed.

PART 883—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM—STATE HOUSING AGENCIES

32. The authority citation for part 883 continues to read as follows:

Authority: 42 U.S.C. 1437a, 1437c, 1437f, 3535(d), and 13611–13619.

Subpart A—Summary and Guide

33. Section 883.101 is revised to read as follows:

§ 883.101 General.

(a) The purpose of the Section 8 program is to provide decent, safe and sanitary housing for low-income families through the use of a system of housing assistance payments. These needs may be met by statewide or special purpose housing agencies established by the various States.

(b) The regulations in this part 883 contain the policies and procedures applicable to the Section 8 program for these State agencies.

§§ 883.102, 883.103, and 883.104 [Removed]

34. Sections 883.102, 883.103 and 883.104 are removed.

35. Section 883.105, is revised to read as follows:

§ 883.105 Applicability of part 883 in effect as of February 29, 1980.

(a) Part 883, in effect as of February 29, 1980, applies to projects for which the initial application was submitted on or after the February 29, 1980, effective date. (See 24 CFR part 883, revised as of April 1, 1980.) Projects for which applications or proposals were submitted before the February 29, 1980, effective date of part 883 have been processed under the part 883 regulations and procedures in effect at the date of submission. If, however, the agency notified HUD within 60 calendar days of the February 29, 1980, effective date of the part 883 regulations that they chose to have the provisions of part 883, in effect as of February 29, 1980, apply to a specific case, it must have promptly modified the application(s) and proposal(s) to comply.

(b) Subpart F of this part, dealing with the HAP contract and subpart G of this part, dealing with management, apply to all projects for which an Agreement was not executed before the February 29, 1980, effective date of part 883. In cases where an Agreement has been executed:

(1) The Agency, owner and HUD may agree to make the revised subpart F of this part applicable and execute appropriate amendments to the Agreement or Contract;

(2) The Agency, Owner and HUD may agree to make the revised subpart G of this part applicable (with or without the limitation on distributions) and execute appropriate amendments to the Agreement or Contract.

(c) Section 883.708, Termination of Tenancy and Modifications of Leases, applies to new families who begin occupancy or execute a lease on or after 30 days following the February 29, 1980, effective date of part 883. This section also applies to families not covered by the preceding sentence, including families currently under lease, who have a lease in which a renewal becomes effective on or after the 60th day following the February 29, 1980 effective date of part 883. A lease is considered renewed when both the landlord and the family fail to terminate a tenancy under a lease permitting either to terminate.

(d) Notwithstanding the provisions of paragraph (b) of this section, the provisions of 24 CFR part 5 (concerning preferences for selection of applicants) apply to all projects, regardless of when am Agreement was executed.

36. A new § 883.106 is added to subpart A to read as follows:

§ 883.106 Applicability and relationships between HUD and State agencies.

(a) *Applicability.* This subpart A applies to contract authority set aside for a State Agency.

(b) *General responsibilities and relationships.* Subject to audit and review by HUD to assure compliance with Federal requirements and objectives, Housing Finance Agencies (HFAs) shall assume responsibility for project development and for supervision of the development, management and maintenance functions of owners.

(c) *Certifications and HUD monitoring.* (1) Generally, when reviewing any of the certifications of an HFA required by this part, HUD shall accept the certification as correct. If HUD has substantial reason to question the correctness of any element in a certification, HUD shall promptly bring the matter to the attention of the HFA and ask it to provide documentation supporting the certifications. When the HFA provides such evidence, HUD will act in accordance with the HFA's judgment or evaluation unless HUD determines that the certification is clearly not supported by the documentation.

(2) HUD will periodically monitor the activities of HFA's participating under this part only with respect to Section 8 or other HUD programs. This monitoring is intended primarily to ensure that certifications submitted and projects operated under this part reflect appropriate compliance with Federal law and requirements.

Subpart B—[Removed and Reserved]

37. Subpart B (§§ 883.201 through 883.207) of part 883 is removed and reserved.

Subpart C—Definitions and Other Requirements

38. The heading for subpart C of part 883 is revised to read as set forth above.

§ 883.302 [Amended]

39. Section 883.302 is amended by removing the definitions of "Allocation area", "Allocation plan", "Impacted jurisdiction", and "New Communities".

§§ 883.303, 883.304, 883.305, 883.309, 883.311, and 883.312 [Removed]

40. Sections 883.303, 883.304, 885.305, 883.309, 883.311, and 883.312 are removed.

41. In § 883.307, paragraph (a) is revised to read as follows:

§ 883.307 Financing.

(a) *Types of financing.* A State Agency that used the Fast Track Procedures formerly in this part must provide permanent financing for any new construction or substantial rehabilitation project without Federal mortgage insurance, except coinsurance under section 244 under the National Housing Act (12 U.S.C. 1701 et seq). Obligations issued by the HFA for this purpose may be taxable under section 802 of the Housing and Community Development Act of 1974 (42 U.S.C. 1440) or tax-exempt under section 103 of the Internal Revenue Code (26 U.S.C. 103), 24 CFR part 811 or other Federal Law.

* * * * *

Subparts D and E—[Removed and Reserved]

42. Subpart D (§§ 883.401 through 883.412) and subpart E (§ 883.501) of part 883 are removed and reserved.

Subpart F—Housing Assistance Payments Contract

§ 883.602 [Amended]

43. Section 883.602 is amended by:

a. Removing paragraph (b);

b. Redesignating paragraphs (c), (d), and (e) as paragraphs (b), (c), and (d), respectively; and

c. By amending newly redesignated paragraphs (b)(2), (c)(2), and (c)(3) by removing the words "§ 883.712" in each place they appear, and by adding the words "§ 880.611 of this chapter", in their place.

§ 883.604 [Amended]

44. In § 883.604, paragraph (b)(2) is amended by removing the words "U.S. Housing Act of 1937" and adding, in their place, the words "1937 Act".

45. Section 883.605 is revised to read as follows:

§ 883.605 Leasing to eligible families.

The provisions of § 880.504 of this chapter apply, subject to the requirements of § 883.105.

46. Section 883.608 is revised to read as follows:

§ 883.608 Notice upon contract expiration.

The provisions of § 880.508 of this chapter apply, subject to the requirements of § 883.105.

47. Subpart G of part 883 is revised to read as follows:

Subpart G—Management

§ 883.701 Cross-reference.

All of the provisions of part 880, subpart F, of this chapter apply to projects assisted under this part, subject to the requirements of § 883.105. For purposes of this subpart G, all references in part 880, subpart F, of this chapter to "contract administrator" shall be construed to refer to "Agency".

PART 884—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM, NEW CONSTRUCTION SET-ASIDE FOR SECTION 515 RURAL RENTAL HOUSING PROJECTS

48. The authority citation for part 884 continues to read as follows:

Authority: 42 U.S.C. 1437a, 1437c, 1437f, 3535(d), and 13611–13619.

Subpart A—Applicability, Scope and Basic Policies

49. In § 884.101, paragraph (a) is revised to read as follows:

§ 884.101 Applicability and scope.

(a) The policies and procedures in subparts A and B of this part apply to the making of Housing Assistance Payments on behalf of Eligible Families leasing newly constructed housing pursuant to the provisions of section 8 of the 1937 Act. They are applicable only to proposals submitted by the Department of Agriculture/Farmers Home Administration (now the Department of Agriculture/Rural Housing and Community Development Service) that have been charged against the set-aside of section 8 contract authority specifically established for projects to be funded under section 515 of title V of the Housing Act of 1949 (42 U.S.C. 1485).

* * * * *

§ 884.102 [Amended]

50. Section 884.102 is amended by:

a. Amending the definition of *"Agreement to enter into housing assistance payments contract ('agreement')"*, by removing the word "FmHA" in each place it appears in paragraphs (a) and (b), and by adding, in each place, the word "RHCDS";

b. Removing the definition of *"FmHA"* and by adding, in alphabetical order, the definition *"RHCDS"*; and

c. Placing the definition of *"Proposal"* in alphabetical order and amending it by removing the word "FmHA", and by adding in its place, the word "RHCDS", to read as follows:

§ 884.102 Definitions.

* * * * *

RHCDS. The Rural Housing and Community Development Service.

* * * * *

§ 884.103 [Removed]

51. Section 884.103 is removed.

§ 884.105 [Amended]

52. Section 884.105 is amended by removing the word "Act" from paragraphs (b)(1) and (b)(2) in each place it appears and adding, in each place, the words "1937 Act".

§§ 884.107, 884.111, 884.112, and, 884.113 [Removed]

53. Sections 884.107, 884.111, 884.112, and 884.113 are removed.

§§ 884.108, 884.118, 884.119, and 884.120 [Amended]

54. Sections 884.108(a), 884.118(a)(9), 884.119(b), and 884.120(b)(3) are amended by removing the word "FmHA", each place it appears, and by adding in each place the word "RHCDS".

§ 884.117 [Amended]

55. Section 884.117 is amended by removing the words "part 705" and adding, in their place, the words "part 5".

56. In § 884.118, paragraphs (a)(3) and (a)(7) are revised, to read as follows:

§ 884.118 Responsibilities of the owner.

(a) * * *

(3) Performance of all management functions, including the taking of applications; determining eligibility of applicants in accordance with 24 CFR parts 5 and 813; selection of families, including verification of income, provision of Federal selection preferences in accordance with 24 CFR part 5, obtaining and verifying Social Security Numbers submitted by applicants (as provided by 24 CFR part 5), obtaining signed consent forms from applicants for the obtaining of wage and claim information from State Wage Information Collection Agencies (as provided in 24 CFR part 5), and other pertinent requirements; and determination of the amount of tenant rent in accordance with HUD established schedules and criteria;

* * * * *

(7) Reexamination of family income and composition; redetermination, as appropriate, of the amount of Tenant Rent and the amount of housing assistance payment in accordance with 24 CFR part 813; obtaining and verifying Social Security Numbers submitted by participants, as provided by 24 CFR part 5; and obtaining signed consent forms from participants for the obtaining of wage and claim information from State Wage Information Collection Agencies, as provided by 24 CFR part 5;

* * * * *

Subpart B—Project Development and Operation

§§ 884.201, 884.202, 884.203, 884.204, 884.205, 884.206, 884.207, 884.208, 884.209, 884.210, and 884.211 [Removed]

57. Sections 884.201, 884.202, 884.203, 884.204, 884.205, 884.206, 884.207, 884.208, 884.209, 884.210, and 884.211 are removed.

§ 884.214 [Amended]

58. In § 884.214, paragraph (b)(1) is amended by removing the phrase "part 812," and adding, in its place, the phrase "part 5,".

§ 884.216 [Amended]

59. Section 884.216 is amended by:

a. Removing the words "part 760," and adding in their place, the words "part 5,"; and

b. Removing the words "24 CFR 812.9, and also 24 CFR 812.10" and adding, in their place, the words "24 CFR part 5 and also".

§ 884.218 [Amended]

60. Section 884.218 is amended by:

a. Amending paragraph (a) by removing the words "part 750" where it appears, by removing "part 760" where it appears, and by removing "part 812" each place it appears, and by adding in each place the words "part 5";

b. Amending paragraph (b) by removing the words "part 760", where it appears, and by removing "part 812", where it appears, and by adding in each place the words, "part 5";

c. Amending paragraph (c) by removing the words "part 750", where it appears, and by removing the words "part 760", where it appears, and by adding in each place the words, "part 5"; and

d. Further amending paragraph (c), by removing the words "24 CFR 812.9, and also 24 CFR 812.10" and adding, in their place, the words "24 CFR part 5 and also".

§ 884.223 [Amended]

61–62. In § 884.223(e), remove the words "§ 812.9 of this chapter" and add, in their place, the words "24 CFR part 5" and remove the words "24 CFR 812.10" in each place they occur and add, in each place, the words "24 CFR part 5".

Dated: February 28, 1996.

Stephanie A. Smith,

Acting General Deputy, Assistant Secretary for Housing-Federal Housing Commissioner.

Part IV

Department of Housing and Urban Development

24 CFR Parts 1700, 1710, and 1715
Interstate Land Sales Registration Programs: Streamlining; Final Rule

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner; Interstate Land Sales Registration Program; Streamlining Final Rule

24 CFR Parts 1700, 1710, and 1715

[Docket No. FR–3987–F–01]

RIN 2502–AG63

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: This final rule amends HUD's regulations for the Interstate Land Sales Registration Program. In an effort to comply with the President's regulatory reform initiatives, this rule will streamline the Interstate Land Sales Registration Program regulations by eliminating provisions that are repetitive of statutes or are otherwise unnecessary. This final rule will make the Interstate Land Sales Registration Program regulations clearer and more concise. Guidelines applicable to the program are available from the Department, as provided in an uncodified attachment to this rule.

EFFECTIVE DATE: April 26, 1996.

FOR FURTHER INFORMATION CONTACT: David R. Williamson, Director, Office of Consumer and Regulatory Affairs, Department of Housing and Urban Development, 451 7th Street SW., Room 5241, Washington, DC 20410–8000); telephone number: (202) 708–4560 (this is not a toll-free number). For hearing- and speech-impaired persons, this number may be accessed via TDD by calling the Federal Information Relay Service at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

On March 4, 1995, President Clinton issued a memorandum to all Federal departments and agencies regarding regulatory reinvention. In response to this memorandum, the Department of Housing and Urban Development conducted a page-by-page review of its regulations to determine which can be eliminated, consolidated, or otherwise improved. HUD has determined that the regulations for the Interstate Land Sales Registration Program can be improved and streamlined by eliminating unnecessary provisions.

Several provisions in the regulations repeat statutory language from the Interstate Land Sales Full Disclosure Act, 15 U.S.C. 1701 *et seq.* It is unnecessary to maintain statutory requirements in the Code of Federal Regulations (CFR), because those requirements are otherwise fully accessible and binding. Furthermore, if regulations contain statutory language, HUD must amend the regulations whenever Congress amends the statute. Therefore, this final rule will remove repetitious statutory language and replace it with a citation to the specific statutory section for easy reference.

Many provisions of part 1720 in the regulations are based on requirements that apply to more than one program, and therefore HUD repeated these provisions in different subparts. This repetition is unnecessary, and updating these scattered provisions is cumbersome and often creates confusion. Therefore, some of part 1720 has been removed, and a consolidated rule of investigation procedures that are in a new part 3800 has been made applicable to the Interstate Land Sales Registration program by cross-reference (see 61 FR 10440, March 13, 1996). In addition, the Department is developing a separate rule to consolidate certain procedures into a uniform rule on hearings. When that separate rule is final, the Department expects to revise § 1710.45 to include certain provisions of subpart D of part 1720 that will not be removed by the consolidated hearing procedures rule.

This final rule also removes from codification part 1700, § 1710.501, § 1710.502, and Appendix A to 1710 (which are maintained in an uncodified appendix accompanying this final rule). The information contained in the material to be removed is informational and will be available through separately issued guidance, which is available from the Department (see uncodified attachment to this rule) and may be updated from time to time and published in the **Federal Register**.

Copies of this rule and related notices are available electronically from HUD or other sources. You can access this material through the World Wide Web at http://www.hud.gov or telenet to hudclips.aspensys.com. You also may subscribe separately to HUDClips (a source of all of HUD's directives) by calling 301/251–5757 or e-mailing to hudclips@aspensys.com.

Justification for Final Rulemaking

HUD generally publishes a rule for public comment before issuing a rule for effect, in accordance with its own regulations on rulemaking in 24 CFR part 10. However, part 10 provides for exceptions to the general rule if the agency finds good cause to omit advance notice and public participation. The good cause requirement is satisfied when prior public procedure is "impracticable, unnecessary, or contrary to the public interest" (24 CFR 10.1). HUD finds that good cause exists to publish this rule for effect without first soliciting public comment. This rule primarily removes unnecessary regulatory provisions. Although the rule also contain some clarification of policy, it does not make substantive changes in the program regulations. Therefore, prior public comment is unnecessary.

Other Matters

Regulatory Flexibility Act

The Secretary, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed and approved this final rule, and in so doing certifies that this rule will not have a significant economic impact on a substantial number of small entities. This rule merely streamlines regulations by removing unnecessary provisions. The rule will have no adverse or disproportionate economic impact on small businesses.

Environmental Impact

This rulemaking does not have an environmental impact. This rulemaking simply amends an existing regulation by consolidating and streamlining provisions and does not alter the environmental effect of the regulations being amended. A Finding of No Significant Impact with respect to the environment was made in accordance with HUD regulations in 24 CFR part 50 that implement section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332) at the time of development of regulations implementing the Interstate Land Sales Registration Program. That finding remains applicable to this rule, and is available for public inspection between 7:30 a.m. and 5:30 p.m. weekdays in the Office of the Rules Docket Clerk, Office of General Counsel, Room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC.

Executive Order 12612, Federalism

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, *Federalism*, has determined that this rule will not have substantial direct effects on States or their political subdivisions, or the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of government. No programmatic or policy changes will result from this rule that would affect the relationship between the Federal Government and State and local governments.

Executive Order 12606, The Family

The General Counsel, as the Designated Official under Executive Order 12606, *The Family*, has determined that this rule will not have the potential for significant impact on family formation, maintenance, or general well-being, and thus is not subject to review under the Order. No significant change in existing HUD policies or programs will result from promulgation of this rule.

List of Subjects

24 CFR Part 1700

Consumer protection, Freedom of information, Land sales, Reporting and recordkeeping requirements.

24 CFR Part 1710

Administrative practice and procedure, Consumer protection, Freedom of information, Land sales, Reporting and recordkeeping requirements.

24 CFR Part 1715

Advertising, Consumer protection, Fraud, Land sales.

Accordingly, under the authority of 42 U.S.C. 3535(d), parts 1700, 1710, and 1715 of title 24 of the Code of Federal Regulations are amended as follows:

PART 1700—[REMOVED]

1. Part 1700 is removed.

PART 1710—INTERSTATE LAND SALES REGISTRATION PROGRAM

1a. The authority citation for part 1710 is revised to read as follows:

Authority: 15 U.S.C. 1718; 42 U.S.C. 3535(d).

2. Section 1710.1 is revised to read as follows:

§ 1710.1 Definitions.

(a) *Statutory terms.* All terms are used in accordance with their statutory meaning in 15 U.S.C. 1702 or with part 5 of this title, unless otherwise defined in paragraph (b) of this section or elsewhere in this part.

(b) *Other terms.* As used in this part:

Act means the Interstate Land Sales Full Disclosure Act, 15 U.S.C. 1701.

Advisory opinion means the formal written opinion of the Secretary as to jurisdiction in a particular case or the applicability of an exemption under §§ 1710.5 through 1710.15, based on facts submitted to the Secretary.

Available for use means that in addition to being constructed, the subject facility is fully operative and supplied with any materials and staff necessary for its intended purpose.

Beneficial property restrictions means restrictions that are enforceable by the lot owners and are designed to control the use of the lot and to preserve or enhance the environment and the aesthetic and economic value of the subdivision.

Date of filing means the date a Statement of Record, amendment, or consolidation, accompanied by the applicable fee, is received by the Secretary.

Good faith estimate means an estimate based on documentary evidence. In the case of cost estimates, the documentation may be obtained from the suppliers of the services. In the case of estimates of completion dates, the documentation may be actual contracts let, engineering schedules, or other evidence of commitments to complete the amenities.

Lot means any portion, piece, division, unit, or undivided interest in land located in any State or foreign country, if the interest includes the right to the exclusive use of a specific portion of the land.

OILSR means the Interstate Land Sales Registration program.

Owner means the person or entity who holds the fee title to the land and has the power to convey that title to others.

Parent corporation means that entity which ultimately controls the subsidiary, even though the control may arise through any series or chain of other subsidiaries or entities.

Principal means any person or entity holding at least a 10 percent financial or ownership interest in the developer or owner, directly or through any series or chain of subsidiaries or other entities.

Rules means all rules adopted pursuant to the Act, including the general requirements published in this part.

Sale means any obligation or arrangement for consideration to purchase or lease a lot directly or indirectly. The terms "sale" or "seller" include in their meanings the terms "lease" and "lessor".

Senior Executive Officer means the individual of highest rank responsible for the day-to-day operations of the developer and who has the authority to bind or commit the developing entity to contractual obligations.

Site means a group of contiguous lots, whether such lots are actually divided or proposed to be divided. Lots are considered to be contiguous even though contiguity may be interrupted by a road, park, small body of water, recreational facility, or any similar object.

Start of construction means breaking ground for building a facility, followed by diligent action to complete the facility.

§ 1710.2 [Removed]

3. Section 1710.2 is removed.

4. Section 1710.5 is revised to read as follows:

§ 1710.5 Statutory exemptions from the provisions of this chapter.

A listing of the statutory exemptions is contained in 15 U.S.C. 1703. In accordance with 15 U.S.C. 1703(a)(2), if the sale involves a condominium or multi-unit construction, a presale clause conditioning the sale of a unit on a certain percentage of sales of other units is permissible if it is legally binding on the parties and is for a period not to exceed 180 days. However, the 180-day provision cannot extend the 2-year period for performance. The permissible 180 days is calculated from the date the first purchaser signs a sales contract in the project or, if a phased project, from the date the first purchaser signs the first sales contract in each phase.

§§ 1710.501, 1710.502, and Appendix A to part 1710 [Removed]

5. Sections 1710.501 and 1710.502 and Appendix A to Part 1710 are removed.

PART 1715—PURCHASERS' REVOCATION RIGHTS, SALES PRACTICES, AND STANDARDS

6. The authority citation for part 1715 is revised to read as follows:

Authority: 15 U.S.C. 1718; 42 U.S.C. 3535(d).

7. Section 1715.1 is revised to read as follows:

§ 1715.1 General.

The purpose of this subpart A is to elaborate on the revocation rights in 15 U.S.C. 1703, by enumerating certain conditions under which purchasers may exercise revocation rights. Generally, whenever revocation rights are available, they apply to promissory notes, as well as traditional agreements.

8. Section 1715.2 is revised to read as follows:

§ 1715.2 Revocation regardless of registration.

All purchasers have the option to revoke a contract or lease with regard to a lot not exempt under §§ 1710.5 through 1710.11 and 1710.14 until midnight of the seventh day after the day that the purchaser signs a contract or lease. If a purchaser is entitled to a

longer revocation period under State law, that period is deemed the Federal revocation period rather than the 7 days, and all contracts and agreements (including promissory notes) shall so state.

§ 1715.3 [Removed]

9. Section 1715.3 is removed.

10. Section 1715.4 is revised to read as follows:

§ 1715.4 Contract requirements and revocation.

(a) In accordance with 15 U.S.C. 1703(d)(3), the refund to the purchaser is calculated by subtracting from the amount described in 15 U.S.C. 1703(d)(3)(B), the greater of:

(1) Fifteen percent of the purchase or lease price of the lot (excluding interest owed) at the time of the default or breach of contract or agreement; or

(2) The amount of damages incurred by the seller or lessor due to the default or breach of contract.

(b) For the purposes of this section:

Damages incurred by the seller or lessor means actual damages resulting from the default or breach, as determined by the law of the jurisdiction governing the contract. However, no damages may be specified in the contract or agreement, except a liquidated damages clause not exceeding 15 percent of the purchase price of the lot, excluding any interest owed.

Purchase price means the cash sales price of the lot shown on the contract.

(c) The contractual requirements of 15 U.S.C. 1703(d) do not apply to the sale of a lot for which, within 180 days after the signing of the sales contract, the purchaser receives a warranty deed or, where warranty deeds are not commonly used, its equivalent under State law.

11. Section 1715.5 is revised to read as follows:

§ 1715.5 Reimbursement.

If a purchaser exercises rights under 15 U.S.C. 1703(b), (c) or (d), but cannot reconvey the lot in substantially similar condition, the developer may subtract from the amount paid by the purchaser, and otherwise due to the purchaser under 15 U.S.C. 1703, any diminished value in the lot caused by the acts of the purchaser.

12. Section 1715.15 is revised to read as follows:

§ 1715.15 Unlawful sales practices—statutory provisions.

The statutory prohibitions against fraudulent or misleading sales practices are set forth at 15 U.S.C. 1703(a). With respect to the prohibitions against representing that certain facilities will be provided or completed unless there is a contractual obligation to do so by the developer:

(a) The contractual covenant to provide or complete the services or amenities may be conditioned only upon grounds that are legally sufficient to establish impossibility of performance in the jurisdiction where the services or amenities are being provided or completed;

(b) Contingencies such as acts of God, strikes, or material shortages are recognized as permissible to defer completion of services or amenities; and

(c) In creating these contractual obligations developers have the option of incorporating by reference the Property Report in effect at the time of the sale or lease. If a developer chooses to incorporate the Property Report by reference, the effective date of the Property Report being incorporated by reference must be specified in the contract of sale or lease.

13. Section 1715.27 is revised to read as follows:

§ 1715.27 Fair housing.

Title VIII of the Civil Rights Act of 1968, 42 U.S.C. 3601, et seq., and its implementing regulations and guidelines apply to land sales transactions to the extent warranted by the facts of the transaction.

Dated: March 13, 1996.

Nicolas P. Retsinas,

Assistant Secretary for Housing-Federal Housing Commissioner.

(Note: The following guidelines will not be codified in the Code of Federal Regulations.)

Guidelines to the Interstate Land Sales Registration Program

A copy of these guidelines applicable to the Interstate Land Sales Registration Program may be obtained by writing to: Interstate Land Sales Registration Program, HUD, 451 7th Street SW., Washington, DC 20410–8000 or by electronic access on the World Wide Web, at: http://www.hud.gov

These guidelines were previously published as appendix A to Part 1710; Part 1700, Introduction; Part 1700.501, Certification criteria; and Part 1700.502, Application for certification of State land sales program, in title 24 of the Code of Federal Regulations (CFR) (1995 edition).

Part IV(b), *Improved Lots* (which pertains to Appendix A to Part 1710) is revised to reflect recent court actions on this matter, as discussed below.

Section 1702(a)(2) of Title 15 of the United States Code exempts (1) the sale or lease of any improved land on which there is a residential, commercial, condominium, or industrial building; or (2) the sale or lease of land under a contract obligating the seller or lessor to erect such a building on the lot within a period of 2 years.

Although there is virtually no legislative history regarding this exemption at the time Congress passed the Interstate Land Sales Full Disclosure Act, institutional memory within the Department is to the effect that this exemption was added by an amendment offered late in the course of passage. The reason for the amendment was to exclude traditional homebuilders from the Act's requirements since they did not comprise the class of persons Congress sought to regulate. Nor were traditional home buyers, whose purchases tend to be reasoned and deliberative, the class of consumers for whom the Act's protections were intended.

HUD's first set of Guidelines, denoted "Condominium And Other Construction Contracts," was published on February 28, 1974, in response to inquiries as to the applicability of the Act and this exemption to condominiums. The Department published expanded Guidelines on October 8, 1975, April 23, 1979, and August 6, 1984. The 1984 Guidelines (which had appeared as an appendix to 24 CFR part 1710) remained applicable until the effective date of these Guidelines on April 26, 1996.

HUD consistently has taken the position that for a lot sale to be eligible for the exemption under section 1702(a)(2), the seller's obligation to construct must be real and not illusory, and must be obligatory except for the conditions described in these guidelines.

On July 11, 1995, the United States Court of Appeals for the Eighth Circuit issued an opinion that from HUD's perspective effectively nullified the seller's obligation to construct. In fact, it effectively nullified the exemption.

In *Attebury* v. *Maumelle Company,* 60 F.3d 415 (8th Cir. 1995), a case in which HUD appeared as amicus curiae as to the exemption issue only, the developer, Maumelle, used a sales contract that initially recited its obligation to build within two years after the lot sale. The contract then went on to recite a number of conditions, the effect of which was to shift the obligation to build onto the buyer.

HUD argued these guidelines and several cases that have recognized an unconditional requirement on the seller to build. In part, the case law adhered to the rule of construction that exemptions from a remedial statute should be narrowly construed. The court, which observed that the plaintiffs had not relied on the HUD Guidelines in the district court, dismissed the government's arguments primarily based on the language in this section that says: "* * * the contract must *specifically* obligate the seller to complete the building within two years" (emphasis added), by distinguishing the Guidelines' literal requirement that the obligation to build be "specific" from the argument in this case that the requirement be "unconditional."

At the time of the decision the language in question read:

If a seller (or developer) is relying on this exemption and the residential, commercial, condominium or industrial building is not complete, the contract must specifically obligate the seller to complete the building within two years. If the contractual obligation is not present, the sale is not exempt. The two-year period begins on the date the purchaser signs the sales contract. The use of a contract that obligates the buyer to build within two years would not exempt the sale.

As amended, the above paragraph will read:

If a seller (developer) is relying on this exemption and the residential, commercial, condominium or industrial building is not complete, the contract must obligate the seller to complete the building within two years. If the contractual obligation is not present, the sale is not exempt. The two-year period normally begins on the date the purchaser signs the sales contract. A contract that conditions construction upon acts of a buyer will not exempt the sale. The essence of this exemption is that it applies to the sale of a house (if not built at the time of sale, then to be built within two years after the sale).

HUD's interpretation of what constitutes an obligation to construct a building relies on general principles of contract law. Provisions for purchaser financing and remedies clauses are matters to be decided by the parties to the contract under the laws of the jurisdiction in which the construction project is located. However, such clauses may not alter the obligation of the seller to build.

(Another reason the court appears to have ruled in favor of Maumelle is that the plaintiffs based much of their case on allegations of fraudulent conduct, conduct which the court found wanting of proof.)

The court also refused to accept the argument that by recognizing the Maumelle contract as eligible for the exemption it essentially abolished the reasons for the exemption. The purpose of the exemption was to eliminate homebuilders from the ambit of the Interstate Land Sales Full Disclosure Act. The rationale was that a person who buys a house is much more attentive to the transaction than one who is buying a lot. Moreover, the methods and practices of selling the two products usually differs with a "heavier sell" being employed for lot sales.

Obviously, a buyer in a non-exempt transaction will shoulder any responsibility for building a house. If the conditions in the Maumelle contract create a similar result, which is the effect of the ruling, there would be no reason for the exemption. (The fact that fewer than 200 houses had been built on approximately 2,000 lots sold over a multi-year period was not a factor that the court considered; the district court had found this fact not probative, a finding that the Department found puzzling, given the purpose of this exemption.)

For the above reasons HUD is amending the third, fourth and fifth paragraphs of this section to make it clear that the seller's obligation to build must be unconditional, except for the conditions HUD recognizes as acceptable for exemption eligibility. HUD also is amending the eighth and ninth paragraphs to update the discussion of case law.

HUD is bound by the *Maumelle* decision within the jurisdiction of the Eighth Circuit but not in other federal judicial circuits. Moreover, since the Guidelines that the court considered when making its decision are being changed to clarify the Department's position that the obligation to build must be that of the developer, subject only to the conditions recognized by HUD, HUD will not recognize the *Maumelle* decision as controlling within the Eighth Circuit as to lots offered after the publication of these amendments to the Interstate Land Sales Guidelines.

Therefore, the Interstate Land Sales Guidelines are revised as follows:

Guidelines to the Interstate Land Sales Registration Program

Public Information

In general. The identifiable records of the Office of Interstate Land Sales Registration are subject to the provisions of 5 U.S.C. 552, as implemented by 24 CFR part 15—Public Information, subtitle A.

Availability of information and records. Information concerning land sales registrations and copies of statements of record may be obtained from the following address: Interstate Land Sales Registration Program, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410–8000.

In addition, statements of record may be reviewed at such address on any business day from 9 a.m. to 4:15 p.m.

Nonapplicability of exemptions authorized by 5 U.S.C. 552. With the exception of information exempt from disclosure under 5 U.S.C. 552(b)(7) and 24 CFR 15.21(a)(7), all information contained in or filed with any statement of record shall be made available to the public as provided by 15 U.S.C. 1704(d).

Duplication fee—property report. Notwithstanding the provisions of 24 CFR 15.14, *Schedule of Fees,* copies of a Property Report on file with the Office of Interstate Land Sales Registration will be provided upon request for a fixed fee of $2.50 per copy regardless of the number of pages duplicated. Payment may be made in cash or by check or money order payable to the Department of Housing and Urban Development. Personal checks are acceptable.

Duplication and certification fee-required documents to the several States that accept Federal filings. Notwithstanding the provisions of 24 CFR 15.14, *Schedule of Fees,* copies of documents on file with the Office of Interstate Land Sales Registration that are provided for certification to the several states that accept Federal filings will be provided upon request for a fixed fee of $12.00 per filing regardless of the number of pages duplicated.

Methods of payment. The fees set forth above may be paid by cash, by personal check, or by company check; or by U.S. money orders; or by certified check payable to the Treasurer of the United States or to the Department of Housing and Urban Development. Postage stamps will not be accepted. All other fees must be paid as set forth in 24 CFR 15.14(g).

Supplemental Information on Part 1710, Subpart C—Certification of Substantially Equivalent State Law

Certification Criteria

(a) *Certification of States requiring full disclosure.* The Secretary shall certify a state when—

(1) It is determined that the laws and regulations of the state applicable to the sale or lease of lots not otherwise exempt under section 1403 of the Act require the seller of lots to disclose information which is substantially equivalent to or greater than the information required to be disclosed in the Federal Statement of Record; and

(2) The state's administration of such laws and regulations shall provide that the information disclosed is current and accurate. The means for administering the disclosure requirements must include considerations of ample staffing, budgetary provisions for policing functions and that the requisite legal authority be vested in the state agency or agencies responsible for enforcing the laws and regulations of the State land program.

(b) *Certification of States providing sufficient protection.* The Secretary shall certify a state when—

(1) It can be demonstrated that the laws and regulations of the state applicable to the sale or lease of lots not otherwise exempt under section 1403 provide the purchasers and lessees with protection commensurate with that which is provided by the Federal disclosure requirements. That is, a State must develop substantive measures plus disclosure which provides a level of protection that is, at a minimum, comparable to the protection provided by the Federal disclosure standard; and

(2) The administration of the laws and regulations provide that all information disclosed is accurate and current. The means for administering the requirements of sufficient protection must include considerations of ample staffing, budgetary provisions for policing functions and that the requisite legal authority be vested in the state agency or agencies responsible for enforcing the laws and regulations of the State land program.

(c) *Applicability to Federal exemptions.* To be certified a state need not provide protections with regard to the sale or lease of lots that would qualify for a Federal exemption. The state may choose at its discretion to provide protections on the sale of lots exempt under the Act. However, for certification a state's laws should, in general, apply to the same lots as would be required to be registered under the Act.

(d) *Equivalency with Federal disclosure.* In order to be determined as substantially equivalent under paragraph (a) or (b) of this section, a state must provide protection either through disclosure, substantive development standards or some combination thereof in the topics delineated in paragraph (e) of this section. In addition, a state must satisfy requirements of paragraphs (f), (g), (h), (i), (j) and (k) of this section.

(e) *Areas of required protection.* In order to be certified, a state must require specific protections for consumers with regard to

paragraphs (e) (1) through (10) of this section. Protection in these areas can be secured through disclosure, substantive development standards or some combination thereof. Establishing protection provisions in these areas is to be considered essential to the granting of certification to a state. Paragraphs (e) (11) through (15) of this section are considered to be complementary protection provisions which would give additional strength to a state's land program if combined with the required provisions for protection. If the protection which is required by the items listed below is provided through substantive standards rather than solely disclosure, it is expected that the state will buttress those substantive standards with requirements of performance that are enforceable against developers. The state will designate who shall be responsible for enforcing the commitments made by developers and the method of enforcement to be used.

(1) *Subdivision and developer information.* The name of the subdivision, the name and address of the developer or owner, the nature of the offering and the number of lots in the subdivision must be given to the purchaser.

(2) *Method of sale or lease.* Information with regard to the: developer's method of sale, type of contract used, type and time frame for delivery of the deed, recordation of contract and deed, whether there is a security arrangement and its description, any escrow arrangement for monies received, title insurance, prepayments, defaults, developer's resale and lot exchange program, time sharing and membership sales must be given to the purchaser.

(3) *Condition of title.* Information about all liens, encumbrances or mortgages affecting purchasers in the subdivision, the lots covered and the impact on purchasers and lessees in a subdivision should a developer default, and mortgage release provisions must be given to the purchaser.

(4) *Condition and use of property.* Information regarding land reservations, unusual or restrictive easements, mineral reservations, land use restrictions, special zoning permits, environmental impact studies which may have been conducted and their results, topographical characteristics, including any subsurface conditions and potentially hazardous natural conditions must be given to purchasers.

(5) *Financial and legal information.* Information about the net income and worth of the developer, condition of financial operations at present and in the preceding fiscal year, bankruptcy litigation or other litigation to which the developer is a party or action taken against the developer by a governmental agency which may have a material adverse impact upon its financial condition or its ability to transfer title to a purchaser or to complete promised facilities must be given to purchasers

(6) *Roads.* Information about access and subdivision roads, type of surface (present and final), completion dates, percentage of completion, buyer's cost and assessment, who is responsible for completion and maintenance and financial assurance of completion must be given to purchasers.

(7) *Water.* Information as to how water is to be supplied, supplier, completion dates, percentage of completion, any financial assurance of completion, buyer's cost and assessment including hook-up and water hauling costs, who is responsible for completion, quality and quantity, source, capacity of the water system, any intention to transfer the water system and the cost to lot owners or property owners association and any permits or approvals required must be given to purchasers.

(8) *Sewerage facilities.* Information as to the method used, supplier, completion dates, percentage of completion, any financial assurance of completion, buyer's cost and assessment including hook-up and sewage pumping and hauling, capacity of central system, who is responsible for completion, approvals and permits required, transfer of system to lot owners or property owners association must be given to purchasers.

(9) *Utilities (gas, electric, phone).* Information as to the availability, supplier, purchaser's or lessee's cost, completion date, percentage of completion must be given to purchasers.

(10) *Recreational facilities.* A list of the facilities and information about estimated date available for use, percentage of completion, any financial assurance or completion, buyer's or lessee's cost and assessment, who is responsible for completion, maintenance, disclosures on facilities which will be leased and/or transferred to the lot owners or property owners' association and who may use the facilities must be given to purchasers.

(11) *Lots being sold or leased.* Information about the legal descriptions of the offering by lot, block and unit number may be given to purchasers.

(12) *Location, size surrounding communities.* Information which describes the county seat, surrounding communities of significant size and services offered, population of the area, road systems and the potential size of the subdivision may be given to purchasers.

(13) *Taxes and assessments.* Information about payments to property owners' associations, the property owners' association's functions and responsibilities, management of the association, extent of developer control and the purpose of any special improvement district may be given to purchasers.

(14) *Community facilities.* Information about the availability of schools, medical and dental services, postal services, fire and police protection, shopping facilities and public transportation may be given to purchasers.

(15) *Platting.* Information which reports whether the subdivision's plats have been approved by regulatory authorities, whether the plats have been recorded and whether the survey and staking of each lot has been done and the cost that may be passed on to purchasers may be given to purchasers.

(f) The disclosure law of the State must be consistent with, but not necessarily identical to, the requirements of 15 U.S.C. 1703(a)(2)(D). This provision makes it unlawful for a developer to represent in any manner that it will provide or complete roads, sewers, water, gas or electric service or recreational amenities without stipulating in the contract of sale or lease that such services or amenities will be provided. Developers registered with the Secretary through a certified state are subject to this requirement. Consequently, the State may itself impose this substantive requirement upon developers. In any event, the disclosure documents approved by any certified state must meet the federal standard with respect to subdivision improvements. Developers are not allowed to represent that they will provide or complete roads, water, sewer, gas or electric facilities or recreational facilities unless the contract or agreement for sale obligates the developer to complete the facilities.

(g) In order to be determined substantially equivalent to the federal disclosure requirement, the state law and regulations must require that prospective purchasers and lessees receive, prior to or at the time of the signing any contract or agreement for purchase or lease, the applicable disclosure document containing complete and accurate information on the subdivision and the developer. In addition, state law or regulation must require developers to file amendments if any change occurs in any representation of material fact required to be stated in the disclosure materials filed with the state. The state law or regulation regarding amendments should entail requirements equivalent to those stated in 24 CFR 1710.23.

(h) For a state to be certified, it must be demonstrated that the state has or will have adequate full-time professional and clerical staff in its regulatory agency or agencies responsible for regulating the sale or lease of lots within its jurisdiction; that there is a budget approved for that staff which will permit them to fulfill the administrative and enforcement responsibilities; and that the staff have adequate legal authority to take official action in cases falling within the purview of state law and regulation.

(i)(1) If a certified state modifies or amends any law, regulation or administrative procedure with regard to subdivision development standards, it shall so notify HUD by registered or certified mail within 30 days after the modification or amendment has been enacted or promulgated. The state must submit to HUD new copies of its laws, regulations, rulings, administrative provisions and legal opinions, as amended, mandating the disclosure of information or establishment of development standards regarding land sales.

(2) Should any changes occur as set forth above and result in a measurable alteration of the protection provided to consumers by the state, the Secretary may, upon examination of those changes, re-evaluate the certification status of the state's land program.

(j) Once a state is certified and the state's disclosure document has become the Federal Property Report, the Secretary may require, as a condition of certification, a cover page, similar to the one presently used for federal filings, to be attached to the certified state filings. The form and substance of the federal cover page is explained in 24 CFR 1710.105. If a certified state filing does not have a cover page, the Secretary may require that, as a condition of certification, the state include information regarding the federal revocation period within the body of the state disclosure document.

(k) The Secretary shall require all certified states to submit to the Secretary a copy of any notice of suspension which the state has issued to a developer at the time the notice is sent to the developer.

Application for Certification of State Land Sales Program

(a) In order to be certified, a state must submit an application to the Office of Interstate Land Sales Registration, Department of Housing and Urban Development, 451 7th Street, SW., Washington, DC 20410. The application should be titled "Application for Certification of State Land Sales Program." The application should use the section format and contain the information set out below:

Application for Certification of State Land Sales Program Submitted by: (Name, Address and Telephone Number of State Agency and Person To Contact.)

Section 1. Legal Authorities. This section should contain copies of all laws and regulations (including rulings and legal opinions having the effect of law) establishing and interpreting disclosure requirements or substantive development standards with regard to land sales and leases including all administrative provisions and all provisions establishing exemptions from the rule. Only those legal authorities which deal with land sales and leases subject to the federal disclosure requirements need be submitted.

Section 2. Sample Copies of Material to be Submitted by Developers to the State. This section should contain sample copies of all materials required to be filed with the agency responsible for regulating the sale of lots in subdivisions and sample copies of all material required to be provided to purchasers and lessees and prospective purchasers and lessees.

Section 3. Methods of Administration and Enforcement. This section should contain a detailed statement on the methods and scope of the state's administration and enforcement procedures to include:

(a) The name and address of the agency responsible for regulating the sale or lease of lots in subdivisions.

(b) The staffing capacity of the responsible State Regulatory Agency. There should be included:

(1) An organizational chart which describes not only the internal structure of the regulatory agency (agencies) but also the relationship of that agency to other decision-making centers;

(2) a description of the functions and duties of the full-time staff;

(3) the eligibility criteria, i.e., training, education and experience, for principal members of the staff; and

(4) the formula used in calculating the necessary number of staff members to fulfill administrative, investigative and enforcement responsibilities. The state should submit for the Secretary's review the actual number of complaints received, enforcement actions taken, and investigations initiated for the past three years.

(C) A description of the anticipated additional staff, if any, and their duties and qualifications.

(D) The method and scope of investigation and enforcement to be used. The state should demonstrate the procedures to be followed from the time a complaint is received until the completion of action on that complaint and the kinds of sanctions which may be involved.

(E) Included should be an accounting of the number of new filings received per year for the past three years, the number of amendments received per year, and the total number of active filings.

Section 4. Assertion of Equivalency. This section should contain a detailed statement supporting the state's claim that its land program provides purchasers and lessees through disclosure, substantive development standards or combination thereof, protection substantially equivalent to the protection provided for them by Federal law.

(b) Upon receiving an application for certification, the Secretary will publish a Notice of Application in the **Federal Register**. The purpose of this public notice is to give other certified states and other interested parties an opportunity to review and comment on applications and to enhance consistency among states which are certified. Person(s) interested in receiving application materials for review and comment purposes may request them from the Secretary. Comments should be submitted no later than 30 days after the Notice of Application has been published.

Supplemental Information to Part 1710: Guidelines for Exemptions Available Under the Interstate Land Sales Full Disclosure Act

Table of Contents

Part I Introduction
Part II Definitions
(a) Anti-Fraud Provisions
(b) Common Promotional Plan
(c) Delivery of Deed
(d) Lot
(e) Sale
(f) Site
(g) Subdivision
Part III Exclusions from the Act
(a) Reservation
(b) Undivided Interest
Part IV Statutory Exemptions from the Title Requiring No Determination by HUD
(a) Twenty-Five Lots
(b) Improved Lots
(c) Evidences of Indebtedness
(d) Securities
(e) Government Sales
(f) Cemetery Lots
(g) Sales to Builders

(5) Lot Sales to a Government
(6) Sales of Leased Lots
Part VII Regulatory Exemption. HUD Determination Required
Part VIII Advisory Opinion
(a) General
(b) Requirements
Part IX No Action Letter

Part I—Introduction

The Interstate Land Sales Registration Division (also known as OILSR) is offering these Guidelines to clarify agency policies and positions with regard to the exemption provisions of the Interstate Land Sales Full Disclosure Act (the Act), Pub. L. 90–448 (15 U.S.C. 1701 through 1720), and its implementing regulations, 24 CFR parts 1710 through 1730. The regulations comply with the Paperwork Reduction Act of 1980, as evidenced by Office of Management and Budget approval number 2502–0243. These Guidelines are intended to assist a developer in determining whether or not a real estate offering is exempt from any or all of the requirements of the Act. They supersede any Guidelines previously issued by this Office.

This is an interpretive rule, not a substantive regulation. Not every conceivable factor of the exemption process is covered in these Guidelines and variations may occur in unique situations. Examples are given, but the examples do not in any way exhaust the myriad possibilities occurring in land development and land sales activity, nor do they set absolute standards.

To understand the exemptions, the jurisdictional scope of the Act must be understood. Any use of the mails, including intrastate use, or advertising in media which have interstate circulation is sufficient to establish jurisdiction. Generally, if a real estate offering falls under the jurisdiction established by the Act, a developer of a subdivision containing 100 or more lots must register the subdivision. Registration includes filing a Statement of Record and supporting documentation with HUD and providing to prospective purchasers an effective Property Report containing important facts about the subdivision and the developer.

Effective June 21, 1980, the provisions of the Act that prohibit misrepresentations or practices that would result in defrauding purchasers generally apply to sales or lease programs of 25 or more lots offered pursuant to a common promotional plan where any means or instruments of transportation or communication in interstate commerce, or the mails, are used.

Real estate offerings that meet the eligibility requirements or an exemption are exempt from all or some of the Act's requirements unless the method of operation

has been adopted for the purpose of evading the requirements of the law. The exemptions are available for subdivisions with particular characteristics, for certain individual lot sales transactions or for real estate meeting specific criteria. In addition, the Act gives the Secretary authority to exempt subdivisions or lots in a subdivision if, because of the small amount involved or the limited character of the offering, enforcement of the Act (i.e., full registration and disclosure) is not necessary in the public interest and for the protection of purchasers.

If the offering is subject to the Act and does not qualify for an exemption, it must be registered. The requirement of registration does not imply that the real estate value is questioned or the integrity of a business is suspect. The law simply provides that prospective purchasers have the right to adequate disclosure of facts about a subdivision so that an informed decision about the potential purchase can be made.

As exceptions to the registration and full disclosure requirements of the Act, the exemption provisions are strictly construed. The exemption requirements do not prescribe a method of operation or dictate how a subdivision should be developed.

A developer is not required to submit any documentation or obtain a determination from HUD to operate under any exemption except the one provided under 24 CFR 1710.16 (part VI of these Guidelines). However, if there is any question whatsoever concerning whether or not a real estate offering qualifies for any of the exemptions, developers are encouraged to seek legal counsel or obtain an Advisory Opinion from the Department before making any sales or leases. Experience has shown that developers are sometimes misinformed as to the applicability of the Act to their offering and that such misunderstanding can result in violative sales and the disruption of business. The instructions and format for obtaining an Advisory Opinion are contained in § 1710.17 of the regulations and in part VIII of these Guidelines.

Part II—Definitions

The following definitions are included here because of the importance each has to the explanation and understanding of HUD's interpretations of the exemption requirements. Furthermore, with the exception of "lot", "sale", "common promotional plan", and "subdivision", these definitions are not set forth elsewhere. The definitions of "lot" and "sale" are repeated here because of their extraordinary importance to the exemptions.

(a) *Anti-Fraud Provisions* means the provisions of the Act that prohibit the use of any sales practices, advertising or promotional materials that: would be misleading to purchasers; contain any misrepresentation of material facts or untrue statements; or would operate as a fraud or deceit upon a purchaser. Also prohibited are representations that roads, sewer, water, gas or electric services or recreational amenities will be provided or completed by the developer without so stipulating in the contract. The relevant provisions are set forth in 15 U.S.C. 1703(a)(2). The regulations that implement the anti-fraud provisions are set forth in 24 CFR part 1715, subpart B.

(b) *Common Promotional Plan* means any plan undertaken by a single developer or a group of developers acting together to offer lots for sale or lease. A common promotional plan is presumed to exist if land is offered by a developer or a group of developers acting in concert and the land is contiguous or is known, designated, or advertised as a common development or by a common name. The number of lots covered by each individual offering has no bearing on whether or not there is a common promotional plan.

Other characteristics that are evaluated in determining whether or not a common promotional plan exists include, but are not limited to: a 10% or greater common ownership; same or similar name or identity; common sales agents; common sales facilities; common advertising; and common inventory. The presence of one or more of the characteristics does not necessarily denote a common promotional plan. Conversely, the absence of a characteristic does not demonstrate that there is no common promotional plan.

Two essential elements of a common promotional plan are a thread of common ownership or developers acting in concert. However, common ownership alone would not constitute a common promotional plan. HUD considers the involvement of all principals holding a 10 percent or greater interest in the subdivision to determine whether there is a thread of common ownership. If there is common ownership or if the developers are acting in concert, and there is common advertising, sales agents or sales office, a common promotional plan is presumed to exist. Experience has led to the conclusion that sales agents generally will direct a prospective purchaser to any or all properties in inventory to make a sale.

The phrase "common promotional plan" is most often misunderstood by those who believe that "promotion" implies an enthusiastic sales campaign. Any method used to attract potential purchasers is, in fact, the "promotional plan". For example, direct mail campaigns and free dinners may be the promotional plan of one developer while another developer's promotion may be limited to classified advertisements in a local newspaper.

Brokers selling lots as an agent for any person who is required to register are required to comply with the requirements of the Act for those sales. Brokers selling lots for different individuals who do not own enough lots to come within the jurisdiction established by the Act generally would not be considered to be offering lots pursuant to a common promotional plan as long as they are merely receiving the usual real estate commission for such sales. If the broker has an ownership interest in the lots or is receiving a greater than normal real estate commission, the broker may be offering lots pursuant to common promotional plan and may be required to comply with the requirements of the Act.

(c) *Delivery of Deed* means the physical transfer of a recordable deed, executed by the seller to the purchaser, to the purchaser's agent or to the appropriate governmental recording office. If the transfer (i.e., delivery) is to an agent or to a recording office, there must not be any conditions imposed upon the purchaser or any further action to be taken by either the purchaser or the seller. If delivery is to the place of recordation, it must be accompanied by the proper recordation fees.

(d) *Lot* means any portion, piece, division, unit or undivided interest in land if such interest includes the right to the exclusive use of a specific portion of the land or unit. This applies to the sale of a condominium or cooperative unit or a campsite as well as a traditional lot.

If the purchaser of an undivided interest or a membership has exclusive repeated use or possession of a specific designated lot even for a portion of the year, a lot, as defined by the regulations, exists. For purposes of definition, if the purchaser has been assigned a specific lot on a recurring basis for a defined period of time and could eject another person during the time he has the right to use that lot, then the purchaser has an exclusive use.

(e) *Sale* means any obligation or agreement for consideration to purchase or lease a lot directly or indirectly. The time of sale is measured from when a purchaser signs a contract, even if the contract contains contingencies beyond the control of the seller. For example, if a developer uses a contract which states that the sale is contingent upon obtaining an exemption from HUD, a sale, for the purposes of this definition, occurred when the purchaser signed the contract. The terms "sale" and "seller" include the terms "lease" and "lessor" for the purposes of the regulations and these Guidelines.

(f) *Site* means a group of contiguous lots whether such lots are actually divided or proposed to be divided. Lots are considered to be contiguous even though contiguity may be interrupted by a road, park, small body of water, recreational facility or any similar object.

(g) *Subdivision* means any land that is located in any state or in a foreign country and is divided or is proposed to be divided into lots, whether contiguous or not, for the purpose of sale or lease as part of a common promotional plan. Any number of lots, whether divided by the previous owner, divided by the current owner, or merely proposed to be divided may constitute a subdivision. "Proposed to be divided" includes the developer's intention to subdivide land, as well as the developer's intention to add additional land or units.

Part III—Exclusions From the Act

The following items are excluded from the coverage of the Act:

(a) *Reservation.* A reservation is a non-binding agreement used to gauge market feasibility for a developer through which a potential purchaser expresses an interest to buy or lease a lot or unit at some time in the future. A deposit may be accepted from the interested person provided that the money is placed in escrow with an independent institution having trust powers and is refundable in full at any time at the option of the potential purchaser. To be excluded from the Act, in no case may a reservation become a binding obligation to purchase a lot; the potential purchaser must take some subsequent affirmative action, typically the signing of a sales contract, to create a binding obligation. An option agreement is an arrangement for consideration in which a potential purchaser could forfeit money; therefore, an option agreement is not a reservation. In no event may a document purporting to be a Property Report or other evidence of compliance with the Act be delivered to an interested party when entering a reservation agreement for a lot or proposed condominium unit which is neither effectively registered nor exempt.

(b) *Undivided interests.* The sale of undivided interests that do not carry with them the right of exclusive use of a specific lot does not establish jurisdiction. For example, a camping subdivision sold as 400 undivided interests to tenants in common, where purchasers have a co-extensive, non-exclusive right to the use and enjoyment of all campsites on a space available basis and no purchaser has an expressed or implied exclusive right to repeatedly use or occupy any specific campsite, would not be covered by the Act.

Part IV—Statutory Exemptions Requiring No Determination by HUD

The discussions that immediately follow pertain to 15 U.S.C. 1702(a) (1) through (8). The exemptions are set forth in the regulations at 24 CFR 1710.5 (a) through (h). These provisions exempt sales from both the anti-fraud and the registration provisions of the Act.

(a) *Twenty-five Lots.* (15 U.S.C. 1702(a)(10) and 24 CFR 1710.5(a)).

This section exempts the sale or lease of lots in a subdivision (i.e., lots offered pursuant to the same common promotional plan) that contains fewer than 25 lots. If a subdivision contains 25 or more lots, but fewer than 25 of those lots are offered for sale under a common promotional plan, those sales would be exempt. Thus, in a subdivision of 28 lots in which 4 lots are not offered for sale because, for example, they are permanently dedicated to the public for a park, the sale of the remaining 24 lots is exempt.

If fewer than 25 lots are acquired in a larger subdivision, the offer of these lots may be subject to the Act if the acquiring party is in any way acting in concert with the previous or current developer of the balance of the subdivision. Correspondingly, if fewer than 25 lots are acquired in a larger subdivision, the offer of the lots may be exempt if there is neither an identity of interest between the acquiring party and the previous or current developer nor any form of concerted action that constitutes a common promotional plan.

Since the *fewer than 25 lots* exemption is based upon the number of lots as opposed to the number of sales, resales of a lot will not be counted toward the *fewer than 25 lots* limit.

(b) *Improved Lots, 15 U.S.C. 1702(a)(2).*

Section 1702(a)(2) of Title 15 of the United States Code exempts (1) the sale or lease of any improved land on which there is a residential, commercial, condominium, or industrial building; or (2) the sale or lease of land under a contract obligating the seller or lessor to erect such a building on the lot within a period of two years.

For a building or unit to be considered complete, it must be physically habitable and usable for the purpose for which it was purchased. A residential structure, for example, must be ready for occupancy and have all necessary and customary utilities extended to it before it can be considered complete. Manufactured home lots with pads but no structure, even if improved with utilities and roads, will not qualify for this exemption. Recreational vehicles are not considered buildings.

If a seller (developer) is relying on this exemption and the residential, commercial, condominium or industrial building is not complete, the contract must obligate the seller to complete the building within two years. If the contractual obligation is not present, the sale is not exempt. The two-year period normally begins on the date the purchaser signs the sales contract. A contract that conditions construction upon acts of a buyer will not exempt the sale. The essence of this exemption is that it applies to the sale of a house (if not built at the time of sale, then to be built within two years after the sale).

HUD's interpretation of what constitutes an obligation to construct a building relies on general principles of contract law. Provisions for purchaser financing and remedies clauses are matters to be decided by the parties to the contract under the laws of the jurisdiction in which the construction project is located. However, such clauses may not alter the obligation of the seller to build. For example, if the type and terms of financing are subject to negotiation between buyer and seller, but the buyer is unable to obtain financing as a condition of the obligation to build, then the sale fails for exemption purposes. The inability of the buyer to obtain construction financing will not relieve the seller from the obligation to build, thereby leaving the buyer with a lot free of a construction obligation. Since the nature of the transaction is the sale of a house (or other structure), there should be no reason for separate construction financing in the normal course of business.

The contract must not allow nonperformance by the seller at the seller's discretion. Contracts that permit the seller to breach virtually at will are viewed as unenforceable because the construction obligation is not an obligation in reality. Thus, for example, a clause that provides for a refund of the buyer's deposit if the seller is unable to close for reasons normally within the seller's control is not acceptable for use under this exemption. Similarly, contracts that directly or indirectly waive the buyer's right to specific performance are treated as lacking a realistic obligation to construct. HUD's position is not that a right to specific performance of construction must be expressed in the contract, but that any such right that purchasers have must not be negated. For example, a contract that provides for a refund or a damage action as the buyer's sole remedy would not be acceptable.

Contract provisions which allow for nonperformance or for delays of construction completion beyond the two-year period are acceptable if such provisions are legally recognized as defenses to contract actions in the jurisdiction where the building is being erected. For example, provisions to allow time extensions for events or occurrences such as acts of God, casualty losses or material shortages are generally permissible. Also permissible, in the case of multi-unit construction, is a clause conditioning the completion of construction or closing of title on a certain percentage of sales of other units. The presale period cannot exceed 180 days from the date the first purchaser signs a contract in the project or, in a phased project, from the date the first purchaser signs a sales contract in a phase. Such a clause may not extend the overall two-year obligation to construct.

Although the factual circumstances upon which nonperformance or a delay in performance is based may vary from transaction to transaction, as a general rule delay or nonperformance must be based on grounds cognizable in contract law such as impossibility or frustration and on events which are beyond the seller's reasonable control.

Because of the variations in applicable contract law among the states and the many different provisions that are used by sellers in construction contracts, HUD may condition its advisory opinions regarding this exemption on representations by local counsel as to the current status of state law on the relevant issues. For example, the Florida Supreme Court has ruled that there must be an unconditional commitment to complete construction within two years and that the remedies available to the purchaser must not be limited. *Samara Development Corp.* v. *Marlow*, 556 So.2d 1097 (Fla. 1990). See also *Schatz* v. *Jockey Club Phase III, Ltd.*, 604 F. Supp. 537 (S.D. Fla. 1985). Developers, especially those in Florida, should be aware of these decisions, as well as decisions in other jurisdictions, e.g., *Markowitz* v. *Northeast Land Co.*, 906 F.2d 100 (3d Cir. 1990).

For a different view, readers should refer to *Attebury* v. *Maumelle Company*, 60 F.3d 415 (8th Cir. 1995), in which the court upheld a contractual provision to build as sufficient to qualify for the exemption despite the fact that the contract then shifted that responsibility to the buyer. This revision of the Guidelines dealing with the "Improved lot" exemption is in reaction to the *Maumelle* decision. At the time of this writing another case of interest was pending in the United States District Court for the Eastern District of Michigan. Whether it ultimately will result in a decision on the Land Sales issues is unknown, as it is the understanding of the Department that settlement negotiations are ongoing. The court is considering those issues on remand from the Court of Appeals for the Sixth Circuit. See *Becherer* v. *Merrill Lynch, Pierce, Fenner & Smith, Inc.*, 43 F.3d 1054 (6th Cir. 1995).

Since questions about this exemption most often arise in connection with condominiums, developers and others should be aware of the decision in the case

of *Winter* v. *Hollingsworth Properties Inc.*, 777 F.2d 1444 (11th Cir. 1985), in which the court held that the Interstate Land Sales Full Disclosure Act applied to the sale or lease of condominium units. This ruling is in consonance with the Department's longstanding position on the condominium issue. The weight of authority of other cases, both Federal and State, supports the Department's position. Therefore, it continues to be the Department's policy that the mere use of the condominium form of ownership does not determine jurisdiction of the Act and that developers should look to the specific requirements of the statutory and regulatory exemptions as amplified in these Guidelines to determine the applicability of the Act.

(c) *Evidence of Indebtedness.* (15 U.S.C. 1702(a)(3) and 24 CFR 1710.5(c)).

This section exempts the sale or lease of evidences of indebtedness (typically a note) secured by a mortgage or deed of trust on real estate. The sale of such notes, which is common in the industry, is exempt; however, the underlying sale of the land is not exempt under this provision.

(d) *Securities.* (15 U.S.C. 1702(a)(4) and 24 CFR 1710.5(d)).

This section exempts the sale of securities issued by a real estate investment trust.

(e) *Government Sales.* (15 U.S.C. 1702(a)(5) and 24 CFR 1710.5(e)).

This section exempts the sale or lease of real estate by any government or government agency. This exemption extends to the sale or lease of land by a city, state, or foreign government as well as the sale of land by the U.S. Government. However, it does not exempt sales or leases of lots by Federal or state chartered and regulated institutions such as banks or savings and loan associations, nor does the fact that the development is assisted, insured or guaranteed under a Federal or state program exempt the lot sales. Municipal Utility Districts and Special Improvement Districts may or may not be considered a qualified government agency under this exemption depending on the legal basis and operation of the District.

(f) *Cemetery Lots.* (15 U.S.C. 1702(a)(6) and 24 CFR 1710.5(f)).

This section exempts the sale or lease of cemetery lots.

(g) *Sales to Builders.* (15 U.S.C. 1702(a)(7) and 24 CFR 1710.5(g)).

This section exempts the sale or lease of lots to any person who acquires the lots for the purpose of engaging in the business of constructing residential, commercial, or industrial buildings or for the purpose of resale or lease of the lots to persons engaged in such a business. The term business is viewed as an activity of some continuity, regularity, and permanency, or means of livelihood.

The sale or lease of lots to an individual who purchases the lots to have his or her own home built is not exempt under this provision. The sale to a non-broker who is buying a lot for investment with indefinite plans for resale also is not exempt.

(h) *Industrial or Commercial Developments.* (15 U.S.C. 1702(a)(8) and 24 CFR 1710.10(h)).

This section exempts the sale or lease of real estate which is zoned for industrial or commercial development. If there is no zoning ordinance, the exemption is available only if the real estate is restricted to industrial or commercial development by a declaration of covenants, conditions, and restrictions which have been recorded in the official records of the city or county in which the real estate is located. In addition, the following five conditions must exist in order to establish eligibility for this exemption:

(1) Local authorities have approved access from the real estate to a public street or highway. The approved access to a public street or highway must run to the legal boundary of the subdivision, but need not run to each and every lot;

(2) The purchaser or lessee of the real estate is a duly organized corporation, partnership, trust or business entity engaged in commercial or industrial business. To be considered "duly organized", a purchaser or lessee must have set up an administrative structure to conduct business, such as: checking accounts; licenses and permits, if required; evidence of intent; and a set of accounting records. The phrase "engaged in business" implies an activity of some continuity, regularity and permanency, or means of livelihood. A new entity or individual starting a business must be authorized to conduct such business in the jurisdiction in which the subdivision is located;

(3) The purchaser or lessee of the real estate is represented in the transaction of sale or lease by a representative of its own selection. The term "representative" is not limited to attorneys and does not exclude sole proprietors from representing themselves. Any person can serve as the representative of the purchaser or lessee so long as sufficient evidence can be produced to prove authority to act in that capacity;

(4) The purchaser or lessee of the real estate affirms in writing to the seller that: it is either purchasing or leasing the real estate substantially for its own use or it has a binding commitment to sell, lease or sublease the real estate to an entity which meets the requirements of (2) above; it is engaged in commercial or industrial businesses; and it is not affiliated with the seller or agent. These affirmations should be retained by the developer in accordance with the statute of limitations of the local jurisdiction or for a period of three years, whichever is longer. If the affirmation is included in the contract, a space must be provided for the purchaser to initial immediately following the affirmation clause; and

(5) A title insurance policy or a title opinion is issued in connection with the transaction showing that title to the real estate purchased or leased is vested in the seller or lessor, subject only to such exceptions as are approved in writing by the purchaser or lessee, preferably in a separate document, prior to the recordation of the instrument of conveyance or execution of the lease. The recordation of a lease is not required. Any purchaser or lessee may waive, in writing in a separate document, the requirement that a title insurance policy or title opinion be issued in connection with the transaction.

Part V—Statutory Exemptions From Registration Requiring No HUD Determination

The discussions that immediately follow pertain to 15 U.S.C. 1701(b) (1) through (8) and 24 CFR 1710.6 through 1710.13.

The developer must comply with the Act's anti-fraud provisions (15 U.S.C. 1703(a)(2)) for sales of lots in the subdivision that are exempt under these provisions. Developers should be particular aware of the requirements of 15 U.S.C. 1703(a)(2)(D).

(a) *One Hundred Lot Exemption.* (15 U.S.C. 1702(b)(1) and 24 CFR 1710.6).

This section exempts the sale of lots in a subdivision if: the subdivision contained fewer than 100 lots on April 28, 1969; has, since that date, contained fewer than 100 lots; and will continue to contain fewer than 100 lots. The 100 lot count for purposes of the exemption excludes lots that are exempt from jurisdiction under 24 CFR 1710.5 (b) through (h). It should be noted that the "25 lot" exemption under § 1710.5(a) cannot be used in connection with the "100 lot" exemption.

For example, a developer of a subdivision containing a total of 129 lots since April 28, 1969, qualifies for this exemption if at least 30 lots are sold in transactions that are exempt because the lots had completed homes erected on them. The 30 exempt transactions may fall within any one exemption or a combination of exemptions noted in § 1710.5 (b) through (h) and may be either past or future sales. In the above example, the developer also could qualify if twelve lots had been sold with residential structures already erected on them, nine lots had been sold to building contractors and at least nine lots were reserved for either the construction of homes by the developer or for sales to building contractors. The reserved lots need not be specifically identified.

Developers of subdivisions containing more than 99 lots who wish to operate under this exemption must assure themselves that all lots in excess of 99 have been and will be sold in transactions exempt under 24 CFR 1710.5 (b) through (h). The sale of more than 99 lots in transactions not exempt under § 1710.5 (b) through (h) would nullify this exemption for prior and future sales and might result in prior sales being voidable at the purchaser's option.

Since the "100 lot" exemption applies to the number of the lots as opposed to the number of sales, resales of a lot will not be counted toward the 100 lot limit. However, any sale or resale of a lot must comply with the anti-fraud provisions.

If fewer than 100 lots are acquired in a larger subdivision, the offer of these lots will not be exempt if the acquiring party is, in any way, acting in concert with the previous or current developer of the balance of the subdivision so as to create a common promotional plan for 100 or more lots unless sales of the other lots are exempt under § 1710.5. However, if fewer than 100 lots are acquired in a larger subdivision, the offer of the lots may be exempt if there is neither an identity of interest between the acquiring party and the previous or current developer nor a form of concerted action constituting a common promotional plan.

(b) *Twelve Lot Exemption.* (15 U.S.C. 1702(b)(2) and 24 CFR 1710.7).

This section exempts the sale of lots from the registration requirements of the Act if, beginning with the first sale after June 20, 1980, no more than twelve lots in the subdivision are sold in the subsequent 12-month period. Thereafter, the sale of the first twelve lots each period is exempt from the registration requirements if no more than twelve lots were sold in each previous 12-month period that began with the anniversary date of the first sale after June 20, 1980. For example, if a developer's first lot sale after June 20, 1980 occurred on August 5, 1980 and no more than eleven additional lots in the subdivision were sold through August 4, 1981, the sales would be exempt.

During the second year of operation under this exemption (beginning on August 5, 1981 in the example) at least the first twelve lot sales would be exempt. However, if lot sales exceed twelve in the second or any subsequent year, the exemption would terminate on the sale of the thirteenth lot. Once eligibility has been terminated, the exemption is no longer available and cannot be recaptured by the same developer for the same subdivision even if there are fewer than twelve lots sold in subsequent years.

A developer may apply to the Secretary to establish a different twelve-month period for use in determining eligibility for the exemption, and the Secretary may allow the change if it is for good cause and consistent with the purpose of this section. An example would be to change the year to coincide with the developer's fiscal or tax year.

In determining eligibility for this exemption, all lots sold or leased in the subdivision after June 20, 1980 are counted, whether or not the lot is registered or the transaction is otherwise exempt, such as the sale of a home and lot package. This exemption extends to twelve lots, not twelve sales. Each lot would be counted in the sale or lease of multiple lots.

Since the "twelve lot" exemption applies to the number of lots as opposed to the number of sales, resales of a lot will not be counted toward the twelve lot limit. The sale and resale of a lot must qualify for the exemption and comply with the anti-fraud provisions. However, lot sales exempt under § 1710.5 (b) through (h), while counted toward the total of twelve, are not required to comply with the anti-fraud provisions.

(c) *Scattered Site Exemption.* (15 U.S.C. 1702(b)(3) and 24 CFR 1710.8).

This section exempts from the Act's registration requirements the sale of lots in a subdivision consisting of noncontiguous parts if: (1) each noncontiguous part of the subdivision contains twenty or fewer lots; and (2) each purchaser or purchaser's spouse makes a personal, on-the-lot inspection of the lot purchased before signing a contract.

This exemption is intended to relieve the developers of small, scattered offerings of the requirement to register their subdivisions. The exemption may also apply to real estate brokers who have an ownership interest in more than one site, each containing 20 or fewer lots.

If a developer intends to rely on this exemption, it is important that the developer understand the definition of subdivision, how a common promotional plan is determined and what constitutes a site. These terms are defined in part II of these Guidelines.

Lots that are contiguous when they are originally platted or developed are considered to remain contiguous. For purposes of this exemption, interruptions such as roads, parks, small bodies of water or recreational facilities do not serve to break the contiguity of parts of a subdivision.

(d) *Twenty Acre Lots Exemption.* (15 U.S.C. 1702(b)(4) and 24 CFR 1710.9).

This section exempts the sale of lots in a subdivision from the registration requirements of the Act if, since April 28, 1969, each lot in the subdivision has contained at least twenty acres. In determining eligibility for the exemption, easements for ingress and egress or public utilities are considered part of the total acreage of the lot if the purchaser retains ownership of the property affected by the easement.

This exemption applies to the entire subdivision and requires that each lot in the subdivision be twenty acres or larger in order for the subdivision to qualify. If a single lot offered in the subdivision is less than twenty acres in size, no lot in the subdivision qualifies for the exemption. If a developer has two sites which comprise the subdivision and only one of the sites contains lots that are all greater than twenty acres in size, the offering of these lots would not be exempt under this provision. All lots offered pursuant to a common promotional plan must be considered.

A subdivision which is platted of record and contains a single lot that is less than twenty acres cannot qualify for the exemption even if the lots are offered in multiples that aggregate twenty acres or more. Further, if the platted lots are all twenty acres or more in size, but a lot is divided and a portion that is less than twenty acres is offered for sale, the exemption would not be available to the subdivision.

(e) *Single-Family Residence Exemption.* (15 U.S.C. 1702(b)(5) and 24 CFR 1710.10).

(1) *General.* This section provides an exemption for the sale of lots that are limited to single-family residential use. Developers are advised to carefully review the eligibility requirements listed below before proceeding with sales. Note especially that some of the eligibility requirements pertain to the entire subdivision while others apply to individual lots.

(2) *Subdivision Requirements.* All lots offered under the same common promotional plan must comply with the two eligibility requirements listed below in order for any lot to be eligible for this exemption.

(i) The subdivision must meet all local codes and standards. If local codes expressly permit incremental development, then only the portions of the subdivision being offered at any given time are required to meet the codes and standards to satisfy this requirement. Otherwise, the entire subdivision must comply with the local standards.

(ii) In the promotion of the subdivision, there cannot be offers, by direct mail or telephone solicitation, of gifts, trips, or dinners or the use of similar promotional techniques to induce prospective purchasers to visit the subdivision or to purchase a lot. There is no prohibition against using the mails, telephone or other advertising media to promote or advertise the offering or to respond to inquiries from potential purchasers. The only prohibition is that these media cannot contain offers of gifts, trips, dinners or other inducement.

In order to qualify for this exemption, the subdivision must have complied with the requirements pertaining to advertising and promotional methods since June 13, 1980, the date the exemption became effective.

(3) *Lot Requirements.* Having met the edibility requirements for a subdivision, each lot offered under the exemption also must comply with the eight requirements listed below. Lots within a subdivision that do not comply with these additional requirements must either be registered or sold in compliance with another exemption, even though the two subdivision requirements have been met.

(i) The lot must be located within a municipality or county where a unit of local government or the State specifies minimum standards for the development of subdivision lots taking place within its boundaries. Each lot must comply with these standards. The following is a list of the areas which must be regulated:

(A) Lot dimensions.
(B) Plat approval and recordation.
(C) Roads and access.
(D) Drainage.
(E) Flooding.
(F) Water supply.
(G) Sewage disposal.

(ii) Each lot sold under the exemption must be either zoned for single-family residence or, in the absence of a zoning ordinance, limited exclusively by enforceable covenants or restrictions to single-family residences or, in the absence of a zoning ordinance, limited exclusively by enforceable covenants or restrictions to single-family residences. Manufactured homes, townhouses, and residences for one to four family use are considered single-family residences for purposes of this exemption. Recreational vehicles are not considered to be residential buildings. Manufactured homes must be affixed to the real estate to be eligible, e.g., connected to water, sewer and electrical sources and on blocks with skirts.

The phrase "* * * in the absence of a zoning ordinance" is interpreted in its literal sense. The existence of a zoning ordinance other than single-family residence zoning is considered to be disqualifying even if there are covenants or restrictions limited construction to single-family residences. Situations such as the foregoing would, however, be a candidate for a "substantial compliance" exemption (24 CFR 1710.16) if all other eligibility requirements of the exemption are satisfied substantially. "Substantial compliance" is discussed in part VII of these Guidelines.

(iii) The lot must be situated on a paved street or highway which has been built to standards prescribed by a unit of local government in which the subdivision is located and be acceptable to that local unit. If the street or highway is not complete, the developer must post a bond or other surety acceptable to the municipality or county in the full amount of the cost of completing the street or highway to assure its completion to local standards. For the purposes of this exemption, paved means concrete or pavement with a bituminous wearing surface that is impervious to water, protects the base and is durable under the traffic load and maintenance contemplated.

(iv) The unit of local government or a homeowners' association must have accepted or be obligated to accept the responsibility for maintaining the street or highway upon which the lot is situated. The obligation of the local government entity to accept this responsibility may be evidenced by an ordinance which binds the government to maintain the streets or by a written statement signed by the appropriate government official. Maintenance independently provided by a developer is not acceptable under this exemption.

In any case in which a homeowners' association has accepted or is obligated to accept maintenance responsibility, the developer must, prior to a purchaser signing a contract or agreement to purchase, provide the purchaser with a good faith written estimate of the cost of maintenance over the first ten years of ownership. A *good faith estimate* means a current estimate based on documentary evidence, usually obtainable from the suppliers of the necessary services.

(v) At the time of closing, potable water, sanitary sewage disposal, and electricity must be extended to the lot or the unit of local government must be obligated to install the facilities within 180 days following closing.

The obligation may be in the form of a local statute or written agreement signed by the appropriate government authority. A local code or statute that obligates the subdivider or developer to complete installation of water and sewage disposal systems within a certain time does not satisfy this requirement of the exemption.

For subdivisions that will not have a central water system, there must be assurances that an adequate potable water supply is available year-round to service the subdivision. Assurances of an adequate, drinkable water supply can be obtained from a hydrologist or the local health department.

For subdivisions that will not have a central sewage disposal system, there also must be assurances that each lot is approved for the installation of a septic tank. If the individual lot is not approved for the installation of a septic tank at time of sale, the developer may provide in the contract that approval will be obtained prior to closing provided that any purchaser deposits and/or payments are placed in an escrow account with an institution having trust powers in the jurisdiction where the subdivision is located. All such monies must be refunded to the purchaser if the approval is not obtained prior to closing. Closing must occur within 180 days. The approval for the installation of a septic tank must come from the appropriate government authority, usually the local health department, local governmental engineer or county sanitarian. Developers selling lots prior to obtaining approval for installation of a septic tank on the individual lot are proceeding at their own risk. The sale will not qualify for the exemption if the approval is not obtained and the closing does not occur within 180 days.

(vi) The contract of sale must require delivery of a warranty deed to the purchaser within 180 days after the signing of the sales contract. The deed must be free from monetary liens and encumbrances at the time of delivery. If a warranty deed is not commonly used in the jurisdiction where the lot is located, a deed or grant that warrants that the seller has not conveyed the lot to another person may be delivered in lieu of a warranty deed. The deed or grant used must also warrant that the lot is free from encumbrances made by the seller or any other person claiming by, through or under the seller.

(vii) At the time of closing, a current title insurance binder, policy or title opinion reflecting the condition of title must be issued or presented to the purchaser showing that, subject only to exceptions which are approved in writing by the purchaser at the time of closing, marketable title to the lot is vested in the seller. In order to satisfy this requirement, a developer may want to obtain the purchaser's written approval of exceptions to title prior to closing, although the actual title binder, policy or opinion must be current at the time of closing and show that title is vested in the seller. If closing occurs and the purchaser has not approved the exceptions to title in writing, the sale would not be exempt under this provision. The party that bears the cost of the title binder, policy or opinion is not relevant to eligibility for the exemption. Unless otherwise defined by state law, the *time of closing* is the date that legal title to the property is transferred from seller to buyer.

(viii) The purchaser or purchaser's spouse must make a personal, on-the-lot inspection of the lot purchased prior to signing a contract or agreement to purchase.

(f) *Mobile home exemption.* (15 U.S.C. 1702(b)(6) and 24 CFR 1710.11)

For purposes of this exemption, a mobile home is a unit receiving a label in conformance with HUD Regulations implementing the National Manufactured Housing Construction and Safety Standards Act of 1974 (42 U.S.C. 5401, et seq.).

This section exempts the sale of a mobile home lot from the registration requirements of the Act when all eligibility requirements listed below are met:

(1) The lot is sold as a homesite by one party and a mobile home is sold by another party, and the individual contracts of sale:

(i) Obligate the sellers to perform, contingent upon the other seller carrying out its obligations, so that a completed mobile home will be placed on a completed homesite within two years after the date the purchaser signs the contract to purchase the lot (see part IV(b) of these guidelines for HUD's position on two year completion requirements);

(ii) Provide that all funds received by the sellers are to be deposited in escrow accounts independent of the sellers until the transactions are completed;

(iii) Provide that funds received by the sellers will be released to the buyer upon demand if either of the sellers do not perform; and

(iv) Contain no provisions that restrict the purchaser's right to specific performance under state law.

(2) The homesite is developed in conformance with all local codes and standards, if any, for mobile home subdivisions.

(3) At the time of closing:

(i) Potable water and sanitary sewage disposal are available to the homesite and electricity has been extended to the lot line;

(ii) The homesite is accessible by roads;

(iii) The purchaser receives marketable title to the lot; and

(iv) Other common facilities represented in any manner by the developer or agent to be provided are completed or, in the alternative, there are letters of credit, cash escrows or surety bonds in a form acceptable to the local government in an amount equal to 100 percent of the estimated cost of completion. Corporate bonds are not acceptable for purposes of the exemption.

(g) *Intrastate Exemption.* (15 U.S.C. 1702(b)(7) and 24 CFR 1710.12).

This section exempts the sale or lease of real estate in a sales operation that is intrastate in nature. The lot must be free and clear of all liens, encumbrances and adverse claims. The following six eligibility requirements must be met before a lot qualifies for this exemption:

(1) The sale of lots in the subdivision after December 20, 1979, must have been and must continue to be restricted solely to residents of the state in which the subdivision is located, unless the sale is exempt under 24 CFR 1710.5, 1710.11 or 1710.13. Sales of lots exempt under § 1710.5, § 1710.11 or § 1710.13 may be to out-of-state purchasers without affecting the eligibility of the overall subdivision for the intrastate exemption. Any other sales to out-of-state purchasers, even if the lots were registered or otherwise exempt under any other section, would make the entire subdivision ineligible for the intrastate exemption.

Residency is determined by state law. For purposes of this exemption, a developer may rely on a statement signed by the purchaser or lessee as to the state of residence. Obviously, the prospective purchaser must be an actual resident of the state at the time of signing the sales contract as opposed to a person visiting the state or planning to move into the state. However, service personnel

may, at their option, claim the state in which they are stationed.

(2) The purchaser or purchaser's spouse must make a personal on-the-lot inspection of the lot to be purchased before signing a contract. Evidence of this inspection should be retained by the developer.

(3) Each contract must:

(i) Specify the developer's and purchaser's responsibilities for providing and maintaining roads, water and sewer facilities and any existing or promised amenities. If the developer is not responsible for providing or completing a particular service or amenity, the contract should make it clear that it is up to the buyer to make the necessary arrangements for the desired services. If a third party is involved, the contract must specify whether the buyer or seller is responsible for making the required arrangements;

(ii) Contain a good faith estimate of the year in which the roads, water and sewer facilities and promised amenities will be completed.

This estimate is required for any facility the developer promises or indicates will be completed. Estimates should be based on documentary evidence, such as contracts, engineering schedules or other evidence of commitments to complete the facilities and amenities; and

(iii) Contain a non-waivable provision giving the purchaser the right to revoke the contract until at least midnight of the seventh calendar day following the date the purchaser signed the contract. This revocation right cannot be restricted to a specific method of notification such as requiring notification to be in writing. If the purchaser is entitled to a longer revocation period by operation of state law, that period automatically becomes the Federal revocation period and the contract must reflect the longer period. If the purchaser revokes the contract during this "cooling-off period," he or she is entitled to a full refund of all money paid.

(4) The lot being sold must be free and clear of all liens, encumbrances and adverse claims. To remain exempt, the real estate must remain free and clear of all liens, encumbrances and adverse claims, with the exception of those placed on the property by the purchaser. Thus, real estate that is sold under a installment contract prior to conveyance by deed cannot be burdened by a lien and still qualify for the exemption. If a lien is placed on the property, the exemption is automatically terminated at the time the lien is perfected.

The fact that a title company will insure against a lien, encumbrance or adverse claim has no bearing in determining whether or not the sale qualifies for the exemption. Except as noted below, the existence of a lien, encumbrance or adverse claim disqualifies the affected lot or lots for this exemption. The only exceptions to this requirement are listed below:

(i) Mortgages or deeds of trust containing release provisions for the individual lot purchased if:

(A) The contract of sale obligates the developer to deliver a free and clear warranty deed or its equivalent under local law within 180 days (constructive delivery is acceptable); and

(B) The purchaser's payments are deposited in an escrow account independent of the developer until a deed is delivered. The escrow account must be with an institution which has trust powers or in an established bank, title insurance, abstract or escrow company that is doing business in the jurisdiction in which the property is located. The purchaser's earnest money payment or any other payment by the purchaser cannot be used to obtain a release from the mortgage and may not be released from escrow until the deed is delivered.

(ii) Liens that are subordinate to the leasehold interest and do not affect the lessee's right to use or enjoy the lot.

(iii) Property reservations that are for the purpose of bringing public services to the land being developed, such as easements for water and sewer lines.

Other acceptable property reservations are easements for roads and electric lines to serve the subdivision as well as certain drainage easements. The reservation of subsurface oil, gas or mineral rights is acceptable unless the reservation expressly or impliedly includes the right of ingress and egress upon the property. Examples of the types of reservations and easements that are unacceptable and disqualify the burdened property for the exemption include easements for high power transmission lines, telephone long lines, pipelines and bridle trails.

(iv) Taxes or assessments which constitute liens before they are due and payable if imposed by a state or other public body having authority to assess and tax property or by a property owners' association.

(v) Beneficial property restrictions that are mutually enforceable by all lot owners in the subdivision.

Developers who wish to maintain control of a subdivision indefinitely through a Property Owners' Association, Architectural Control Committee, and/or restrictive covenants will find the requirements of this exemption unsuitable.

In recognition of the fact that developer control is unavoidable until lots are sold, for the purpose of this exemption, a developer must provide an opportunity for the transfer of control to all lot owners at or before the time when the developer no longer owns a majority of total lots in, or planned for, the subdivision. Relinquishment of developer control must require affirmative action, usually in the form of an election based upon one vote per lot.

The developer may continue to participate in the control of the subdivision to the extent that lots remain unsold. For example, a developer who still owns thirty percent of the lot inventory has a thirty percent voting block on issues regarding the subdivision.

It is acceptable for the developer to appoint, during the initial stages of development, a governing body (panel, commission, etc.) whose members subsequently are elected and re-elected by all the lot owners to administer subdivision control.

To be enforceable, restrictions must be part of a general plan of development. Restrictions, whether separately recorded or incorporated into individual deeds, must be applied uniformly to every applicable lot or group of lots. To be considered beneficial and enforceable, any restriction or covenant that imposes an assessment on lot owners must apply to the developer on the same basis as other lot owners.

(vi) Reservations contained in United States land patents and similar Federal grants or reservations are excepted from the term "liens" but must be disclosed in the Intrastate Exemption Statement.

Many of the land patents by which land west of the Mississippi River was originally conveyed contain reservations to the United States for minerals and water rights-of-way for canals and ditches. These reservations as well as any other Federal grants or reservations must be disclosed but are not disqualifying factors.

(5) Before the sale the developer must disclose in a written statement (see sample below) to the purchaser all liens, reservations, taxes, assessments and restrictions applicable to the lot purchased. The developer must obtain a written receipt from the purchaser acknowledging that the statement required by this subparagraph was delivered.

Neither the statement nor the written receipt have to be submitted to HUD, but copies of the purchaser receipts should be available for review upon demand by the Secretary or his or her designee. It is suggested that the developer retain the purchaser receipts for at least three years.

(6) The written statement (see sample below) also must include good faith cost estimates for providing electric, water, sewer, gas and telephone service to the lot. Estimates must include all costs associated with obtaining the services. For example, if private wells are the water source, the estimate should include the cost of the well, pump, casing, etc. Likewise, if butane or propane gas is used, the statement must include the cost of installing a tank and the per gallon cost of the gas.

The estimates for services applicable to unsold lots must be updated every two years or more frequently if the developer has reasons to believe that at least a $100 increase or decrease for a particular item has occurred. The dates on which the estimates were made must be included in the statement.

Effective state property reports or disclosure statements containing all the information required in the Intrastate Exemption Statement may be used in lieu of a separate statement. State property reports which do not contain all the information required in the Intrastate Exemption Statement may be used only of they are supplemented with the missing information.

Sample Intrastate Exemption Statement

Intrastate Exemption Statement

Name of Developer _____

Address _____

Name of Subdivision _____

Location _____

Liens

(Provide a clear and concise listing of all liens on the property. As used in this statement, liens are security interests such as mortgages or deeds of trust, tax liens, mechanics liens or judgments. Liens which are acceptable for purposes of the exemption are those which contain release provisions for the individual lot purchased but only if the contract of sale obligates the developer to deliver a deed within 180 days and the purchaser's payments are held in an independent escrow account until a deed is delivered and, in the case of leases, liens which are subordinate to the lease hold interest and do not affect the lessee's right to enjoy or use the lot.) A chart similar to the following may be used:

Type of lien	Amount of lien	Lots subject to lien.
.....	.....	

Reservations

(Disclose all easements and reservations affecting the lots that are offered for sale. The preceding narrative contains examples of easements and reservations which are acceptable.)

Taxes

(Provide sufficient information to enable a purchaser to estimate the annual taxes due on the lot purchased.)

Assessments

(Disclose all assessments, fees and dues that have been imposed or may be imposed. The list of assessments, fees and dues must show the rates and amounts and explain who has the authority for imposing the listed assessments, fees and dues.)

Restrictions

(Recite verbatim all restrictions that apply to the lots being offered. In the alternative, the developer may attach a complete copy of all restrictions affecting the lots. If the restrictions do not apply to all the lots in the offering, the developer should specify which lots are affected by the restrictions. In addition, the developer should explain who has the authority to enforce the restrictions and indicate whether or not the restrictions are recorded.)

Utility Cost Estimates

(Disclose a good faith estimate of the cost to the purchaser of providing water, electric, telephone, sewage disposal and gas service to each lot offered under the exemption. The estimate must include all costs associated with obtaining the services.) A chart similar to the following may be used.

Lot No.	Water	Electric	Telephone	Sewage disposal	Gas
.....					
.....					

Under each heading list the estimated cost to the purchaser and the date the estimate was made.

I affirm that to the best of my knowledge the above information is accurate and complete.

(Signature of Developer or Authorized Agent)

(Date)

(Title)

Purchaser's Acknowledgement

(The developer must obtain a written receipt from the purchaser acknowledging that the purchaser received a written statement(s) of all liens, reservations, taxes, assessments and restrictions applicable to the lot and good faith estimates of the cost of providing electric, water, sewer, gas and telephone service to the lot.)

The receipt may be in the following form:

Sample Receipt

I acknowledge that I have received an Intrastate Exemption Statement listing all liens, reservations, taxes, assessments, restrictions and estimates of utility costs applicable to (identify the subdivision and its location) from (name of developer). I have made a personal on-the-lot inspection of (identify the lot), which is the lot I am interested in buying or leasing.

(Signature of Purchaser)

(Date)

(h) *Metropolitan Statistical Area (MSA) Exemption.* (15 U.S.C. 1702(b)(8) and 24 CFR 1710.13).

This section exempts the sale or lease of lots in a subdivision located in a Metropolitan Statistical Area (MSA). The eligibility criteria for the MSA Exemption are the same as that of the Intrastate Exemption with the following exceptions:

(1) The subdivision must have contained fewer than 300 lots on and since April 28, 1969, and continue at or below that quantity in the future;

(2) The lot(s) must be located in a MSA as defined and designated by the U.S. Office of Management and Budget;

(3) The principal residence of each purchaser must be within the same MSA;

(4) Adverse claims that are disqualifying for the Intrastate Exemption are acceptable for the MSA Exemption. The only requirement in this regard is for the adverse claim to be disclosed in the MSA Exemption Statement. The party making the claim, the basis of the claim and the property affected by the claim must be identified; and

(5) Although the MSA exemption is self-determining, a written affirmation must be submitted by developers relying on this exemption. The due date is January 31 of each year. Failure to submit the affirmations will disqualify the subdivision for this exemption. The written affirmation must be in the following format: Affirmation

Developer's Name _____

Developer's Address _____

Purchaser's Name(s) _____

Purchaser's Address(es) (including county)

_____

_____

Name of Subdivision _____

Legal Description of Lot(s) Purchased _____

_____

I hereby affirm that all of the requirements of the MSA exemption as set forth in 15 U.S.C. 1702(b)(8) and 24 CFR 1710.13 have been met in the sale or lease of the lot(s).

I also affirm that I submit to the jurisdiction of the Interstate Land Sales Full Disclosure Act with regard to the sale or lease cited above.

(Date)

(Signature of Developer or Authorized Agent)

(Title)

The sample Intrastate Exemption Statement shown above may be used as a guide in preparing the MSA Exemption Statement. Simply substitute references to the MSA Exemption in lieu of references to the Intrastate Exemption and add a provision for disclosure of "Adverse Claims" after the discussion of "Restrictions" and before the caption "Utility Cost Estimates".

Part VI—Regulatory Exemptions From Registration Requiring No HUD Determination—(24 CFR 1710.14)

(a) *General.*

The Secretary has established several regulatory exemptions from the registration and full disclosure requirements of the Act (i.e., filing a Statement of Record and furnishing a Property Report). These exemptions are self-determining and do not require a submission to HUD.

To qualify, a developer must satisfy the eligibility criteria at all times. Exempt status ends when a developer fails to immediately comply with the eligibility criteria. Furthermore, if there are reasonable grounds to believe that the use of any of these regulatory exemptions is not in the public interest in a particular case, the Secretary may deny the use of the exemption by an otherwise eligible subdivision, site or lot. The developers will be given notice and an opportunity for hearing before a final determination is made. Proceedings under this provision follow the requirements set forth in the regulations (24 CFR 1720.105, et seq.) and are patterned after the notice and time requirements of a proceeding pursuant to 24 CFR 1710.45(b)(1).

If a sale meets any one of the following requirements, it qualifies for exemption from the registration requirements of the Act. However, qualifying sales must comply with the anti-fraud provisions.

(b) *Eligibility Requirements.*

(1) *Inexpensive Lots (24 CFR 1710.14(a)(1))*

The sale or lease of a lot for less than $100, including closing costs, is exempt if the purchaser or lessee is not required to purchase or lease more than one lot. This exemption is available on a lot-by-lot basis. The entire subdivision need not qualify.

(2) *Leases for Limited Duration (24 CFR 1710.14(a)(2))*

The lease of a lot for a term of five years or less is exempt if the terms of the lease do not obligate the lessee to renew. This exemption is available on a lot-by-lot basis. The entire subdivision need not qualify.

The use of an arrangement that is called a lease but is tantamount to the sale or long-term lease of a lot would not qualify for this exemption; i.e., a lease with a large initial payment or substantial payments over five years and token payments thereafter.

A five-year lease with an option to purchase or renew would be suspect under this exemption and might or might not qualify depending on the overall transaction. In these cases, a request for an Advisory Opinion is strongly recommended.

(3) *Lots Sold to Developers (24 CFR 1710.14(a)(3))*

The sale or lease of lots to a person who is engaged in a bona fide land sales business is exempt. For a transaction to qualify for this exemption, the purchaser must be a person who plans to subsequently sell or lease the lot(s) in the normal course of business. The term business refers to an activity of some continuity, regularity and permanency, or means of livelihood. The sale or lease of lots to an individual who is buying the property for investment, to be sold at some unforeseeable time in the future, would not be exempt under this provision. This exemption is available on a lot-by-lot basis, although most transactions would include more than one lot. The entire subdivision need not qualify.

(4) *Adjoining Lot (24 CFR 1710.14(a)(4))*

The sale or lease of a lot to a purchaser who owns a contiguous lot that has a residential, commercial, or industrial building on it is exempt. This exemption permits a developer to sell or lease unimproved lots to persons wishing to enlarge the property on which their home or business is located. This exemption is available on a lot-by-lot basis.

(5) *Lot Sales to a Government (24 CFR 1710.14(a)(5))*

The sale or lease of real estate to a government or government agency is exempt. This exemption is available on a lot-by-lot basis. The entire subdivision need not qualify.

(6) *Sales of Leased Lots (24 CFR 1710.14(a)(6))*

The sale of a lot or lots on which the purchaser has maintained his or her primary residence for at least one year is exempt. Typically, these sales will occur in a mobile home subdivision. This exemption is available on a lot-by-lot basis. The entire subdivision need not qualify.

(c) *Termination.*

If HUD has reasonable grounds to believe that exemption from registration in a particular case is not in the public interest, HUD may terminate the exemption as to a subdivision or as to particular lots in a subdivision. Termination could be ordered only after the developer is notified of HUD's intention to terminate and is afforded a hearing opportunity. The reasons for termination will vary from case to case but could include unlawful sales practices by the developer or its agents, insolvency or adverse information about the lots or the subdivision that should be disclosed to purchasers.

Part VII—Regulatory Exemption HUD Determination Required—(24 CFR 1710.16)

An Exemption Order is available for a subdivision or certain lots in a subdivision that technically do not comply with the eligibility requirements of one of the other available exemptions. However, to qualify for an Exemption Order, the offering must substantially comply with the eligibility requirements.

In evaluating the circumstances of an Exemption Order request, HUD examines the basic intent and legislative history of the exemption that the developer claims to substantially meet. If the offering is not consistent with the basic intent, an Exemption Order will not be issued even though some of the technical requirements of that exemption are met.

Offerings that involve circumstances that are equal to or better than the technical requirements, or that are consistent with the basic intent of the exemption, will be judged to be in substantial compliance and an Exemption Order will be issued. It should be noted that an Exemption Order applies only to sales after the date of the Order and has no retroactive effect. This is the only exemption that requires submission of a request and a determination by HUD before it is effective. Developers wishing to request an Exemption Order must submit the information listed below:

(a) A detailed statement describing how the proposed sales of lots meet, or substantially meet, each of the eligibility requirements of the exemption that the developer claims to substantially meet.

(b) A copy of the contract to be used. The contract must:

(1) Specify the developer's and purchaser's responsibilities for providing and maintaining roads, water and sewer facilities and any existing or promised amenities. If the developer is not responsible for providing or completing a particular service, the contract should make it clear that it is up to the buyer to make the necessary arrangements for desired services; and

(2) Contain a good faith estimate of the year in which the roads, water and sewer facilities and promised amenities will be completed. This estimate is required for any facility the developer promises or indicates will be completed. Estimates should be based on documentary evidence, such as contracts, engineering schedules or other evidence of commitments to complete facilities and amenities; and

(3) Contain a non-waivable provision giving the purchaser the opportunity to revoke the contract until at least midnight of the seventh calendar day following the date the purchaser signed the contract. If the purchaser is entitled to a longer revocation period by operation of state law, that period becomes the Federal revocation period and the contract must reflect the requirements of the longer period; and

(4) Contain a provision that obligates the developer to deliver to the purchaser within 180 days of the date the purchaser signed the sales contract, a warranty deed, or its equivalent under local law, which at the time of delivery is free from any monetary liens or encumbrances.

(c) A plat of the entire subdivision with the lots subject to the exemption delineated.

(d) A description of how the lots have been and will be promoted and to which population centers the promotion has been and will be directed.

(e) Documentation to establish that each purchaser or purchaser's spouse will make an on-the-lot inspection of the lot to be purchased before the contract is signed.

(f) A filing fee in the amount set forth in § 1710.35(c) in the form of a certified check, cashier's check or postal money order made payable to the U.S. Treasury.

If, after an Exemption Order has been issued, HUD has reasonable grounds to believe that the exempt status of the subdivision or individual lots is not in the public interest, the Exemption Order may be terminated. Such an action would be preceded by a notice giving the developer an opportunity to request a hearing on the allegations leading to termination. For example, proceedings may be initiated because of the apparent omissions or misrepresentations in the information upon which the Exemption Order was based, the unethical conduct of the developer or the developer's agent or the presence of adverse conditions at or about the real estate which should be brought to the attention of purchasers by way of a disclosure document.

Some examples of substantial compliance are listed below. These are examples only and presume that all other applicable eligibility requirements of the exemption are either fully met or substantially met. It should be remembered that substantial compliance can occur with virtually any of the twenty-two available exemptions.

(1) One of the eligibility requirements for the Single-Family Residence Exemption is that the lots be zoned as single-family residential or, in the absence of a zoning ordinance, restricted to single-family residence development by enforceable covenants or restrictions. As stated before, the phrase "* * * in the absence of a zoning ordinance * * *" is interpreted in its most literal sense. Therefore, the existence of any zoning ordinance other than single-family

residence zoning is a disqualifying factor for the exemption.

However, substantial compliance would be considered if a different zoning ordinance existed and the enforceable covenants or restrictions limited development to single-family residences.

(2) Another eligibility requirement for the Single-Family Residence Exemption states that, at the time of closing, potable water, sanitary sewage disposal and electricity must be extended to each lot or the unit of local government must be obligated to install these facilities within 180 days following closing.

Substantial compliance with this provision would be considered in those cases where one or more of these utilities is not available but the developer has a contract with a publicly regulated utility to install the facilities within 180-days following closing or upon demand of the purchaser.

Furthermore, substantial compliance would be considered if the utility trunk lines are "reasonably close" to the lots instead of at each lot line.

(3) An eligibility requirement for the Intrastate Exemption is that the lot sold must be free and clear of all liens, encumbrances and adverse claims. Mineral reservations have been deemed to be acceptable so long as the reservation does not include the right of ingress or egress upon the property. If the right of ingress or egress exists, substantial compliance will be considered if there are written, recorded provisions from the owner(s) of the mineral rights for compensating the lot owner for loss of the use or enjoyment of the property when such rights are exercised.

Part VIII—Advisory Opinion—Secretary's Opinion May Be Requested—(24 CFR 1710.17)

(a) *General*

When it is not clear that an offering is either exempt under the self-determined statutory or regulatory provisions or whether jurisdiction exists, an Advisory Opinion may be requested to clarify the situation. The filing requirements are found in 24 CFR 1710.17 of the regulations and are described in (b) and (c) below.

The material to be submitted with all requests for Advisory Opinions is described under (b) below. In most cases, depending on the provision under which an exemption is claimed, additional documentation is needed before an opinion can be given. Review (c) below to determine what additional documentation is customarily needed before submitting a request.

HUD's Advisory Opinions are based upon and limited to the representations made by the developer. Therefore, if a favorable Advisory Opinion is issued based upon incomplete, improper or incorrect representations, the Opinion has no binding effect.

(b) *Basic Requirements For Submission*

(1) A filing fee in the amount required by § 1710.35(c) in form a certified check, cashier's check or postal money order made payable to the U.S. Treasury.

(2) A comprehensive description of the conditions and operations of the offering. Specify the provision(s) of the Act or regulations under which sales are believed to be exempt or why there is no jurisdiction.

(c) *Additional Requirements For Submission*

Depending on the provision under which an exemption is claimed, a developer may be required to submit additional information. Beginning with the exemption under 24 CFR 1710.5(a) of the regulations and ending with 24 CFR 1710.14, the additional information that should be submitted with a request for an Advisory Opinion is listed below. In some cases, information or documentation other than that specified may be requested after a submission has been reviewed by HUD.

(1) To obtain an Advisory Opinion pertaining to 24 CFR 1710.5(a), the "25 lot" exemption, submit a plat of the subdivision. Submit a listing of any other properties in which the developer has an interest and the geographic relationship of those properties to the subdivision for which the exemption is claimed. If other properties are divided or proposed to be divided, indicate the total number of lots planned. Indicate those properties which will be offered by the same sales personnel or through the same sales office as the subdivision for which the exemption is claimed. Describe how the lots are marketed, i.e., who sells the lots, how the lots are advertised, whether prospective purchasers are referred between subdivisions, etc.

(2) To obtain an Advisory Opinion pertaining to 24 CFR 1710.5(b), the "improved lot" exemption, submit a copy of the contract of sale or lease and an opinion of local counsel with respect to whether the contract meets the exemption's requirements under the law in the jurisdiction in which the subdivision is located.

(3) To obtain an Advisory Opinion pertaining to 24 CFR 1710.5(c), the "evidences of indebtedness" exemption, describe the security arrangement and submit a copy of the evidence of indebtedness.

(4) To obtain an Advisory Opinion pertaining to 24 CFR 1710.5(d), the "securities" exemption, no additional documentation is customarily required to be submitted with the request.

(5) To obtain an Advisory Opinion pertaining to 24 CFR 1710.5(e), the "government sales" exemptions, specify the government agency selling the property and submit the enabling legislation.

(6) To obtain an Advisory Opinion pertaining to 24 CFR 1710.5(f), the "cemetery lots" exemption, no additional documentation is customarily required to be submitted with the request.

(7) To obtain an Advisory Opinion pertaining to 24 CFR 1710.5(g), the "sales to builders" exemption, submit specific information showing that the purchaser or lessee is engaged in the business of building or is acquiring the real estate for resale or lease to a builder.

(8) To obtain an Advisory Opinion pertaining to 24 CFR 1710.5(h), the "industrial or commercial development" exemption submit a plat and supporting documentation, including a copy of the instrument containing the purchaser or lessee affirmation and evidence of the zoning or, in the absence of zoning, restrictive covenants.

(9) To obtain an Advisory Opinion pertaining to 24 CFR 1710.6, the "100 lot" exemption, submit a plat of the subdivision. In addition, submit a listing of any other properties in which the developer has an interest and the geographic relationship of those properties to the subdivision for which the exemption is claimed. If other properties are divided or proposed to be divided, indicate the total number of lots planned. Indicate those properties that will be offered by the same sales personnel or through the same sales office as the subdivision for which the exemption is claimed. Describe how the lots are marketed, i.e., who sells the lots, how the lots are advertised, whether prospective purchasers are referred between subdivisions, etc.

(10) To obtain an Advisory Opinion pertaining to 24 CFR 1710.7, the "12 lot" exemption, submit a list of all lots sold under the same common promotional plan since June 20, 1980. (Review Part II(b) of these Guidelines for an explanation of common promotional plan.) Indicate the date of each sale. State whether the developer has been involved in the sale of any other real estate since June 20, 1980 and indicate how it is intended that future sales will be restricted.

(11) To obtain an Advisory Opinion pertaining to 24 CFR 1710.8, the "scattered sites" exemption, submit a plat of the site and list the name and geographic location of all other properties in which the developer has an interest. State the extent of the developer's interest.

(12) To obtain an Advisory Opinion pertaining to 24 CFR 1710.9, the "20 acre lots subdivision" exemption, submit a plat of the subdivision with the acreage of each lot clearly delineated. In addition, substantiate that all lots offered under the same common promotional plan are greater than 20 acres in size and have been that size since April 29, 1969. Describe all properties in which the developer has an interest and the geographic relationship of such properties to the subdivision for which the exemption is claimed. Indicate those properties which will be offered by the same sales personnel or through the same sales office as the subdivision for which the exemption is claimed. Describe how the properties are marketed, i.e., who sells the lots, how the lots are advertised, whether purchasers are referred between subdivisions, etc.

(13) To obtain an Advisory Opinion pertaining to 24 CFR 1710.10, the "single-family residence" exemption, address each of the subdivision requirements and the eight lot requirements as set forth in Part V(e) of these Guidelines. For example, the developer should specifically state how the condition of title will be demonstrated, that the purchaser's approval of exceptions to title will be obtained prior to closing and that the purchasers will make a personal on-the-lot inspection prior to signing the contract. The submission should describe how the standards are being enforced by the local authorities. The submission must also describe the marketing and promotion of the subdivision.

The submission should be accompanied by documentation including a copy of the contract of sale and a copy of the state or local minimum standards. The documents submitted must include minimum standards for each of the eight areas listed in the regulations. The documentation should clearly show that the standards are being enforced and are not merely discretionary. If the developer states that the local authorities will take over responsibility for the roads, submit documentation evidencing that intent. If the developer represents that water is the purchaser's responsibility, submit a copy of the appropriate report assuring that an adequate year-around water supply is available. If septic tanks are to be used, submit a copy of the approval for their installation and a statement of how approval will be obtained for each lot.

The above listing is not comprehensive. It is designed to give the developer an idea of the type of statements and documentation which will be requested before an opinion will be issued.

(14) To obtain an Advisory Opinion pertaining to 24 CFR 1710.11, the "manufactured home" exemption, identify who is selling the lot and who is selling the manufactured home. Submit a copy of the contracts to be used.

(15) To obtain an Advisory Opinion pertaining to 24 CFR 1710.12, the "intrastate" exemption, submit a copy of the contract of sale, the Intrastate Exemption Statement, the restrictive covenants, a statement of the status of mineral right ownership and the enabling document(s) of the Property Owners' Association or condominium association including the by-laws, if any. If sales have been made since December 20, 1979, submit a list of such sales with the purchaser's name, address at the time of sale, date of sale and lot number(s).

(16) To obtain an Advisory Opinion pertaining to 24 CFR 1710.13, the "MSA" exemption, submit a copy of the contract of sale, plat, and MSA Exemption Statement. If sales have been made, submit a list of such sales with the purchaser's name, address at the time of sale, date of sale and lot number(s).

(17) To obtain an Advisory Opinion pertaining to 24 CFR 1710.14(a)(1), the "inexpensive lots" exemption, submit a copy of the proposed promotional materials and the documents to be used in the sale.

(18) To obtain an Advisory Opinion pertaining to 24 CFR 1710.14(a)(2), the "limited term leases" exemption, submit a copy of the lease and other documentation relevant to the lease transaction.

(19) To obtain an Advisory Opinion pertaining to 24 CFR 1710.14(a)(3), which exempts sales of lots to developers, submit information to substantiate the claim that the purchaser is in the land sales business.

(20) To obtain an Advisory Opinion pertaining to 24 CFR 1710.14(a)(4), the "adjoining lot" exemption, submit a map showing the lot on which the purchaser owns a residential, commercial or industrial building and the lot to be purchased.

(21) To obtain an Advisory Opinion pertaining to 24 CFR 1710.14(a)(5), the "sales to government" exemption, name the Government entity and submit a copy of the legal document by which the entity was created or a document evidencing the governmental decision to purchase.

(22) To obtain an Advisory Opinion pertaining to 24 CFR 1710.14(a)(6), the "sales of leased lots" exemption, state the circumstances which the purchaser has lived on or will have lived on the lot for one year or more and submit a copy of the lease or other agreement entitling the purchaser to occupy the lot. State whether the purchaser is using the lot as his or her primary residence.

Part IX—No-Action Letter—(24 CFR 1710.18)

The availability of expanded regulatory exemptions has resulted in the exemption of most transactions which may previously have warranted the issuance of a No-Action Letter. Nevertheless, there may be instances when one or more sales or leases fall within the purview of the Act but do not qualify for an exemption, although the circumstances of the sales or leases may be such that no affirmative action is needed to protect the public interest and prospective purchasers.

In such instances, a No-Action Letter may be requested. The request should include a thorough explanation of the proposed transaction(s) and the facts and supporting documentation necessary to demonstrate that no affirmative action is needed in the particular situation. If a request for a No-Action Letter is based upon a belief that the offering is ineligible for an exemption due to a minor technicality, demonstrate how other provisions of the particular exemption are met. The issuance of a No-Action Letter will not affect any right or remedy that the purchaser may have under the Act, including the right to rescind a contract for a period of two years. A No-Action Letter simply signifies that HUD will not take any affirmative action to require registration. However, the issuance of a No-Action Letter does not preclude any future agency action which may become necessary because of new information or a change in the circumstances.

HUD's No-Action Letters are based upon and limited to representations made by the developer. Therefore, if a favorable No-Action Letter is issued based upon incomplete, improper or incorrect representations, the Letter has no binding effect.

In no event will a No-Action Letter be issued if the sale or lease has already occurred.

There is no prescribed format for requesting a No-Action Letter. Therefore, describe the circumstances as fully as possible following a general rule that too much information is better than too little. Upon review of the information submitted, additional clarification may be required to permit a final determination.

[Docket No. FR–3988–F–01]

RIN 2501–AC12

Consolidation and Streamlining of the Restrictions on Assistance to Noncitizens

AGENCY: Office of the Secretary, HUD.

ACTION: Final rule.

SUMMARY: On March 20, 1995, HUD issued its final rule implementing Section 214 of the Housing and Community Development Act of 1980, as amended. Section 214 prohibits HUD from making financial assistance available to persons other than United States citizens, nationals, or certain categories of eligible noncitizens in HUD's Public Housing and Indian Housing programs (including homeownership); the Section 8 housing assistance payments programs; the Housing Development Grants program; the Section 236 interest reduction and rental assistance programs; the Rent Supplement program; and the Section 235 homeownership program. HUD's March 20, 1995 final rule, which became effective on June 19, 1995, promulgated virtually identical "noncitizen" regulations for the HUD programs covered by Section 214. This final rule eliminates the redundancy of these duplicative regulations by consolidating noncitizens requirements and relocating them to a single location in 24 CFR part 5. This rule does not consolidate or revise the noncitizens requirements for HUD's Indian Housing programs.

EFFECTIVE DATE: April 26, 1996.

FOR FURTHER INFORMATION CONTACT: For the covered programs, the following persons should be contacted:

(1) For Public Housing, Section 8 Rental Certificate, Rental Voucher, and Moderate Rehabilitation (except Single Room Occupancy—"SRO") programs—Linda Campbell, Office of Public Housing, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410–5000, telephone (202) 708–0744;

(2) For Indian Housing programs—Deborah Lalancette, Office of Native American Programs, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410–5000, telephone (202) 755–0088;

(3) For the Section 8 Moderate Rehabilitation SRO program—Dave Pollack, Office of Special Needs Assistance Programs, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410–7000, telephone (202) 708–4300;

(4) For the other Section 8 programs, the Section 236 programs, Housing Development Grants and Rent Supplement—Barbara Hunter, Office of Multifamily Management, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410–8000, telephone (202) 708–3944; and

(5) For the Section 235 homeownership program—William Heyman, Office of Lender Activities and Land Sales Registration, Office of Single Family Housing, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410–8000, telephone (202) 708–1824.

For persons with hearing or speech impairment, the TTY number is 1–800–877–8339 (Federal Information Relay Service TTY). With the exception of the "800" number, none of the foregoing telephone numbers are toll-free.

SUPPLEMENTARY INFORMATION:

I. Background

A. The March 20, 1995 Final Rule

On March 20, 1995 (60 FR 14816), HUD issued its final rule implementing Section 214 of the Housing and Community Development Act of 1980, as amended (42 U.S.C. 1436a). Section 214 prohibits HUD from making financial assistance available to persons other than United States citizens, nationals, or certain categories of eligible noncitizens in HUD's: (1) Public Housing and Indian Housing programs (including homeownership); (2) the Section 8 housing assistance payments programs; (3) the Housing Development Grants program; (4) the Section 236 interest reduction and rental assistance programs; (5) the Rent Supplement program; and (6) the Section 235 homeownership program.

B. Regulatory Reform

President Clinton's Regulatory Reform Initiative calls for immediate, comprehensive regulatory reform. The President has directed all Federal departments and agencies to undertake an exhaustive review of their regulations. This initiative, which is part of the National Performance Review, calls for the elimination of redundant, unnecessary, or obsolete regulatory requirements, and the modification of others to increase flexibility and reduce burden.

On February 9, 1996 (61 FR 5198), HUD, as part of its continuing regulatory reform efforts, published a final rule creating a new 24 CFR part 5. HUD established part 5 to set forth those requirements which are applicable to one or more program regulations. Consolidation in part 5 of requirements applicable to one or more programs will eliminate redundancy in title 24 and assist in HUD's overall efforts to streamline the content of its regulations.

HUD's March 20, 1995 final rule implementing Section 214, which became effective on June 19, 1995, promulgated virtually identical noncitizen regulations for the HUD programs covered by Section 214. Subpart G of part 200, subpart B of part 812, and subpart B of part 912, contain, with minor exceptions, the same noncitizen requirements. This final rule eliminates the repetitiveness of these duplicative regulations by consolidating the noncitizens requirements and relocating them to a single location in 24 CFR part 5. This rule does not consolidate the noncitizens requirements for HUD's Indian Housing programs. These provisions will continue to be located in 24 CFR part 950, which sets forth the consolidated regulatory requirements for the Indian Housing programs.

Although HUD is consolidating its noncitizen requirements, it is not revising the requirements nor is it modifying any differences in the requirements among the program regulations. This final rule eliminates redundancy in the existing noncitizen requirements wherever possible, but it retains those provisions which are specific to certain of the Section 214 covered programs.

C. Technical Corrections/Clarifying Changes

Additionally, although HUD is not making substantive changes, it is making certain clarifying changes. These changes are as follows. First, this streamlining rule clarifies that a noncitizen student alien's family may be eligible for assistance if the family meets the conditions for prorated assistance for mixed families. Second, this rule removes from the text of the regulation those INS documents that are required to show proof of immigration status. Because INS may change these documents from time to time, notification of the documents that are required to show proof of immigration status is best accomplished through notice in the **Federal Register**. The INS uses the **Federal Register** frequently to list appropriate documents for various immigration categories. Third, the rule also provides increased flexibility on when verification of immigration status is to occur for public housing projects. Fourth, the rule clarifies that for tenants receiving assistance under the Section 8 Moderate Rehabilitation assistance, Section 8 tenant-based assistance, and the Section 8 project-based certificate assistance programs, that the applicable hearing procedures are found in parts 882, 982, and 983, respectively. Section 812.9(f)(3) of the March 20, 1995 rule incorrectly referred to the procedures in part 966, which are the public housing hearing procedures. This rule does not revise the noncitizens requirements for HUD's Indian Housing programs in 24 CFR part 950.

Additionally, this rule makes one technical change unrelated to the noncitizens requirements. On February 13, 1996, HUD published a final rule which consolidated HUD's general requirements for assistance under the United States Housing Act of 1937 in a new subpart D of part 5. This final rule amends paragraph (c)(2) of § 5.405 to add the phrase "as determined by the HA subsidy standard." The addition of this phrase will clarify how the limitations on housing assistance for single persons is applied under the tenant-based assistance programs.

With regard to more substantive changes to HUD's noncitizens regulations, HUD is aware that some housing providers desire certain changes be made to the noncitizen requirements set forth in the March 20, 1995 rule. In some cases, the types of changes requested cannot be made because the changes would affect statutory requirements not regulatory ones. Other changes which could possibly be made are not those that can be addressed by this streamlining final rule, but rather, would need to be addressed through rulemaking that provides for advance notice and public comment. Because the March 20, 1995 final rule became effective June 19, 1995, implementation of Section 214 remains fairly recent. HUD is monitoring implementation of Section 214 and will consider making changes to the regulations (to the extent that HUD can give the statutory requirements) after opportunity to review the results of the procedures provided in the March 20, 1995 rule.

D. New Immigration Legislation and Changes to Noncitizen Requirements

HUD is also aware of several immigration bills that have been proposed by House and Senate committees that would possibly amend Section 214. As of the date of publication of this rule, no changes have been made to Section 214. If and when changes are made to Section 214 that may require changes to the regulations issued on March 20, 1995, HUD will undertake whatever regulatory action may be required in accordance with any new immigration legislation or by the Administrative Procedures Act.

E. Nondiscrimination in the Implementation of Section 214

HUD reiterates the statement made in the March 20, 1995 final rule that all regulatory procedures involved in implementation of Section 214 must be administered in the uniform manner prescribed without regard to race, national origin, or personal characteristics (e.g., accent, language spoken, or familial association with a noncitizen).

II. Justification for Final Rulemaking

It is HUD's policy to publish rules for public comment before their issuance for effect in accordance with its own regulations on rulemaking found at 24 CFR part 10. However, part 10 provides that prior public procedure will be omitted if HUD determines that it is "impracticable, unnecessary, or contrary to the public interest." (24 CFR 10.1). HUD finds that in this case prior comment is unnecessary since this final rule does not affect or establish policy. This rule merely consolidates HUD's noncitizen requirements in 24 CFR part 5. Where consolidation is not possible, this rule retains those provisions which are applicable to several, but not all, Section 214 covered programs. This final rule does not add or remove program requirements, but merely relocates them to a single part of HUD's regulations.

III. Other Matters

Environmental Review. This rulemaking does not have an environmental impact. This rulemaking simply amends existing regulations by consolidating and streamlining provisions and does not alter the environmental effect of the regulations being amended. A Finding of No Significant Impact with respect to the environment was made in accordance with HUD regulations in 24 CFR part 50 that implement section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332) at the time of development of regulations implementing Section 214 of the Housing and Community Development Act of 1980. That Finding remains applicable to this rule, and is available for public inspection between 7:30 a.m. and 5:30 p.m. weekdays in the Office of the Rules Docket Clerk, Room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410.

Regulatory Flexibility Act. The Secretary, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this final rule before publication, and by approving it, certifies that this rule does not have a significant economic impact on a substantial number of small entities. This rule is limited to consolidating and streamlining existing regulations.

Executive Order on Federalism. The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, *Federalism*, has determined that the policies contained in this final rule will not have substantial direct effects on States or their political subdivisions, or the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of government. Specifically, this final rule merely consolidates HUD's noncitizen requirements which are currently repeated throughout title 24 of the Code of Federal Regulations.

Executive Order on The Family. The General Counsel, as the Designated Official under Executive Order 12606, *The Family*, has determined that this rule does not have potential significant impact on family formation, maintenance, and general well-being. This final rule merely consolidates HUD's noncitizen requirements which are currently repeated throughout title 24 of the Code of Federal Regulations.

List of Subjects

24 CFR Part 5

Administrative practice and procedure, Aged, Grant programs—housing and community development, Individuals with disabilities, Loan programs—housing and community development, Low and moderate income housing, Mortgage insurance, Pets, Public housing, Rent subsidies, Reporting and recordkeeping requirements.

24 CFR Part 200

Administrative practice and procedure, Claims, Equal employment opportunity, Fair housing, Home improvement, Housing standards, Incorporation by reference, Lead poisoning, Loan programs—housing and community development, Minimum property standards, Mortgage insurance, Organization and functions (Government agencies), Penalties, Reporting and recordkeeping requirements, Social security, Unemployment compensation, Wages.

24 CFR Part 236

Grant programs—housing and community development, Low and moderate income housing, Mortgage insurance, Rent subsidies, Reporting and recordkeeping requirements.

24 CFR Part 247

Grant programs—housing and community development, Loan programs— housing and community development, Low and moderate income housing, Rent subsidies.

24 CFR Part 812

Low and moderate income housing, Reporting and recordkeeping requirements.

24 CFR Part 882

Grant programs—housing and community development, Homeless, Lead poisoning, Manufactured homes, Rent subsidies, Reporting and recordkeeping requirements.

24 CFR Part 887

Grant programs—housing and community development, Rent subsidies, Reporting and recordkeeping requirements.

24 CFR Part 904

Grant programs—housing and community development, Loan programs—housing and community development, Public housing.

24 CFR Part 912

Grant programs—housing and community development, Public housing, Reporting and recordkeeping requirements.

24 CFR Part 960

Aged, Grant programs—housing and community development, Individuals with disabilities, Public housing.

24 CFR Part 982

Grant programs—housing and community development, Housing, Rent subsidies, Reporting and recordkeeping requirements.

Accordingly, under the authority of 42 U.S.C. 3535(d), parts 5, 200, 236, 247, 812, 882, 887, 904, 912, 960, and 982 of title 24 of the Code of Federal Regulations, are amended as follows:

PART 5—GENERAL HUD PROGRAM REQUIREMENTS; WAIVERS

1. The authority citation for part 5 is revised to read as follows:

Authority: 12 U.S.C. 101r-1; 42 U.S.C. 1436a, 3535(d), 3543, and 3544.

2. Section 5.405 is amended by revising paragraph (c)(2) to read as follows:

§ 5.405 Basic eligibility; preference over single persons; and housing assistance limitation for single persons.

* * * * *

(c) * * *

(2) For tenant-based assistance, housing assistance for which the family unit size as determined by the HA subsidy standard exceeds the one bedroom level.

* * * * *

3. A new subpart E is added to read as follows:

Subpart E—Restrictions on Assistance to Noncitizens

Sec.
5.500 Applicability.
5.502 Requirements concerning documents.
5.504 Definitions.
5.506 General provisions.
5.508 Submission of evidence of citizenship or eligible immigration status.
5.510 Documents of eligible immigration status.
5.512 Verification of eligible immigration status.
5.514 Delay, denial, reduction or termination of assistance.
5.516 Availability of preservation assistance to mixed families and other families.
5.518 Types of preservation assistance to mixed families and other families.
5.520 Proration of assistance.
5.522 Prohibition of assistance to noncitizen students.
5.524 Compliance with nondiscrimination requirements.
5.526 Protection from liability for responsible entities and State, and local government agencies and officials.
5.528 Liability of ineligible tenants for reimbursement of benefits.

Subpart E—Restrictions on Assistance to Noncitizens

§ 5.500 Applicability.

(a) *Covered programs/assistance.* This subpart E implements Section 214 of the Housing and Community Development Act of 1980, as amended (42 U.S.C. 1436a). Section 214 prohibits HUD from making financial assistance available to persons who are not in eligible status with respect to citizenship or noncitizen immigration status. This subpart E is applicable to financial assistance provided under:

(1) Section 235 of the National Housing Act (12 U.S.C. 1715z) (the Section 235 Program);

(2) Section 236 of the National Housing Act (12 U.S.C. 1715z–1) (tenants paying below market rent only) (the Section 236 Program);

(3) Section 101 of the Housing and Urban Development Act of 1965 (12 U.S.C. 1701s) (the Rent Supplement Program); and

(4) The United States Housing Act of 1937 (42 U.S. C. 1437 *et seq.*) which covers:

(i) HUD's Public Housing Programs;

(ii) The Section 8 Housing Assistance Programs; and
